TEXT-BOOKS FOR

LONDON MATRICULATION.

- MATRICULATION ENGLISH COURSE. Containing Grammar, Analysis, Composition, Paraphrasing, and Préciswriting, By W. H. Low, M. A. Lond., and John Briogs, M.A. Camb., F.Z.S. 3s. 6d.
- THE NEW MATRICULATION ALGEBRA. By RUPERT DEARIN, M.A. Lond. and Oxon. With a Section on Graphs. 3s. 6d.
- TUTORIAL ARITHMETIC. By W. P. WORKMAN, M.A., B.Sc. 4s. 6d.
- EUCLID.—BOOKS I.—IV. By RUPERT DEAKIN, M.A. With Problems in Practical Geometry and an Introductory Chapter on Drawing and Measurement. 2s. 66
- TUTORIAL LATIN GRAMMAR. By B. J. HAYES, M.A. Lond. and Camb., and W. F. MASOM, M.A. Lond. and Camb. 3s. 6d.
- LATIN COMPOSITION. By A. H. ALLEROFT, M.A. Oxon., and J. H. HAYDON, M.A. Lond. and Camb. 2s. 6d.
- MATRICULATION LATIN CONSTRUING BOOK. By A. F. WATT. M.A. Oxon. B.A. Lond., and B. J. HAYES, M.A. Lond. and Camb. 2s
- MATRICULATION SELECTIONS FROM LATIN AUTHORS. By A. F. Watt, M.A., and B. J. Haves, M.A. 25. 6d.
- MATRICULATION FRENCH COURSE. By Prof. E. Weekley, M.A. Lond. and Camb. 3s. 6d.
- THE MATRICULATION FRENCH READER. With Notes and Vocabulary. By J. A. Perret. 2s. 6d.
- MATRICULATION MODERN HISTORY. 1485-1901. By C. S. Fearenside, M.A. Oxon. 39.6d.
- MATRICULATION MECHANICS. An Elementary Text-Book of Mechanics. By Wm. Briggs, LL.D., M.A., B.Sc., F.R.A.S., and G. H. Bryan, Sc.D., F.R.S. 3s. 6d.
- MATRICULATION HYDROSTATICS. An Elementary Text-Book of Hydrostatics. By Wm. Briggs, LL.D., M.A., B.Sc., F.R.A.S., and G.H. Bryan, Sc. D., F.R.S. 2s.
- THE NEW MATRICULATION CHEMISTRY. By G. H. BAILEY, DSc. Lond., Ph.D. Heidelberg. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.C.S. New Edition (Rewritten and Enlarged). 5s. 6d.
- MATRICULATION PHYSICS: HEAT, LIGHT, AND SOUND. By R. W. STEWART, D.Sc. Lond., and JOHN DON, M.A., B.Sc. Lond. 4s. 6d.

PREFACE TO THE FOURTH EDITION.

The object kept in view throughout in writing this book was to produce a grammar, clearly and simply arranged, which should impart a sound general knowledge of Latin of the classical period, without encumbering the reader with a number of isolated forms and usuages. The steady and increasing sale of the work since its first publication in 1892 would seem to indicate that a grammar so designed is found useful both in schools and by private students.

In order to distinguish points of fundamental importance from those which may be passed over at first, use has been made of a considerable variety of types. This principle has been extended to the classified lists of verbs with irregular perfects and supines—the commoner verbs being printed in heavy type—and also to the alphabetical lists of verbs; the latter is intended for the purposes of revision and reference.

In the syntax the constructions found in simple sentences are treated first, and are followed by an account of the various kinds of dependent clauses used in complex sentences. Rules relating to individual words are collected in a chapter by themselves (ch. xlvii.). The examples in the syntax are drawn, to a great extent, from the classics most usually read, so that even the beginner may recognise some familiar sentences among them.

The point of view throughout the book is that of translation from Latin, though a few cautions are given here and there with regard to usages that should not be imitated; translation into Latin has already been dealt with in this series in a volume entitled Latin Composition.

The chief change introduced in the fourth edition is to be found in the tables of the regular conjugations: the commonest meanings of the subjunctives in principal sentences have been inserted in the paradigms, and the more important usages in dependent clauses have also been indicated by means of English conjunctions added in brackets.

The chief authorities on which this book is based are Neue, Dräger, Roby, and Lewis & Short; but various other writers have been consulted occasionally. I have pleasure in repeating here the acknowledgment made in the Preface to the First Edition with regard to my indebtedness to my colleague, Mr. W. F. Masom; his constant assistance and painstaking revision amply justify the appearance of his name on the title-page. I received also, when engaged on this book, many valuable suggestions from two other members of the staff of University Correspondence College, Mr. A. H. Allcroft (Oxon.) and Mr. F. G. Plaistowe, Fellow of Queens' College, Cambridge.

PART I.: ACCIDENCE.

CHAPTER I.—INTRODUCTION.

§ 1. Classical Latin, i.e. Latin of the best period, is the language of Roman literature during the century preceding the death of the Emperor Augustus (A.D. 14).

ALPHABET.

§ 2. The Latin alphabet is the same as that now in use

for writing English, except that it has no W.

In the classical period one form (I) served for the vowel I and the consonant J, and accordingly the form J is not used in current editions of the ancient authors or in Latin words in this book.

U and V were also denoted by the same form (V), but the modern distinction has, in deference to custom and for convenience' sake, been retained in this book, U (u) being used as a vowel and also after Q.

Note.—In some texts of Latin writers u is not admitted after u or v. Either it is replaced by o, e.g. volgus (= vulgus), common people, ĕquos (=ĕquus), horse; or c is substituted for qu, e.g. ĕcus (=ĕquus). Some editors prefer u to i before m in superlatives and some other words; e.g. maxumus (= maximus), greatest.

MARKS OF QUANTITY.

§ 3. Vowels are said to be of long or short quantity, according to the time occupied by their pronunciation. Thus in the English word funigated u and α are of long quantity, i and e of short quantity.

The sign (-) denotes that the quantity of the vowel over which it is placed is long, the sign () denotes that the quantity of the vowel is short, and the sign (2) is placed

over vowels that may be either long or short.

§ 4. Our knowledge of the quantities of Latin vowels is mainly derived from the poets, Latin metre depending on quantity, not, as English metre, on accent. The quantity, however, of which metre takes account is, strictly speaking, not that of vowels, but that of syllables; and although a syllable containing a long vowel is always long, a syllable containing a short vowel is short only if its vowel is not followed by two consonants or by x, z, or consonantal i (= j). Hence it is impossible to ascertain from the poets the natural length

of vowels followed by two consonants, x, z, or consonantal i; but philological research has now settled the quantity of most of such vowels. The subject, however, is not one that need trouble a beginner.

A syllable with a short vowel may be either long or short if its vowel be followed by two consonants of which the first is a mute (b, p; g, c; d, t) or f, and the second l or r. The mark (\simeq) is often placed over such vowels; e.g. patres, plural of pater, father.

- The final syllable of a word ending in m was either made long in poetry, owing to the following word beginning with a consonant, or, if the following word began with a vowel, the final m and the vowel preceding it were, as far as the metre was concerned, treated as non-existent. For instance the words monstrum horrendum ingens, huge dreadful monster, make only five syllables in verse: monstr' horrend' ingens. Hence the quantity of the vowel preceding a final m cannot be ascertained. It is customarily pronounced short.
- § 5. In this grammar the quantity of every vowel is marked, except in the case of—

(1) diphthongs (these are always long);

(2) vowels followed in the same word by two consonants or by x or z (but see § 4, second paragraph);

(3) vowels preceding m at the end of a word.

Observe also:—

(4) When the letter i occurs in this book without a mark of quantity in a position not included in the above three exceptions, it is consonantal; e.g. iaciō (=jaciō), I throw.

ACCENTUATION.

§ 6. Latin words of two syllables are accentuated on the first syllable (e.g. pater, father; mater, mother), i.e. the first syllable is pronounced with more stress than the second, though the stress is not so marked as in the English words father, mother.

Latin words of more than two syllables are accentuated on the penultimate (last syllable but one) if that syllable is long, e.g. sŏrōrēs, sisters; but on the ante-penultimate (last syllable but two) if the penultimate is short, e.g. dominus, lord; fămiliă, household. Accordingly těněbrae, darkness, is pronounced téněbrae or těnébrae.

- Obs. The mark of accentuation is not used in writing or printing Latin,

PRONUNCIATION.

§ 7. There are two ways of pronouncing Latin at present common in England: (1) as English, but with final e never mute (e.g. mare, sea, is a word of two syllables); (2) as the Romans are supposed to have pronounced it.

```
§ 8. The following are the rules of the latter method:—

CONSONANTS: C, always hard, as in can.

G, ,, ,, go.

I (in some books printed J), as y in ye.

B, always rolled, as rr in furrier.

S, always sharp, as in hiss (not as in his).

V, &s w in we.

X, always as cs, not gs.

Z, as dx in adze.
```

COMBINATIONS: BS, as ps; e.g. trabs, beam, is pronounced trraps.

CH, PH, TH, as c, p, t, followed by aspirate;

compare inhhorn, loophole, boathwise.

GU (before a vowel), as gu in language.

QU, as qu in queen.

SU (in suādēō, I recommend; suāvīs, sweet, suescō, I become accustomed; and words formed from these), as sw in sweet.

The other consonants have their normal English value; t is never to be pronounced sh as in diction.

```
VOWELS: ā, as second a in papa. ă, as first a in papa. ē, "ê in fête. ě, "e in set.

ī, " second i in quinine. ĭ, " first i in quinine.

ō, ", o in follow. ŏ, ", o in follow.

ŭ, " oo in boot. ŭ, " oo in foot.

ÿ, like Latin ī uttered with rounded lips.

ÿ, " i "

DIPHTHONGS: ae, as ea in pear.*

au, " ou in house.

oe, " oi in boil.
ei, "ei in eight,
eu, " eu in feud,
ui, " we,
```

NOTE.—The true pronunciation of the diphthongs is best ascertained by pronouncing the vowels of which they are composed quickly one after the other; the sounds indicated above are only approximations.

Obs. The learner should as occasion requires refer to the above rules for pronunciation until he is thoroughly familiar with them.

^{*}This is the usual pronunciation in England; according to recent authorities it should be approximately as i in side.

CHAPTER II.—PARTS OF SPEECH.

§ 9. There are eight parts of speech in Latin:—

- 1. Substantive
 2. Adjective
 3. Pronoun
 4. Verb conjugated
 5. Adverb
 6. Preposition
 7. Conjunction
 7. Conjunction
 8. Left in the conjugated conjugated
 9. Left in the conjugated conjugated

8. Interjection

Note,-Adverbs, though not subject to any other change, have Degrees of Comparison (§ 250).

When we say that a word is "inflected," we mean that to a certain unchangeable portion of the word, called the "base," suffixes are added. This system of inflexion is in substantives, adjectives, and pronouns called "declension"; in verbs it is called "conjugation."

As an example of declension in English the word child may be taken: from it are formed by suffixes child's, children, children's. Similarly in the conjugation of the verb to love

there occur the forms lovest, loves, loved, lovedst.

In Latin inflexion plays a much more important part than it does in English, and it is absolutely impossible to ascertain the meaning of a Latin sentence without paying attention to the suffix of every inflected word.

Obs. The department of grammar that deals with inflexion is termed "accidence."

CHAPTER III.—SUBSTANTIVES.

§ 10. Latin substantives are of three genders—masculine. feminine, and neuter. As in English, substantives denoting persons of the male sex are masculine, and those denoting persons of the female sex are feminine; but other substantives, instead of being all neuter, are in Latin some masculine, some feminine, some neuter.

(In this book, m. = masculine, f. = feminine, c. = common, i.e. either masculine or feminine, n. = neuter.)

Substantives have inflexions that indicate (a) number and (b) case.

- § 11. There are in Latin, as in English, two numbers singular and plural.
 - § 12. Latin substantives have six cases.

[To illustrate the use of the cases here and in § 18, the following words have been employed :-

Substantives (all of the First Declension, § 16). copia, plenty. corona, wreath. cură, care. • ĕpistŏlă, letter. filia, daughter. gloriă, glory. insŭlă, island. Kălendae (pl.), Calends (the Roman name for the first day of each month). neglegentia, heedlessness. portă, gate. pŭellă, girl. rēgīnā, queen. Roma, Rome. rosa, rose. superbia, pride.

Verbs.

ămăt, (he, she) loves; ămātur, (he, she) is loved. cănit, (he, she) sings; cănunt, (they) sing. dăt, (he, she) gives. erit, (he, she) will be. est, (he, she) is; sunt, (they) are. munit, (he, she) fortifies; munitur, (it) is being fortified. pāret, (he, she) is obedient. věnī, come (thou); věnītě, come (ye). venit, (he, she) comes.

Prepositions.

ā (before a vowel or h, ab), from. by (with ablative). ad, to (with accusative). cum, with (with ablative). in, in (with ablative).]

(1) The nominative, as in English, denotes the subject of the sentence, and also (with the verb to be) the predicate.

E.g., puellă cărit. the qirl sings. pŭellă rēgīnă ĕrĭt. the girl will be queen.

English Example: "I am he."

Note.—A and the are not, as a rule, expressed in Latin. Thus puellă means girl, a girl, or the girl.

(2) The vocative denotes the person addressed.

E.g., věnī, pŭellă!
come, girl!

- (3) The accusative, like the objective case in English,
- (a) denotes the direct object of a transitive verb, and (b) follows many prepositions.

E.g., rēgīnă pŭellam ămăt.

the queen loves the girl.

rēgīnă ăd pŭellam vĕnĭt.

the queen comes to the girl.

English Example: "He calls me to him."

(4) The genitive answers to the English possessive case, and also expresses nearly all the other relations indicated by the preposition of.

E.g., rēgīnae fīliă.

copia rosarum. plenty of roses.

the queen's daughter (or the daughter of the queen).

cŏrōnă rŏsārum.

neglěgentiă glōriae.

a wreath of roses.

heedlessness of glory.

(5) The dative expresses the indirect object of a transitive or intransitive verb.

(A) (C) (B) E.g., puellă rēginae rosam dăt.

the girl gives a rose to the queen.

(A) (C)

pŭellă rēgīnae pārět.

the girl is obedient to the queen.

Note.—Where A (the subject) performs an action on B (direct object) whereby C (indirect object) is affected, \mathcal{A} is nominative, B accusative, C dative; this is illustrated by the first of the above two examples. In the second example, the verb being intransitive, there is no direct object (B), but the indirect object (C) is, as before, in the dative.

- (6) The ablative has three chief significations, in each of which it is used sometimes with and sometimes without a preposition:—
 - •(a) local and temporal, denoting place where or time when, and usually rendered by the English preposition in;
 - (b) instrumental, denoting that with which (instrument) a thing is done, or the manner in which it is done, and usually rendered by the English preposition with;
 - (c) ablative proper (ablation = taking away), denoting place whence, and usually rendered by the English preposition from;
 - E.g., (a) Place where (with preposition):

in cŏrōnā sunt rŏsae. in the wreath are roses.

Time when (without preposition):

Kălendīs věnī.

come on the Calends.

(b) Instrument (without preposition):
rēgīnă insŭlam portīs mūnĭt,
the queen fortifies the island with gates.

Manner (with preposition):
insŭlă cum cūrā mūnītŭr.
the island is being fortified with care.

(c) Place whence (generally with preposition):

puellă ā portā věnit.

the girl comes from the gate.

• (7) A seventh case, the locative, is found in the declension of some names of towns and a few other words. It has the same signification as the local use of the ablative, viz. place where.

E.g., rēgīnă Rōmae est. the queen is at Rome.

Note 1.—It will be observed that, of the above examples of case-usage, the examples of the genitive alone contain no verb. The reason is that the genitive shows the relation of the substantive to another substantive in the same sentefice; whereas the nominative, accusative, dative, ablative, and locative show the relation of the substantive to the verb. The vocative stands out of the sentence altogether.

Note 2.—It will also be observed that the order of words in the above Latin sentences differs from the order of the English. In Latin the extensive use of inflexions makes the order of words less essential to the meaning of the sentence than it is in English; but there is a normal order in sentences such as the above, viz.: (1) subject, (2) indirect object, (3) direct object, (4) ablative, (5) verb.

THE FIVE DECLENSIONS OF SUBSTANTIVES.

§ 13. There are five declensions of substantives, i.e. Latin substantives are severally declined in five different ways.

Dictionaries indicate to which declension a substantive belongs by giving after the nominative singular the suffix of the genitive singular.

The declensions are also known according to the characteristic vowel of the genitive plural, as follows:—

****		Sing. Suffix.	Gen. Pl. Suffix.	Characteristic.
First De		ae	$ar{ extbf{A}} ext{rum}$	A
Second	* **	ī	Órum	0
\mathbf{Third}	22	ĭs	um or Ĭum	Consonant or I
Fourth	"	ūs	$\ddot{\mathbf{U}}\mathbf{um}$	II
Fifth	27	ěī	Ērum	E

§ 14. The base of a substantive, i.e. the invariable part to which the case-suffixes are added, can always be ascertained by cutting off the suffix from the genitive singular; but, except with substantives of the third declension, and those of the second declension which end in r, the base is more readily ascertained from the nominative singular by cutting off—

in the first declension ă,

- " second " us or um,
- " fourth " ŭs or ū, " fifth " ēs.

as is indicated by the hyphen in the examples given in the following pages.

The learner must bear in mind that it is impossible for him to "decline" a substantive, i.e. to enumerate the forms proper to the several cases, until he has ascertained the base to which the suffixes are to be added.

- § 15. The following remarks apply to all the declensions:—
 - (1) The vocative in Latin substantives is always the same as the nominative, except in the singular of substantives of the second declension with nominative singular in ŭs.
 - (2) The accusative of all neuter substantives is the same as the nominative and vocative, both in the singular and in the plural. In the plural of Latin neuter substantives these three cases always end in ă.
 - (3) The ablative plural is always the same in form as the dative plural.

CHAPTER IV.—FIRST (OR A) DECLENSION.

§ 16. Example: mensă (f.*), table. Base, mens-.

Singular		Plural.
Nominative.	mens-ă	mens-ae
Vocative.	mens-ă	•mens-ae
Accusative.	mens-am	$mens-\bar{a}s$
Genitive.	mens-ae	\mathbf{mens} - $\mathbf{ ilde{A}}$ \mathbf{rum}
Dative.	mens-ae	mens-īs
Ablative.	mens-ā	mens-īs

For the signification of the several cases, see the table on the next page.

Obs. The difference in the quantity (see § 3) of the suffix in the nominative and ablative singular must be carefully marked in pronunciation, $\check{\mathbf{a}}$ being sounded as the first a in papa, and $\bar{\mathbf{a}}$ as the second (or, if the "English" pronunciation is adopted, as a in baker).

§ 17. In the first declension the locative has been displaced by the local ablative, except in the names of towns (singular number); in these words it has the same form as the genitive singular. Thus Rōmā, Rome, has locative Rōmae (§ 12, 7).

Note.—Militia, warfare, also has locative militiae, at the wars.

For irregularities in the first declension, see § 41-43. For Greek substantives of the first declension, see § 62. For the gender of substantives of this declension, see § 71.

*Inanimate objects, though almost always neuter in English, are in Latin some masculine, some feminine, some neuter.

röginä a püellis ämätür the queen is loved by the girk

2

(by) girls

röginä a püellä ämätür thequeen is loved by thegirl

(by) a girl(§375) "

	§ 18. T.	TABLE OF CASE-MEANINGS (SINGULAR AND PLURAL).	(SINGULAR AND PLU	JRAL).
		EXAMPLE: puellă, girl.	pŭellă, <i>girl.</i>	
	Sing	Singular.		Plural.

	(12) Later 1 (12)	XTENTA BILL N. B. X. C. C.	A	

CHAPTER V.—SECOND (OR 0) DECLENSION.

- § 19. Substantives of this declension may be arranged as follows:—
 - (1) Masculines (and a few feminines) with nom. sing. suffix -ŭs;
 - (2) Masculines with nom. sing. suffix -er;
 - (3) Neuters with nom, sing. suffix -um.
 - (1) Example: dŏmĭnŭs (m.), lord. Base, dŏmĭn-

Singular.	Plural.
Nom. dŏmĭn-ŭs	dŏmĭn-ī
Voc. dŏmĭn-ĕ	dŏmĭn-ī
Acc. dŏmĭn-um	dŏmĭn-ōs
Gen. dŏmĭn-ī	dŏmĭn-Orum
Dat. dŏmĭn-ō	dŏmĭn-īs
Abl. dŏmĭn-ō	dŏmĭn-īs

(2) Example: măgister (m.), master. Base, măgistr-.

Singular.	Plural.
Nom. mägistër	măgistr-ī
Voc. măgistĕr	măgistr-î
Acc. mägistr-um	măgistr-ōs
Gen. măgistr-ī	mägistr-Örum
Dat. mägistr-ö	măgistr-īs
Abl. mägistr-õ	măgistr-îs

Obs. The vocative singular has the same form as the nominative. In the other cases $\check{\mathbf{e}}$ is dropped before \mathbf{r} .

A few substantives, however, retain e before r throughout.

Example: puer (m.), boy Base, puer-.

Singular.	Plural.
Nom. pŭěr	pŭĕr-ī
Voc. puer	pŭĕr-ī
Acc. puer-um	pŭĕr-ōs
Gen. pŭer-ī	pŭĕr-Örum
Dat. pŭěr-ō	pŭĕr-īs
Abl. puer-o	pŭĕr-īs

Like puer are declined socer, father-in-law; gener, son-in-law; Liber, a name of Bacchus, god of wine; and liberi (pl. only), children

Note sŏeĕr, gĕnĕr, lībĕrī, And Lībĕr, god of revelry: Like puĕr, these retain the e.

With these may be classed vir (m.), man. Base, vir-.

Singular.	Plural.
Nom. vir	vĭr-ī
Voc. vir	vĭr-ī
Acc. vĭr-um	vĭr-ōs
Gen. vĭr-ī	v ĭr-Ōrum
Dat. vĭr-ō	vĭr-īs
Abl. vĭr-ō	vĭr-īs

Words declined like vir are its compounds triumvir, member of a commission of three; decemvir, member of a commission of ten, etc.

(3) Example: regnum (n.), kingdom. Base, regn.

Singular.	Plural.
N.V.A. regn-um	regn-ă
Gen. regn-ī	regn-Örum
Dat. regn-ō	regn-īs
Abl. regn-ō	regn-īs

§ 20. In the second declension, as in the first, the locative has been displaced by the local ablative, except in the names of towns (singular number); in these words it has the same form as the genitive singular. Thus Corinthus, Corinth, has locative Corinthi.

Note.—Humus, ground, also has locative humi.

For irregularities in the second declension, see §§ 44-47. For Greek substantives of the second declension, see § 63.

For the gender of substantives of this declension with nom. sing. in -us. see § 72.

CHAPTER VI.—THIRD (OR CONSONANT AND I) DECLENSION.

[In this declension the base (i.e. the invariable part of the word, to which the suffixes are added) is seldom ascertainable from the form of the nom. sing., and nothing but practice will surmount the difficulty. It is therefore necessary always to learn the gen. sing. as well as the nom. sing. of substantives of the third declension.

Many of the words here given are declined alike, and are inserted as illustrations of the changes which the base

undergoes in the nom. sing.]

- § 21. Substantives of this declension fall into two main classes:—
 - (I.) Those which have genitive plural ending in -um preceded by a consonant (consonant-nouns).
 - (II.) Those which have genitive plural ending in -ĭum (I-nouns).

The suffixes in this declension also vary according as the substantive is (a) masculine or feminine, or (b) neuter.

The examples are arranged as follows:—

- I. (a) Masculine and feminine consonant-substantives.
 - (b) Neuter ,,
- II. (a) Masculine and feminine I-substantives.
 - (b) Neuter
- I. (a) MASCULINE AND FEMININE CONSONANT-SUBSTANTIVES.

These (with the exception of the words mentioned in § 36) are imparisyllabic, i.e. the number of syllables in the nom, sing, is less than the number of syllables in the gen. sing, (impar = unequal).

§ 22. The nom. sing. frequently ends in -s.

Example: hiems (f.), winter. Base, hiem-.

Singular. N.V. hĭĕm-s Acc. hĭĕm-em Gen. hĭĕm-ĭs	Plural. hlēm-ēs hlēm-ēs
Gen. hĭĕm-ĭs	hĭĕm-um
Dat. hĭĕm-ī	hĭĕm-ĭbŭs
Abl. hĭĕm-ĕ	hĭĕm-ĭbŭs

Often the increase in the number of syllables is accompanied by a change of vowel (ĕ to ĭ).

Example: princeps (c.), chief. Base, princip-.

Singular.	Plural.
N.V. princep-s	princĭp-ēs
Acc. princip-em	princĭp-ēs
Gen. princĭp-ĭs	princip-um
Dat. princip-i	princip-ibŭs
Abl. princĭp-ĕ	princip-ibus

§ 23. A dental (d or t) at the end of the base is dropped before the -s of the nom. sing.

First Example: lăpis (m.), stone. Base, lăpid-.

Singular.	Plural.
N.V. lăpĭ-s	lăpĭd-ēs
Acc. läpid-em	lăpĭd-ēs
Gen. lăpĭd-ĭs	lăpĭd-um
Dat. lăpĭd-ī	lăpĭd-ĭbŭs
Abl. lăpĭd-ĕ	lăpĭd-ĭbŭs

Second Example (\bar{a} long throughout): aetās (f.), age. Base, aetāt-.

Singular.	Plural.
N.V. aetā-s	aetāt-ēs
Acc. aetāt-em	aetāt-ēs
Gen. aetāt-ĭs	aetät-um
Dat. aetāt-ī	aetāt-ĭbŭs
Abl. aetāt-ĕ	aetāt-ĭbŭs

Note.—An irregular gen. pl. aetātīum is found occasionally. So cīvitās, citizenship, state, has gen. pl. cīvitātĭum, as also have some other similar substantives.

Third Example (ū long throughout): pălūs (f.), marsh. Base, pălūd-.

Singular.	Plural.
N.V. pălū-s	pălūd-ēs
Acc. pălūd-em	pălūd-ēs
Gen. pălūd-ĭs	pălūd-um
Dat. pălūd-ī	pălūd-ĭbŭs
Abl. pălūd-ĕ	pălūd-ĭbŭs

Fourth Example (with vowel change): mīlĕs (m.), soldier. Base, mīlĕt-.

Singular.	Plural.
N.V. mīlĕ-s	mīlĭt-ēs
Acc. mīlĭt-em	mīlĭt-ēs
Gen. mīlĭt-ĭs	mīlĭt-um
Dat. mīlĭt-ī	mīlĭt-ĭbŭs
Abl. mīlĭt-ĕ	mīlĭt-ĭbŭs

§ 24. A guttural (c or g) followed by the final -s of the nom. sing. becomes -x.

First Example: lex (f.), law. Base, leg-.

Singular.	Plural.
N.V. lex	lēg-ēs
Acc. lēg-em	lēg-ēs
Gen. lēg-ĭs	leg-um
Dat. lēg-ī	lēg-ĭbūs
Abl. lēg-ĕ	lēg-ībŭs

Second Example: dux (c.), leader. Base, duc-.

Singular.	Plural.
N.V. dux	dŭc-ēs
Acc. dŭe-em	dŭc-ēs
Gen. dŭc-ĭs	dŭc-um
Dat. dŭc-ī	dŭc-ĭbŭs
Abl. dŭc-ĕ	dŭc-ĭbŭs

Third Example (with vowel change): iūdex (c.), julge. Base, iūdic-.

Singular.	Plural.
N.V. iūdex	iūdīc-ēs
Acc. iūdĭc-em	iūdĭc-ēs
Gen. iūdĭc-ĭs	iūdĭc-um
Dat. iūdĭc-ī	iūdĭc-ĭbŭs
Abl. iūdĭc-ĕ	iūdĭc-ĭbŭs

§ 250 Here must be classed a few parisyllabic consonant-substantives (see § 36) with nom. sing. ending in -ēs or -ĭs (one in -x).

First Example: cănis (c.), dog. Base, căn-.

Singular.	Plural.
N. V. căn-ĭs	căn-ēs
Acc. căn-εm	căn-ēs
Gen. căn-ĭs	căn-um
Dat. căn-ī	căn-ĭbŭs
Abl. căn-š	căn-ĭbŭs

Second Example: senex (c.), old man. Bases, senec- and sen-.

Singular.	Plural.
N. V. sěnex	sĕn-ēs
Acc. sĕn-em	sĕn-ēs
Gen. sěn-ĭs	sĕn-um
Dat. sĕn-ī	sēn-ībŭs
Abl. sěn-ě	sĕn-ĭbŭs

§ 26. Often n at the end of the base is dropped in the nom. sing.

First Example: leo (m.), lion. Base, leon-.

Singular.	Plural.
N.V. lĕō	lĕōn-ēs
Acc. lĕōn-em	lĕōn-ēs
Gen. lĕōn-ĭs	lĕōn-um
Dat. lĕōn-ī	lĕön-ĭbŭs•
Abl. lĕōn-ĕ	lĕōn-ĭbŭs

2

Second Example (with $\bar{0}$ in nom. sing. and $\check{1}$ in base): $virg\bar{0}$ (f.), maiden. Base, $virg\check{1}$ n-.

Singular.	Plural.
N.V. virgō	virgĭn-ēs
Acc. virgin-em	virgĭn-ēs
Gen. virgin-is	virgĭn-um
Dat. virgĭn-ī	virgĭn-ĭbŭs
Abl. virgĭn-ĕ	virgĭn-ĭbŭs

§ 27. Substantives with base ending in a liquid (l, n, r) often have nom. sing. of the same form as the base.

First Example: consul (m.), consul (chief civil and military official at Rome). Base, consul-.

Singular.	Plural.
N. V. consŭl	consŭl-ēs
Acc. consul-em	consŭl-ēs
Gen. consŭl-ĭs	consŭl-um
Dat. consŭl-ī	consŭl-ĭbŭs
Abl. consŭl-ĕ	consŭl-ĭbŭs

Second Example: anser (m.), gander. Base, anser-.

Singular.	Plural.
N.V. ansĕr	ansĕr-ēs
Acc. ansĕr-em	ansĕr-ēs
Gen. ansĕr-ĭs	ansĕr-um
Dat. ansĕr-ī	ansĕr-ĭbŭs
Abl. ansĕr-ĕ	ansĕr-îbŭs

Păter, father; mater, mother; frater, brother; accipiter, hawk, have e before r in the nom. and voc. sing. only.

Example: păter (m.), father. Base, pătr-.

Singular.	Plural.
N.V. păter	pătr-ēs
Acc. patr-em	pătr-ēs
Gen. patr-ĭs	pătr-um
Dat. pătr-ī	pātr-ībŭs
Abl. patr-ĕ	nštr-ĭhŭs

§ 28. A final s (not a suffix, but an integral part of the word) changes to r in the base.

Example: flos (m.), flower. Base, flor-.

Singular.	Plural
N.V. flös	flōr-ēs
Acc. flör-em	flōr-ēs
Gen. flör-ĭs	flōr-um
Dat. flör-ī	flēr-ĭbŭs
Abl. flör-ĕ	flor-ĭbŭs

Many such substantives have two forms in the nom. sing., that ending in \mathbf{r} like the base being the commoner.

Example: arbor or arbos (f.), tree. Base, arbor-.

Singular.	Plural.
N.V. arbör or arbös	arbŏr-ēs
Acc. arbŏr-em	arbŏr-ēs
Gen. arbŏr-ĭs	arbŏr-um
Dat. arbŏr-ī	arbŏr-ĭbŭs
Abl. arbŏr-ĕ	arbŏr-ĭbŭs

I. (b) NEUTER CONSONANT-SUBSTANTIVES.

§ 29. If the nom. sing. ends in n or t, the increase in the number of syllables is accompanied by a vowel change in the base.

First Example: nōmĕn (n.), name.

| Singular. | Plural. | nōmĕn - ă nōmĭn-ă nōmĭn-is | nōmĭn-is nōmĭn-ibūs nōmĭn-ibūs nōmĭn-ibūs nōmĭn-ibūs nōmĭn-ibūs nōmĭn-ibūs nōmĭn-ibūs nōmin-ibūs nōmin-ibūs nōmin-ibūs nōmin-ibūs nōmin-ibūs nōmin-ibūs nōmin-ibūs Second Example: căpūt (n.), head.

Singular.	1	Plural.
N.V.A. căpăt		căpĭt-ă
Gen. căpit-is	}	căpit-um
Dat. căpit-ī		căpĭt-ĭbŭs
Abl. căpĭt-ĕ		căpĭt-ĭbŭs

§ 30. Final s in the nom. sing. changes to r in the base.

First Example: crus (n.), leg. Base, crur-.

S	ingular.	Plural.
N.V.	1. crūs	crūr-ă
Gen.	crūr-ĭs	crūr-um
Dat.	crūr-ī	crūr-ĭbŭs
Abl.	crūr-ĕ	crūr-ĭbŭs

Second Example (with vowel change): ŏpŭs (n.), $^{\bullet}$ work. Base, ŏpĕr-.

S	ingular.	Plural.
N.V.	1. ŏpŭs	ŏpĕr-ă
Gen.	ŏpĕr-ĭs	ŏpĕr-um
Dat.	ŏpĕr-ī	ŏper-ĭbŭs
Abl.	ŏpĕr-ĕ	ŏpĕr-ĭbŭs

Third Example (with vowel change): corpus (n.), body. Base, corpor-.

Singu	lar.	Plural.
N.V.A. co	orpŭs	corpŏr-ă
Gen. co	orpŏr-ĭs	corpŏr-um
	orpŏr-ī	corpŏr-ĭbŭs
Abl. co	orpŏr-ĕ	corpŏr-ĭbŭs

In a few substantives the nom. sing. ends in -ŭr, as does also the base.

Example: fulgur (n.), lightning. Base, fulgur-.

Singul	ar.	Plural.
N.V.A. fu	lgŭr	fulgŭr-ă
Gen. fu	lgŭr-ĭs	fulgur-um
	lgŭr-ī	fulgŭr-ĭbŭs
Abl. fu	lgŭr-ĕ	fulgŭr-ĭbŭs

II. (a) MASCULINE AND FEMININE I-SUBSTANTIVES.

To this class belong parisyllabic substantives (i.e. with an equal number of syllables in the nom. sing. and gen. sing. respectively), and substantives with base ending in two consonants, together with a few others mentioned in § 36.

§ 31: Parisyllabic I-substantives add -ēs or -ĭs to the base in the nom. sing.

First Example: nubes (f.), cloud. Base, nub-.

Singular.	Plural.
N.V. nūb-ēs •	nūb-ēs
Acc. nüb-em	nūb-ēs or -īs
Gen. nūb-ĭs	nūb-Ĭum
Dat. nūb-ī	nūb-ĭbŭs
Abl. nūb-ĕ	nūb-ĭbŭs

Second Example: hostis (c.), enemy. Base, host-.

Singular.	Plural.
N.V. host-ĭs	host-ēs
Acc. host-em	host-ës or -īs
Gen. host-ĭs	host-Ĭum
Dat. host-ī	host-ĭbŭs
Abl. host-ĕ	host-ĭbŭs

Abl. nav-ĕ or -ī

Obs. The accusative plural of masculine and feminine I-substantives is generally printed with the ending -es, but the older and more correct ending -is is sometimes used, especially in editions of the poets.

§ 32. A few of these I-substantives have an alternative abl. sing. ending in -i; some have also an alternative acc. sing. ending in -im.

Base, nāv-,

imbr-ĕ or -I

imbr-ĭbŭs

Examples: nāvīs (f.), ship. imber (m.), shower. Base, imbr-. Singular. Plural. Singular. Plural. N. V. nāv-ĭs nāv-ēs imber imbr-ēs Acc. nāv-emor-im nāv-ēs or-īs imbr-em imbr-ēs or -īs Gen. nav-is nāv-Īum imbr-īs imbr-Ium nāv-ĭbŭs Dat. nāv-ī imbr-ī imbr-ĭbüs

The more important substantives declined like navis are classis. fleet; puppis, stern; clavis, key; febris, fever; messis, harvest, turris, tower. Sitis, thirst, and tussis, cough, have only im and i in acc. and abl. sing. respectively.

nāv-ībŭs

Cănālis, channel; ignis, fire; securis, axe; and sodalis, boon companion, have abl. in -i.

Febris, messis, turris, clāvis, Classis, puppis, are (like nāvis) Wont from im and I to falter; Stis, tussis never alter. I for ignis and cānālis, With sēcūris and sŏdālis.

Linter, boat; ūter, leather bottle; and venter, stomach, are declined like imber.

Restis, rope, has acc. sing. restim or restem, abl. sing. reste.

§ 33. Substantives with base ending in two consonants have the suffix -s in the nom. sing.

First Example: urbs (f.), city. Base, urb-.

Singular.	Plural.
N.V. urb-s	urb-ēs
Acc. urb-em	urb-ēs or -īs
Gen. urb-ĭs	urb-Ĭum
Dat. urb-ī	urb-ĭbŭs
Abl. urb-ĕ	urb-ĭbŭs

Second Example (with dental dropped before -s in the nom. sing.): dens (m.), tooth. Base, dent-.

Singular.	Plural.
N.V. den-s	dent-ës
Acc. dent-em	dent-ës or īs
Gen. dent-is	dent-Ĭum
Dat. dent-ī	dent-ĭbŭs
Abl. dent-ĕ	dent-ĭbŭs

To these are to be added a few imparisyllabic substantives (see § 36) with base ending in one consonant. In some of these the final s of the nom. sing. is an integral part of the word, and changes to r in the base.

Example: mus (c.), mouse. Base, mur-.

Singular.	Plural.
N. V. mūs	mūr-ēs
Acc. mūr-em Gen, mūr-ĭs Dat. mūr-ī Abl. mūr-ĕ	mūr-ēs or -īs mūr-Ťum mūr-ĭbūs mūr-ĭb ūs

II. (b) NEUTER I-SUBSTANTIVES.

§ 34. Substantives with nom. sing. ending in -ĕ drop the -ĕ in the base.

Example: mărě (n.), sea. Base, măr-.

Singular.	Plural.
N.V.A. măr-ĕ	măr-ĭa
Gen. măr-ĭs	not in use
Dat. măr-ī	măr-ĭbŭs
Abl. măr-ī	măr-ĭbŭs

§ 35. In substantives with nom. sing. ending in -ăl or -ăr a final -ĕ has been dropped and the last vowel of the base (if long) shortened.

First Example: ănimăl (n.), animal. Base, ănimāl-.

Si	ngular.	Plural.
N.V.A	. ănimăl	ă nĭmāl-ĭă
Gen.	ănĭmāl-ĭs	ănĭmāl-Ĭum
Dat.	ănĭmāl-ī	ănĭmāl-íbŭs
Abl.	ănĭmāl-ī	ă nĭmāl-ĭ b ŭs

Second Example: calcăr (n.), spur. Base, calcār-.

Singular.	Plural.
N.V.A. calcăr	calcār-ĭă
Gen. calcār-ĭs	calcār-Ĭum
Dat. calcār-ī	calcār-ĭbus
Abl. calcār-ī	calcār-ĭbŭs

Os (n.), bone (base, oss-), has gen. pl. ossium, but in other respects is a consonant-substantive.

Sing	ular.	Plural.
N.V.A	1	088-ă
Gen.	oss-ĭs	oss-Ĭu m
Dat.	oss-ĩ	oss-ĭbŭs
Abl.	oss-ĕ	oss-ibŭs

§ 36. On looking out a substantive of the third declension is a vocabulary or dictionary, the student will find (1) the nom. sing.; (2) the gen. sing. (whence, by taking off the suffix is, the base may be ascertained); (3) the gender. In order to decline the word fully it is necessary also to know whether it is a consonant-substantive or an I-substantive, or (in other words) whether the gen. pl. ends in -um or -ĭum.

This last point may be decided thus in the case of

masculine and feminine words:-

Imparisyllabic substantives (i.e. those in which the number of syllables in the nom. sing. and the gen. sing. respectively is unequal) with base ending in a single consonant are consonant-substantives. (Gen. pl. -um.)

Parisyllabic substantives (i.e. those in which the number of syllables in the nom. sing. and gen. sing. respectively is equal), and substantives with base ending in two consonants, are I-substantives. (Gen. pl. -Ium.)

These rules are subject to some few exceptions.

(a) The following parisyllabic words are consonant-substantives: ambāgēs (gen. pl. ambāgum), circumlocution; cănīs (gen. pl. cănum), dog; iŭvěnīs (gen. pl. iŭvěnum), young man; sĕnex (gen. pl. sĕnum), vld man; vātēs (gen. pl. vātum), prophet; vŏlūcrīs (gen. pl. vŏlūcrum), bird (§ 25); pātēr (gen. pl. pātrum), father; mātēr (gen. pl. mātrum), mother; frātēr (gen. pl. frātrum), brother; accīpīter (gen. pl. accīpītrum), hawh (§ 27).

(b) The following imparisyllabic words are I-substantives: falx (gen. pl. faleĭum), sickle; faux (gen. pl. faucĭum—in sing. only in use in abl. faucĕ), throat; glīs (gen. pl. glīrĭum), dormouse; līs (gen. pl. lītĭum), dispute; mās (gen. pl. mārīum), male; mūs (gen. pl. mūrīum), mouse; nix (gen. pl. nīvĭum), snow; vīs (gen. pl. vīrĭum), force (§ 33).

In -ĭum terminate glīs, līs, Mās, mūs, and nix, falx, faux, and vīs; But -um ends iŭvěnis and frātěr, Ambāgēs, vātēs, sēnex, pătěr, With cănis, völücris, and mātěr.

Neuters of the third declension are I-substantives if the nom. sing.ends in -e, -al, or -ar; other neuters are consonant-substantives.

Exception: ös (gen. pl. ossíum), bone (§ 35).

- § 37. The locative case is not distinguishable from the ablative in the third declension, except in a very few forms, and those of the singular number; e.g. Karthāgō, Carthage, has locative Karthāgōnī.
- § 38. The following is a synoptic view of the suffixes of substantives of the third declension:—

Singular. I. Consonant-Substantives.	Singular. II. I-Substantives.
(a) Masc. or Fem. (b) Neut. N. Vs or none none Accem none Genis Dati Able	(a) Masc. or Fem. (b) Neut. -ēs, -īs, or -s ĕ- or none -em (rarely -im) -īs -ĭ -ĕ (rarely -ī) -ī
Plural. I. Consonant-Substantives.	Plural. II. I-Substantives.
(a) Masc. or Fem. (b) Neut. N. Vēs -ā Accēs -ā Genum Datībūs Ablībūs	(a) Masc. or Fem. (b) Neut. -ēi: -ēs or -īs -īāĨumĨbūsǐbūs

For irregularities in the third declension, see §§ 48-50.

For Greek substantives of the third declension, see §§ 64-68.

For the gender of substantives of this declension, see §§ 73-76.

CHAPTER VII.—FOURTH (OR U) DECLENSION.

- \S 39. This declension contains substantives of two classes:—
 - (1) Masculine (and some feminine) words, with nom. sing, ending in -ŭs;
 - (2) Neuter words, with nom. sing. ending in -ū.
 - (1) Example: grădus (m.), step. Base, grăd.

Singular.	Plural.
N.V. grād-ŭs	grăd-ūs
Acc. grăd-um	grăd-ūs
Gen. grăd-ūs	grăd-Ŭum
Dat. grăd-ŭī	grăd-ĭbŭs
Abl. grăd-ū	grăd-ĭbŭs

(2) Example: gĕnū (n.), knee. Base, gĕn-.

Si	ngular.	Plural.
N.V.A	l. gĕn-ũ	gĕn-ŭă
Gen.	gĕn-ūs	gĕn-Ŭum
Dat.	gĕn-ũ	gĕn-ĭbŭs
Abl.	gĕn-ū	gĕn-ĭbŭs

For irregularities in the fourth declension, see §§ 51, 52. For the gender of substantives of this declension with nom. sing. in . us, see § 77.

CHAPTER VIII.—FIFTH (OR E) DECLENSION.

 \S 40. Example : dĭēs (m. or f. in sing., m. in pl.), day. Base, dĭ-.

Singular.	Plural.
N.V. dĭ-ēs	dĭ-ēs
Acc. dĭ-em	dĭ-ēs
Gen. dĭ-ēī	dĭ-Ērum
Dat. dĭ-ēī	dĭ-ēbus
Abl. dĭ-ē	dĭ-ēbus

The substantives of this declension are all feminine, except dies (§ 78).

NOTE.—The rule is that if the last letter of the base is a consonant, the gen. and dat. sing. end in -ĕī (not -ĕī); e.g. fĭd-ēs, faith, has gen. and dat. sing. fĭd-ĕī.

For irregularities in the fifth declension, see §§ 53, 54.

CHAPTER IX.—IRREGULARITIES IN THE DECLENSION OF SUBSTANTIVES.

FIRST DECLENSION (§§ 16-18).

- § 41. Genitive Singular. (1) In poetry the old suffix -āī is sometimes found instead of the ordinary-ae; e.g. ăquă, water, occasionally in poetry has genitive ăquāī.
- (2) Fāmīliā, household, has gen. sing. fāmīliās when used in connection with pātēr, mātēr, fīliŭs or fīliā. Thus, pātēr fāmīliās or pāterfāmīliās, master of the house; mātēr fāmīliās or māterfāmīliās, mistress of the house. (In the plural either pātrēs fāmīliās or pātrēs fāmīliārum may be used.)
- § 42. Genitive Plural. The suffix -um (instead of -arum) is found in the following words:—
 - Patronymics (§ 279), e.g. Dardănidae, descendants of Dardanus, gen. Dardănidum;
 - (2) Some names of nations or tribes. e.g. Lăpithae, the Lapithae (a Thessalian tribe), gen. Lăpithum;
 - (3) Substantives ending in -cŏlā (denoting dweller in, cp. cŏlō, I cultivate, inhabit), or -gĕnā (denoting born in, cp. gĕnūs, birth), e.g. caelĭcŏlae, dwellers in heaven, gen. caelĭcŏlum; terrĭgĕnae, earth-born people, gen. terrĭgĕnum;
- (4) amphörä, a jar, gen. pl. amphörum; drachmä (a Greek silver coin, somewhat smaller than a shilling), gen. pl. drachmum. N.B.—Many of these words have also the regular gen. pl. suffix -ārum.
- § 43. Dative and Ablative Plural. Some feminine substantives of the first declension which correspond to masculines in is of the second declension have dat. and abl. pl. in ābūs. In classical Latin this form is found only in dĕā, goddess, which has dat. and abl. pl. dĕābūs, to avoid confusion with dēïs, one form of the dat. and abl. pl. of dĕūs, god (§ 47), and fīlĭā, daughter, which has dat. and abl. pl. fīlīābūs,

SECOND DECLENSION (§§ 19, 20).

the form filiis being dat. and abl. pl. of filius, son.

§ 44. Vocative Singular. Proper names ending in -ĭűs have voc. sing. in -ī jnstead of -ĭë; e.g. Tullĭüs, voc. Tullī; Vergilĭüs, voc. Vergilī. So too filĭüs, son, has voc. sing. filī. These contracted vocatives are, contrary to the rule in § 6, accentuated on the last syllable but one.

- & 45. Genitive Singular. Substantives with nom. sing. ending in -ĭūs often contract -iī to -ī in the gen. sing.: e.g. flūvĭūs, river, gen flūvī or flūvĭī; ingĕnĭum, ability, gen. ingĕnī or ingĕnīī. These contracted genitives are accentuated on the last syllable but one.
- \$ 46. Genitive Plural. The suffix -um may be used (as an alternative for -orum) in the gen. pl. of :-
 - (1) Substantives denoting coins and measures, e.g. denarius (a silver coin rather larger than a sixpence), gen. pl. denarium; modius, peck, gen. pl. modium; nummus, coin, gen. pl. nummum; also făber, artificer, has gen. pl. fabrum;
 - (2) Some names of nations or tribes (in poetry), e.g. Rutuli (an ancient Italian tribe), gen. Rŭtùlum;
 - (3) Many other words in poetry, especially deus, god, gen. pl. děum; dīvus, deity, gen. pl. dīvum; vir, man, gen. pl. virum.
 - § 47. Deus, god, is thus declined :-

Singular.	Plural.
N.V. dĕŭs	děī or dī
Acc. dĕum	děõs
Gen. dĕī	deorum or (in poetry) deum
Dat. dĕō	dĕīs, dĭīs, or dīs
Abl. dĕō	deīs, dīīs, or dīs

Obs. The voc. sing, of deus is the same as the nominative.

Virus, venom, and vulgus, populace, are neuter, and therefore have acc. sing, of the same form as the nom. (Vulgus is also found masculine, and then has acc. sing. vulgum.) These substantives have no plural. For pelagus, see § 68.

THIRD DECLENSION (§§ 21-38).

§ 48. The following irregular nouns are in common use:-

Bos (c.), ox or cow. Sus (c.), boar or sow.

Singular.	Plural.	Singular.	PluraL
N. V. bos	bŏvēs	N.V. sūs	sŭēs
Acc. bovem	bŏvēs	Acc. sŭem	sŭēs
Gen. bovis	bŏum	Gen. sŭis	sŭum 🔪
Dat. bŏvī	būbŭs or bōbŭs	Dat. sŭī	sŭĭbŭs or sŭbŭs
Abl . bö $f vreve{e}$	būbŭs or bōbŭs	Abl. sŭĕ	sūĭbūs or sūbūs

Importer (m.). Jupiter (a Roman god). Ins in andum frequently written as one word: iusiurandum] (n.), oath. (No plural.)

Singular.	Singular.	
N.V. Iuppiter	N.V. iūs iūrandum	
Acc. Iŏvem	Acc. iūs iūrandum	
Gen. Iŏvĭs	Gen. iūris iūrandī	
Dat. Iŏvī	Dat. iūrī iūrandō	
Abl. Iŏvě	Abl. iūrē iūrandō	

Obs. 1. Iuppiter is made up of the base Iov- and piter (=pater). Obs. 2. Each part iusiūrandum is declined, viz. iūs (base iūr-), bbligation, and itrandum (verbal adj. from itro, I swear), to be sworn. NOTE.—Aether, the upper air, and aer, air, have Greek acc. sing. (§ 65) actheră, āeră.

§ 49. The following substantives have nom, sing, differing unusually from the base :-

cărō (f. . flesh, gen. sing. carnis.

cucumis m., cucumber, gen. sing. cucumeris.

fēmur (n.), thigh, gen. sing. fēmoris or fēminis. iĕcŭr (n.), liver, gen. sing. iĕcŏrĭs or iĕcĭnŏrĭs.

ĭtěr (n.), journey, gen. sing. ĭtĭněrĭs.

senex (m.), old man, gen. sing. senis.

supellex (f.), furniture, gen. sing. supellectilis.

§ 50. The declension of the following substantives is defective:

(F.) Aid (in sing.), resources (in pl.). (F.) Prayer.

Singular, N. V. — Acc. ŏpem Gen. ŏpĭs Dat. — Abl. ŏpĕ	Plural. ŏpēs ŏpēs ŏpum ŏpībŭs ŏpībŭs	Singular. N.V. — Acc. prěcem Gen. — Dat. prěci Abl. prěcě	Plural. prēcēs prēcēs prēcum prēcībūs prēcībūs
---	---	--	---

(F.) Alternation.

(F.) Force (in sing.), strength (in pl.).

Singular. N. V. — Acc. Vicem	Plural, vicēs vicēs or vicīs	Singular. N. V. vīs Acc. vim	Plural.
Gen. vicis Dat. — Abl. vicĕ	vicium vicibus vicibus	Gen. — Dat. —	vīrēs or vīrīs vīrīum vīrībūs
V100	ATCIDUS	Abl. vī	vīrībns

Nēmō (c.), no one, has acc. nēmīnem and dat. nēmīnī. The gen. is supplied by nullīus, and the abl. by nullo or nulla (see § 81). Nom. sing. fors (f.), chance; abl. sing. forte.

Abl. sing. sponte (f.), choice.

FOURTH DECLENSION (§ 39).

- § 51. Dative Singular. This case is sometimes found ending in -t in substantives not of neuter gender; e.g. mětus (m.), fear, has occasionally dative mětū.
- § 52. Dative and Ablative Plural. The following generally have dat. and abl. pl. ending in - ubus instead of - ibus: acus, needle; arcus, bow; artus, limb; lacus, luke; partus, birth; tribus, tribe.

Rhyme: -Six have ŭbus: arcus, acus, artus, partus, tribus, lacus

FIFTH DECLENSION (§ 40).

- § 53. Genitive and Dative Singular. These cases are sometimes found ending in -ē; thus dǐēs, day, sometimes has gen. and dat, sing, dǐē instead of dǐēī, and similarly fīdēs, faith, has fĭdē instead of fǐdēī.
- § 54. Dies, day, and res, thing, are the only substantives of this declension that have gen. dat. and abl. plural.

In respublică (f.), commonwealth, each part of the word is declined, viz. rēs, thing, and publică, fem. of the adjective publicăs, -ă, -um, public. The plural is rarely used; the singular (sometimes written as two words) is thus declined:—

N. V. respublică
Acc. rempublicam
Gen. reipublicae
Dat. reipublicae
Abl. republicā

HETEROCLITE SUBSTANTIVES (i.e. BELONGING TO TWO DECLENSIONS).

§ 55. The following have singular and plural of different declensions:—

Singular.

balně-um, -ī, -ō (n.), (private)

bath.

dēlĭeĭ um, -ī, -ō (n.), delight.

ĕpŭl-um, -ī, -ō (n.), banquet.
iñgĕr-um, -ī, -ō (n.), acre.
vās, vās-ĭṣ, -ī, -6 (n.), vessel.

Plural.

balně-ae, -ās, -ārum, -īs (f.),

public baths.

dēlĭeĭ-ae, -ās, -ārum, -īs (f.),

(1) delight, (2) pet.

ĕpŭl-ae, -ās, -ārum, -īs (f.),

iŭgĕr-ă, -um, -ībŭs.

vās-ā, -ōrum, -īs.

§ 56. Some substantives (mostly names of trees) belonging to the second declension have also fourth declension forms; e.g. laurus, bay, has in the singular gen. laurī or laurus, abl. laurō or laurū; and in the plural nom. laurī or laurūs, acc. laurōs or laurūs. Sēnātus, senate. belongs to the fourth declension, but sometimes has gen. sing. sēnātī.

Dŏmŭs (f.), house, belongs to the fourth declension, but prefers second declension forms in abl. sing. (dŏmō), acc. pl. (dŏmōs), and gen. pl. (dŏmōrum), though even there fourth declension forms are occasionally found. The locative is dŏmī.

Rhyme:—Dŏmō for ablative we see,
Dŏmōs, dŏmōrum commonly;
Bear locative dŏmī in mind;
The rest like grādūs is declined.

Some substantives belong to both first and fifth declensions; luxuriă or luxuriës, luxury; mătěriă or mātěriēs, timber. Rēquies (f.), rest, has third and fifth declension forms, and is thus declined in the singular only, the plural not being in use:—

N. V. rēqui-ēs
Acc. rēqui-em or rēquiēt-em
Gen. rēquiēt-is
Dat.
Abl. rēqui-ē or rēquiēt-ē

Plebs, gen. plēbis (f), common people, sometimes has nom. sing. plēbēs and gen. sing. plēbēi.

Vespěr (m.), evening, has in the singular acc. vespěrum, gen. vespěrī or vespěrīs, abl. vespěrě or vespěrð, locative vespěrīs; the plural is wanting. There is also a first declension form vespěră (f.), which is fully declined in the singular.

HETEROGENEOUS SUBSTANTIVES (i.e. WITH PLURAL DIFFERING IN GENDER FROM THE SINGULAR).

§ 57. The following are the more important words of this class:—

Singular.
carbăsŭs, -ī (f.), linen.
diēs, -ēī (f. or m.), a day, set time.
diēs, -ēī (m.), a day (as a division
of time).

frenum, -ī (n.), bridle.

ičcus, -ī (m.), jest.

locus, -I (m.), place.

rastrum, -I (n.), harrow.

Plural. carbăsă, -ōrum (n.), sails.

dies, -erum (m.), days.

frēnī, -ōrum (m.).
frēnā, -ōrum (n.).
iŏēī, iŏeōrum (m.).
iŏēā, iŏeōrum (n.).
lŏeī, -ōrum (m.), places.
lŏeā, -ōrum (n.), region.
frastrī, -ōrum (m.).
rastrā, -ōrum (n.).

SUBSTANTIVES WITH SPECIAL MEANINGS IN THE PLURAL.

§ 58. The following are the more important:-

Singular.

aedēs, -īs (f.), temple. āquā, -ae (f.), vaater. auxīlium, -ī (n.), help. balnēum, -ī (n.), good. carcer, -ērīs (m.), prison.

Castrum, -ī (n.), Fort (in names of places).

Plural.

aedēs, -ium, house.
ăquae, -ārum, medicinal springs.
auxiliă, -ōrum, auxiliaries.
balnēae, -ārum (f.), public baths.
bönā, -ōrum, goods, property.
careērēs, -um, starting place (in
rarecourse).

castră, -ōrum, camp.

Singular.

comitium, -I (n.), place of assembly.

copia, -ae (f.), plenty.
finis, -is (m.), end.
fortuna, -ae (f.), fortune.
gratia, -ae (f.), favour.
hortus, -I (m.), (hitchen-) garden.
impēdimentum, -I (n.), hindrance.
littērā, -ae (f.), letter (of the
alphabet).
lūdūs, -I (m.), game or school.
öpēra, -ae (f.), work.
öpem (@cc.), -is (f.), aid.
pars, -tis (f.), part.

rostrum, -ī (n.), beak of a ship.

sāl, -ĭs (m. or n.), salt. tābŭlă, -ae (f.), board, picture.

vis (f.), force.

Plural.

comitia, -orum, elective assembly. election. copiae, -arum, supplies or troops. fīnēs, -ĭum, territory. fortunae, -ārum, possessions. grātiae, ārum, thanks, the Graces. horti, -orum, pleasure-grounds. impedimentă, -orum, baggage. litterae, -ārum, letter (epistle) or literature. lūdī, -orum, public games. operae, -ārum, workmen. opes, -um, resources. partes, -ium, a part (in a play), party. rostră, -orum, platform in the · Forum which was adorned with the beaks of ships. sălēs, -um (m.), witticisms. tăbulae, -ārum (f.), writingtablets. vīrēs, -ĭum, strenath.

SUBSTANTIVES USED IN THE PLURAL ONLY.

§ 59. The following are very common :-

armă, -ōrnm (n.), armour. dīvitiae, -ārum (f.), riches. indūtiae, -ārum (f.), truce. lībērī, -ōrum (m.), children. mānēs, -ium (m.), spirits of the dead. moenia, -ium (n.), city walls. těněbrae, -ārum (f.), darkness.

Many names of towns are plural in form; e.g. Åthēnae, -ārum (f.), Athēns; Gābīī, -ōrum (m.), Gabīi; Sỹrācūsae, -ārum (f.), Syracuse. Some proper names are singular or plural, as Pergāmum, -i (n.), or Pergāmā, -ōrum (n.), the citadel of Troy. So Tartārūs, -ī (m.), or Tartārā -ōrum (n.), Tartarus, the infernal regions.

INDECLINABLE SUBSTANTIVES.

§ 60. The following are of neuter gender, and are used in the nom. and acc. sing. only:—

fās, right, the dictates of religion. instăr, resemblance. māně, morning.

nihil or nīl, nothing. părum, too little. sătis, enough.

Note.—Nihilum or nilum, -i (n.), nothing, is declined throughout the singular.

CHAPTER X.—GREEK SUBSTANTIVES.

§ 61. Greek proper names and other Greek substantives, when used in Latin, are sometimes declined like Latin words, but often retain the Greek inflexions.

N.B.—The Latin forms are given here only where no distinctive Greek form exists, but are in many other instances in use; e.g., Aenēās

has accusative Aenēan or Aenēam,

FIRST DECLENSION.

§ 62. (1) Masculines with nom, sing. ending in -ās or -ēs;

(2) Feminines " " " -a or -e.

Note.—The plurals of words of this class (if used) have Latin

suffixes only.
(1) Examples: Aenēās (m.), Aeneas; Tydīdēs (m.), son of Tydēus (see § 280).

0'lam	Singular
Singular.	Nom. Tydīd-ēs
Nom. Aenē-ās	Voc. Týdīd-ē *
Voc. Aenē-ā	Acc. Tydid en
Acc. Aenē-ān	Gen. Tydīd ae
Gen. Aenë-ae	Dat. Tÿdīd-ae
Dat. Aene-ae	Abl. Týdīd-ē
Abl. Aenē-ā	Electra: Phoebe (f.), Phoebe.
Z-complos + Telectra (f)	Electra: Phoene (I.), Phoene

(2) Examples: Electrā (f.), Electra; Phoebē (f.), Phoebe.

xamples: Electia (1.), Eccosia,	
G23am	Singular.
N.V. Électr-ā	V.V. Phoeb-ë
14. 4. E10001-a	Acc. Phoeb-en
Acc. Production	
Gen. Electr-ae	Gen. Phoeb-ës
Dat. Electr-ae	Dat. Phoeb-ae
Dat. Electr-ae	Abl. Phoeb-ē
Abl. Electr-a	A06. F1000-0

SECOND DECLENSION.

- - Examples: (1) Dēlŏs (f.), Delos; (2) Andrŏgĕōs (m.), Androgeos;
 - (3) Panthus (m.), Punthus;
 - (4) rhŏdŏdendrŏn (n.), rhododendron.

 * The vocative may also end in -ă or -ā.

Singular.	Singular.
Nom. Dēl-ŏs	Nom. Androge-os
Voc. Dēl-ĕ	Voc. Androge-os
Acc. Dēl-ŏn	Acc. Androge-on cr -o
Gen. Dēl-ī	Gen. ▲ndrŏgĕ-ō
D. Abl. Dēl-ō	D. Abl. Androge-o
Singular.	Singular.
Nom. Panth-us	Nom. rhödödendr-ön
Voc. Panth-ū	Foc. rhŏdŏdendr-ŏn
Acc. Panth-um	Acc. rhödödendr-ön
Gen. Panth-ī	Gen. rhŏdŏdendr-ī
D. Abl. Panth-ō	D.Abl. rhödödendr-ö

Greek plural forms of the second declension occur:-

- (1) In the nominative of a few masculine and feminine words; e.g. Adelphoe, m. (title of a comedy), "The Brothers"; arctoe (f.), bears:
- (2) In the genitive of names of books (neuter); e.g. Gĕorgĭcă (Vergil's treatise on husbandry) has gen. Gĕorgĭcōn: Gĕorgĭcōn lĭbrī. the books of the Georgics.

THIRD DECLENSION.

- § 64. (1) Imparisyllabic masculines and feminines with base ending in a consonant, $-\bar{o}$, or $-\bar{y}$;
- (2) Feminines (and a few masculines) with nom. sing. ending in -Is, in some cases declined both as imparisyllabics and as parisyllabics

Sinonlar

- (3) Parisyllabic feminines with nom, sing, ending in -0.
- § 65. (1) Examples: lampăs (f.), torch;
 Phäöthön (m.), Phaöthon;
 hērōs (m.), hero;
 Tēthýs (f.), Tethys.

Note.—Poema (n.), poem, and	other such words, have a dat. abl.

NOTE.—Poēmā (n.), poem, and other such words, have a dat. abl. plural according to the second declension; e.g. poēmātīs.

CHAPTER XI.—GENDER OF SUBSTANTIVES.*

§ 69. The gender of some Latin substantives is determined by their meaning, that of others by the declension to which they belong and the ending of their nominative singular.

Obs. In the following rules and lists of exceptions it is to be understood that the gender, if determined by the meaning, is not affected by the form of the word; e.g. gigās, giant, is masculine, though words of the third declension with nom. sing. ending in -as are (according to the rule in § 73) feminine.

RULES FOR ASCERTAINING GENDER BY THE MEANING.

§ 70. Masculine. Words denoting persons of the male sex and most names of rivers.

Examples: Sullă (name of a man); puĕr, boy; Mŏsă, Meuse; Tibĕrĭs, Tiber.

Feminine. Words denoting persons of the female sex and most names of countries, islands, cities, and trees and plants.

Examples: ănus, old woman; Ēpīrus (the modern Albania); Zacynthus, Zante; Corinthus, Corinth; quercus, oak.

- † Male are rivers; female these: Countries, islands, cities, trees.
- * Of the rhymes here given, only those in large type are to be learnt at first.
- † In the rhymes male is for convenience used for mascaline, female for feminine, and words of which the gender is sometimes masculine sometimes feminine, are called common.

Exc. All plural names of towns in -i
Are masculine, as Thūrīi;
So are of plants in -ĕr a few
Belonging to declension two.
With ending -um (declension second)
Both plants and towns are neuter reckoned.

Substantives which denote persons of either sex are said to be of common gender; e.g. incola, inhabitant; testis, witness.

Note.—The gender of names of animals is, as a rule, determined by their form, but domestic animals are often personified and become masculine or feminine according to sex; e.g. cănis, dog or bitch; bōs, bull or cow.

RULES FOR ASCERTAINING GENDER BY THE FORM.

FIRST DECLENSION.

§ 71. All substantives of this declension are feminine, except (1) those denoting persons of the male sex; e.g. naută, sailor, and family or personal names, e.g. Mūrēnă, Scaevŏlă; and (2) most names of rivers (§ 70).

Classed among the males must be Hădria, Adriatic Sea.

SECOND DECLENSION.

§ 72. Substantives of this declension are masculine if the nom. sing. ends in -us or -er, neuter if it ends in -um.

Obs. The above rule does not apply to such words as are feminine by meaning. See § 70, and the examples there given.

Rule. Exc. Neuters twain * begin our rhyme:

Vulgus, mob, and virus, slime;

Vulgus—neuter commonly—

Sometimes masculine may be.

Feminine in -us are found

Alvus, paunch, and humus, ground;

Also arctos,† carbasus, Constellation of the Bear, linen, Colus, vannus, pampinus. Distaff, winnowing-fan, vine-leuf.

^{*} For pëlägus, see § 68.

[†] Greek form; sce § 63.

THIRD DECLENSION.

§ 73. The gender of substantives of this declension is determined according to the ending of the nom. sing. as follows:—

Masculine: Words ending in -er, -o, -or, -os; also imparisyllabic words in -es.

Feminine: Words ending in -as, -aus, -is, -x; -s following another consonant; also parisyllabic words in -es.

Neuter: Words ending in -ar, -ur, -us; -l, -a, -n, -c, -e, -t.

Obs. In this as in other declensions the form does not affect a word's gender when the latter is determined by the meaning; e.g. für, thief, is masculine, notwithstanding the rule that words ending in -ur are neuter.

Rhyme.—The genders of declension three
From each word's ending we may see:
-er, -o, -or, -os are masculine;
-as, -aus, -is, -x are feminine,
-s also after a consonant,
and -es that has no increment;
-es otherwise is masculine.
Of neuter endings there are nine:
Note -ar, and -ur, and -us; the rest
By lancet are remembered best.

EXCEPTIONS.

The exceptions to the above rules are somewhat numerous; they are here arranged in three classes:—

- A. Feminine and Neuter Substantives with endings usually characteristic of Masculine Substantives;
- B. Masculine and Neuter Substantives with endings usually characteristic of Feminine Substantives;
- C. Masculine and Feminine Substantives with endings usually characteristic of Neuter Substantives.

§ 74. A. Feminine and Neuter Substantives with Masculine Endings.

Rule. Masc. in er. Heminine is lintër, boat;
Learn these neuters nine by rote:
Itër, journey, vēr, the spring,
Verbër, lash—unpleasant thing!
Sübër, pĭpĕr, and cădāvĕr, Cork, pepper, corpse.
Äcĕr, ūbĕr, and păpāvĕr. Maple, fertility, pappy.

Masc. in -o.

Exc. Female are words in -do and -go,
Though cardō, hinge, and ordō, row,
Are masculine, with ligō, hoe.
Margō is common. Female call
The abstract * nouns in -iō all.
To ēchō give the female gender,
The same to cărō (carnis) render.

Echo.
Flesh.

Masc. in-or. Exc. A feminine is arbŏr, tree;
As neuter substantives we see
Cŏr (cordĭs), heart; and ădŏr, grain;
With marmŏr, marble; aequŏr, main.

Masc. in-os. Exc. Call feminine the whetstone cos,
Likewise the woman's dowry dos;
Of Latin substantives alone
These neuter are: os (ossis), bone,
And eke os (oris), mouth; a few
Greek nouns in -os are neuter too.

Masc. impari. Exc. Aes (aerĭs), bronze, has increment, syllable m-es. Yet with the neuter nouns it went. And quies, rest, with merces, pay, Are classed as feminine alway;

So also five more—merges, seges, Sheaf, cornfield. With compes, requies, and teges. Fetter, repose, mat.

* An abstract noun is properly the name of a quality, attribute, or circumstance, of a thing; often it is transferred to denote a thing with which that quality, etc., is in some way associated; e.g. statio, a standing, commonly means a standing-place, station.

§ 75. B. Masculine and Neuter Substantives with Feminine Endings.

Rule. Exc. Ās, copper coin, is known as male, Fem. in as. Văs (vădĭs), too, who offers batl; Surety. Vās (vāsĭs), neuter, means a pail. Vessel.

Fem. Exc. Here such nouns in -is as be in is. Masculine set forth you see: Amnis, läpis, both from collis Stream, stone, hill. Falling; ignīs blown by follis; Fire, bellows. Sanguis, blood, and sword-blade ensis; Circuit, month. Orbis too, wherein each mensis Year by year recurs; and crīnis, Hair, is male, and (mostly) finis; End.He who panis, piscis spurneth Bread. fish.Soon to cinis, pulvis turneth. Ash. dust.

> Rarer fascīs, sentīs, callīs, Axīs, postīs, and nātālīs, Vectīs, fustīs, and cānālīs, Torrīs, caulīs, cūcūmīs, Unguīs, fūnīs, vermīs, glīs.

Fagot, bramble, rough path. Awle-tree, door-post, birthday. Crow-bar, cudgel, channel. Firebrand, cabbage, cucumber. Finger-or toe-nail, rope, worm, dormouse.

Fem. in -x.

Exc. Masculine are found in -x,

Ăpex, vertex, shepherd's grex, Summit, eddy, flock.

Călix,cortex,thōrax,frutex, Cup,barkof tree,breastplate,shrub.
Pollex,pūmex,silex, cōdex. Thumb, pumice-stone, flint, book.

Fem. Exc. As masculine count mons, a mount; in -s following With pons, a bridge, and fons, a fount; another So dens, a tooth, and bidens, hoe; consonant. But bidens, sheep, for female know. Male, too, are tridens, occidens, Trident. The West, and dawning oriens, East.Trope. With chalybs, hydrops, torrens, rudens, Steel, dropsy, torrent, And gryps and fractions such as triens. Griffin, one-third of an as or other unit.

Fem. Exc. Masculine is found in -es parisyllabic in -es. Scimitar ăcīnăcēs.

§ 76. C. Masculine and Feminine Substantives with Neuter Indings.

RULE. Exc. These are masculine in -ur:

Nent. Vulture, turtur, and furfur. Vulture, turtle-dove, bran. in -ur.

Neut. Exc. A group of well-known nouns in -ūs in us. Are female: slavery, servitūs, And virtūs, valour; safety, sălūs, With tellūs, earth, and swampy pălūs, Marsh.Iŭventūs, youth, senectūs, eld (Throughout these nouns u long is held); So incus, anvil; short u keep In pěcus (pěcudis), a sheep. With feminines count long-necked grus, Crane,

But lepus, hare, is male; and mus,

Pig.

Portico.

The mouse, is common; so is sūs.

Neut. Exc. Of males in -1 take note of one n -1. Besides sal, salt: that's sol, the sun.

Neut. Exc. Two males in -n are pecten, comb, in -n. And delphin in his ocean home. Dolphin.

FOURTH DECLENSION.

§ 77. Substantives of this declension are masculine if the nom. sing. ends in -us, neuter if it ends in -u. -us are feminine in accordance with § 70).

RULE. Exc. Feminine are found in -us, Masc.

Acus, needle, porticus, in -ŭs. Mănus, hand, and domus, home, Tribus, civil tribe at Rome,

 $ar{\mathbf{I}}$ d $ar{\mathbf{u}}$ s * (plural word), the Ides— Day on which the month divides.

FIFTH DECLENSION.

§ 78. All words of this declension are feminine, except dies, day, and meridies, mid-day, both masculine.

Note.—Dies is sometimes feminine in the singular, especially when meaning an appointed day or lapse of time. In the plural dies is always masculine.

* Idus was the name given to the 13th day of some months, to the 15th of others. See Appendix on the Roman Calendar.

CHAPTER XIL—DECLENSION OF ADJECTIVES.

§ 79. The form of a Latin adjective varies in accordance with the gender, number, and case of the substantive to which it refers, either as attribute or predicate. Thus: we may write timidus naută, a timid sailor, or naută est timidus, the sailor is timid; but if we wish to express in Latin a timid yirl or the girl is timid, timidus, the masculine form of the adjective, is inadmissible, and we must write timidă puellă, puellă est timidă, because the feminine substantive puellă requires a feminine form of the adjective. The same holds good with regard to number and case: we say timidi nautae, timid sailors, timide naută (vocative), timid sailor! in each instance changing the suffix of the adjective in accordance with the gender, number, and case of the substantive to which it is applied.

Accordingly, in the declension of an adjective, the form which it assumes in each of the three genders must be given

for each case singular and plural.

Adjectives are divided, according to the form of their declension, into two classes:—

- Adjectives with masculine and neuter like the second declension of substantives, and feminine like the first declension of substantives;
- II. Adjectives declined in all genders like the third declension of substantives.

In the declension of adjectives, as in that of substantives, the various endings are added to the base; the latter must, therefore, be ascertained before an adjective can be declined.

The base is ascertained by taking away the case-ending of the genitive singular masculine; this is

for adjectives of the first class -ī (-īŭs for those in §81);

The base of adjectives of the first class with nom. sing. masc. ending in -us may be seen at once on dropping the -us.

I. ADJECTIVES OF THE FIRST CLASS.

§ 80. This class consists of adjectives with nominative singular ending in the masculine in -us or -er, in the feminine in -u, and in the neuter in -um.

They are declined as follows:-

Masculine: in -ŭs, like dŏmĭnŭs, § 19, 1; in -ĕr, like măgistĕr, § 19, 2; with a few retaining e before r throughout, like pŭĕr, § 19, 2, Obs.

Feminine: like mensă, § 16. Neuter: like regnum, § 19, 3.

Examples: bŏnŭs, bŏnå, bŏnum, good. Base, bŏn-.

mĭgĕr, nĭgră, nĭgrum, black. Base, nĭgr-. Singular. Plural.

M. F. N. M. F. N. Nom. bŏn-ŭs bŏn-ā bŏn-um bŏn-ī bŏn-ae bŏn-ă Voc. bŏn-ĕ bŏn-ä bŏn-um bŏn-ī bŏn-ae bŏn-ă bon-um bon-am bon-um bon-os Acc.bŏn-ās bŏn-ă Gen. bon-ī bŏn-ae bŏn-ī bŏn-ōrum bŏn-ārum bŏn-ōrum Dat. bon-ō bŏn-ae bŏn-ō bŏn-īs bŏn-īs bŏn-īs Abl. bŏn-ō bŏn-ā bŏn-ō bŏn-īs bŏn-īs bŏn-īs

Obs. In committing the above table to memory, the learner should repeat the form for each of the three genders in the nom. sing., then the three forms for the voc. sing., and so on for each case in the singular, and afterwards similarly for each case in the plural.

Singular. Plural. M. F. N. M. F. N. N.V.nĭgĕr nigr-ă nigr-um nigr-ī nigr-ae nigr-ă Acc. nigr-umnigr-amnigr-um nigr-ös nigr-ās nigr-ă Gen. nigr-ī nigr-ae nigr-ī nigr-örumnigr-ärumnigr-örum Dat. nigr-ō nigr-ae nigr-ō nigr-īs nigr-īs nigr-īs Abl. nigr-ō nigr-ā nigr-ō nigr-īs nigr-īs nigr-īs

Note.—Some few adjectives of this class with nom. sing, masc, in Fr retain ${\bf e}$ before ${\bf r}$ in the base.

Example: těněr, těněră, těněrum, tender. Base, těněr.

	inguiar.		ĺ	Plural.	
Acc. tĕnĕr-um Gen. tĕnĕr-ī. Dat. tĕnĕr-ō	tĕnĕr-am tĕnĕr-ae tĕnĕr-ae	tĕnĕr-ī	tĕnĕr-ōrum tĕnĕr-īs	F. těněr-ae těněr-ās těněr-ārum těněr-īs	N. těněr-a těněr-a těněr-ōrum těněr-īs těněr-īs

Like těněr, the following retain e before r throughout.

- (1) Adjectives ending in -fer, denoting bearing (cp. förö, I bear) or -gör, denoting carrying (cp. görö, I carry); e.g. frügiföra, frügiföra, frügiförum, fruit-bearing; armigör, armigöra, armigörum, carrying armour.
 - (2) aspēr, aspērā, aspērum, rough. lībēr, lībēra, lībērum, free. lācēr, lācēra, lācērum, torn. mĭsēr, mĭsēra, mĭsērum, wretched.

Dexter, right, on the right hand, sometimes retains and sometimes drops the ĕ, making fem. dexteră or dextră, neut. dexterum or dextrum.

Like těněr is declined sătur, sătură, săturum, sated.

Rhyme:—Like těffér compound words in -fér Retain the e; so those in -gér; Add aspěr, rough, and läcer, torn, With liber, free, and miser, lorn.

§ 81. The following nine adjectives of the first class have genitive singular of all genders ending in -īūs (sometimes -ĭūs), and dative singular of all genders ending in -ī.

Sõlŭs, sõlä, sõlum, alone.

Tōtŭs, tōtă, tōtum, whole.

Unus, ūna, ūnum, one,

Ullus, ulla, ullum, any (after a negative). Nullus, nulla, nullum, no, none.

Ŭter, ŭtră, ŭtrum, which (of the two)?

Neuter, neutră, neutrum, neither.

Alter, altera, alterum, the one (of two), the other (of two). Alius, aliud, one (of several), another (of several).

Example: nullus, nullum, no, none. Base, null-.

Singular.			Plural.			
	M.	F.	N.	M.	F.	N.
Nom.	null-ŭs	null-ă	null-um	null-ī	null ae	null-ă
						null-ă
Gen.	null-īŭs	null-īŭs	null-īŭs	null-örum		
	null-ī					null-īs
Ab.	null-ō	null-ā	null-ō	null-īs	null-īs	null-īs

Obs. Alius has nom. and acc. sing. neut. aliud, and gen. sing. alius; the latter is rarely found, alterius being generally used instead. (The dative singular is aliu.)

Note 1.—The quantity of -i in the gen. sing. ending is, as a rule, long, except in alterius, gen. sing. of alter.

NOTE 2.— Ŭtër has the following compounds, in which the second part is indeclinable, while the former part is declined just as when not compounded:—

Ŭtercumque, utrăcumque, utrumcumque, whichever (of the two). Ŭterlibet, utrălibet, utrumlibet, which (of the two) you please. Ŭterque, utrăque, utrumque, each (of the two). Ūtervis, utrăvis, utrumvis, which (of the two) you will.

Obs. Libět is an impersonal verb denoting it pleases (§ 233); vīs means thou wilt, and is 2nd person sing. of vŏlō, I will (§ 211).

In the compound alteruter, the one or the other (of the two), the latter member only is, as a rule, declined; thus the nom. sing. fem. is alterute, and the dat. sing. for all genders is alteruter.

§ 82. Some few adjectives of the first class that denote number or quantity have a locative case formed by adding -ī to the base; e.g. ūnī, from ūnŭs, one; tantī, from tantūs, so great; parvī, from parvūs, small. The use of these locatives is explained in the Syntax.

§ 83. Examples of Adjectives of the First Class Declined together with Substantives.

Lātus ager, wide field.

Äger (m.), like mägister, § 19, 2; lāt-us, -a, -um, like bonus, § 80.

Singula	r. 'j	P	lural.
Nom. lātŭs		lātī	ăgrī
	ăgĕr	lātī	ăgrī
Acc. lātum		lātōs	āgrōs
Gen. lātī	ăgrī	lātōrum	ăgrōrum
Dat. lātō	ăgrõ	lātīs	ăgrīs
Abl. lātō	ăgrō	lātīs	ăgrīs

Magnă res, great matter.

Rēs (f.), like dĭēs, § 40; magn-ŭs, -ă, -um, like bŏnŭs, § 80.

Singular.		Plural.	
N.V. magnă	rēs	magnæe	rēs
Acc. magnam		***************************************	rēs
Gen. magnae		magnārum	
Dat. magnae			rēbŭs
Abl. magnā	rē	magnīs	rēbŭs

Curvum lītus, winding shore.

Lītās (n.), base, lītor-, like corpus, § 30; curv-us, -a, -um, like bonus, § 80.

Singular.		Plural.		
N.V.A.	curvum	lītŭs	curvă	lītŏră
Gen.	curvī	lītŏrĭs	curvõrum	lītŏrum
Dat.	curvõ	lītŏrī	curvīs	lītŏrĭbŭs
Abl.	curvõ	lītŏrĕ	curvīs	lītŏrĭbŭs

Impiger naută, active seaman.

Naută (m.), like mensă, § 16; impĭgĕr, impĭgrā, impĭgrum, like nĭgĕr, § 80.

Singular.	Plur	Plural.		
N.V. impiger nauta		nautae		
Acc. impigrum nauta	am impīgrōs	nautās		
Gen. impigrī nauta	ae impīgrōrum	nautārum		
Dat. impigro nauta	ae impīgrīs	nautīs		
Abl. impigro nauti	ā impīgrīs	nautīs		

Tōtă nox, whole night.

Nox (f.), base, noct-, like urbs, § 33; tōt-ŭs, -ă, -um, like nullŭs, § 81.

Singular.		Plural.
Nom. tōtă n	ox tōta	e noctës
Acc. totam ne	octem tōtā	s noctēs or noctīs
Gen. tötīŭs n	octĭs tōtā:	rum noctĭum
Dat. tōtī n	octī tōtīs	noctibăs
Abl. tötä n	octě tötis	noctĭbŭs

II. ADJECTIVES OF THE SECOND CLASS.

- § 84. Adjectives of this class fall into two main divisions:—
 - (1) Adjectives with genitive plural in -um, declined like consonant-substantives of the third declension;
 - (2) Adjectives with genitive plural in -ĭum, declined like I-substantives of the third declension.

Obs. Whenever in the following tables one form only is given for any case, it is to be understood to serve for all genders alike.

- (1) Adjectives Declined like Consonant-Substantives.
- \S 85. The following are declined like consonant-substantives of the third declension :—
 - (a) Adjectives of the comparative degree;
 - (b) Adjectives having in the nom. sing. one form for all genders alike, and with base ending in a short syllable.

Examples: (a) longiŏr, longiŭs, longer (comparative of longus, longa, longum, long, see § 89). Base, longiōr-.

(b) paupër, poor. Base, paupër-.

Singular	:	Plui	ral.
M. and F.	N.	M. and F.	N.
N.V. long 1 or	longĭŭs	longĭōr-ēs	longĭōr-ă
Acc. longiör-em		longĭōr-ēs	longĭör-ă
Gen. longĭōr-ĭs		longĭō	r-um
Dat. longiō	r-ī	longĭō	
Abl. longiō	r-ĕ	longĭō	
Singular.		Plur	al.
M. and F.	N.	M. and F.	N
N.V. paup	ĕr	paupĕr-ēs	none
Acc. pauper-em		paupĕr-ēs	
Gen. paup		paupě	r-um
Dat. paupěr-ī		paupěi	
Abl. paup	ēr-ē	paupě	r-ĭbŭs

NOTE 1.—The following adjectives of this class have abl. sing. ending in -1:—

NOTE 2.—Like the comparatives is declined větůs, old (base, větěr.), except that it has větůs for all genders of nom. and voc. sing. and for acc. sing. neut.

Note 3.—Âlēs, winged (also used as a substantive of common gender denoting bird), base ālǐt-, has in poetry a lengthened genitive plural ālǐtǔum.

- (2) Adjectives Declined like I-Substantives.
- § 86. This division consists of:
 - (a) Adjectives which have three forms in the nom. sing., one for each gender;
 - (b) Adjectives which have two forms in the nom. sing., one for the masculine and feminine, the other for the neuter;
 - (c) Adjectives having in the nom. sing. one form which serves for all genders alike, and with base ending in a long syllable.

Under this last heading all present participles (§ 125) are included; in poetry the genitive plural frequently ends in -um instead of -ĭum.

Examples: (a) ācĕr, ācrĭs, ācrĕ, sharp. Base, ācr. (b) tristĭs, tristé, sad. ,, trist. (c) $\begin{cases} f \bar{e} lix, fortunate. \\ pr \bar{u} dens, discreet. \end{cases}$, prūdent.

	Sin	gular.		1		Plural.	
_	M.	F.	N.		M. and I	₹.	N,
*N.V.	ācĕr	ācr-ĭs	ācr-ĕ	1	ācr-ēs		ācr-ĭă
Acc.	ācr-em	ācr-em	ācr-ĕ		ācr-ēs		ācr-ĭă
Gen.	;	ācr-ĭs			ā	cr-Ĭum	
Dat.		ācr-ī			ā	er-ĭbŭs	
Abl.		ācr-ī		1	ā	cr-ĭbŭs	

NOTE 1.—Cělěr, cělěris, cělěrě, swift, alone retains the ê before r throughout; it has genitive plural cělěrum.

Singular.	Plural.
M. and F. N.	M. and F. N.
N.V. trist-ĭs trist-ĕ	trist-ēs trist-ĭă
	trist-ēs or -īs trist-ĭă
1100. 02200 0111	trist-Ĭum
Gen. trist-īs

2200	
Singular,	Plural.
M. and F. N.	M. and F. N.
	fēlīc-ēs fēlīc-ĭă
N.V felix	
Acc. fēlīc-em fēlīx	fēlīc-ēs or -īs fēlīc-ĭă
$Gen.$ f $\bar{\mathbf{e}}$ l $\bar{\mathbf{i}}$ c $-\bar{\mathbf{i}}$ s	fēlīc-Īum
Dat. fēlīc-ī	fēlīc-ĭbŭs
Abl. fēlīc-ī or -ĕ	fēlīc-ĭbŭs
A06. lefte-1 of -e	10110-15 45
Q* 1	Dianal
Singular.	Plural.
M. and F. N.	M. and F. N.
N.V. prūdens	prūdent-ēs prūdent-ĭă
Acc. prūdent-em prūdens	prūdent-ēs or -īs prūdent-ĭă
Gen. prūdent-ĭs	prūdent-Ĭum
Dat. prüdent-ī	prūdent-ĭbŭs
$Abl.$ prüdent-i or - \check{e}	prūdent-ĭbŭs
	•

NOTE 2.—The following, though they have one form for all genders in the nom. sing., and have a base ending in a short syllable (see § 85, b), are declined like I-substantives, *i.e.* have abl. sing. in -I, nom. and acc. pl. neut. in -IA, and gen. pl. in -Ium:—

	pār	equal	Base,	păr-
	hĕbĕs	blunt	,,	hĕbĕt-
	tĕrĕs	rounded		tĕrĕt-
	anceps	wavering	**	ancĭpĭt-
	praeceps	headlong	32	praecipit-
with	simplex	simple	22	simplic-
and other	adjectives	ending in -plex (§	106).	_

Obs. Note that whereas the ablative singular of certain I-substantives only (see § 32) ends in -ī, the ablative singular of all adjectives with genitive plural in -ĭum may end in -ī. and that an alternative form in -ĕ is found only in those adjectives whose nom. sing. neut, does not end in -ĕ.

§ 87. Examples of Adjectives of the Second Class Declined together with Substantives.

Dīvěs ĕrŭs, rich master.

Ērūs (m.), like dŏmĭnŭs, § 19, 1; dīvĕs (base, dīvĭt-), like paupĕr, § 85.

F, 3				
	Singula	r.	Plu	ral.
Nom	. dīvĕs	ĕrŭs	dīvĭtēs	ĕrī

Dat. cĕlĕrī săgittae	cĕlĕrĭbŭs săgittīs
Abl. cĕlĕrī săgittā	celerībus sagittīs

Brevis sermo, short discourse.

Sermõ (m.), base sermõn-, like lěõ, § 26; brěv-is, -ĕ, like tristïs, § 86.

Singular. N.V. brěvřís sermô Acc. brěvem sermônem Gen. brěvřís sermônís Dat. brěvří sermôní	Plural. brěvěs sermôněs brěvěs (or brěvīs) sermônës brěvĭum sermônum brěvĭubůs sermônibůs
Abl. brěví sermôně	brevībūs sermonībūs

Grave onus, heavy burden.

Onus (n.), base oner-, like opus, § 30; grav-is, -e, like tristis, § 86.

Singular. • N.V.A. grave onus Gen. grāvis ŏnĕris Dat. grăvī ŏnĕrī

Plural. grăvĭă ŏnĕră gravium onerum. gravibus oneribus gravibus oneribus

Audax civis, daring citizen.

Abl. grăvī ŏnĕrĕ

Civis (c.), base civ., like hostis, § 31; audax, base audac. like felix, § 86.

Singular. N.V. audax cīvĭs Acc. audācem cīvem Gen. audācis cīvis Dat. audācī cīvī

Plural. audācēs cīvēs audācēs (or -īs) cīvēs (or -īs) audācium cīvium audācībus cīvibus Abl. audācī (or audācĕ) cīvĕ | audācībūs cīvībūs

Ingens specus, enormous cavern.

Specus (m.), like gradus, § 39; ingens, base ingent-, like prūdens, § 86.

Singular. N.V. ingens specus Acc. ingentem specum Gen. ingentis spēcūs Dat. ingentī spěcŭī

Plural. ingentēs spēcūs ingentēs (or ingentīs) spēcūs ingentĭum spēcŭum ingentibus spēcibus Abl. ingentī (or -e) specū | ingentībus specībus

INDECLINABLE ADJECTIVES.

§ 88. These are frugī, of worth (properly dative singular of frux, fruit), nequam, worthless, satis, sufficient; also many numeral adjectives (§ 101), and tot, so many, quot, how many? or as many as, with their compounds (§ 118).

CHAPTER XIII.—COMPARISON OF ADJECTIVES.

§ 89. Adjectives have (where their meaning admits of it) in Latin, as in English, three Degrees of Comparison—Positive, Comparative, and Superlative. These degrees are generally in Latin, as often in English, denoted by means of suffixes: e.g. longus, long; longur, longer; longissimus, longest.

There is, however, this difference between the two languages in the use of the Degrees of Comparison, that whereas in English a standard of comparison is always expressed or distinctly understood (e.g. "longer than this," "longest of all"), in Latin the comparative may denote that the quality exists to a considerable or to an excessive degree, the superlative that it exists to a high degree; thus longior sometimes means somewhat long or too long, and longissimus often denotes very long.

GENERAL RULE FOR THE FORMATION OF THE COMPARATIVE AND SUPERLATIVE.

§ 90. To the base of the Positive add—

-iŏr to form the nom. sing. masc. of the Comparative;
-issĭmŭs •,, ,, Superlative.

All comparative adjectives are declined like longĭŏr (\S 85), and all superlatives like bŏnŭs (\S 80).

EXAMPLES.

Posit (Nom. Sir	ive. ng. Masc.)	Base.	Comparative.	Superlative.
longŭs	long	long-	long-ĭŏr	long-issĭmŭs
tristĭs	sad	trist-	trist-ĭŏr	trist-issīmŭs
fēlix	fortunate	fēlīc-	fēlīc-ĭŏr	fēlīc-issĭmŭs
prūdens	discreet	prüdent-	prüdent-ĭŏr	prūdent-issīm ŭs

CLASSES OF EXCEPTIONS TO THE ABOVE RULE.

& 91. I. The Superlative of adjectives with nom. sing. masc. ending in -cr is formed by adding -rimus to the nom. sing. masc. (The Comparative is formed by adding -ĭor to the base according to the rule.)

EXAMPLES.

Positi (Nom, Sin		Base.	Comparative.	Superlative.
pulchër tënër paupër ācër cëlër	beautiful tender poor sharp swift	pulchr- těněr- paupěr- ācr- cělěr-	pulchr-ĭŏr tĕnĕr-ĭŏr paupĕr-ĭŏr ācr-ĭŏr cĕlĕr-ĭŏr	pulcher-rimus tener-rimus pauper-rimus acer-rimus celer-rimus
Note a				
větŭs	old	větěr-	(větust-ĭŏr)	věter-rĭmŭs

§ 92. II. Adjectives ending in -dicus, -ficus, and -volus form their Comparative and Superlative as if their Positive ended in -dicens (base, dicent-; cp. dico, I say), -ficens (base, ficent-; cp. făcio, I make), -volens (base, volent-; cp. vŏlō, I will).

EXAMPLES.

Base from which Positive. Comp. and Superl. Comparative. Superlative. are formed. măledicus măledicent- măledicent-ior măledicent-issimus slanderous magnificus magnificent-magnificent-ior magnificent-issimus _ magnificent běněvolus běněvolent- běněvolent-ior běněvolent-issimus benevolent Note also-

ĕgēnŭs ĕgentĕgent-ĭŏr ĕgent-issimus needyprovidus provident-ior provident-issimus prövidentforeseeing

§ 93. III. Adjectives with base ending in a vowel (other than u in the combination gu or qu) have no special forms for the Comparative or Superlative; the Comparative is expressed by magis and the Superlative by maxime preceding the positive.

EXAMPLES.

Positiv ė. pĭŭs ardŭŭs	dutiful lofty	Base. pĭ- ardŭ-	Comparative. māgis piŭs māgis ardŭŭs	Superlative. maximē piŭs maximē ardŭŭs
But— pinguĭs antīņuŭs	fat ancient		pingu-ĭŏr antīqu-ĭŏr	pingu-issīmŭs antīqu-issīmŭs

ADJECTIVES IRREGULARLY COMPARED.

§ 94. I. The following six adjectives form their Superlative by adding -limus to the base:—

,			***	à i	C
]	Positive.		Base.	Comparative.	Superlative.
	făcilis	easy	făcil-	făcĭl-ĭŏr	făcil-lĭmŭs
	diffĭcĭlĭs	difficult	diffĭcĭl-	diffĭcĭl-ĭŏr	diffĭcil-lĭmŭs
	sĭmĭlĭs	$li\widetilde{k}e$	sĭmĭl-	sĭmĭl-ĭŏr	sĭmil-lĭmŭs
	dissĭmĭlĭs	unlike	dissĭmĭl-	dissĭmĭl-ĭŏr	dissĭmil-lĭmŭs
	grăcilis	thin	grăcil-	grăcĭl-ĭŏr	grăcil-lĭmŭs
	hŭmĭlĭs	low	hŭmil-	hŭmĭl-ĭŏr	hŭmil-lĭmŭs

Obs. All other adjectives in -ĭlĭs form the Superlative in the ordinary way; e.g. frăgĭlĭs, brittle, frăgĭlissĭmŭs.

\$95. II. Three indeclinable adjectives are thus compared:—
Positive.

Comparative.

Superlative.

frügī of worth frügāliŏr frügālissĭmŭs nēquam worthless sătĭs sufficient satĭus (n.), preferable

Superlative.

Superlative.

Superlative.

Frügāliŏr frügālissĭmŭs nēquissĭmŭs

§ 96. III. The following adjectives have a Comparative and Superlative not formed from the Positive:—

Comparative. Positive. Superlative. bŏnŭs mělĭŏr optimus qoodmălŭs pēiŏr pessimus badmagnus great māiŏr maximiis parvus small mĭnŏr mĭnĭmŭs multŭs much plūrēs (pl.) plūrimŭs dītior or divitior dītissimus or divitissimus dīvēs rich

Note.—Plūrēs is thus declined: N. V. Acc. (masc. and fem.) plūrēs, (neut.) plūrā, Gen. (all genders) plūrīum, Dat. Abl. (all genders) plūrībūs. The singular plūs, Gen. plūrīs, more, is a neuter substantive; the Dat, and Abl. are not in use.

§ 97. IV. The following adjectives have no Positives:—

Obs. Nātū is ablative, and is a substantive used only in that case and denoting birth. Hence nātū mĭnĭmŭs, nātū maxĭmŭs, mean respectively least and greatest by birth.

§ 98. V. The following adjectives, derived from prepositions, are irregularly compared:—

Preposition. Positive. Comparative. Superlative. citra, on this side citerior, nearer citimus dē, down from dēterior, worse dēterrimus exterior, outer { extremus extrā, outside (extěrŭs) infrā, below inferus. lower inferior infīmus or īmus intrā, within interior, inner intimus postrēmus, last post, after (posterus) postěrior, later { postumus, last prae, before prior, former prīmŭs born propior, nearer proximus prope, near sűprēműs, highest, suprā, above superus, upper superior ultrā.beyond ulterior, farther ultimus, farthest,

Note.—Exterus and posterus are regularly declined throughout, all forms except the nom. sing. masc. being in use.

CHAPTER XIV.—THE NUMERALS.

- § 99. The Numerals may conveniently be treated here, though they are not all adjectives.
- (1) There is one numeral substantive: miliă (n.), thousands.
 - (2) There are three series of numeral adjectives:-
 - (a) Cardinal, corresponding to the English series one, two, three, etc.;
 - (b) Ordinal, corresponding to the English series first, second, third, etc.;
 - (c) Distributive, denoting one α-piece, two α-piece, three α-piece, etc.; and also used instead of cardinals in expressions of multiplication, as bis bină (neut. pl.), twice two, and (except singŭli) with substantives plural in form and singular in meaning (§ 58), as bină castră, two camps, binae aedēs, two houses. (But dŭae aedēs, two temples.)
- (3) There is a series of numeral adverbs denoting once, twice, three times, etc.

TABLE OF NUMERALS.

§ 100. In the table on p. 58 a hyphen divides the base from the variable ending of such of the numerals as are declinable. The portions of the table printed in lighter type may be passed over by the beginner.

VARIANT SPELLING.—In some editions of classical Latin writers the ending of the ordinals from 18 upwards is spelt -ensim-us instead of -ēsim-us, and that of the adverbials from 5 upwards -qns instead of -ēs; e.g. vīcensim-us, trīcensim-us, quinquiens, sexiens. Mīl-iš is sometimes (wrongly) spelt mill-iš.

	CARDINALS.	ORDINALS.	DISTRIBUTIVES.	ADVERBS.	
1	ūn-ŭs, one	prīm-ŭs, first	singul-i, one a-	sĕmĕl, once	
2	dŭ-ŏ	secund-us or alter *	bīn-ī [piece		
3	tr-ēs	tertĭ-ŭs	tern-ī or trīn-ī	těr

600	sescent-ī	sescentēsim-vs	sescen-ī	sescenties	
		septingentēsīm-ŭs			
	octingent-i	octingentësim-us	octingen-i	septingenties	
		nongentësim-us		octingentiës	
	millě	millēsīm-ŭs		nongentiës	
		bĭs millēsĭm-ŭs		millĭēs	
2000 au-0 mil-ia bis millesim-us bin-a mil-ia bis millies					

^{*} Alter, second (of two); secundus, second (of a larger number than two).
† Trīnī (not ternī) is used with substantives plural in form but singular in meaning; e.g. trīnae aedēs, three houses.

DECLENSION OF NUMERALS.

§ 101. Cardinals.—Ūnus is declined like nullus (§ 81). The plural is used with substantives plural in form but singular in meaning (§ 58); e.g. ūna castra, one camp.

Duo and tres are thus declined :-

М.	· F.	N.	M. and F.	N.
N.V. dŭŏ	dŭae	dŭŏ	trēs	${f tr}$ iă
Acc. dŭosordŭo		dŭŏ	trēs or trīs	trĭă
$Gen. \begin{cases} \mathbf{d} \mathbf{\check{u}} \mathbf{\check{o}} \mathbf{rum} \\ \mathbf{or} \ \mathbf{d} \mathbf{\check{u}} \mathbf{um} \end{cases}$	dŭārum	dŭōrum	trĭum	
			. ~ ~	
Dat. dŭōbŭs	dŭābŭs		trībŭs	
Abl. dŭōbŭs	dŭābŭs	dŭōbŭs	trĭbŭs	

Note.—Ambo, both, the two, is declined like duo.

The cardinals denoting hundreds from 200 to 900 are declined like the plural of bonus, § 80, except that they usually have genitive plural in -um, not in -orum or -arum; e.q. ducentum.

The other cardinal numerals, viz. 4 to 20, the tens up to 100, and millě, 1000, are indeclinable.

The substantive mīliā (n.) is declined in the plural only:—

N.V.A. mīlia Gen. mīlium Dat. mīlibūs Abl. mīlibūs

- Obs. A declinable numeral qualifying milia must, of course, be in agreement with it, and the substantive dependent on milia is put in the genitive; e.g. tria milia equitum, 3000 horsemen.
- § 102. Ordinals.—These are declined like bŏnŭs (§ 80), with the exception of alter, second (of two), for which see § 81.
- § 103. DISTRIBUTIVES.—These are all declined like bŏnŭs, except that the genitive plural generally ends in -um, not in -ōrum or -ārum; e.g. dēnum. In the singular they are used only in poetry.

On Compounding Numerals.

\$ 104. 21 to 99.—As may be inferred from the preceding table, the smaller number follows the larger without et or precedes it with et; e.g. viginti quinque or quinque et viginti, just as in English we say twenty-five or five-and-twenty.

The two numbers preceding each ten are commonly expressed by prefixing duode-, unde- respectively to it: see 28 and 29 in the table. (De is a preposition denoting from.) Such expressions as viginti octo and octo et viginti occur, but are less usual.

101 and upwards.—The larger number, as a rule, precedes the smaller, and et may be inserted (except in distributives); e.g. duo milia (et) quingenti (et) quadraginta equites or equitum duo milia (et) quingenti (et) quadraginta, 2540 horsemen. (Note that the substantive is not put in the genitive if separated from milia by numerals that do not qualify mīliă.)

Obs. Where unus is used with other numerals it agrees with the substantive in case and gender, but remains singular in number; e.g. fēminīs vigintī ūni or ūni et viginti fēminis, 21 women (dative); ūniŭs et ducentum equitum or ěquitum ducentum unius, 201 horsemen (genitive).

FRACTIONS.

- § 105. (a) Fractions with 1 for numerator are denoted by the ordinal corresponding to the denominator in agreement with pars, part; e.g. dimidia pars, half; tertia (pars). one-third; quarta (pars), a quarter. Pars may be omitted, except after dimidia: half is also expressed by the neuter dīmidium.
- (b) In fractions with a numerator greater than 1, the numerator is expressed by a cardinal, the denominator byan ordinal in agreement with partes understood; e.g. tres septimae, three-sevenths; duae nonae, two-ninths.
- (c) But if the numerator is only one less than the denominator, the latter is not expressed, and partes is added to the cardinal that denotes the numerator; e.g. dŭae partēs, iwo-thirds; trēs partēs, three-quarters; quattuor partes, four-fifths.

For the expression of fractions by means of the parts of the as, see Appendix on Roman Money.

MULTIPLICATIVES.

§ 106. There is an incomplete series of numeral adjectives with the ending -plex (base, -plic-), -fold; the following are in use:—•

simplex, single. quădruplex, fourfold. duplex, double, twofold. septemplex, sevenfold. triplex, triple, threefold. decemplex, tenfold.

All are declined like \bar{f} elix (§ 86), but with \check{I} (not \bar{I}) in the base; e.g. simplex, gen. simplicis.

SIGNS FOR NUMERALS.

§ 107. The use of the letters I, V, X, L, C, D, M to represent respectively 1, 5, 10, 50, 100, 500, 1000 (and, in combination, other numbers) has remained unchanged to the present day and is well known to all. It is only necessary to point out that in some editions of the classics I_O is used instead of D for 500 and CI_O instead of M for 1000.

CHAPTER XV.-PRONOUNS.

§ 108. Under this heading are included many words which do not "stand in place of a substantive," but are either always or sometimes used adjectivally; e.g. měŭs, my (always used adjectivally); idem, the same (used either substantivally or adjectivally).

PERSONAL PRONOUNS.

§ 109. The personal pronouns of the first and second persons, ego, I, and tū, thou, are substantival and of common gender. They are thus declined:—

0 7 0	THE WOLLTON
Singular.	Plural.
Nom. ĕgŏ	nōs
Acc. mē	nōs
Gen. měī	∫nostrī
Det milit /	\nostrum (partitive *)
Dat. mihi or (in poetry) mī	nōbīs
Abl. mē	nõbīs
Singular.	Plural.
$N.V.$ $t\bar{u}$	νōs
Acc. tē	võs
17	
Gen. $f tar uar u$	∫vestrī
70 ×1 ¥	(vestrum (partitive *)
Dat. tĭbĭ	vōbīs `
Abl. tē	võbīs
'	10012

Note 1.—To any of the above forms (except tū) the particle -mět may be added for emphasis, e.g. ěgŏmět; tū is lengthened to tūtěmět.

Note 2.— \mathbf{Vos} is never, like the English you, used of a single person. You, therefore, must always be rendered by the singular ($\mathbf{t\bar{u}}$, etc.) unless it is clear that more than one person is addressed. Nos, however, sometimes denotes I.

^{*} I.e. dependent on a word denoting part, e.g. multi nostrum, many of us.

There is in Latin no pronoun of the third person exactly corresponding to the English he, she, it; but its place can when necessary be supplied by one of the Demonstratives (§ 112).

PERSONAL PRONOUNS—REFLEXIVES.

§ 110. The personal pronouns of the first and second person are used as reflexives; e.g. mē dēfendō, I defend myself; tībī indulgēs, you are indulgent to yourself.

For the third person reflexive there is a special form, viz. sē, himself, herself, itself, themselves, which is thus

declined for both numbers and all genders:-

Singular and Plural.

Acc. sē or sēsē Gen. sŭī Dat. sĭbĭ Abl. sē or sēsē

Possessive Adjectives.

§ 111. These are formed from the personal pronouns, singular and plural:—

From Singular Pronouns. měŭs, měä, měum, my (mine). tǔŭs, tǔǎ, tǔum, thy (thine). sǔŭs, sǔǎ, sǔum, his, her (hers), its.

From Plural Pronouns.

nostěr, nostra, nostrum, our (ours). vestěr, vestra, vestrum, your (yours). sums, sum, their (theirs).

Obs. These adjectives are translated by the English words in brackets when they do not stand as attributes.

Měŭs, tŭŭs, and sŭŭs are declined like bŏnŭs (§ 80), except that měŭs has voc. sing. masc. mī; nostěr and vestěr are declined like nǐgěr (§ 80).

Note 1.—One or other of the particles -mět, -ptě, may be added for emphasis to the abl. sing. of the possessive adjectives; e.g. měōmět, nostraptě.

NOTE 2.—Nostěr is sometimes used as an equivalent for měŭs, just as nos is used for ego; but vestěr never takes the place of tuus.

Note 3.—Suus, being formed from the reflexive sē, generally refers (except, of course, in the nominative) to the subject of the sentence. Hence, if his in a principal sentence refers to the subject of the sentence, we must use suus, -a, -um; if it does not refer to the subject, we must use ēius (genitive of is, čă, id, § 112); c.g. Patrem suum occīdit, He wills his (own) father; Patrem ēius occīdit, He hills his (somebody else's) father.

Note 4.—From noster and vester respectively are formed the adjectives—

nostrās (gen. sing. nostrātīs), of our country; vestrās (,, ,, vestrātīs), of your country; both declined like prūdens (§ 86).

DEMONSTRATIVE PROPOUNS.

§ 112. The Latin demonstrative pronouns are used both substantivally and adjectivally, just as in English we may say either "this (substantival) is true," or "this (adjectival) statement is true."

The demonstrative pronouns are five in number, as follows:—

- (1) hīc, haec, hōc, this; used of that which belongs to, or is near, the speaker.
 - In the paradigm on the next page the forms placed in brackets () are rarely found, and should not be used in translating English into Latin.
- (2) istě, istě, istěd, that (of yours); used of that which belongs to, or is near, the person spoken to.

The demonstrative particle -ce (seen in the declension of hic, haec, hoc) is sometimes added to iste, which is then declined istic, istaec, istuc, as shown in the paradigm.

- (3) illě, illå, illůd, that (yonder); used of that which belongs to, or is near, neither the speaker nor the person spoken to.
- (4) ĭs, ĕã, ĭd, that; used of what has just been mentioned, and (when used substantivally) often to be translated he, she, it.

Īdem, ĕădem, ĭdem, the same, is formed from ĭs, ĕā, ĭd, and the particle -dem. Its declension is given in full after that of ĭs.

(5) ipsĕ, ipsä, ipsum, self, or himself, herself, itself. Ipsĕ ĥas a superlative form ipsissïm-ŭs, -ă, -um, very self declined like bŏnŭs (§ 80). The demonstratives are thus declined:-

Singular.	Plural.

RELATIVE PRONOUNS.

§ 113. The relative pronouns are three in number, viz:—
Quī, quae, quŏd, who, which, that (generally substantival);
Quīcumquĕ, quaecumquĕ, quodcumquĕ, whoever, whatever
(substantival or adjectival);
Quisquĭs, quidquĭd, whoever, whatever (substantival or

guisquis, quidquid, whoever, whatever (substantival or adjectival).

Singular.	Plural.
M. F. N.	M. F. N.
Nom. quī quae quŏd	quī quae quae
Acc. quem quam quŏd	quōs quās quae
Gen. cūiŭs	quōrum quārum quōrum
Dat. eui*	quibus (in poetry also quis)
Abl. $\left\{ egin{array}{ll} \mathbf{q}\mathbf{u}ar{\mathbf{o}} & \mathbf{q}\mathbf{u}ar{\mathbf{a}} & \mathbf{q}\mathbf{u}ar{\mathbf{o}} \\ \mathbf{q}\mathbf{u}ar{\mathbf{i}} & (\mathrm{all\ genders\ ;\ rare\ except} \\ \mathbf{m}\ \mathbf{q}\mathbf{u}\mathbf{c}\mathbf{u}\mathbf{m},\ \$ & 250) \end{array} ight\}$	quibus (in poetry also quis)

^{*} In cui the vowels ui form a diphthong (§ 8). According to the "English" pronunciation cui is sounded like ki in kind.

In the declension of quīcumquě the ending -cumquě (sometimes spelt -cunquě) is invariable, and the first part of the word is declined like the simple relative quī, e.g.:—

M. F. N.
Sing. nom. quīcumquĕ quaecumquĕ quodcumquĕ
" acc. quemcumquĕ quamcumquĕ quodcumquĕ
etc. etc. etc.

Of quisquis the only forms in common use are:— Sing. nom. masc. quisquis, neut. quidquid or quicquid "• abl. masc. and neut. quōquō.

Note.—From the genitive singular of the relative quī an adjective is formed, viz. cūi-ūs, -ā, -um, whose (declined like bŏnūs, § 80).

Interrogative Pronouns.

§ 114. The interrogative pronoun is quis, quae, quid, who? which? what? It is used both substantivally and adjectivally, except in the forms qui (nom. sing. masc.) and quod (nom. and acc. sing. neut.), which are adjectival only.

Examples: Quïs věnĭt? Who is coming? (substantival).
Quī mīlēs vēnĭt? What soldier is coming? (adjectival).
Quĭd vĭdēs? What do you see? (substantival).
Quŏd ănīmāl vĭdēs? What animal do you see? (adjectival).

$Acc.$ quem quam $\left\{ egin{matrix} ext{quid} \\ ext{quod} \end{smallmatrix} \right\}$	quōs quās quae
Gen. cūiŭs Dat. cui	quōrum quārum quōrum quĭbŭs (in poetry also quīs)
Abl. $\left\{ \begin{array}{ll} \mathbf{quar{0}} & \mathbf{quar{a}} & \mathbf{quar{0}} \\ \mathbf{quar{1}} & \left\{ \begin{array}{ll} \mathbf{quar{a}} & \mathbf{quar{0}} \\ \mathbf{quar{1}} & \left\{ \begin{array}{ll} \mathbf{qua} & \mathbf{qua} \end{array} \right\} \end{array} \right\}$	quĭbŭs (in poetry also quīs)

Obs. Except in the forms quis, quid, the interrogative pronoun is identical with the relative.

Quisnam, quaenam, quidnam, who, pray? what, pray? is an emphatic interrogative formed by adding the invariable particle-nam to the simple interrogative.

NOTE 1.—Which (of the two)? is generally expressed by uter (§ 81).

NOTE 2.—From the genitive singular of the interrogative quis two adjectives are formed:—cūi-ūs, -ā, -um, whose? (declined like bonus, § 80); cūi-ās (gen. sing. cūiātis), of what country? (declined like prūdens, § 86); e.g. Cūium est pēcūs? Whose flock is it? (Gūius belongs to colloquial Latin, but is used by Vergil.)

INDEFINITE PROPOURS.

§ 115. The indefinite pronouns are quis, qui, quid, any, and its compounds. This indefinite quis is, generally speaking, used only after nē, lest, num, interrogative particle, sī, if, nĭsĭ, unless, and may be written as one word with any of the first three of these words; thus: nē quis or nēquis, lest any one; num quis or numquis, any one? (like ecquis, § 116, 4); sī quis or sīquis, if any one; nīsĭ quis, unless any one; e.g. Sī quid (or sīquid) hābēt, dāt, If he has any thing, he gives it. Like the interrogative it has the forms qui (nom. sing. masc.) and quod (nom. and acc. sing. neut.), which are adjectival only. These forms appear in some of its compounds even when used substantivally.

Gen. cūiŭs	quōrum	quārum	quõrum
Dat. cui	quĭbŭs (in poetry a	also quĩs)
Abl. quō quā quō		in poetry a	

Obs. Except in the nom. sing. fem. and the nom. and acc. pl. neut. the indefinite pronoun is identical with the interrogative, and even in those cases quae is sometimes used instead of quă.

- \$ 116. The compound indefinite pronouns are numerous. and somewhat confusing; they are best classified by means of their significations according as they imply-
 - all.

 - (2) some (opposed to none),
 •(3) any (with a negative = none),
 - (4) any? (i.e. is there any that . . .?).

These pronouns are used both substantivally and adjectivally, except that in the nom. and acc. sing. of some of them two forms exist-one substantival, the other adjectival-as shown below.

(1) The indefinite pronouns which imply all (though, of course, they are not to be so translated) are:-

quisque, quaeque, quidque or quicque (subst.), quodque (adi.). each.

Unus quisque, each one, is sometimes written as one word, unusquis ne; both parts are declined exactly as if written separatel : e.g. Nom. unusquisque, unaquaeque, unumquidque or unumquodque; Gen. uniuscuiusque.

quilibet, quaelibet, quidlibet (subst.), quodlibet (adi.), any you please.

quivis, quaevis, quidvis (subst.), quodvis (adj.), any you will.

Cp. § 81, Note 2, on the compounds of ŭter.

(2) Under the heading of indefinite pronouns implying some come :--

quidam, quaedam, quiddam (subst.), quoddam (adj.), a certain one, a certain;

ăliquis (no feminine), ăliquid (subst.), some one, some thing (opposed to no one, nothing):

ăliqui, ăliquă, ăliquod (adj.), some:

quispĭam, quaepĭam, quidpĭam or quippĭam (subst.), quodpiam (adj.), some one, some thing, some.

(3) With a negative, and in expressions implying a negative, any is rendered by the indefinite adjective ullus, or (especially where a substantival word is required) by the indefinite pronoun

quisquam, quaequam, quidquam or quicquam, any, any one, any thing.

Example: Nec quisquam venit, And no one comes.

(4) To introduce a question beginning Is there any that..? Are there any who...? numquis (§ 115) may be used, or the interrogative-indefinite pronoun

ecquis (no feminine), ecquid? (subst.), is there any one that . . .?

ecqui, ecquae or ecqui, ecquod (adj.), is there any . . . that?

Examples: Ecquis nos videt? Does any one see us?

Ecquod animal vides? Is there any animal that you see?

§ 117. The variable portion of the above compound indefinite pronouns is declined like the simple indefinite quis or qui, except that (1) the nom. sing. forms are as given above; (2) the nom. and acc. pl. neut. is the same as the nom. sing. fem.; and (3) there is no ablative form qui or quis.

The endings -que, -libet, -vis, -dam, -piam, -quam are invariable. Quidam is declined below as an example:—

		Singular.	ì		Plural.	
	M.	F.	N.	M.	F.	N.
Nom.	quīdam	quadam	{ quiddam } { quoddam }	quīdam	quaedam	quaedam
Açc.	quemdar	n quamdam	{quiddam }	quosdam	quasdam	quaedam
Gen.		cūiusdam				quōrumdam
Dat.		cuidam		q	uĭbusdam	
Abl.	quōdam	quādam	quōdam	d.	uĭbusdam	

Obs. In the above declension **n** is sometimes written instead of **m** before-**d**; e.g. quendam, quandam. Cp. the declension of Idem, § 112.

The Table on the next page is not to be learnt column by column, but across from left to right.

§ 118. Synopsis of Demonstrative, Belative, Interrogative, and Indepinite Pronouns and Adje-Pince (§§ 112—117; also § 81).

			PRONOU	INS.			11
nite.	quidam, a certain one filiquis (subst.), some one filiqui (adi.), some quispiam, some quisquam, ulliss(adi.), song one, any quis (adi. qui.), any (§ 115)	altőrútőr,the one or the other		áliguantüs, of a consider- able size	ăliquantülüs, of a small size		
Indefinite.	quisque, rach quilibêt, any yeu please quivis, any yeu vill	ŭterquó, each ŭterlibët, uchich you please ŭtervīs,achich yeu		quantusvīs, as greatasyouwill			
Interregative.	40,	ŭtër, which of two?	qualls, of what kind?	quantŭs, how great?	quantülüs, how small?	quốt, how many?	*quotus, which (in numerical order)?
Relative.	guïcu guïcu	ŭtŏr, vokick of two ŭteroumquŏ, vokiok- erer	quālis, as quāliscumque, of what kind sorver	quantús, (as great) as quantuscumquĕ, how great soener	quantŭlŭs, (<i>assmall</i>) <i>as</i> quantŭluscumquĕ, <i>kow</i> <i>small soerer</i>	quôt, (as many) as quoteumqué, or quotquot, how many seever	
Domonstrative	hio, this isté (istřo), that (if yours) ille, that (yours) ille, that (youder) s, that; idem, the same, i psé, he himself	Referring to the objects only (§ 404):—	tālīs, such	tantŭs, so great tantusdem, just so great	tantūlūs, so small	tot, so many totiden, just so many	

• Quốtús asks a question answered by an ordinal numeral; e.g. Quốtă pars i What part? (Answer: Tortiă, one-third, etc.). It is often used in conjunction with quisqué, each, to signify have few! e.g. Quốtusquisque (or quốtus quisqué) bổnus est! Hew few few are!

CHAPTER XVI.—REMARKS ON VERBS.

- The beginner should read this chapter before, and also after, learning the conjugation of sum (Ch. XVII.) and the regular verbs (Ch. XVIII.).
- § 119. Latin Verbs have inflections that indicate (1) voice, (2) mood, (3) tense, (4) person, (5) number.
- § 120. (1) Voice. There are in Latin, as in English, two voices, viz. active and passive: e.g. amo, I love; amor, I am loved.

NOTE 1.—The passive of some transitive Latin verbs has a reflexive meaning, and may often be rendered by the intransitive use of the corresponding English verb: e.g. moveo, I move, set in motion, moveor, I move, am in motion; pascit, he feeds, supplies with food; pascitur, it (an animal) feeds, takes food.

NOTE 2 .- Some verbs which are conjugated in the passive only are the equivalents of English active verbs; these are called deponents (§ 171).

§ 121. (2) Mood. There are, properly speaking, three moods: the indicative, the subjunctive, and the imperative. The infinitive, which is in reality a verbal substantive, is often regarded as a fourth mood.

The rules for the use of these moods belong to syntax; but in order that the student may learn intelligently the tables in the following chapters, the various meanings there assigned to the subjunctive are illustrated here.

The subjunctive is used :-

(a) To express a wish or command.

Examples: Vīvăt rēgīnă! (Long) live the queen!

Audiant omnes. Let all hear.

Ŭtĭnam illě ădhūc vīvěrět! Would that he were still alive!

Ŭtĭnam vīcissēmŭs! Would that we had won!

Obs. In the first of these examples the Latin subjunctive is represented by the same mood in English.

(b) In both clauses of some conditional sentences.

Examples: Sī věnĭās, gauděam, If you were to come, I should be glad.

Sī mē adiŭvārēs, gaudērem, If you were helping me, I should be glad.

Sī vēnissem, audīvissem, If I had come, I should have heard.

(c) To express purpose.

Example: Edit ut vivat, { He eats that he may live. He eats to live.

(d) To express consequence.

Example: Ita aeger est ut vix vivat, He is so ill that he scarcely lives.

(e) In clauses introduced by some Latin conjunctions meaning when, although, or since.

Example: Hostes, cum haec audīvissent, se ad proelium paravērunt, When the enemy had heard this, they made themselves ready for battle.

The Latin indicative, imperative, and infinitive are, roughly speaking, equivalent to the English forms similarly named.

§ 122. (3) Tense. The tenses belonging to the several moods, active and passive, are as follows:—

Indicative. Subjunctive. Imperative.
Present Present Present
Imperfect Imperfect
Future Future
Perfect * Perfect

Obs. The tenses marked (*) are in the passive voice formed, similarly to all tenses of the passive in English, from the passive participle and the verb sum, I am. The

participle, being an adjective, must be in the same gender, number, and case as the substantive to which it refers (§ 79).

Examples: Pŭer ămātŭs est, The boy was loved.

Pŭellă ămātă est, The girl was loved.

Pŭeri ămātī sunt, The boys were loved.

Pŭellae ămātae sunt, The girls were loved.

The infinitive has three tenses: present, perfect, and future.

The meaning of the tenses is given in the tables of the regular verbs. It must be noted that the **perfect** has two meanings: e.g. amāvī, I loved or I have loved. The second meaning is the less common of the two, and is therefore, to save needless repetition, omitted in the tables from the conjugation of the perfect subjunctive.

§ 123. (4) Person. There are in Latin special forms in each tense to be used according as the subject is of the first, second, or third person. This is to some extent the case in English also (e.g. I love, thou lovest, he loves); but the Latin forms not only vary according to the person of the subject: they often contain the subject in themselves, especially in the first and second persons, e.g. ămō, I love; ămās, thou lovest; but the pronouns may be inserted for emphasis, e.g. ĕgŏ ămō, tū nōn ămās, I love, thou dost not love. In the third person the subject is frequently expressed by a substantive, but by no means always; thus we may have ămăt, he loves, or she loves, or it loves, according to the context, or Caesăr ămăt, Caesar loves.

Obs. In English the only part of the verb which contains the subject in itself, and accordingly may form a complete sentence, is the imperative, e.g. "Go."

§ 124. (5) Number. The two numbers, singular and plural, are used as in English, except in two points (cp. § 109, Note 2). (i.) The use of plural for singular in the second person, which is common in modern English, never occurs in Latin; e.g. you love is ămās (singular), never (unless more persons than one are addressed) ămātīs (plural). (ii.) The plural is in Latin occasionally used for the singular in the first person; this usage often indicates an affectation of modesty, thus differing from the "royal" we in English.

VERBAL ADJECTIVES (PARTICIPLES).

§ 125. Verbal adjectives or participles are adjectives implying verbal action, the base of the participle indicating the voice and tense of the action. There are four participles, two with active and two with passive meaning, viz.:—

Active {Present participle, declined like prūdens, § 86. Future "Perfect ", Gerundive (in transitive verbs only) " " bŏnŭs, § 80.

The gerundive has two chief usages: (1) as a verbal adjective denoting fitness to be the object of the active verb, e.g. amandus, fit to be loved, lovable; (2) as a substitute for the gerund in what is known as the "gerundive attraction," the rules of which will be found in the Syntax.

VERBAL SUBSTANTIVES.

§ 126. Certain verbal substantives (i.e. substantives implying verbal action) are usually appended to the conjugation of a Latin verb.

These are:—(1) the Gerund;

- (2) the Supine;
- (3) the Infinitive.
- § 127. (1) The gerund is an abstract substantive of neuter gender declined (like regnum, § 19) in the singular only; it expresses the action denoted by the verb, e.g. amandum, loving, i.e. the act of loving, and corresponds to the English gerund, a verbal noun in -ing (e.g. "I take exercise by walking"), which originally ended in -ung, and so was distinct in form from the present participle with which it is now often confounded. The nominative of the gerund is not, as a rule, found except in the case of intransitive verbs; it is therefore included in brackets () in the tables of the regular conjugations.
- § 128. (2) The supine is the name given to two cases (accusative and ablative singular) of a masculine verbal substantive (declined like grădus, § 39), which is in meaning similar to the gerund, though differently used. The accusative supine is found, after verbs of motion, to denote the purpose or goal of that motion (e.g. ĕō audītum, I go to hear), just as the English gerund is used e.g. in I go fishing (formerly I go a-fishing). The ablative supine is in common use only in the case of certain verbs, but for the sake of uniformity it is given in all the tables of conjugation.

The other cases of the verbal substantives of which the supine is the accusative and ablative singular exist in many instances, but are never included in the conjugation of the verb; e.g. auditus (nominative), hearing, the act or sense of hearing.

§ 129. (3) The infinitive is distinguished from the other verbal substantives (a) in being indeclinable and (b) in possessing forms expressive of voice and tense, as follows:—

Active.	Passive.
PRESENT. Special form	Special form
Past. ,, ,,	Past participle + esse (to be)
FUTURE. Future participle	Accusative supine + īrī
+ esse (to be)	

Note.—Īrī, used in the phrase which serves as the future infinitive passive, is the present infinitive passive of čō, I go (§ 214), used impersonally, and the supine expresses the act which is the goal of that motion; e.g. Sentiō rēgīnam ămātum īrī, I perceive that it is (lit. I perceive it to be) being gone about to love the queen, i.e. I perceive the queen to be about to be loved.

THE THREE BASES OF A VERB.

§ 130. In order to conjugate a verb it is necessary, as in the declension • of substantives, to ascertain the base to which the inflections are to be added. In a verb these inflections denote voice, mood, tense, person, and number.

§ 131. Latin verbs, except deponent (§ 171) and defective verbs, have three bases, from one or other of which all their various parts are formed, viz. (1) the present base, (2) the perfect base, (3) the supine base.

The present base is found by cutting off the last three letters of the present infinitive active, which are always either -ārē, -ērē, -ērē, or -īrē; e.g. the present base of ămō, which has present infinitive active ămārē, is ăm-.

Obs. In a few irregular verbs the infinitive ends otherwise and there is then no single "present base.'

To find the perfect base cut off the final -ī of the first person singular perfect indicative active, and to find the supine base cut off the final -um of the accusative supine; e.g. the perfect base of ămō is ămāv- and the supine base ămāt-, the first person singular perfect indicative active and the accusative supine being respectively ămāvī and ămātum.

§ 132. These three forms—

(1) Present infinitive active,

(2) Perfect indicative active (first person singular),

(3) Supine (accusative), together with the present indicative active (first person singular), are called the principal parts of a verb, and must be known before a verb can be conjugated (\$ 136).

§ 133. The following table shows from which of the three bases each part of a Latin verb is formed:—

			Indicative.	Subjunctive.	Imperative.	Verbals.
Present Reve	A LOBOLL VIOLES	Present Imperfect Future	Act. & Pass.	Act. & Pass.	Act. & Pass.	Pres. Part. Gerundive Pres. Inf. Act. & Pass. Gerund
Dowfoot Rose	T el leur Dane	Perfect Pluperfect Future Perf	22	Active		Perf. Inf. Act.
Cuning Boog	eandine pase	Perfect Pluperfect Future Perf	Passive	Passive	Parameter Section 1	Perf. Part. (and Inf.) Pass. Fut. Part. (and Inf.) Act. Supine (& Fut. Inf. Pass.)

CHAPTER XVII.—THE VERB SUM.

§ 134. The conjugation of this verb, though irregular, is given before that of the regular verbs, as it serves as an auxiliary in the conjugation of the latter.

PRINCIPAL PARTS (§ 132): sum, esse, fu-i, (no supine).

* Participles Present: none. Future: fŭtūrŭs, fŭtūrā, fŭtūrum.

 § 208, and for its compounds, see §§ 209, 210.
```

CHAPTER XVIII.—THE FOUR REGULAR CONJUGATIONS.

EXTENT OF THEIR DIVERGENCE.

§ 135. A Latin verb belongs to one or other of four conjugations, i.e. it has in such parts as are formed from the present base (§ 133) inflections similar to one of the four model verbs given in this chapter. In those parts which are formed from the perfect base or the supine base all verbs add the same inflections to those bases, though the formation of the bases themselves varies.

Obs. A few verbs belonging to the third conjugation have some forms according to the fourth conjugation (§ 170), and a very few are so irregular as not to be usually classed with any one of the four conjugations.

The four conjugations are distinguished by the ending of the present infinitive active, which is

in the first conjugation -Ārĕ (A conjugation)

,, second ,, -Ērĕ (E ,,) ,, third ,, -ĕrĕ (consonant conjugation)

" fourth " -Īrĕ (I conjugation)

FORMATION OF THE PERFECT AND SUPINE BASES.

§ 136. From what has been said above (§ 135) it follows that, if the present infinitive active of a regular verb is known, all parts of the verb formed from the present base can be ascertained by reference to one of the model verbs.

To form any other parts of a verb, it is necessary to know the perfect base or the supine base. These bases cannot, in the case of verbs of the third conjugation, be ascertained from the present base by any rule; but the perfect and supine of each verb of this conjugation must be committed to memory. A list is given in §§ 189, 190.

In the case of verbs of the other three conjugations, the perfect and supine bases are, with some exceptions (§§ 187, 188, 191), regularly formed from the present base as follows:—

	Giver Present found by of from pres.	t Base, outting off	Per	fec o th	nd the t Base, se present		upir	ind the 1e Base, present base
First Conjugation Second Conjugation Fourth Conjugation	-ārē, as fro -ērē, ,	mŏn-ērĕ	-ŭ-,	,,	mŏn-ŭ-ī	-ĭt-,	"	năm-āt-um mŏn-ĭt-um aud-īt-um

In committing to memory the four regular conjugations the learner should notice the following points:—

PRESENT INDICATIVE AND IMPERATIVE.

§ 137. In the present indicative and in the imperative the characteristic vowel (i.e. A in the first conjugation, E in the second, and I in the fourth) occurs throughout, after the first person singular. In the third conjugation the place of a characteristic vowel is taken by ĕ, ĭ, or u.

IMPERFECT INDICATIVE.

§ 138. The imperfect indicative ends in -bam, -bās, etc., in the active, and in -bar, -bāris, etc., in the passive, in all four conjugations, though the vowel preceding the b varies.

FUTURE INDICATIVE.

§ 139. The future in the second conjugation resembles that in the first, except in the characteristic vowel; in the third conjugation the future is quite differently formed, and the future of the fourth conjugation resembles that of the third.

PERFECT INDICATIVE ACTIVE.

§ 140. In the perfect indicative active the third person plural termination -ērĕ is chiefly used in poetry.

PRESENT SUBJUNCTIVE.

§ 141. In the third and fourth conjugations the present subjunctive is, in the first person singular, the same as the future indicative; in succeeding persons the future indicative has e, the present subjunctive a.

IMPERFECT SUBJUNCTIVE.

§ 142. The imperfect subjunctive (first person singular) may always be found by adding m for the active and r for the passive to the present infinitive active; and the pluperfect subjunctive active may be found by adding m to the perfect infinitive active.

PERFECT SUBJUNCTIVE ACTIVE.

§ 143. The perfect subjunctive active is always (except in the first person singular) identical in form with the future-perfect indicative active.

FORMATION OF PASSIVE FROM ACTIVE.

\$ 144. The passive (first person singular) of any tense formed from the present base may be found by adding r to the active, after the final m (if any) of the active has been dropped.

SECOND PERSON SINGULAR PASSIVE.

§ 145. The second person singular in tenses of the passive which are formed from the present base ends in -re more commonly than in -ris, except in the present indicative; in that tense the ending -re is so rare that it has not been included in the tables. (The preference for -ris in the present indicative is due to a desire to avoid confusion with present infinitive active.)

MARKS OF QUANTITY.

§ 146. Attention must be paid to the marks of quantity over the terminations. In some instances the quantity is the only difference between two entirely different parts of the verb; e.g. regere is present infinitive active (to rule) or present imperative passive (the ruled), whereas regere is future indicative passive (thou wilt be ruled).

ENGLISH EQUIVALENTS.

§ 147. (i.) In the English translation of the second-person forms In the tables *thou* and *ye* are used for the sake of distinguishing singular and plural; the natural rendering is, of course, *you* for both numbers.

(ii.) The English renderings given in the following tables are by no means the only ones of which the several tenses admit; e.g. moneo may be rendered either I advise or I am advising; moneor, I am advised or I am being advised.

(iii.) Various meanings are assigned to the subjunctive in order that the learner may not be misled into attempting to render this mood into English without regard to the context.

The translations in the paradigm, supplemented by § 121, will suffice until the syntax of the complex sentence is reached, if the following additional renderings in the present subjunctive are borne in mind in the case of each verb:—

ăm-ēt, let him love
am-ētŭr, let him be loved

ăm-ēmūs, let us love ăm-ent, let them love ăm-ēmūr, let us be loved ăm-entūr, let them be loved

$\$ 148. FIRST (OR A) CONJUGATION.—ACTIVE VOICE.

• Model: ămō, I love, I like.

ALTERNATIVE FORMS OF VERBS (ACTIVE).

- § 152. Imperfect Indicative.—In the fourth conjugation is occasionally found instead of is before the b; e.g. audibant is sometimes used for the ordinary form audisbant.
- § 153. Tenses formed from the Perfect Base.—Most verbs of which the perfect base ends in \mathbf{v} have also a shorter form of their perfect tenses without the \mathbf{v} . In such forms the absence of \mathbf{v} leads (except in the case of ie, and sometimes of ii) to a contraction of vowels in which the latter vowel disappears: e.a.—

	PP				
-		First Conju Longer	gation. Shorter	Fourth C	lonjugation.

"	Plupf.	ămāvissem	ămassem	audīvissem	∫audĭissem {audissem
Inf. F		ămāvissě	ămassĕ	audīvissē	∫audĭissĕ {audissĕ

Obs. 1. The shorter forms are hardly ever found in the perfect indicative (1) in the first person, singular or plural, (2) in the third person singular of the first conjugation, (3) in the third person plural ending in -re in the first conjugation, as a form such as amare (for amavere) would not be distinguishable from the present infinitive. In other tenses the shorter forms occur in all three persons both singular and plural.

Obs. 2. Where no contraction of vowels takes place in the shorter forms, i.e. with ie and sometimes with ii, the former vowel is short; e.g. audiere (longer form audivere), audiit (longer form audivit).

§ 154. Future-Perfect Indicative and Perfect Subjunctive.—In the first person plural and the second person singular and plural of these tenses the i following the r in the suffix is in the tables marked short (e.g., andiverimus, audiveris, audiveritis), and it is usually so pronounced. This i is, however, occasionally found long; e.g. from audio we have in one passage audieris (= audiveris), and in other places forms occur corresponding to audiverimus, audiveritis.

§ 155. Gerund.—For the ending -undum, see § 161.

Additional Tenses of Verbs (Active).

§ 156. The future participle of any verb may be used with the indicative or subjunctive or the infinitive (present or perfect) of the verb sum, I am, as shown below.

to be about to be heard

ALTERNATIVE FORMS OF VERBS (PASSIVE).

§ 161. Gerundive. In the third and fourth conjugations the terminations -und-us, -und-us, are sometimes used instead of -end-us, -und-us; thus we find regundus for the more usual regendus, and forms corresponding to audiundus instead of to audiendus.

[A similar variation is found in the gerund; e.g. pětundî (genitive), from pětō, I seek; věnĭundum (nominative), from věnĭō, I come.]

§ 162. Phyperfect Subjunctive.—This tense consists of the perfect participle of the verb and the imperfect subjunctive of sum. On reference to § 134 it will be seen that the latter has two forms, essem and forem, esses and fores, etc. Either of these may be used in the formation of the pluperfect subjunctive, though only the more usual form (essem, etc.) is, to save space, given in the preceding tables.

Thus, the pluperfect subjunctive passive of amo may be

conjugated as follows:-

ămāt-ŭs főrem, I should have been loved

ămāt-ŭs főrēs, thou wouldst have been loved

ămāt-ŭs főrět, he would have been loved

ămāt-ī fórēmus, we should have been loved would have been loved have been loved have been loved have

§ 163. Present Infinitive.—A longer form, common in early Latin, is occasionally found in the poetry of the classical age; it consists of the ordinary present infinitive passive (of which the final \(\bar{\bar{\chi}}\) is shortened) and the syllable -\(\bar{\chi}\)r. The following are examples:—

	Present Indic. Act.		Pres. Inf. Pass.	Ŧ	res. Inf. Pass. (old form).	
•	First cūr-ō, Conjugation laud-ō,	I care for I praise	cūr-ārī laud-ārī		cūr-ārĭĕr laud-ārĭĕr	
	Second (immisc-eo, Conjugation torqu-eo,	$I \ minyle \ I \ twist$	immise-ērī torqu-ērī		immisc-ērĭĕr torqu-ērĭĕr	
	Third {admitt-ō, Conjugation defend-ō,	I admit I defend	admitt-ī dēfend-ī		admitt-ĭĕr dēfend-ĭĕr	
	Fourth (moll-ĭō, Conjugation (rĕpĕr-ĭō,	I soften I find	moll-īrī rēpēr-ī rī	•	moll-īrĭĕr rĕpĕr-īrĭĕr	

ADDITIONAL TENSES OF VERES (PASSIVE).

§ 164. The perfect participle is frequently found in combination with one or other of those portions of the verb sum, I am, which are formed from the perfect base, as shown below. To illustrate the exact meaning of these tenses (to which no special names have been given), it will be convenient to take, instead of one of the model verbs conjugated in this chapter, the verb

păr-ō, păr-ārĕ, părāv-ī, părāt-um, I make ready, which has perfect participle părāt-us, ready or made ready.

INDICATIVE MOOD.

WITH THE PERFECT TENSE.

părāt-ŭs fŭī, I was ready părāt-ŭs fŭistī, thou wast ready părāt-ŭs fŭĭt, he was ready părāt-ī făimās, we were ready părāt-ī făistis, ye were ready părāt-ī făērant or făērē, they were ready

WITH THE PLUPERFECT TENSE.

părāt-ŭs fŭĕram, I had been ready. etc. etc.

WITH THE FUTURE-PERFECT TENSE.

părāt-ŭs fŭĕrō, I shall have been ready. etc. etc.

SUBJUNCTIVE MOOD.
WITH THE PERFECT TENSE.
părāt-ŭs fǔērim.

WITH THE L'LUPERFECT TENSE. părāt-us fuissem, I should have been ready.

INFINITIVE.

WITH THE PERFECT TENSE: părăt-us fuisse, to hace been ready.

Obs. The perfect participle with perfect indicative of sum is never used by the best writers as the equivalent of the perfect participle with the present indicative of sum, e.g. părâtůs fúl means I was ready. never (like părâtůs sum) I was made ready or I hare been made ready.

But the other tenses given above, though they have the assigned meanings where the sense admits it, are often respectively equivalent to the forms given in the tables (§§ 157-160), $\iota \eta$.:—

ămātŭs fŭĕram = ămātŭs ĕram | ămātŭs fŭĕrim = āmātŭs sim ămātŭs fŭĕrō = āmātŭs ĕrō | ămātŭs fŭissem = ămātŭs essem ămātŭs fŭissě = ămātŭs essĕ.

§ 165. Future-Perfect Infinitive. — This consists of the perfect participle followed by fore (future infinitive of sum); c.g amat-us fore, to be about to have been loved.

VERRAL SUBSTANTIVES						

VERBAL SUBSTANTIVES.

INFINITIVE.

PRESENT : cap-ī, to be taken.

PERFECT: capt-us esse, to have been taken. FUTURE: captum īrī, to be about to be taken.

All verbs of the third conjugation (i.e. with pres. inf. act. ending in -ērē) which in the pres. indic. act. end in -io are conjugated like capio, as also are deponents of the third conjugation ending in -ior. A list of these verbs is given in §§ 190, 195.

Obs. Căpio is conjugated like audio in those parts in which the i of audio is followed by a vowel, i.e. in which the i is short (i); in other parts căpio is conjugated like rēgo.

CHAPTER XX.—DEPONENT VERBS.

§ 171. As already stated (§ 120, Note 2), some Latin verbs which are conjugated in the passive only are the equivalents of English active verbs; such verbs are called deponents, because they were considered by the old grammarians to lay aside (deponere) their passive meaning.

It is not in all cases clear what was originally the force of the passive form in these verbs, but in many of them it was evidently reflexive, e.g. amplector, I embrace, i.e. twine myself around (from plecto, I plait, and the prefix ambi-,

around), glöriör, I boast, i.e. glorify myself.

But whatever the origin of the deponent verbs may have been, they are for all practical purposes equivalent both in force and in usage to active verbs, either transitive (as amplector) or intransitive (as glorior).

- § 172. The existence in early Latin of an active form of many verbs which were deponent in classical times accounts for the first and second at least of the following non-deponent parts which belong to all deponent verbs:—
 - (1) Present Participle

(2) Future Participle (and consequently Future Infinitive) active in form,

(3) Gerund

(4) Supine

(5) Gerundive

passive in meaning.

For examples, see §§ 178—181.

Note.—In some deponent verbs the perfect participle is sometimes passive in meaning; e.g. věněrěr, I worship, has perfect participle věněrātůs, worshipped (passive), or having worshipped (deponent).

§ 173. There are four conjugations of deponent verbs resembling those of regular passive verbs (§§ 157—160, § 163), with the addition of the aforesaid forms from the corresponding active conjugations. Models are given in §§ 178—181.

Three deponent verbs and their compounds (§ 195) are conjugated like căpiŏr (§ 170).

- § 174. Deponent verbs have no perfect tenses active in form, and consequently no perfect base; all their tenses are formed from the present and supine bases in the same way as the tenses of the passive voice of regular verbs (see § 133). The supine base of deponent verbs of the first, second, and fourth, conjugations is formed from the present base in accordance with rules given in § 136 for active verbs, except in the case of the deponents enumerated in §§ 193, 196. The supine bases of deponents of the third conjugation must be learned from §§ 194, 195.
- § 175. The alternative forms and additional tenses of passive verbs mentioned in §§ 161—164 are found also in deponent verbs.

§ 176. SEMI-DEPONENTS.

Four verbs are deponent in their perfect, pluperfect, and future-perfect tenses only (including perfect infinitive and perfect participle), viz.:—

	Pres. Indie		Pres. Inf.	Perf. Indic.
C	aud-ĕō,	I dare I rejoice I am accustomed	aud-ērĕ	aus-ŭs sum
Second	gaud-ĕō,	I rejoice	gaud-ër ë	gāvīs-ŭs sum
Conjugation	sŏl-ĕō,	I am accustomed	sŏl-ērĕ	sõlit-üs sum
Third Conj.			fīd-ĕrĕ	fīs-ŭs sum
So also the	compoun	ds confido, I trust,	and diffido,	I distrust.

§ 177. PERFECT PARTICIPLES WITH ACTIVE MEANING.

```
Pres. Inf.
                                           Perf. Part.
         Pres. Indic.
First (cen-o.
                              cēn-ārĕ
                                          cenāt-us, having dined
                    I dine
         iūr-ō,
                                          iūrāt-ŭs, having sworn
                    I swear iūr-ārĕ
Conj.
                                           pot-us, drunk (act. or pass.)
        pōt-ō,
                   I drink pot-are
         plac-ēē, I am
                                           placit-us, having pleased
                              plăc-ērě
Second
             pleasing
Conj.
         prand-ĕō, Ilunch prand-ērĕ prans-us, having lunched
        cresc-ō, I grow cresc-ĕrĕ crēt-ūs, sprung
suesc-ō,* I become suesc-ĕrĕ suēt-ūs, accustomed
Third
```

And some others, from intransitive verbs; e.g. adultus, grown vr, from adolesco, I grow up; nupta, married, from nubo, I am married (to a man).

- Obs. It is only the perfect participle of these verbs that is deponent; the perfect tenses of the indicative, subjunctive, and infinitive are active in form as well as meaning, e.g. cēnāvī, iūrāvī.
 - * Su is in this verb pronounced as sw in sucet. See § 8.

§ 178. DEPONENT VERBS.—FIRST CONJUGATION. Model: hortor, I exhort.

PRINCIPAL PARTS: hort-ārī, hortāt-ŭs sum. Bases r hort- (present); hertat- (supine).

CHAPTER XXI.—PRINCIPAL PARTS OF VERBS.

§ 182. In order to conjugate a Latin verb, it is necessary to know (1) to which conjugation it belongs, and (2) its present, perfect, and supine bases. The conjugation is shown by the ending of the present infinitive active (§ 135), and the three bases are ascertained from (a) the present infinitive active, (b) the perfect indicative active, (c) the accusative supine (§ 131). It is also necessary, in order to distinguish verbs conjugated like căpiō (§ 170) from other verbs of the third conjugation, to know the present indicative active (first person singular).

Deponent verbs have, as explained in § 174, present and

supine bases only.

- § 183. The perfect base is formed from the verbal stem * in six different ways, viz.:—
- A.—By reduplication, *i.e.* by means of a prefix consisting of the first consonant of the verb and a short vowel (the vowel being **e** or that of the first syllable of the verb).;
- B.—By vowel-lengthening ($\check{\mathbf{a}}$ becoming $\check{\mathbf{e}}$, unless ∇ follows);
- C.—By the addition of s, which combines with a preceding c or g into x;
 - D.—By the addition of v preceded by a long vowel;
 - E.—By the addition of ŭ.
- F.—The remaining form of the perfect base is that in which it is identical with the present base, or (§ 189, F.) with the verbal stem.
- * The verbal stem is often, but by no mean always, identical with the present base. Thus the verbal stem of frango (§ 189, B) is frage, from which are formed the present base frange, the perfect base frage, and (by change of g to c before t), the supine base fract. This "verbal stem" is of no practical importance to the learner, but its existence affords an explanation of forms otherwise unintelligible.

- § 184. The supine base is formed from the verbal stem by the addition of (1) t (sometimes it) or (2) s; the latter combines with a preceding c or g into x. The more usual ending of the supine base is t; s is, generally spraking, found when the verbal stem ends in d or t. (The supine may often be remembered by the help of an English derivative; e.g. "caution," "motion," "vote," from caveo, moveo, voveo respectively, § 188, B.)
- § 185. The following list contains all common verbs of the third conjugation, and those verbs of the first, second, and fourth conjugations which form their perfect and supine differently from amo, moneo, and audio respectively; except—
- (a) Inceptive verbs formed from simple verbs which are in use (§ 284), the perfect and supine of these, if they exist, being the same as the perfect and supine of the simple verb;
- (b) Compound verbs which contain the simple verb unchanged in form, but drop the reduplication (if any) in the perfect, e.g.—

Simple verb: dūc-ŏ -ĕrĕ dux-ī duct-um lead compound verb: abdūc-ō -ĕrĕ abdux-ī abduct-um lead away

Simple verb: pell-ō -ĕrĕ pĕpŭl-ī puls-um drive compound verb: impell-ō -ĕrĕ impŭl-ī impuls-um drive on

But one compound at least is given of verbs which when compounded change in form or retain the reduplication in the perfect. Compound verbs of which the simple forms are not in use, e.g. abnuo, I refuse, are also given.

For the changes undergone by prepositions in composition, see § 292; for yowel change in compound verbs, see § 293.

§ 186. In this list the verbs of each conjugation are classed according to the formation of their perfect base, and in each class the verbs with supine base ending in s (if any) follow those with supine base ending in t.

The student should learn the principal parts as here arranged, and later on test his knowledge by the alphabetical list in Ch. XXVI. Beginners may confine their attention to verbs printed in dark type.

§ 187.

FIRST CONJUGATION.

A.—Perfect formed by reduplication.

Present Indic. d-ō* (§§ 222, 223) Compounds belong to 3rd conj (§ 189, A.), excep	•	Perfect děd-ī	Supine. dăt-um	give

```

CHAPTER XXII.—IRREGULARITIES IN THE CONJUGATION OF VERBS.

§ 199. Verbs with Forms belonging to Two Conjugations.

(1) Lăvō, I wash (1st conj.), has in poetry pres. infin. act. lăvĕrĕ, and some persons of the pres. indic. act. (e.g. lăvĭt) from a 3rd conjugation stem.

(2) **Ferveo,** I am boiling (2nd conj.), and fulgeo, I gleam (2nd conj.), have similarly in poetry fervere and fervet, fulgere and fulget.

(3) Strīdeo, I creak (2nd conj.), and strīdo (3rd conj.), are both in

common use.

(4) Cĭĕō, I arouse (2nd conj.), has a 4th conjugation form cĭō, which is rarely used in the simple verb, but is the common or only form in the compounds. The supine (cĭtum) retains i short in the compounds, except in accĭō, I summon (supine accītum); excĭō, I call forth, has excĭtum or excītum. The imperfect indicative often ends in -ībam (§ 152).

(5) Öriör, I rise (4th conj.), has in pres. indic. ŏrĕrĭs, ŏrĭtŭr, ŏrïmŭr, and in imperf. subj. ŏrĕrētŭr, ŏrĕrentŭr, both in the simple verb and in the compounds, the fourth conjugation forms of these

parts being rarely found.

(6) Pŏtĭŏr, I get possession (4th conj.), similarly has in pres. indic. pŏtĭtŭr, and in imperf. subj. pŏtĕrētŭr, pŏtĕrēmŭr, pŏtĕrentŭr.

§ 200. OLD FORMS OF THE FUTURE-PERFECT INDICATIVE AND PERFECT SUBJUNCTIVE.

In the older Latin writers many verbs have a future-perfect formed by the addition of -assō to the present base in the first conjugation, -sō in the third conjugation, and -essō or -sō in the second; also a perfect subjunctive formed by the addition of -assim to the present base in the first conjugation, -sim in the third conjugation, and -essim or -sim in the second. The two tenses are identical in form except in the first person singular.

First Conjugation: lev-asso (lev-o, lighten), adolar-assis (adolar-o,

make clear), rog-assint (rog-o, ask);

Second Conjugation: prohib-essit (prohib-eo, hinder), au-sim (aud-eo, dare, d being dropped before s);

Third Conjugation: faxo (indic.), faxim (subj.), faxis, faxit, faximus, faxitis, faxint (fac-io, make, dv, cs becoming x).

Făcio is the only verb of which all these forms exist; such parts of

other verbs as occur are similarly conjugated.

In classical times only faxo, faxis, ausim, ausis were in common use. They should not be used by the learner in writing Latin prose,

§ 201. VERBS WITH PERFECT BASE ENDING IN V.

For the shorter form of tenses formed from the perfect base of verbs with perfect ending in -āvī or -ēvī, see § 153. Many verbs with perfect ending in -ēvī or -ēvī have similar short forms; e.g.:—

```
flestī = flēvistī (flēō, wrep)
dēlērunt = dēlēvērunt (dēlēō, destroy)
implērāt = implēvērat (implēō, fill)
adsuērint = adsuēvērint (adsuescō, be wont)
quĭessem = quĭēvissem (quĭescō, rest)
nosem = novistī
norāt = novistī
norāt = noverāt
n
```

Similarly, in compounds of moveo, set in motion, we find though the v belongs to the verbal stem, admorant (=admoverunt), commosse (=commovisse), etc.

In the first person singular of the perfect indicative active, desiro, desist, always has desir, and peto, seek, has petor or peto. Petoit (cp. iit, \$214) is occasionally contracted to petit.

§ 202. SHORT FORMS OF VERBS WITH PERFECT BASE IN S.

The following and similar forms are occasionally found in poetry:—

```
say (in prose also)
         for dixisti.
                           from dīcō
dixtî
          " ēvāsistī.
                                ēvādō
                                        go out
ēvastī
                            **
          ., traxissě.
                                trăhô
                                        draw
traxĕ
                            72
                                ērēpō
                                        crawl out
ērepsēmus "ērepsissēmus "
```

§ 203. IMPERATIVE PRESENT WITHOUT FINAL VOWEL.

In the second person singular of the present imperative active, the three following verbs—dicō, say; dūcō, lead; fāciō, make, do—have respectively dīc, dūc, fāc, the final -ŏ being dropped. This applies to the compounds dīcō and dūcō, and to compounds of fāciō which retain a in the present base: other compounds are regular, e.g. afficiō, affect, has imperative afficē.

§ 204. FUTURE PARTICIPLES NOT FORMED FROM SUPINE BASE.

Present Indic. iŭv-ö sŏn-ō parc-ō haur-ĭō frŭ-ŏr	Infinārē -ārē -ērē -īrē	Supine. iūt-um sŏnĭt-um haust-um Perf. Part. fruct-ŭs	Future Participle. iŭvātūr-ŭs delight sŏnātūr-ŭs sound parsūr-ŭs be sparing (hausūr-ŭs) haustūr-ŭs frŭĭtūr-ŭs enjoy oneself
	-ī -ī -īrī		

\$ 205. GERUNDIVE OF INTRANSITIVE VERBS.

Only transitive verbs, as a rule, have a gerundive. Four intransitive verbs, which were transitive in early Latin, retain their gerundive in the classical period; these are fruor, fungor, potior, ūtor, which were used transitively with the meanings respectively of enjoy, perform, obtain, use.

CHAPTER XXIII.—IRREGULAR VERBS.

§ 206. Under this heading are included verbs in which the tenses formed from the present base (§ 133) do not all conform to any one of the models given in the foregoing pages, viz. :-

I. Sum, I am, and its compounds. II. Volo, I will, am willing, with its two compounds nolo, I will not, am unwilling; mālo, I am more willing, prefer.

III. Fero, I bear, and its compounds.

IV. Eō, I go, and its compounds; also queō, I am able, and nĕquĕō, I am unable, conjugated like ĕō.

V. Fio, I become, and its compounds.

VI. Edő, I eat, and two compounds. *

VII. Do, I give, and its compound circumdo.

I.—SUM AND ITS COMPOUNDS.

§ 207. The ordinary forms of this verb are given in § 134 (pp. 78, 79).

Obs. After a word ending in a vowel or m, est is in many editions of the classics printed st, either attached to the preceding word or separately; e.g. visast or visa st = visa est (she has been seen), děcorumst or děcorum st = děcorum est (it is seemly). This represents what was probably the pronunciation.

§ 208. Present Subjunctive.—The following forms belong chiefly to early Latin :-

SINGULAR: sĭem sĭēs sĭĕt PLURAL (3rd person): sient fiiam fŭās fŭăt fŭant

§ 209. Compounds.

The following are conjugated like sum:

Present Indic.	Present Infin.	Perfect.	
ab-sum	ăb-essĕ	āfŭ-ī	am absent
ad-sum	ăd-essĕ	affŭ-ī	am present
dē-sum	dē-essĕ	dēfŭ-ī	am wanting
in-sum	ĭn-essĕ	ınfŭ-ī	am in
inter-sum	inter-esse	interfŭ-ī	am in the midst
ob-sum	ŏb-essĕ	obfŭ-ī	am harmful
prae-sum	prae-essĕ	praefŭ-ī	am in command
prö-sum	prod-essě	pröfŭ-ī	am beneficial
sub-sum	sŭb-essĕ		am under
sŭper-sum	sŭpër-essë	sŭperfŭ-i	am left

Note 1.—Prosum retains d (§ 292, Note) before e; e.g. the present indicative is

prō-sum prő-sűműs prod-ĕs prod-estis prod-est pro-sunt

Similarly prosum has imperfect indicative proderam, future indicative prodero, etc.

Absum generally has a-instead of ab- before f: e.q. afui, afore.

NOTE 2 .- Absum has a present participle absens (gen. absent-is), absent, and praesum has a present participle praesens (gen. praesent-is), present. These are the only compounds in which a present participle of sum is found.

§ 210. Possum, I am able, I can (consisting of the base of the adjective pot-is, able, + sum), is conjugated as follows :--

PRINCIPAL PARTS: possum, posse, potu-i.

PRESENT PARTICIPLE (used as adjective only): potens (gen. potent-is), powerful.

Potome mall Tr. confluent	
INDICATIVE MOOD.	SUBJUNCTIVE MOOD.
PRESENT. (I am able.)	PRESENT. (I should be able.)
pos-sum pos-sümüs pŏt-ës pŏt-estïs pŏt-est pos-sunt	pos-sim pos-sīmūs pos-sīs pos-sītīs pos-sīt pos-sint
IMPERFECT. (<i>I was able.</i>) pŏt-ĕrām pŏt-ĕrāmŭs pŏt-ĕrās pŏt-ĕrātĭs pŏt-ĕrāt pŏt-ĕrant	IMPERFECT. (I should be able.) pos-sem pos-sēmus pos-sēs pos-sētis pos-sēt pos-sent
FUTURE. (<i>I shall be ahle.</i>) pŏt-ërō pŏt-ërĭmüs pŏt-ërĭs pŏt-ërĭtïs pŏt-ërĭt pŏt-ërunt	PERFECT. pŏtŭ-ĕrim, etc. PLUPENFECT. (I should have been able. pŏtŭ-issem, etc.
PERFECT.* (I was or have been able.) pŏtŭ-ī, etc.	IMPERATIVE MOOD. None.
PLUPERFECT. (I had been able.) potu-ĕram, etc.	INFINITIVE.

FUTURE-PERFECT. (I shall have PRESENT: posse, to be able. PERFECT: potu-isse, to have been been able.) able.

Obs. Possum has no supine or other parts which are formed from the supine base of verbs.

pŏtŭ-ĕrō, etc.

NOTE.—Instead of potest the full form potis est is occasionally found, and sometimes potis (masc. and fem.) or pote (neut.) stands alone as an equivalent for potest. Potis with other parts of sum is rare.

* Tenses formed from the perfect or supine base of irregular verbs are conjugated regularly. Cp. § 135.

H.-VOLO, NOLO, AND MALO.

§ 211. PRINCIPAL PARTS:-

vŏlō, vellĕ, vŏlŭ-ī, I will, am willing.
nōlō (ne-, not, + vŏlō), nollĕ, nōlŭ-ī, I will not,
am unwilling.

mālō (măg-, aš in măgĭs, more, + vŏlō), mallĕ, mālŭ-ī, I am more willing. prefer.

võlens (Võlens (gen. võlent-īs), rõlens (gen. nõlent-ĩs), võlens (gen. võlent-īs), rõlens (gen. nõlent-ĩs), võne.

Obs. Völö, nölö, and mälö have no supine or other parts which are formed from the supine base of verbs; nor have they any gerund.

NOTE 1.—Vult, vultis are sometimes spelt volt, voltis. (See § 2, NOTE.)

NOTE 2.—Sī vīs, if thou wilt, is sometimes contracted to sīs.

III.—FERO AND ITS COMPOUNDS.

§ 212. Principal Parts: fer-ō, fer-re, tul-ī, lat-um, I bear.

Bases: fen (present); tul- (perfect); lat- (supine).

Obs. The perfect and supine bases of this verb are in no way connected with its present base, but are akin to tollo, I raise. The supine (tlatum) has lost an initial t.

SUPINE. Acc. it-um, to go

PASSIVE VOICE (IMPERSONAL ONLY, § 230, 2, b).

INDICATIVE MOOD. PRESENT: ītŭr IMPERFECT:

ībātŭr ībĭtŭr

FUTURE: So also the other tenses; e.g. Perfect, itum est.

SUBJUNCTIVE MOOD. PRESENT: ĕātur IMPERFECT: Īrētur

INFINITIVE Present: īrī

& 215. Compounds.

The following are conjugated like $\check{e}\check{o}$; in the tenses formed from the perfect base the forms without v are more usual:—

Pr	esent.	Perfect.	Supine.	
ăŀ	o-ĕō	ăbĭ-ī	ăbĭt-um	g@away
*ac	l-ĕō	ădĭ-ī	ădĭt-um	approach
cŏ	-ĕō	cŏĭ-ī	coĭt-um	come together
*ĭn	ı-€ō	ĭnĭ-ī	ĭnĭt-um	enter
in	těr-ĕő	intěrĭ-ï	intěrĭt-um	ranish
in	trŏ-ĕō	intrŏĭ-ī	intrŏĭt-um	go in
*ŏł	o-ĕō	ŏbĭ-ī	ŏbĭt-um	traverse, die
pč	ér-ĕō	pĕrĭ-ī	pĕrĭt-um	perish
	rae-ĕō	praeĭ-ï	praeĭt-um	precede
P.	rōd-ĕō	prōdĭ-ī	prōdĭt-um	go forth
pi	raetěr-ĕō	praeteri i	praetěrit-um	go past
rĕ	d-ĕö	rědĭ-ī	rĕdĭt-um	go back
*sì	ib-ĕō	sŭbĭ-ī	sŭbĭt-um	go up to, endure
*tı	ans-ĕō	transĭ-ĭ	transĭt-um	go across
V	ēn-ĕō	vēnĭ-ī	vēnīt-um	go on sale
				v

NOTE.—Ambio, I go around, is a regular verb of the 4th conj.

§ 216. The compounds marked (*) in the above list may, when they have a transitive meaning, be conjugated in the passive in all three persons as follows:—

PARTICIPLES. [approached.

PERFECT: ădit-ŭs, ădit-ă, ădit-um, approached or having been GERUNDIVE: ăd-ŏundŭs, ăd-ĕundă, ăd-ĕundum, fit to be approached.

INDICATIVE MOOD,
PRESENT. (I am approached.)

ăd-ĕor

ăd-iris

ăd-imini

ăd-itur

ăd-ĕuntur

IMPERF.: ăd-ībăr, ād-ībāris, etc.
FUTURE: ăd-ībōr, ād-ībēris, etc.
PERFECT: ādītus sum, etc.

PERFECT: ädit-üs sum, etc. PLUFERF.: ädit-üs eram, etc. FUT.-PF.: ädit-üs ero, etc. SUBJUNCTIVE MOOD.
PRESENT: ăd-ĕăr, ăd-ĕārĭs, etc.
IMPERF.: ăd-īrĕr, ăd-īrērīs, etc.

PERFECT: ădĭt-ŭs sim, etc. PLUPERF.: ădĭt-ŭs essem, etc.

INFINITIVE.

PRESENT: ăd-īrī, to be a pproached PERFECT: ădĭt-ŭs essē, to have been approached

QUEO AND NEQUEO.

§ 217. PRINCIPAL PARTS:

qu-ĕō, qu-īrĕ, quīv-ī, quĭt-um, I can.

něqu-ĕō, něqu-īrě, něquīv-ī, něquĭt-um, I cannot.

These two verbs are conjugated exactly like ĕō, except that they have no imperative or gerund.

NOTE.—In tenses from the perfect base the forms with **v** and those without **v** are used indifferently, except that the latter do not occur in the first person (singular or plural) of the perfect indicative. (Cp. § 153, Obs. 1.)

V.-FIO AND ITS COMPOUNDS.

§ 218. Fīō, I become, am made, takes the place of the passive of făcīō, I make, in tenses formed from the present base. The other tenses of fīō are supplied by the passive voice of făcīō, of which the supine base is fact.

Principal Parts: fīō, fĭĕrī, fact-ŭs sum.

PARTICIPLES PERFECT: fact-ŭs, fact-ŭ, fact-um, having become. GERUNDIVE: făciend-ŭs, -ā, -um, fit to become.

INDICA	TIVE MOOD.	SUBJUNCTIVE MOOD.		
PRESEN	T. (I become.)	PRESENT. (I	should become.)	
fio fis fit in the field of the	fiunt	fians fiās fiāt IMPERFECT. (. fiĕrem fiĕrēs fiĕrēt PERFECT: fac PLUPERF.: fac IMPERAT PRESENT.	fiamus fiatis fiant I should become.) fieremus fieretus fierent st-us sim, etc. st-us essem, etc. IVE MOOD. (Become.) fite	
FUTPERF.	fact-us ero, etc.	FUTURE	. None.	

INFINITIVE.

PRESENT: fieri, to become. PERFECT: fact-us esse, to have become. Future: factum iri, to be about to become.

Obs. Except in the present infinitive and imperfect subjunctive (cp. § 142), fio follows the fourth conjugation; it has, however, I (long) in all parts except fit, fieri, and the imperfect subjunctive.

§ 219. Compounds.

Compounds of făciō with a preposition and regularly conjugated in the passive; e.g. afficiō, I affect (compounded of the preposition ad, to, and făciō), has passive afficior.

Other compounds of făciō employ fīō as their passive in those parts which are formed from the present base; e.g. călĕfăciō, I make hot, has passive călĕfāō.

Note.—Conficio, I accomplish, sometimes has passive confio instead of the regular and more usual form conficior.

Dêfiō is occasionally found, and has the same meaning as dēficiō, viz. I fail, come to an end.

VI.-EDO AND COMPOUNDS.

§ 220. The tenses given below are the only ones in which ĕdō is irregular.

Principal Parts: ĕd-ō, ĕd-ĕrĕ or ĕssĕ, ĕd-īfēs-um, I eat.

ACTIVE VOICE.

	TULLI	1 0 1 0 11	
Present	IVE MOOD. r. (<i>I eat.</i>) ĕd-ĭmŭs ĕd-ĭtĭs or estĭs ĕd-unt	IMPERFECT. (ĕd-ĕrem or essem ĕd-ĕrēs or essēs	VE (continued). [I should be caling.] ĕd-ĕrēmūs or essēmūs ĕd-ĕrētĭs or essētĭs
SUBJUNC	TIVE MOOD. (I should cat.)	ĕd-ĕrĕt or essĕt	essent
ěd-am or ěd-im ěd-ās or ěd-īs	ěd-āmŭs or ěd-īmŭs ěd-ātis or ěd-ītis	PRESEN ěd-ě or ēs FUTURE. (TIVE MOOD. T. (Eat.) ĕi-ĭtĕ or estĕ Thou shalt vat.)
ĕd-ăt <i>or</i> ĕd-ĭt	ĕd-ant or ĕd-int	ěd-ĭtō or estō ěd-ĭtō or estō	ěd-ĭtŏtě or estōtě ěd-untō

INFINITIVE.

PRESENT : ĕd-ĕrĕ or essĕ, to eat.

Obs. It should be noticed that, in all parts of the verb in which sum, I am, has forms beginning with the letters es, ĕdō has forms exactly similar, excepting that in the second person singular of the present indicative and imperative sum has ĕs, whereas ĕdō has ĕs.

PASSIVE VOICE.

Two irregular forms are occasionally found in the passive voice of ĕdō, viz, estūr (for ĕdĭtūr, 3rd sing. pres. indic.), and essētūr (for ĕdĕrētur, 3rd sing. imperf. subj.).

§ 221. Compounds.

Two compounds of ēdō occasionally follow the irregular conjugation of the simple verb, viz. comedō, I eat up, and exedō, I devour.

VII .- DO AND ITS COMPOUND CIRCUMDO.

§ 222. Dō (perfect dĕdi) follows the first conjugation, but has ă (short) instead of ā after d in parts formed from the present or supine base (e.g. dămūs, dătūs), except in the second person singular of the present indicative and imperative active, dās, dā.

§ 223. In addition to the regular form, do has an old present subjunctive duim, duis, duit; duint. This occurs also in some of the compounds of do.

§ 224. Circumdo is conjugated like do; the other compounds belong to the third conjugation.

CHAPTER XXIV.—DEFECTIVE VERBS.

The following verbs are defective, that is to say only the parts given be ow are in use.

§ 225. Aiō, I say.

PRESENT PARTICIPLE: āiens (gen, āient-īs), sauing, " INDICATIVE PRESENT: āio (I sau), ais, ait, aiunt.

> IMPERFECT: āiēbam (I was saving), etc. (complete). PERFECT: ăit, he said.

SUBJUNCTIVE PRESENT : aiat, he would say.

§ 226. Inquam, I say.

INDICATIVE PRESENT: inquam, inquis, inquit, inquimus, inquiunt,

IMPERF.: inquiebat, he was saying. FUTURE: inquies, inquiet, he will say.

PERFECT: inquii, inquisti, inquit.

§ 227. Fārī, to say. (The simple verb is only used in poetry.)

PARTICIPLE PRESENT: fantem (acc.), fanti (dat.), saying.

PERFECT: fāt-us. fāt-ā, having said. 22 GERUNDIVE: fand-us, -a, -um, fit to be said.

INDICATIVE PRESENT: fatur, he says.

fabor (I shall say), fabitur. FUTURE: 22 PERFECT: fat-us est, he said or has said.

29 PLUPERFECT: fat-us eram (I had said), fat-us erat. INFIN. PRESENT: fari, to say. IMPERATIVE PRESENT: fare, say. GERUND : fandī, fandō (saying). SUPINE: fatu, in saying.

Some other parts (present, imperfect, and future indicative) of the compounds of fari occur.

§ 228. The following have no present base in use: coep-ī, I began; memin-ī, I remember; od-ī, I hate.

They are regularly conjugated in the perfect, pluperfect, and future-perfect tenses, which (in the case of memini and odi) are translated respectively as present, imperfect, and Some other parts are in use:—

From coepī: Perf. part. pass., coept-us, -a, -um, and tenses formed by it with sum.

- měmini: Imperative, měmentő (remember), měmentőtě.
- odī: Future part., osūr-us, -a, -um, about to hate.
- § 229. The following are isolated forms:—

(1) Infit, he begins (to speak).

- (2) Quaeso, I entreat; quaesumus (used parenthetically like
- English pray).
 (3) Avē or avētē, hail!; avētē. Infinitive, avērē, to cry "hail."
- (4) Salvē, hail !; salvētē. Ind. fut., salvēbīs. Infin., salvērē,

(5) Cědě, qive (imperative).

CHAPTER XXV.—IMPERSONAL VERBS.

§ 230. Two classes of verbs fall under this heading:—

(1) Active verbs (some transitive, some intransitive) found only in the third person singular and infinitive and always used impersonally:

(2) The third person singular and infinitive-

(a) Of a few active verbs, transitive and intransitive; e.g. iŭvăt, it delights, from iŭvo, I delight; tonat, it thunders, from tono, I thunder; interest, it makes a difference, from intersum, I am in the midst;

(b) Of the passive of nearly all verbs which in the active are personal intransitive verbs or can be used intransitively; e.g. ventum ĕrăt, they (or he, I, we) had come, from věniō, I

come.

Obs. The perfect participle in the perfect, pluperfect or futureperfect of a passive verb used intransitively is always neuter.

§ 231. The various tenses of personal verbs thus used impersonally are regularly formed, and call for no further remark here; their constructions are explained in the Syntax. A list of the commoner verbs which are impersonal only is given below.

```
TRANSITIVE IMPERSONAL VERBS.
                             Perfect.
           Infin.
Present.
                                              it beseems
                    děcŭ-ĭt
           -ērĕ
děc-ět
                                              it misbeseems
                    dēděcŭ-ĭt
            -ērĕ
dēděc-ět
                                              it moves to pity
                    mĭsĕrŭ-Ĭt
mĭsĕr-ĕt
            -ērĕ
                                              it behoves
                    ŏportŭ-ĭt
           -ērĕ
ŏport-ĕt
                                              it makes sorry
                    paenītŭ-ĭt
            -ērĕ
paenit-et
                                              it troubles
                    pĭgŭ-ĭt
            -ērĕ
pĭg-ĕt
                    pudu-it or puditum est it shames
pud-et
            -ērĕ
                    pertaesum est
                                              it wearies
taed-ĕt
            -ērĕ
```

Obs. These verbs are not as a rule translated by English impersonal verbs; e.g. mē miseret may be rendered I pity; nos oportet, we ought; tē paenītēbāt, you were sorry; ĕos pudēbīt, they will be ashamed.

```
INTRANSITIVE IMPERSONAL VERBS.
§ 233.
                                    Perfect.
                                                         it is pleasing \ \text{with} \
it is lawful \ \ \text{dative} \]
  Present.
                           lĭbŭ-ĭt or lĭbĭtum est
                -ērĕ
  līb-ĕt
                           lĭcŭ-ĭt or lĭcĭtum est
                -ērē
  lic-et
                                                         it concerns (§ 213)
                           rētŭl-ĭt
             rēferrē
  rēfert
                                                         it snows
  ning-it )
                 -ĕrĕ
                           ninx-ĭt
  ningu-ĭt /
                                                         it rains
                           plu-it or pluv-it
                 -ĕrĕ
   plŭ-ĭt
```

Obs. Libet and licet with a dative may usually be rendered thus: mīhī lībēt, I like ; tībī līcēt, you may, or you are allowed.

10

CHAPTER XXVI.—ALPHABETICAL LIST OF VERBS.

§ 234. This dist contains all common verbs of the third conjugation, together with irregular verbs, and those verbs of the first, second, and fourth conjugations which form their perfect and supine differently from ămō, mŏnĕō, and audiō respectively; except—

(a) Inceptive verbs formed from simple verbs which are in use (§ 284), the perfect and supine of these, if they exist, being the same as the perfect and supine of the simple verb;

(b) Compound verbs which contain the simple verb unchanged in form, but drop the reduplication (if any) in the perfect, e.g.—

Simple verb : Compound verb	Pres. Indic. duc-ō abduc-ō	Infin. -ĕrĕ -ĕrĕ	Perfect. dux-ī abdux-ī	Supine. duct-um abduct-um	lead lead awa y
Simple verb : Compound verb	pell-ö	-ěrě	pĕpŭl-ī impŭl-ī	puls-um impulsum	drive drive on

But one compound at least is given of verbs which when compounded change in form or retain the reduplication in the perfect. The perfect and supine of verbs which are only slightly modified in composition, e.g. occīdō, I kill (from ŏb and caedō), must be ascertained by reference to the simple verb; but compound verbs such as surgō, I arise (compounded of sŭb and rĕgō), of which the elements cannot readily be seen, are given in alphabetical order as well as under the simple verb. Compound verbs of which the simple forms are not in use, e.g. abnŭō, I refuse, are given in alphabetical order.

For the changes undergone by prepositions in composition, see § 292; for vowel change in compound verbs, see § 293.

Present Indic. abnŭ-ō žbŏl-ĕō accend-ō accumb-ō ăcŭ-ō ădĭpisc-ŏr	Infinĕrĕ -ĕrĕ -ĕrĕ -ĕrĕ -ĕrĕ -ĕrĕ	Perfect. abnŭ-ī ăbŏlēv-ī accend-ī accubŭ ī ăcŭ-ī ădept-ŭs sum	Supine. abnūt-um ābŏlĭt um accens-um accŭbĭt-um ăcūt-um	refuse abolish kindle recline at table sharpen obtain

∇Ī∇-Ö	-ĕrĕ	vix-I	vict-um.	live
vŏlō (§ 211)	vellě	võlŭ-ī		will
Comp.: mālō	mallě	mālŭ- ī	-	will rather
nōlō	nollě	nōlŭ-ī		be unwill i ng
vclv-ö	-ĕrĕ	volv-ī	vŏlūt-um	roll
vŏm-ō	-ĕrĕ	vŏm ŭ- ī	v ŏmĭt-um	romit
vŏv-ĕō	-ērĕ	võv-1	võt-um	vow

Note.—A few verbs have no perfect or supine, and are used only in tenses formed from the present base, e.g. langues, I am faint. Neither these, nor the defective verbs given in §§ 225—229, are included in the above list.

CHAPTER XXVII,—ADVERBS.

§ 235. Adverbs may for convenience be arranged in three classes:— •

I. Adverbs expressing

(a) Place, time, degree, etc.;

(b) Negation, interrogation, transition, etc.

II. Adverbs formed from pronominal roots; e.g. quō, whither, from the root of quī, who.

III. Adverbs formed from adjectives; e.g. līberē, freely, from līber, free.

I. (a) Adverss of Place, Time, Degree, etc. The following are some of the commonest:—

§ 236.

PLACE.

circa, deround circum, around circum, around contra, opposite coram, face to face extra, outside infra, below intra, inside intus, linside intus, close passim, hither and thither

poně, behind post, far procůl, far propě, near subtěr, beneath supěr, above supra, above sursum, upwards ultra, beyond versůs, facing

§ 237.

TIME.

antē, antēā, before cottīdiē, daily quōtīdiē, daily quōtīdiē, daily crās, to-morrow dēmum, at length dīt, long extemplō, forthwith hērī, yesterday hōdītē, to-day iam, already iamdūdum, a long time iamprīdem, already intōrīm, meanwhile

interdum, sometimes
itérum, again
mānē, in the morning
mödō, just now
mox, soon
nūpēr, recently
pārumpēr, for a little whilo
post,
postēā. } afterwards
quondam, formerly
saepē, often
sempēr, always
simūl, at the same time
stātim, forthwith
tandem, at length

§ 238.

Manner, Degree, etc.

```
praesertim, especially
ceu, like as
clam, secretly
                                     prope, nearly
frustrā, in rain
                                     quăsi, as if
modo, only
                                     quoad, so far as
nimis or too much
                                     sătis (also used as an in-
                                       declinable substantive \enough
                                       or adjective)
omnino, altogether
paene, almost
                                     secus, otherwise
                                     tamquam or |
palam, openly
                                                   as it were
parum (also used as an)
                                       tanquam, §
  indeclinable neuter
                                    ultro, further
                                     usque, all the way, even
  substantive)
pěrindě (usnally
                                    vēlut or
                                                as, for example
  followed by ac,
                                       věluti,
  atque or ut)
                                    Vix. scarcely.
```

§ 239. NEGATION, INTERROGATION, TRANSITION, ETC.

Negation.

non, not haud (rare with verbs), not no (in prohibitions), not no . . . quidem, not even

Interrogation.

-ně (enclitic) introduces a question nonně introduces a question expecting an affirmative answer num introduces a question expecting a negative answer quarë or cūr, why? quin, why not? utrum ... an, whether ... or atrum ... {annôn} whether ... or necně or not

Transition, etc.
contră, on the other hand
equidem, indeed
ergő,
ideircő,
ideircő,
iğitür (seldom placed first)
item, likewise
ne or nae (with pronouns), indeed
praetéréä, besides
proptěrěä, therefore

praetěrěa, besides proptěrěa, therefore quidem, indeed rursůs, again saltem, at least ŭtinam introduces a wish

Obs. 1. The term enclitic applied to -në and similar particles (cp. § 261, Obs. 1) implies that they throw their accent back on to the words to which they are appended; e.g. vidēs, you see; vidésně, do you see?

Obs. 2. When -ně is appended to a word ending in s (as above to víděs), the vowel preceding the s is sometimes shortened and the s and e dropped; e.g. víděn = vídesně, do you see? audin = audisně, do you hear? Such shortened forms are accentuated on the last syllable.

L, G.

indiqué, evequebere ütröbiqué, evequebere ütröbiqué, in both places ütröbiqué, in both places ütröbiqué, in both places ütröque, to both places alibi, elserbere ütröqué, to both places quoibite, erbither que places quoibite, erbither que places aliqué, to met place indiqué, trom ell places intrinqué, from ell sides ütrinqué, from ell sides älloundé, from elsenbere älfundé, from elsenbere älfundé, from elsenbere	quandōqué) at some time ălfquandō, at some time unquam (with neg.), reer nunquam, nerre ălfâs, at anether time	ütiquê, in any ease alitêr, otherwise quamlibêt, huvever quamvis, (with adj. or adv.)

S. 240. Demonstractive. Inc. here In	nune, neno, then tun, tune, then et that time	\ \ \frac{\partial \text{ade6}, \text{Itá}, \su\}{\partial \text{ade6}, \text{Itá}, \su\} \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \

II. ADVERBS FORMED FROM PRONOMINAL ROOTS.

- § 241. The principal adverbs of this class are given on the opposite page. The student should first learn the adverbs referring to "place where" (demonstrative, relative, interrogative, indefinite), and proceed to those referring to "place whither," and so on. The table may be compared with that on p. 71 (§ 118).
- § 242. Variant Spelling.—The ending cumque is sometimes spelt -cunque; so too umquam and numquam are in some editions of the classics printed unquam, nunquam. Toties and quoties are also spelt totiens, quotiens.
- § 243. A comparison between the various adverbs formed from the roots of the pronouns hīc, istē, illē, ĭs, quī may be made by means of the following table:—

hīc, here istīc, illīc, tota undē, where hūc, hither istūc, illūc, eō, thither quō, whither hinc, hence istinc, illīnc, indē, thence undē, whence hāc, this way illā, eā, that way quā, which way

III. Adverbs formed from Adjectives (including Participles).

§ 244. From adjectives of the first class, *i.e.* those which follow the first and second declensions of substantives (§ 80), adverbs are formed by the addition of -ē to the base of the adjectives.

EXAMPLES. Adjective. Base. Adverb. angustus, narrow angustangustē, narrowly ornātus, adorned (perf. part.) ornātornātē, ornately passive of orno, Iadorn) f pulcher, beautiful pulchrpulchrē, beautifully līberlīberē, freely līber. free

Note.—A few adverbs ending in -iter are formed from adjectives of the first class; e.g. largiter (also large), abundantly, from largus, abundant.

§ 245. From some adjectives of the first class adverbs are formed by adding -ō to the base.

EXAMPLES.

Adjective.

Farus, scanty

consultus (perf. part. passive of consult, I deliberate)

consult.

Consult.

Consult.

§ 246. From adjectives of the second class, i.e. those which follow the third declension of substantives (§ 84), adverbs are formed by the addition of -ĭtěr to the base of the adjective; but if the base of the adjective ends in nt, -ĕr is added instead of -ĭtěr.

Adjective. měmor, mindful acěr, sharp brěvís, short felix, fortunate průdens, discreet amans, loving (pres. part.) active of ămo, I love)	EXAMPLES. Base. měmör- âcr- brěv- fēlic- prūdent- ămant-	Adverb. měmčrítěr, ācrítěr, brěvítěr, felicitér, prūdentěr, * amantěr,	by heart sharply briefly fortunately
---	---	---	---

§ 247. The accusative singular neuter of an adjective is often used as an adverb, sometimes even when a special form for the adverb exists.

EXAMPLES.

Adjective (Nom. Sing. Masc.)

multŭs, much
dulcĭs, sweet
fācilĭs, casy
Also plērīquĕ (pl.), very many

Adjective (Acc. Sing. Neut.) and Adverb.

multum, much
dulcĕ (also dulcĭtĕr), sweetly
făcilĕ, easily
plêrumquĕ, very frequently

§ 248. The following are irregularly formed:-

From	audax,	bold,	audactěr,	boldly
73	bonŭs.	good,	běně,	well
77 22	citus,	quick,	cĭtŏ,	quickly
	difficilis,	difficult,	difficulter,	with difficulty
97	magnus,	great,	magnŏpĕrĕ,	greatly
71	mălŭs.	bad.	mălĕ,	badly
**	neguam,	worthless,	nēgulter,	worth lessly
**	välidus,	strong,	valdē,	strongly
**			,	- *

Obs. Magnopere (also written as two words, magno opere) properly means with great labour; hence, very much, greatly.

§ 249. Adverbs formed from numeral adjectives are given in § 100 (p. 58).

CHAPTER XXVIII.—COMPARISON OF ADVERBS.

§ 250. Adverbs formed from adjectives have (where the meaning admits of it) three degrees of Comparison—Positive, Comparative, and Superlative: e.g. breviter, briefly; brevius, more briefly; brevissime, most briefly. Where no standard of comparison is expressed or distinctly understood, the comparative may denote "considerably" or "excessively," and the superlative "exceedingly": e.g. brevius, somewhat briefly or too briefly; brevissime, very briefly. (Cp. § 89.)

§ 251. A comparative adverb is the accusative singular neuter of the corresponding comparative adjective (cp. § 247).

A superlative adverb is formed by adding -ē to the base of the corresponding superlative adjective, in accordance with the rule for forming adverbs from adjectives of the first class (§ 244).

These rules apply whether the comparison of the adjective is regular or irregular.

EXAMPLES.

Positive.	Comparative.	Superlative.
Adjective. sanctus, religious	sanctĭŏr	sanctissīmūs
Adverb. sancte, religiously		sanctissĭmē
Adjective. acer, sharp	ācrīŏr	ācerrīmus
Adverb. äcrīter, sharply	ācrĭŭs	ācerrīmē
Adjective. facilis, rasy	făcĭlĭŏr	făcillĭmŭs
Adverb. făcile, easily	făcĭlĭŭs	făcillĭmē
Adjective, bonus, good	mělĭŏr	optīmŭs
Adverb. běně, well	mělĭŭs	optĭmē
Adjective, mălŭs, bad	pēiŏr	pessīmŭs
Adverb. mălĕ, ill	pēiŭs	pessīmē

IRREGULAR COMPARISON.

The following are the only exceptions to the above rules:

Positive. Comparative. Superlative.

magnopere, greatly magis maxime
multum, much plus plurimum

§ 252. Comparative and Superlative Adverses not formed from Adjectives.

Positive.		Comparative.	Superlative.
dĭū,	long	dĭūtĭŭs	dĭūtisaĭmē
	without punishmen	$\imath t$ impūniŭs	impūnissī mē
	recently	Name of the last o	nüperrimē
saepě,	often	saepĭŭs	saepissĭmē
sĕcŭs,	otherwise	{ sēciŭs or sētiŭs } (with neg.), the less	-

CHAPTER XXIX.—PREPOSITIONS.

§ 253. Most Latin prepositions (like all English ones) take the accusative case. The ablative, however, is used with some prepositions, and a few take either case; it is therefore necessary for the student to commit to memory at least the second and third of the fellowing lists, if not the first.

§ 254. For the forms assumed by prepositions in composition, see § 292.

§ 255. I. Prepositions used with Substantives in the Accusative Only.

ad, to adversum or adversum, and poposite, towards ante, before apud, with (a person), at the house of circa, around circum, around circum, this side of contra, against erga, towards (a person) ext.

inter, between, among
intra, within
inxta, close by
ŏb, because of
penes, in the power of
per, through
pone, behind
post, after
praeter, beyond
prope, near
propter, near, on account of
secundum, following on
supra, above
trans, across*
ultra, the other side of

The following lines contain the above twenty-eight prepositions, which are used with the accusative only:—

> antě, post, cis, citrā, ultrā, trans and pěr; adversús, contrā; praetěr, pōně; infrā, suprā; circum, circiter and circā; proptěr, ŏb, secundum, ergā; ad and apud, propě, iuxtā; pěněs, intěr, intrā, extrā.

§ 256. II. PREPOSITIONS USED WITH SUBSTANTIVES IN THE ABLATIVE ONLY.

ā (before a consonant)

āb (before a vowel or h)

abs (only with tē, thee)

coram, in the presence of

cum, with

ē or ex, out of

palam, in the presence of prae, in front \$f; with neg. (\$599) on account of pro, before, instead of procedul, far from sine, without tenus, as far as

Rhyme:—ā, āb, abs, cum, ex and ē, cōram, pālam, prōcūl, dē, sǐně, těnŭs, prō and prae.

Obs. 1. Tenus is also found with the genitive case.

Obs. 2. The distinction between ā and ăb, as stated above, holds good only as a general rule. Ex is used before a vowel or a consonant; ē before consonants only.

§ 257. III. PREPOSITIONS USED WITH SUBSTANTIVES IN THE ACCUSATIVE OR ABLATIVE.

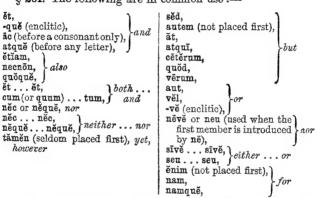

- The ablative's the proper case. § 258. The usual place for a preposition is immediately before its substantive (or pronoun), but some prepositions are occasionally found after their substantives, tenus being always so placed.
- § 259. Cum always follows the personal pronouns mē, tē, nōbīs, vōbīs, sē, and is then enclitic (§ 239, Obs. 1); e.g. mēcum, with me. Cum is generally enclitic also with the relative pronoun (quī, quō, quā, quībūs), but may precede e.g. quōcum or cum quō, with whom.

CHAPTER XXX.—CONJUNCTIONS.

§ 260. Conjunctions are of two kinds—co-ordinating and subordinating. A co-ordinating conjunction joins two words or phrases, two principal sentences, or two clauses dependent on the same principal sentence; a subordinating conjunction joins a dependent clause to its principal sentence.

I. Co-ordinating Conjunctions.

§ 261. The following are in common use:-

- Obs. 1. The enclitics -que, and, -ve, or, are added to the second of the two words they join, or to the first word of the second sentence or clause; e.g. Arma virumque căno, I sing of arms and a hero; Quid tū es tristis, quidve es ălăcris? Why are you sad, or why are you cheerful?
- Obs. 2. Autem is usually the second word in the sentence or clause it introduces; e.g. Nihil scrībō, lĕgō autem libentissimē, I write nothing, but I read with great pleasure. So also ĕnim, and (unless emphatic) tămĕn.

II. SUBORDINATING CONJUNCTIONS.

§ 262. In the following list of subordinating conjunctions, all of which are in common use, several have more than one English equivalent attached. The translation of such conjunctions for the most part varies according to the mood of the verb in the subordinate clause introduced, or, in other words, the variation of the Latin mood is represented by a variation of the English conjunction. This is more fully explained in the Syntax.

```
(With Indicative or Subjunctive.)
                                        (With Indicative Only.)
                                    quamquam, although
nisi or ni, unless
                                    quoniam.
                                    quandoquidem
etsī.
         although
ětĭamsī.
                                    sīmulāc.
                                    sĭmŭlatouĕ
      with Indic. when
                                    ŭbī.
       with Subj. when, since,
         although
                                    ŭt (or ŭti)
antequam, before that
                                       (With Subjunctive Only.)
                                    ŭt (or ŭti), in order that, so that,
dum.
        with Indic. whilst
quoad, with Subj. until
                                      although
                                    nē. lest
quod, } because
                                    quo, that (thereby)
                                    quominus, that (thereby) ... not
quiă,
                                    quin, that (thereby) ... not, but
                                      that
                                    quamvīs, \although
                                    licet.
```

Obs. Several relative adverbs serve also as conjunctions; cum, quoxd, tbi, and tt have already been given in Ch. XXVII.

CHAPTER XXXI.—INTERJECTIONS.

I. NATURAL SOUNDS.

§ 263. The following are the most common :-

āh or ā, ah eccĕ, } lo!' ēn, } lo!' ēiă or hēiă, come! hei, ah! heu or ēheu, alas!
"heus, ho!

ō, O, oh!
prō or prōh, alas
vae, woe!

II. WORDS.

§ 264. The following are the most important:-

ăge, come! hercle, Hercules! macte (voc. of mactus, glorified), bravo! well done! go on! medius fidius; may the God of Faith (help) me! měhercůlě, měhercůlěs, pōl, Pollux!

PART II.: FORMATION OF CERTAIN CLASSES OF WORDS.

CHAPTER XXXII.—SUBSTANTIVES AND ADJECTIVES.

FORMATION OF SUBSTANTIVES FROM VERBS.

§ 265. Three verbal substantives—the gerund, the supine, and the infinitive—are included in the conjugation of the verbs to which they belong (§ 126). Substantives of one or more of the following classes are also formed from the supine base of many verbs.

Obs. The word "formed" here refers merely to the mechanical structure of the words, not to their etymology.

§ 266. The nominative of the verbal substantive, of which the supines are respectively the accusative and ablative cases, is formed by adding -us to the supine base. These substantives are of the fourth declension and of masculine gender; e.g. audit-us, -us, the sense of hearing; us-us, -us.

Obs. This verbal substantive of the fourth declension must be carefully distinguished from the perfect participle, which is an adjective declined like bonus.

§ 267. Substantives formed by adding -iō (base -iōn-) to the supine base of the verb are very numerous; e.g. act-iō, -ōnis, action. These substantives are all feminine.

§ 268. Substantives formed by adding -or (base -or-) to the supine base denote the agent—i.e. one who performs the action expressed by the verb; e.g. vēnāt-or, -oris, hunter; foss-or, -oris, digger. These substantives are masculine; those in -tor have a feminine form in -trix (§ 274).

FORMATION OF ADJECTIVES FROM VERBS.

§ 269. Adjectives ending in -ĭlĭs or -bĭlĭs denote that the substantive to which they refer is capable of performing or (more usually) suffering the action indicated by the verb.

Examples: dŏc-îlis, teachable, cp. dŏcerĕ, to teach; ūt-ilis, useful, cp. ūtī, to use; stā-bilis, steadfast, cp. stārē, to stand; fiē-bilis, tearful (active) or lamentable (passive), cp. flērĕ, to weep.

§ 270. Adjectives ending in -ĭdŭs imply a condition or state, those in -cundŭs a characteristic or habit; adjectives in -bundŭs imply (like present participles) the present performance of the verbal action.

Examples: frīg-ĭdus, cold, cp. frīgērē, to be cold; val-ĭdus, strong, cp. val-ērē, to be strong; fā-cundus, eloquent, cp. fārī; to speak; īrā-cundus, hot-temp. r.d, cp. īrascī. to be angry; morī-bundus, dying, cp. morī. to die; errā-bundus, wandering, cp. errārē, to wander.

§ 271. Adjectives ending in -ax (gen. -ācis) indicate a propensity, often an excessive one.

Examples: and ax, daring, rash, cp. audere, to dare; loqu-ax, talkative, cp. loqui, to talk; min-ax, threatening, cp. minari, to threaten; viv-ax, long-lived, cp. vivere, to live.

FORMATION OF ADJECTIVES FROM SUBSTANTIVES.

§ 272. Adjectives are formed from substantives by the addition of various endings, the more important of which are illustrated by the following examples:—

Pătr-ĭus, paternal, păter-nus, owned by a father, cp. păter, father; quer-nus, vaken, cp. quercus, oak; aur-eus, golden, cp. aurum, gold; bell-ĭeus, military, cp. bellum, war; form-ōsus, beautiful, cp. formă, shape, beauty; vī-ŏ-lentus, violent, cp. vīs, force; barb-ātus, bearded, cp. barbă, beard; fāt-ālīs, fated, cp. fatum, fate; sālūt-ārīs, healthful, cp. sālūs (base, sālūt-), health; hest-īlīs, hostile, cp. hostis, enemy; Lāt-īnūs, Latin, cp. Lātīum; oppid-ānūs, provincial, cp. oppīdum, country town; ăgr-ārīus, agrarian, cp. āgĕr, field.

FORMATION OF FEMININE SUBSTANTIVES FROM MASCULINE.

§ 273. In the case of many masculine substantives of the second declension denoting males there are corresponding feminine forms of the first declension denoting females; e.g.—

dē-ŭs, god dē-ă (§ 43), goddess šqu-ŭs, herse šqu-a, mare fili-ŭs, son fili-a (§ 43), daughter māgister (base, māgistr-), master māgistr-ā, mistress

§ 274. From masculine substantives of the third declension ending in the nominative singular in -tŏr (genitive -tōrĭs) feminine substantives may be formed by changing -tŏr to -trix (base, -trīc-); e.g.—

vēnā-tor, hunter vēnā-trix, -trīcīs, huntress

NOTE.—Some of these feminine forms are used as feminine adjectives; e.g. victrix, victorious, from victor, conqueror.

DIMINITIVES.

- § 275. From many Latin substantives dimiratives may be formed, conveying the idea of smallness, just as in English we have "islet" from "isle," "manikin" from "man," etc. In the following sections the commoner methods of forming diminutives are indicated.
- & 276. From substantives of the first and second declensions (except some ending in -er) diminutives are formed by adding to the base -ulus if the substantive is masculine. -ŭlă if the substantive is feminine, and -ŭlum if it is neuter; the same rule applies to substantives of the third declension with base ending in a dental (d, t) or guttural (c, g); e.g.—

stream rīv-ŭs, shield parm-ă, oppid-um, town capit (gen capit-is), head capit-ulum, little head rex (gen. reg-is), king

rīv-ŭlŭs. streamlet parm-ŭlă, little shield oppid-ŭlum, small town rēg-ŭlŭs. vetty king

§ 277. If the base of the substantive ends in a vowel, -ŏlŭs, -ŏlă, or -ŏlum is added instead of -ŭlŭs, -ŭlă, -ŭlum ; e.g.—

fīli-ŭs. 8/122 fīli-ā, daughter něgöti-um, business

fīlī-ŏlūs, little son fīlĭ-ŏlă, little daughter negoti-olum, bit of business

NOTE.—If the base ends in I, n, or r, the diminutive termination contracts with this last letter of the base into -llus, -lla, -llum: e.g.-

cŏrō-n-ă, garland book lĭbe-r.

coro-lla, small garland libe-lius, pamphtet

§ 278. From substantives other than those included in the preceding sections diminutives ending in -culus, -cula. -culum are formed on the model of the examples here given :-

fräter, brother mülier, woman corpus, body nāv-ĭs, ship vers-us (4th decl.), verse spes (5th decl.), hope

frāter-culus. little brother mŭlĭer-cŭlă, little woman cornus-culum, atom nav-1-cuis 8kiff vers-ĭ-culus, little verse spē-cula, ray of hope

Atr-eus,

PATRONYMICS.

- \$ 279. Patronymics denote descent from a parent or ancestor, generally a father; they are all of Greek formation, but are of frequent occurrence in Latin poetry.
- § 280. Masculine patronymics are formed by adding to the base of proper names of Greek origin (\$\$ 61-68) belonging to the

First Declension, as--ădes, as in Aene-ădes, son of Aeneas Aenē-ās, -ĭadēs, " Laert-iadēs, son of Exertes Lāert-ēs. Second Declension, as-" Prīam-idēs, son of Priam -ĭdēs, Priam-us, Second Decleusion (with base ending in i), as--ădes, as în Thesti-ădes, son of Thestius Thesti-us. Third Declension, as-" Cēcrop-idēs, son of Cecrops Cecrops (gen. Cecrop-is), -ides, " Atlant-ĭădēs, son of Atlas Atlas (gen. Atlant-is), -iades, " Atr-ides, son of Atreus -īdēs,

- § 281. All masculine patronymics are declined like Tydides (§ 62). The genitive plural often ends in -um instead of $-\bar{\mathbf{a}}\mathbf{r}\mathbf{u}\mathbf{m}$ (§ 42, 1).
- § 282. Feminine patronymics are formed by adding to the base of proper names of Greek origin -as, -ĭas, -ĭs or -ēis, according as the masculine patronymic would end in -ădes, -ĭădes, -ĭdes or -īdes; e.g.-

Masc. Patronymic. Fem. Patronymic. Thesti-ades Thesti-as, daughter of Thestius Atlant-jades Atlant-jas, daughter of Atlas Atlas (gen. Atlant-is) Cēcrops (gen. Cēcrop-is) Cēcrop-idēs Cēcrop-is, daughter of Cecrops Ner-eis, daughter of Nereus

§ 283. Feminine patronymics are declined like lampas. (§ 65, 1), the accusative singular of the examples given above being Thestiad-a, Atlantiad-a, Cecropid-a, Nereid-a.

CHAPTER XXXIII.—FORMATION OF CERTAIN CLASSES OF VERBS.

DERIVED VERBS.

- § 284. Three classes of verbs call for notice here:—
 - (a) frequentative verbs, expressing repeated action;
 - (b) inceptive verbs (also called inchoative), expressing incipient or increasing action;
 - (c) desiderative verbs, expressing desire of action.
- § 285. The present base of a frequentative verb is formed either (i) by adding -ĭt- to the present base of the simple verb, or (ii) by adding -ĭt- to the supine base of the simple verb, or (iii) is identical with the supine base of the simple verb. From verbs of the first conjugation frequentative verbs are formed by the first method only. Many verbs, though frequentative in form, have no frequentative force, but are either equivalent to their simple verb or imply intenser action.

~ *			
Present (of Simple Verb).	Supine (of Simple Verb).	Frequentative.	
(i) rŏg-ō, ask	,	rog-it-o, ask repeatedly	
ăg-ō, drive		ag-it-o, shake	
min-or, threater	r —	min-it-or, threaten	
(ii) lego, read	lect-um	lect-it-o, read repeatedly	
věnio, come	vent-um	vent-it-o, come frequently	
(iii) cănō, sing	cant-um	cant-ō, sing	
vert-ō, turn	vers-um	vers-ö. twist	

§ 286. Frequentative verbs are all of the first conjugation, and form their principal parts regularly; e.g. agitō, agitārē, agitāvī, agitātum; minitōr, minitārī, minitātūs sum.

Obs. If the simple verb is deponent, the frequentative is deponent also.

§ 287 Inceptive verbs are formed by adding to the present base of a verb of the

lst conj. -a.cō, e.g.—
läb-asc-ō, -ĕrĕ, begin to totter, from läb-ō, -ārĕ, totter

2nd conj. -escō, r.g.—
sil-esc-ō, -ĕrĕ, become silent, " sil-ĕō, -ērĕ, be silent

3rd conj. -escō or -iscō, e.g.—
trĕm-esc-ō,] -ĕrĕ, begin to tremble " trĕm-ō, -ĕrĕ, tremble

4th conj. -iscō, e.g.—
obdorm-isc-ō, -ĕrĕ, fall asleep " dorm-iō, -īrĕ, ʒleep

NOTE.—Sometimes the simple verb from which the inceptive is supposed to be formed is not in use, and sometimes the inceptive is formed direct from an adjective; e.g. mit-esco, I grow mild, from mit-is, mild.

- § 288. Inceptive verbs are all of the third conjugation; their perfects and supines, if in use, are identical with those of the simple verbs from which they are formed. The principal parts of inceptive verbs not derived from other verbs (e.g. trascor, I get angry) are given in Chapters XXI. and XXVI. if in use.
- § 289. Desiderative verbs are formed by adding -ŭriō to the supine base of the simple verb; e.g. ēs-ŭriō, *I desire to eat, am hungry*, from the base of ēs-um, supine of ĕdō, *I eat*.
- § 290. All desiderative verbs are of the fourth conjugation, and form their perfects and supines (if in use) like audio.

COMPOUND VERBS.

- § 291. When compounded with verbs, etc., some prepositions undergo certain changes in accordance with euphonic principles. These changes are best learnt by observation; the following remarks may be of use to the learner, but are by no means exhaustive.
- § 292. (i) The final consonant of ăd, ŏb, sŭb is frequently assimilated to the first letter (if a consonant) of the verb; e.g. affĕrō (= ăd + fĕrō), oppōnō (= ŏb + pōnō), summŏvĕō (= sŭb + mŏvĕō). Sus-, e.g. in sus-pendō, sus-tūlī, represents subs-, a form of sŭb.

- (ii) Com- (the usual form of cum in composition) and in are assimilated to I or r when the simple verb regims with either of those letters; e.g. corrumpō (= com- + rumpō), irrumpō (= in + rumpō). They are respectively written com- aid im- before m, b, or p, e.g. impellō; com- becomes con- before most other letters, e.g. confērō, contuli.
- (iii) Ā, āb assumes several forms: a-, ab-, au-, abs-, as-; e.g. āmittō, abdō, aufērō, abstrāhō, asportō.
- (iv) È is used in composition before consonants only, ex is used before consonants and vowels; e.g. ēdō, expellō, exĕō. Defore £ the old form ec- becomes ef-, as in effĕrō.
- (v) Åd. com-, and frans sometimes has the consonants at the end, as in aspīrō, cŏéō, trāiciō (see p. 128, footnote).
- Obs. In some cditions of Latin classics prepositions in composition are printed in their unassimilated forms, e.g. adfero, objoro, submoveo.

NOTE.—Prō (originally prōd) retains its final d in prōd-ĕō, prōd-ĭgō (= prōd + ặgō), and in prōd-essē and other parts of prōsum in which the verb begins with e. Sometimes pro has \ddot{o} (short) in composition, eg, in profficiseor, I set eut.

§ 293. Verbs, etc., when compounded frequently undergo certain vowel-changes in the present, perfect, and supine bases, or in the present and perfect bases, or in the present base only.

The vowels thus subject to change are ă (with the diphthongs ae and au) and ĕ.

```
ă (short)
                 becomes ě, as in congredior = com + gradior
                                occĭdō
                                          = ŏb + cădō
                       or ĭ, "
                                          ⇒ cem-+quătio
                       "ŭ, "
                                concŭtio
a (short by nature) becomes e, " correptum = com-+raptum
                       or i, ,, confringo = com-+frango
                       "u, " insultō
                                          = in
                                                 + saltō
                 becomes ī, " cecīdō
                                          - ŏb + caedô
28
                                          = ex + plaudo
au
                         ō, " explōdō
                      or ū, "
                                conclūdō
                                         = ccm- + claudo
ē (short)
                 becomes I, "
                               collĭgö
                                          = com-+ lěgō
```

CHAPTER XXXIV.—INSEPARABLE PARTICLES.

§ 294. The following particles serve as prefixes in the formation chiefly of verbs, but also of other parts of speech. Most of them undergo euphonic changes similar to those which occur in the case of the prepositions mentioned in the last chapter.

ambi-, around, (amb-)

as in amb-ĭō (= ambi- + ĕō, but conjugated like audĭō), go round

dis-, asunder, (dif-, dī-)

" dis-cŭtiō (= dis- + quătiō), shatter; dif-fĕrō (= dis- + fĕrō), bear asunder; dī-vellō, rend

in-, not (= Eng. un-), (im-, il-, ir-) " in-andītūs, unheard of; im-pār, unequal; il-lotūs, unwashed; ir-rītūs (= in-+ rātūs), ineffectual

ne-, not,

" ne-scio, know not

rĕd-, back, (rĕ-)

" red-dō, give back; rĕd-ĕō, go back; rettŭlī,* I brought back; rĕ-mittō, send back

sēd-, apart, without, (sē-)

" sēd-ĭtĭo (-ĭtĭo = a going, from supine base of ĕo, go), dissension; sē-cūrūs, without anxiety

Obs. 1. The enclitic -dum is occasionally added to age and to some other imperatives; e.g. agedum, come now! iteradum, repeat now!

Ohs. 2. For the enclitic -ně, see § 239; for the enclitics -quě and -vě, see § 261.

* So also receïdī (perf. of rēcĭdō, fall back), reppērī (perf. of rēpērīō, find), and reppūlī (perf. of rēpellō, drive back).

PART III .: SYNTAX.

CHAPTER XXXV.—SENTENCES.

§ 295. The departments of grammar known respectively as accidence and syntax may be roughly defined by saying that accidence deals with words, syntax with sentences.

As it is impossible to learn intelligently the inflexions of substantives, verbs, etc., without some knowledge of the part which the inflected words play in a sentence, some of the main principles of syntax, here set out in detail, have already been indicated in Part I. of this book.

SIMPLE, COMPOUND, AND COMPLEX SENTENCES.

§ 296. A simple sentence consists of a single statement, question, or command, and contains but one finite verb.

věnio. quis I come. who

quis venit?

vění.

- Obs. By "finite" verb is meant a verb in the indicative, subjunctive, or imperative mood, as distinguished from a participle or verbal substantive.
- § 297. A compound sentence contains two or more simple sentences, each of which gives, when taken separately, a complete and intelligible meaning.

vēnī, vīdī, vīcī. I came, I saw, I overcame.

§ 298. A complex sentence consists of a simple sentence (called the "principal sentence"), to which are joined one or more sub-sentences (called "dependent clauses"), which, though each containing a finite verb, do not give a complete and intelligible sense when taken apart from the principal sentence. (See the next section for examples.)

- § 299 The dependent clause performs, in regard to the principal entence, the function of—
 - (a) a substantive,(b) an adjective, or
 - (c) an adverb;

and is termed accordingly substantival, adjectival, or adverbial.

- (a) quŏd rĕdĭĭt Rēgŭlŭs nōbīs mīrābīlĕ vĭdētŭr. (the fact) that Regulus went back seems to us remarkable.
- (b) non căret is qui non desiderăt. he lacks not who feels not his want.
- (c) cunctă ŭt gestă sunt exponam.
 I will relate everything as it happened.
- Obs. 1. The verb in a dependent clause is in the indicative or subjunctive mood.
- Obs. 2. The preceding examples are merely given to illustrate the definitions; the consideration of the dependent clauses of complex sentences must be deferred until simple sentences have been treated in detail.

Principal sentences to which dependent clauses are added fall under the same rules as simple sentences.

CHAPTER XXXVI.—VERBS, TRANSITIVE AND INTRANSITIVE: USE OF THE VOICES.

- § 300. It is necessary before proceeding with the syntax of the simple sentence to explain the chief usages of the two voices of Latin verbs. These usages vary according as the verb is transitive or intransitive.
- § 301. Of Latin verbs some are always intransitive (i.e. the action they express is not one performed upon some person or thing); e.g. věniō, I come. Others are always transitive, and imply the existence of some person or thing upon which the action is performed; e.g. portō, I carry.

Many verbs, however, are sometimes transitive, some-

times intransitive; e.g. timeo, I jeur.

Rules given in this syntax for transitive verbs must be understood to apply also to verbs of this last class when used transitively, and similarly rules given for intransitive verbs apply to these verbs when used intransitively.

Among deponents (§ 171) there are both transitive and

intransitive verbs.

- Obs. It often happens that, whereas a verb in its simple form is intransitive, compounds of this verb with prepositions are transitive; e.g. ĕō, I go (intransitive); ĕdĕō, I approach (transitive); pugnō, I jyht (intransitive); expugnō, I storm (transitive).
- § 302. Transitive and intransitive verbs (unless deponent or defective) are alike conjugated throughout the active voice, except that—
- (1) impersonal verbs are used in the third person singular and the infinitive only (§ 230);
- (2) the nominative gerund of transitive verbs is not in use in classical Latin.

§ 303. Verbs which are transitive in the active voice are conjugated throughout in the passive; intransitive verbs can only be used impersonally in the passive, and are, therefore, only found in the third person singular and in the infinitive.

ex proximis castellis e5 concursum est. a rush was made thither from the neurest forts.

ventum est in montes.

the mountains were reached.

Obs. There is in English no exact parallel to the Latin impersonal use of the passive of intransitive verbs: it is literally means there is a going, a going takes place; so ventum est, a coming that place. Attention is thus directed to the action, not to the person by whom the action is performed. The passive form of such sentences may be reproduced (as above) by employing as subject a substantive answering to the Latin verb or to some other word in the sentence.

- § 304. When a transitive verb is used in the passive voice the subject—
- (a) suffers an action performed by some external agency or instrumentality:

E.g., Saxum fluctībūs tundītūr, The rock is beaten by the waves;

(b) performs an action on himself:

E.g., Moveor, I move myself, i.e. I move;

(c) performs an action on something connected with his person:

E.g., Accingor gladium, I gird on a sword.

Obs. In usages (b) and (c), and especially in (c), the passive is said to have a middle meaning, i.e. a meaning similar to that of the "middle" voice of a Greek verb, in which the subject is identical with the indirect object. Usage (c) is peculiar to poetry; for other examples, see § 327.

CHAPTER XXXVII.—THE SIMPLE SENTENCE: CONCORDS.

SUBJECT AND PREDICATE.

§ 305. In its normal form a simple sentence statis-

(a) a substantive (in the nominative case) as subject;

 $\langle b \rangle$ a verb (of the same number and person as the subject) as predicate.

nāvis it.

nāvēs ĕunt. the ships go.

Obs. Rules given in this syntax for substantives apply also to adjectives used substantivally and to substantival pronouns. Adjectives used substantivally (i.e. without substantives) in the mascaline denote men, in the neuter denote things; e.g. Boni honesta probant, Good men approve of honourable things. This usage is avoided where ambiguity would arise through the masculine and neuter endings being the same.

- § 306. The subject need not be separately expressed, but may be denoted by the termination of the verb, if the latter is—
 - (a) of the first or second person singular or plural;
 - (b) of the third person singular used impersonally;
 - (c) of the third person plural used indefinitely.
 - (a) věniō.
 I come.
- (b) plut.

(c) crēdunt.
people believe.

Obs. The subject of a verb in the third person often has to be supplied from a preceding sentence; hence it is occasionally wanting in some of the extracts from the classics used as examples in this book, e.g. in § 320.

THE SECONDARY PREDICATE.

§ 307. Some intransitive and passive verbs do not by themselves form a predication complete in itself; e.g. fīō, I • hecome (become what?); Cātō appellātur, Cato is called (is called what?). The substantive or adjective added in such cases to complete the sense is called the secondary predicate, the verb in question being then for distinction called the primary predicate.

consŭl fiō.

Căto appellatur săpiers.

I become consul.

- Obs. A secondary predicate must, if a substantive, be in the same case as its subject; if an adjective, in the same gender, number, and case.
- § 308. The verb sum always requires a secondary predicate (unless used in the sense of I exist), and the perfect participle in the perfect, pluperfect, and future-perfect tenses of the passive voice is, strictly speaking, a secondary predicate.
- § 309. A perfect participle is very commonly used alone as a primary predicate, instead of as a secondary predicate with est or sunt.

continuo au ditae vocës. forthwith cries were heard.

NOTE.—Any adjective may be so used; see the example in § 313.

Concords.

§ 310. Two rules, known respectively as the "first concord" and the "second concord," which relate to the "concord" or agreement of words in a sentence, have already been indicated and are here formally stated.

Obs. The "third concord" has to do with complex sentences only (see § 497).

§ 311. Concord I. The subject of a finite verb is in the nominative case, and the verb agrees therewith in number and in person.

lābuntur annī. pro years glide by. aw

procul, o procul este, profani. away, away, ye uninitiated.

NOTE.—Sometimes the number of the verb depends on the sense rather than on the form of the subject; see Appendix (A.), Synesis.

§ 312. CONCORD II. An adjective, participle, or adjectival pronoun agrees in gender, number, and case with the substantive to which it refers either as attribute or predicate.

solvītūr ā c r ī s hīems.

sharp winter is melting away.

mětūō p ă t r ŭ a e* verběră linguae.

I fear the scourging of an uncle's tongue.

* Besides the substantive pătrăus, an uncle, there is an adjective pătrăus, of an uncle; pătrăue is from the latter.

fortună caecă est.

fortune is blind.

Clytaemnestră a filio suo occisa e. Clytaemnestra was slain by her son

NOTE.—An allocative that expresses a quality possessed by the subject at the time of action is often represented by an English adverb; e.g. Invitus id feci, I did so unwillingly.

§ 313. A masculine or feminine substantive sometimes has as predicate a neuter adjective used substantivally.

vărium et mutabile semper femină. woman is ever a pickle and inconstant thing.

§ 314. A substantive may stand to another substantive in the relation of an attribute, and is then said to be in apposition to it. A substantive agrees in case with that to which it is in apposition, but not necessarily in number. tē cănam, magnī Iŏvĭs ĕt dĕōrum nuntĭum.

thee will I hymn, the messenger of great Jupiter and the gods. Göriöli oppidum captum.

the town of Corioli was taken.

Obs. Note that apposition is often represented by the English preposition of. (Cŏrĭŏli is nominative plural.)

§ 315. A substantive in apposition often has special reference to the time of action, and must then be translated with the addition of when or us.

Cicero consul haec fecit. Cicero did these things when consul.

COMPOUND CONCORDS.

- § 316. Two or more substantives (not in apposition) having the same predicate form what is called a composite subject. (See the next section for examples.)
- § 317. A composite subject has, according to rule, its verb in the plural; and if the members of the composite subject are of different persons, the verb agrees with the "prior" person, the first person being reckoned prior to the second, and the second to the third.

ěgŏ ět Cĭcĕrō vălēmŭs. tū ēt Tullĭă vălētīs. Cicero and I are well. you and Tullia are well.

- § 318. Very commonly, however, a composite subject is constructed with a sin ular verb for one of the following reasons:—
- (a) The representation one member of the subject only, being understood with the other. This is always the case where the conjunction joining the members of the subject means or or nor.
- (b) The two members of the subject are either practically synonymous or combine to form one idea.
 - (a) făvět nox ět Věnůs.

night and Venus are favourable. cită mors věnit aut victoriă laetă, a swift death comes or a joyful victory.

- (b) rĕligiō ĕt fidēs antĕpōnātŭr ămīcītiae.
 let religion and good faith be considéred before friendship.
- 319. An adjective used as an attribute of several substantives usually agrees with the nearest.

vigēbāt in illā domo patriŭs mos et disciplina. there flourished in that house ancestral custom and rule.

NOTE.—Occasionally the rule for the agreement of the secondary predicate of a composite subject (§ 321) applies here.

§ 320. A plural substantive may have, when the sense requires it, two attributes, each in the singular.

in cornibus dextrō Poenōs lŏcăt, laevō Afrōs. [left. he places the Carthaginians on the right wing, the Africans on the

NOTE.—Similarly two individual names in the singular are constructed with a family name in the plural; e.g. Mĩhĩ Gnaeus et Publius Scipiones fortunati videntur, Gnaeus and Publius Scipio seem to me fortunate.

§ 321. An adjective or participle serving as the secondary predicate of a composite subject is, according to rule, put in the plural number; and if the members of the subject are of different genders, the adjective is masculine if it refers to persons, neuter if it refers to things.

mortŭī sunt pătěr ēiŭs ět mātēr. his father and mother are dead. dīvītīae děcŭs glōrīā in ŏcŭlīs sītā sunt. riches, honour, and glory are set before our eyes.

Note.—Two or more feminine abstract substantives may have a neuter plural predicate: e.g. Stultitia et temeritas sunt fügiendă, Folly and rashness are things to be avoided (cp. § 313).

CHAPTER XXXVIII.—SUBSTANTIVES: THE USE OF THE CASES AND NUMBERS.

I_THE NOMINATIVE CASE.

\$ 322. The nominative is used-

(a) as the subject of a finite verb:

E.g., Caesar pervēnit, Caesar arrived;

(b) as secondary predicate of that subject:

E.g., Iuppiter rex habetur, Jupiter is accounted king;

(c) in apposition to another nominative:

F.g., Pater Aeneas flebat, Futher Aeneas was weeping;

(d) occasionally, in place of the vocative, to denote the person addressed:

E.g., Audī tū, pŏpŭlŭs Albānŭs, Hear thou, Alban nation.

§ 323. The commoner verbs with which a secondary predicate is used in the same case as the subject are here given (these are often termed copulative verbs):—

(a) The verb sum, I am:

E.g., Cicero consul erat, Cicero was consul.

(b) The passive of verbs signifying to make, name, esteem, and the like (including fīō, I become, which serves as the passive of fāciō, I make, and vĭdĕŏr, I seem, passive of vĭdĕō, I see):

E.g., Hi běātī videntur, These men seem happy.

(c) Intransitive verbs such as nascŏr, I am born; vīvō, I live; mănĕō, I remain:

E.g., Egŏ vīvō mīserrīmūs, My life is most wretched.

II.—THE VOCATIVE CASE.

§ 324. A substantive in the vocative case stands as an exclamation. It bears no syntactical relation to the sentence with which it is used.

hūc ădes, mī fīlī. come here, my son.

Obs. For the nominative used as vocative, see § 322.

III.—THE ACCUSATIVE CASE.

§ 325. We word in the accusative case for the most part defines the phere of a verb's action, and is called the object of that verb.

The object is-

- (A.) external, denoting that to which the verbal action is applied (§\$ 326—333); or
- (B.) internal, denoting the extent or character of the action (§§ 334—344).

The accusative is also used with many prepositions (§§ 345-346).

Obs. The terms "external" and "internal" are explained and illustrated in § 336.

For the accusative used as subject of an infinitive, see § 408, Obs.

- (A.) Accusative of the External Object (Including the "Goal," when the Verb expresses Motion).
- § 326. The object of a transitive verb, personal or impersonal, is in the accusative case.

multī dīvītīās despīciunt. many despise riches.

ŏportĕt mē ăbīrĕ.

it behoves me (i.e. I ought) to go away.

Note.—Participles of transitive verbs, and the infinitive and other verbal substantives (§ 407) take an accusative of the object.

Caesăr contratus su o s proelium commisit. Caesar, having encouraged his men, joined battle.

§ 327. This accusative of the external object is found not only with active and deponent transitive verbs, but also in poetry with passive verbs used in a middle sense (§ 304), and especially with their perfect participles.

induïtur cultum făciem que Dianae.

she assumes the garb and form of Diana.

pueri laevo suspensi loculos tabulam que lacerto ibant.

the boys used to go, having slung on their left arm satchel and
tablet.

§ 328. Verbs which are, strictly speaking, intransitive are occasionally, by a slight stretch of their meaning, constructed with an accusative of the external object, especially in poetry.

trībūnīcium nōmēn horrēbant. they stood in dread of the title of "tribune." i o c a t u a rīsī s atīs.

I laughed heartily at your jests.

§ 329. The accusative used in exclamations is the object of some verb more or less distinctly understood.

ō mē perdītum! ō mē afflictum! alas for me, undone and overchrown!

Ohs. The above usage must be distinguished from that of an interjection with the vocative of the person addressed (§ 324).

§ 330. With verbs of making or calling (known as factitive verbs), the object has a predicate in agreement with it.

> tē fācimus, Fortūna, děam. we make thee, Fortune, a goddess.

Cătonem săpientem appellant. they style Cato wise.

Obs. When a sentence such as the above is reproduced in a passive form, the predicative word agrees with the subject of the passive verb; the above examples become tū, fortūnă, fīs dĕă, and Cătō appellātūr săpiens.

§ 331. The accusative is used both with and without a preposition to denote the goal of motion.

It is used without a preposition when the goal is ex-

pressed by—

(a) the name of a town;

(b) the name of a small island—i.e. one small enough to be regarded as a place, not a country;

(c) the words domus, home (but not in the meaning

house); rūs, country.

Brundusium pervēnimus, inde Leucadem. we came to Brundusium and thence to Leucas.

võs îtě domum, ego rūs ībō.

you go home, I will go into the country.

NOTE 1.—If a substantive (e.g. urbs, city; oppidum, town) stands in apposition to the name of the town which is the goal of motion, a preposition is generally used with that substantive.

consul pervenit in oppidum Cirtam. the consul arrived at the town of Cirta.

NOTE 2.—The difference between the Latin and the EngKsh idiom in sentences such as the following should be noted: Lēgātī missī Sāguntum ād Hannībālem, Ambassadors were sent to Hannibal at Saguntum.

NOTE 3.—The accusative of words other than names of towns and small islands is occasionally used (without a preposition) by the poets to denote the goal of motion; e.g. Dēvēnērē löcōs laetōs, They reached the joyful spots.

§ 332. The accusative supine represents an action as the "goal," and accordingly is used with verbs implying motion.

lūsum it Maecēnās, dormītum ĕgŏ Vergiliusquē. Maecenas goes to play, Vergil and I to sleep.

§ 333. In the case of words other than names of towns or small islands, dŏmūs, rūs, and supines, the goal of motion is in prose expressed by the accusative with a preposition.

Caesăr în Galliam contendit. Caesar hastens into Gaul. lēgātōs ăd Caesărem mittunt. they send ambassadors to Caesar.

(B.) Accusative of the Internal Object.

§ 334. The uses classed under the heading of "internal" accusative are far more varied than the preceding. The internal accusative is found with adjectives as well as with verbs and participles; with adjectives it denotes the extent to which the adjective is applicable to its substantive (§ 340). The usages in which the accusative expresses extent of space or time also fall under the general heading of "internal object."

Obs. The name "adverbial" is often given to the accusative of the internal object generally, though some confine the term to the adverbial use in \S 341.

§ 335. Intransitive verbs may have as an accusative of the internal object a substantive expressing something allied to or contained in the notion of the verb. This is aften called the cognate accusative.

păter eius servitutem servivit.

his father was a slave (lit. served a service).

populus laetum ter crepuit sonum.

the people thrice applauded joyfully (lit. clapped a joyful sound).

§ 336. Certain transitive verbs may have two objects in the accumative—one external, the other internal: these verbs are such as denote asking or teaching; also cēlō, when meaning I keep in ignorance (not I hide). The internal accusative with these verbs expresses that with regard to which the action is performed on the external object.

clāvēs portārum magistratūs poposcit.

he asked the magistrates for the keys of the gates.

(The internal object is claves, the subject-matter of his demand.) puĕrōs ĕlĕmentă dŏcēbō.

I shall teach boys their letters.

(The internal object is ělěmentă, the subject-matter of my teaching.) non celavi te sermonem Títi.

I did not keep you in ignorance as to Titus' conversation.

(The internal object is sermonem, that with regard to which I keep you in ignorance.)

- Obs. These examples illustrate the meaning of the terms "external object," "internal object." Thus, in the first example, magistratus is external to the verbal action, and gives no information with regard to its nature; whereas claves is internal, and defines the nature of the request. So, too, in the second example, "boys" is the object of the act of teaching, but external to it; whereas "letters"—the contents of the lesson—is the internal object of the verbal action.
- NOTE.—These verbs do not by any means always take two accusatives.
- § 337. When a sentence such as the above is reproduced in a passive form, the external object becomes the subject of the passive verb, but the internal object is retained in the accusative. This may be called the retained accusative.

Cicero was asked his opinion.

Obs. Disco, I learn, is usually substituted for the passive of doceo, I teach.

§ 338. With cēlō, I keep in ignorance, dē with the ablative is generally (except in the case of neuter pronouns) substituted for the internal object when the sentence assumes a passive form.

non est profecto de illo veneno celata mater.

his mother was certainly not kept in ignorance with regard to that poison.

nosně hôc cělátôs (sc. essě, § 413) tam dřů! to think of our being kept in ignorance of this so long!

§ 339. The extent of the action of any verb —transitive, intransitive, or passive—may be expressed by a neuter pronoun in the accusative.

nos ăliquid Rutulos contra iuvimus.

I, on the other hand, have helped the Rutuli somewhat.

Note.—Nihīl, in no respect, cētěră, in all other respects, are similarly used.

§ 340. In poetry the accusative of any substantive may be used to express the part affected by the action of an intransitive verb, or the part to which an adjective or passive participle is applicable. This is sometimes called the accusative of specification or of respect.

equus tremit artus. the horse trembles in his limbs.

huic sē formă děī obtůlit, omniă Mercŭrio similis, vocemquě

colore mque.

to him the form of the god presented itself, like unto Mercury in all respects, both in voice and in complexion.

măn ūs iŭvenem post terga revinctum trăhebant.

they were haling a youth with his hands bound (lit. hand-bound) behind his back.

Obs. 1. In prose the ablative (§ 370) is used. *

Obs 2. The accusative of specification or respect is to be distinguished from the accusative governed by a passive verb used in a middle sense (§ 327).

§ 341. The accusative neuter of an adjective, singular or plurel, serves as an adverb to qualify an intransitive verb. This use is mainly poetic, and is known as the adverbial accusative.

dulcě rīdentem Lălăgên ămābō. my sweetly laughing Lalage I will love. ăcerbă tŭens rĕtrō rĕdĭt.

acerba tuens retro redit.
glaring sourly he draws back.

§ 342. Here may be noted the phrases hoe genus, of this hind; id genus, of that hind; virile secus, of the make sec; which are seems anally found instead of the mentione of quality (§ 394); also instar, like, properly of the weight (§).

mihi concredit nugas hõc gönus. he confides to me trifles of this sort.

- instär mürī hae saepēs mūnīmentā praebēbant. these lealges prosected ba riers lake a real!.
- § 343. Extent of space is expressed by the accusative.

nos pēdem ē villā adhūc ēgressī non sumus.

so fur I have not stepped a foot outs' is my country-house.

Caesar mīliā passuum trīā ab Helvētīorum castrīs castrā ponīt.

Caesur pitches his camp three miles (lit. three thousand pages) from the camp of the Helicitii.

duas fossas quindecim pedes latas perduxit. he constructed two trenches fifteen feet broud.

§ 344. The time throughout which an action or state extends is expressed by the accusative.

Romulus septem et triginta regnavit annos.

Romulus reigned thirty-seven years.

Cătō annōs quinque et octoginta natus excessit e

Cate died at the age of (lit. having been born) eighty-five years,

THE ACCUSATIVE WITH PREPOSITIONS.

- § 345. A list of the prepositions which are used with the accusative is given in § 255, and some of the more noticeable usages are illustrated in §§ 598, 600.
- § 346. Verbs compounded with trans, across, may have an accusative dependent on trans-, in addition to the accusative of the object.

Caesar Germanos flümen traicit. Caesar puts the Germani across the river.

NOTE.—The accusative dependent on trans-is also found when the verb is passive; e.g.. Exercitus flumen traductus est, The army was conveyed across the river.

IV.—THE DATIVE CASE.

§ 347. The use of the dative falls under two main headings: §

(A.) Dative of the indirect object—i.e. the person or thing affected by the action of the verb (§§ 348—358).

(B.) Predicative dative, indicating that which a person or thing serves as or results in (§ 359).

(A.) DATIVE OF THE INDIRECT OBJECT.

§ 348. The dative of the indirect object is found with transitive and intransitive verbs, active and passive.

Transitive.

virtūtī ŏperam dătō.

give attention to virtue.

h ŏ m ĭ n ĭ b ŭ s ănĭmŭs dătŭs est.
to men a mind has been given.

Intransitive.

impērī o illē pātrīs magnī pārērē pārābāt.

he was preparing to obey the command of his mighty sire.

mendācī hōmīnī nōn crēdītur. no confidence is placed in a liar.

Obs. 1. That which is affected by an action (dative) being termed the "indirect object," that which is acted on (accusative) is for distinction often called the "direct object."

Obs. 2. The passive of intransitive verbs is used impersonally only (see § 303).

 \S 349. Verbs which admit a dative of the indirect object are—

(1) Transitive verbs, such as those of showing, telling, and giving, which do not yield a complete sense when accompanied by a direct object only.

(2) Many verbs (transitive and intransitive) compounded with—

běně, mălě, sătis, rě-, antě, ăd, in, intěr, dē, cum, sŭb, sŭpěr, post, ŏb, prae.

(3) All compounds of sum (except possum).

(4) Other intransitive verbs rendered by English transitive verbs signifying—

To please, obey, command, persuade, Harm, pardon, spare, believe, and aid.

Note. The most common verbs of this last class are :-

```
Verb (Indic, and Infin ).
                         Meaning.
                                         Usual English rendering.
             -ērē to le pleasine
                                             to please
  plăc-ĕō.
              -ērē to be o'r dient
                                              to oben
  pār-ĕō.
  serv-ĭō.
              -Tra to be a dare
                                             1.1 8FTE
             -are to size orders
  impěr-ö.
                                             to cor mand
             -ere to rec one not
                                             to necessarde
  suād-ĕō.
  nőc-ĕő.
             -ere to le introdut
                                             to harm
  ignosc-ō.
              -ere to overlook (an offence)
                                             to parden
  indulg-eo, -ere to give way, he kind
             -ěrě to be snarene
  parc-o.
                                              to spare
  crēd-ŏ.
             -ere to trust, entrust
                                             to trust, believe
             -ĕrĕ to have confidence
                                              to trust
  fīd-ö.
             -ārī
  auxili-or.
                   to give help
                                              to help
             -ērē to be favourable
                                              to farour
 fãv-ĕö.
 měd-ĕŏr.
             -ērī
                  to be a cure
                                             to heal
```

Obs. Dēlectō, Idclight; iŭbēō, Icemmand; iŭvō, I help or delight; laedō, I hurt; sānō, I heal, are transitive verbs, and have a direct object in the accusative.

- (1) Aenēās rēgī mēmŏrāt nōmenquē gēnusquē. Aeneas recounts to the king his name and descent. bellīcōsīs fātā Quĭrītĭbŭs dīcō. I declare to the warlike Quirites their destiny.
- (2) ămicitiam omnibus rēbus hūmānis antēpono. I value friendship above all human things. subvēnistī hömīnī iam perdīto. you have come to the help of a man already lost.
- (3) nē dēsint ĕ p ŭ l ī s r ŏsae. let not roses be wanting to the feast. nihīl t ĭ b ī littērae mēae prodērunt. my letter will do you no good.
- (4) nō bīs nŏcētūr. Parthī fǔ gae fīdunt. we are being injured. Parthians trust to flight.

NOTE 1.—The dative of the indirect object is found with some verbs of taking away; e.g., Nihil tibi dētraxit senectūs, Old age has borne nothing off from you. These verbs are adimo, I take away,

and some compounds of ab, de, ex.

NOTE 2.—A name is often attracted to agree in case with the dative substantive denoting the person to whom the name is given; e.g. Puĕrō Ĕgĕrĭō indĭtum nōmĕn, The name Egerius was given to the boy.

§ 350. The dative is used with adjectives and adverbs implying likeness or nearness, or any notion similar to that of a verb that is constructed with a dative of the indirect object. (For similis, see § 569.)

Belgae proximī sunt Germānīs. the Belgae are nearest to the Germani. congruenter nātūrae sapientes vīvunt. wise men live agreeably to nature.

§ 351. The dative of advantage or disadvantage is a development of the dative of the indirect object; it is commonly rendered by "for" or "in honour of."

non solum nobis dīvītēs essē volumus, sēd lībērīs. we wish to be rich not for ourselves only, but for our children.

Īūlŭs dūcit āvō turmās.

Iulus leads squadrons in honour of his grandfather.

 \S 352. Occasionally the dative expresses the person whose point of view the writer assumes.

ille clarus erit postgenītīs.

he will be renowned in the eyes of posterity.

§ 353. A personal pronoun in the dative is sometimes introduced for dramatic effect, and indicates that the statement is one that concerns the person in question; this is called the ethic dative.

ăt ille tibi pergit Brundusium.

but, look you, he is going on to Brundusium.

quid mihi Celsus agit?

pray, what is Celsus doing?

Obs. 1. The term "ethic" is derived from the Greek $\hat{\eta}^{\theta}$ os (ēthos), a word used by writers on rhetoric to signify the influence exercised by a speaker's personality.

Obs. 2. It should be noted that this ethic dative is found in Shakespearian English; e.q. "He plucked me ope his doublet," "Knock

me on this door."

§ 354. The dative is sometimes used in a possessive sense, especially with substantives denoting parts of the body.

sēsē omnēs flentēs Caesarī ad pedēs proiecerunt. they all threw themselves at Cacsar's feet weeping.

hộc multīs ĕrăt ĭn ōrě.

this was in many people's mouths.

§ 355. The verb sum in the third person with a dative (of advantage) may often be rendered by the English verb to have.

sunt nobis mitia poma. we have mellow apples.

- § 356. The dative is used to express the agent, i.e. the person by whom an action is performed—
- (1) regularly with the gerund, gerundive, or verbal adjective ending in -bilis (§ 269);
- (2) sometimes (in both prose and poetry) with the perfect participle passive or a tense formed by the verb sum with that participle;
- (3) occasionally in poetry and very rarely in prose with other tenses of the passive.
 - (1) suo c u i q u ĕ iudicio est utendum (§ 586). use must be made by each of his own judgment. hoc făciendum imitandumquĕ est o m n i b u s. this is to be done and imitated by all. multīs illĕ b o n ī s flēbilĭs occidit. he died lamented by many good men.
 - (2) cui non sunt auditae Dēmosthenis vigiliae? by whom have not Demosthenes' nights of work been heard of?
 - (3) hönestä bönis viris quaeruntür.

 honourable objects are sought by good men.
- Obs. 1. The dative of the agent should not be used in translating English into Latin except with the gerund, gerundive, or verbal adjective ending in -bilis.
- Obs. 2. The dative of the agent may be shown to fall under the heading of dative of the indirect object by rendering Hoc faciendum est omnibus as This is for all a thing to be done,

§ 357. The place towards which motion takes place is occasionally in poetry expressed by the dative.

ūnus homo iuvenum primos tot miserit Orco?

shall one man have sent so many of the chief of the youths to Orcus? läbentur flüminä pontö.

rivers will glide on to the sea.

- Obs. 1. This usage may be brought under the general heading of dative of the indirect object by understanding, for instance, in the above example the exact meaning to be sent them for Orcus to receive.

 Obs. 2. The prose construction is ad and the accusative.
- § 358. The dative used in close connection with a substantive may indicate the purpose to which the latter is put. This is frequently called the dative of the work contemplated. Cp. § 430 (ii.).

dies collòquio dictus est. a day for a parley was appointed.

(B.) PREDICATIVE DATIVE.

- § 359. A large number of substantives more or less abstract in meaning (most of them implying verbal action) are used in the dative singular to denote that which a person or thing serves as or results in. This dative stands (a) as secondary predicate of the subject of the sentence, or (b) as primary predicate of the direct object, and is known as the predicative dative.
 - (a) haec mihi sunt cūrae.

 these things are an anxiety to me.

 maximō mihi ūsūī ĕris.

 you will be of very great use to me.
 - (b) ĕquĭtātum auxĭlĭō Caesărī Aedŭī misĕrant. the Aedui had sent cavalry as an aid to Caesar.
- Obs. 1. A dative of the indirect object nearly always accompanies the predicative dative; hence the name of "double dative" is sometimes given to this construction.
- Obs. 2. The predicative dative either has no attributive adjective or one denoting quantity (c.g. magnus).
- Obs. 3. In usage (b) the verb is one of sending or placing, or else dăre, ducere (to consider), or habere; in (a) the verb is esse, or a verb of going, or the passive of one of the above-mentioned verbs.

V.—THE LOCATIVE CASE.

§ 360. The locative case has, except in the words and classes of words enumerated below, become merged in the ablative; accordingly only those usages in which the locative has a form distinct from that of the ablative are here treated.

The locative denotes-

(A.) the place where an action is performed;

(B.) the time when an action is performed;

- (6.) certain forms denoting the value at which a person or thing is held have also been regarded as locative by some grammarians, and are here so classed.
 - (A.) LOCATIVE DENOTING PLACE WHERE.

§ 361. Place where is expressed by the locative of-

(1) names of towns and small islands belonging to the first or second declension and singular in form (§§ 17, 20); (2) a few names of towns of the third declension singular (§ 37); (3) a few other words, of which the most common are dŏmūs (home), hūmūs (ground), rūs (country), bellum (war), mīlītiā (warfare), which have locatives dŏmī, hūmī, rūrī, bellī, mīlītiāe, respectively.

Rōmae rūs optās.

at Rome you wish for the country.

Pollex mihi Lān uvīī praesto fuit.

Pollex was ready for me at Lanuvium.

mīlītīae quam domī respublicā melīus administrātā est.

public affairs were carried on better at the wars than at home.

Note.—Under this heading falls the use of ănimi (locative of ănimis) with verbs and adjectives—e.g. ănimi pendeo, I am irresolute; aeger ănimi, sich at heart. Also cordi, dear (e.g. nobis cordi es, you re dear to us, lit. at our heart), is locative of cor.

(B.) LOCATIVE DENOTING TIME WHEN.

§ 362. In classical Latin only two substantives have distinct locative forms denoting time when—viz. lux, light, and vesper, evening; their locatives are luci (in daylight) and vesper (in the evening).

ăd mē hĕrī vespērī vēnĭt Caesăr.

Caesar came to me yesterday evening.

NOTE.—Heri and some other adverbs were originally locatives.

(C.) EXPRESSIONS OF VALUE AND PRICE.

§ 363. The great or small value at which a person or thing is held is expressed by genitive singular neuter forms of certain adjectives, and genitive singular forms of certain substantives:—

tantī (tantŭs, so great), magnī (magnŭs, great).

quantī (quantŭs, as great) maxīmī (maxīmūs, very great) plūrīmī (plūrīmūs, very much) minīmī (mīnīmūs, very smali)

parvī (parvūs, small), minīmī (minīmūs, floccī (floccūs, flock of wool), pilī (pilūs, a hair) nihilī (nihīlum, nothing), pensī (pensum a w

), pilī (pilŭs, a hair)
pensī (pensum, a weighty matter)

quantī quisque sē ipse făcit, tantī fit ab amīcīs. at whatever price each values himself, at this price is he valued by his friends.

parvī sunt foiīs armā nīsī est consīlĭum domī.

arms are of little value abroad, unless there is good counsel
at home.

rem publicam flocci non făcis.

you do not care a straw for the commonwealth (lit. value at a flock of wool).

Obs. These forms may be explained as genitives of quality. They have also been regarded as locatives indicating position in an imaginary scale of values.

§ 364. The following, which are undoubtedly genitive forms, were similarly used to express value:—

plūris (gen. sing. of plūs, neuter substantive, more), minoris (gen. sing. neut. of minor, smaller).

meă mihi conscientia plūris est quam omnium sermo. a good conscience is of more value to me than what all say.

Note.—Assis (genitive of ās, a copper coin) was similarly used.

§ 365. Tantī, quantī, plūrīs, mīnōrīs are also used to denote the price at which a thing is bought or sold.

quantī emptum? at what price was it bought?

Obs. The ablative of all other words must be used to denote price (§ 377).

VL—THE ABLATIVE CASE.

- § 366. The usages of the ablative fall into three main divisions:—
- (A.) Local, in which the ablative has absorbed (except in the instances mentioned in §§ 361—365) the functions of the locative.
- (B.) Instrumental, in which the ablative has absorbed the functions of a lost instrumental case.
- (C.) Ablative proper, signifying separation, the word "ablative" being formed from the supine base of aufero, I bear away.
- Obs. The ablative when used with a preposition (§§ 256, 257) may usually be classed without difficulty under one of these headings; e.g. the ablative with ĭn, prō, or sǔb is local, with cum instrumental, with ǎb, dē, ex ablative proper.

(A.) LOCAL ABLATIVE.

- § 367. The usages of the ablative which fall under the heading of "local" denote (1) the place where an action is performed, (2) the time when an action is performed.
- § 368. In prose place where is expressed by the ablative without a preposition only in the case of—
- (a) names of towns or small islands belonging to the third declension or (if plural in form) to the first or second declension; (b) substantives accompanied by mědĭŭs, middle, or tōtŭs, whole, as an attribute;
 - (c) terrā, marī (used in connection), by land, by sea;

dextrā, on the right; laevā, on the left;

lŏcō (usually with an attribute), lŏcīs (always with an attribute), from lŏcūs, place;

partě, partibus (always with an attribute), from pars, part; rěgioně (with attribute or genitive), from rěgio, direction.

(a) hīc Tīb ŭr ĕ nātŭs est, illĕ Gābĭīs. one was born at Tibur, the other at Gabii.

Athēnīs Crătippum audiebam.

at Athens I used to hear Cratippus' lectures.

 $\it Obs.$ I. There are no names of towns or other place-names belonging to the fourth or fifth declension.

- (b) carcer media urbe aedificatur, a prison is being built in the middle of the city. totis castris undique ad consules curritur. throughout the camp there is a rush from all quarters to the consuls.
- (c) ōrātiō pūĕrīlis est multīs locīs. the speech is in many passages puerile. utrāquĕ partĕ Tībĕrĭs pŏpŭlātōrēs oppressĭt. on each side of the Tiber he surprised plunderers.
- Obs. 2. A preposition may be used with the words loco, etc. Note.—If a substantive (e.g. urbs, city; oppidum, town) stands in apposition to the name of a town expressing place where either by the locative or by the ablative, the preposition in is used with the ablative of that substantive; e.g. Albae constiterant in urbe opportuna, They had stopped at Alba, a convenient city.
- § 369. In prose place where is expressed by the ablative with a preposition, except in accordance with the preceding rule, or where the locative may be used; but poets freely employ the local ablative without a preposition.

in ĕā cīvitātĕ duŏ dē principātū intĕr sē contendēbant. in that state two were contending for the sovereignty.

Caesăr în Galliā hībernă constituit. Caesar fixed his winter quarters in Gaul. solă domo maeret văcuā.—Vergil. she mourns alone in the empty house.

§ 370. The ablative is used to limit the application of a substantive, adjective, or verb. This usage is called the ablative of respect, and falls under the general heading of "local" ablative.

non tota rē sed temporīb us errastī.

you have made a mistake not as to the whole matter but as to dates.

hī omnēs linguā instītūtīs lēgībŭs intēr sē differunt. these all differ in language, customs, and laws.

Obs. This use of the ablative is very common in dependence on words expressing plenty or want; e.g. Non egeo medicina, I do not require a remedy.

§ 371. The time when an action is performed is expressed by the ablative without a preposition.

Ărăbēs campos hìĕmĕ ĕt aestātĕ pĕragrant.

the Arabs wander about the country in winter and in summer.

hōrā diēi dĕcimā Rōmam pervēnī.

I reached Rome at the tenth hour of the day.

§ 372. The time within which an action is performed is also expressed by the ablative.

Ăgămemnon vix decem annīs urbem unam cepit.

in ten years Agamemnon barely took one city.

NOTE.—The preposition in is used with the ablative when a distributive or adverbial numeral forms part of the expression; e.g. Inde vix ter in annonuntium audimus, We receive news thence barely three times a year.

(B.) Instrumental Ablative.

- § 373. In the usages which fall under this heading the ablative expresses, as did the lost instrumental case, either the instrument or some accompaniment of an action, in both of which characters it answers to the English preposition "with."
- § 374. The ablative of the instrument denotes the thing by means of which an action is performed, and is found with active and passive verbs alike.

měā ŏ p ĕ r ā Tărentum rěcēpistī.

by my help you recovered Tarentum.

non vīrībūs aut vēlocītātĕ rēs magnae gĕruntūr. great things are not achieved by strength or swiftness.

§ 375. The ablative of the agent—i.e. of the person by whom an action is performed—cannot stand without the preposition ā, ăb, and is found with passive verbs only.

Sŏphŏclēs ā fīlĭīs m iūdicĭum vŏcātŭs est.

Sophocles was prosecuted by his sons.

Obs. 1. The ablative of the agent is placed here in order that it may be contrasted with ablative of the instrument; strictly speaking it falls under the heading of "ablative proper," the agent being regarded as the source of action.

Obs. 2. For the dative of the agent, see § 356.

§ 376. The instrumental ablative expresses the road by which a journey is performed.

ībam fortě v i ā sacrā.

I was walking by chance along the sacred way.

§ 377. The price for which a thing is bought or sold is put in the ablative case, the price being regarded as the instrument of purchase.

sāl impensō prētīō vēnībāt, salt was being sold at a high price.

NOTE 1.—The genitive forms tantī, quantī, plūrīs, mĭnōrīs, are used instead of the ablative to express price; e.g. "Quantī emptum?" "Parvō." "Quantī ergō?" "Octussībūs." "At what price was it bunght?" "At a low price." "At what price, now?" "For eight asses."

Obs. The ablatives magno. permagno, plūrimo, parvo, minimo are used without a substantive as ablatives of price.

NOTE 2.—With the verb aestimo, I value, the ablative singular neuter of tantus, quantus, magnus, parvus, etc., may be used instead of the genitive form (§ 363); e.g. Virtutem magno aestimo, I value virtue greatly.

§ 378. The ablative of measure indicates by how much one thing differs from another.

Caesăr lěgionem passibus cc ăb ĕō tumulo constituit. Caesar halted the legion 200 paces from that mound.

proelium equestre paucis ante diebus erat factum. a cavalry engagement had taken place a few days before.

Obs. Distinguish this ablative of measure in expressions such as decem annis ante or post (ten years before or after, lit. before or after by ten years) from the ablative of time in decimo anno ante or post (in the tenth year before or after).

§ 379. An ablative, apparently local but really instrumental, is found with the verbs těněō or continěō, I hold; rěcĭpĭō, I withdraw; abdō, I conceal.

Ariovistus castrīs sē tenebat.

Ariovistus was keeping within his camp.

§ 380. The ablative of cause is an extended use of the instrumental ablative.

vires eum lassit ū din e defecerunt. his strength failed him owing to fatigue.

§ 381. Various accompaniments of an action are expressed by the ablative, the largest class being those denoted by the ablative of manner. A substantive used in the ablative to express manner must be accompanied by (1) the preposition cum, or (2) an adjective, except (3) in the case of a few words, of which the most important are:—

mŏdō, dŏlō, sĭlentiō, clāmōrĕ, vī, rătiōnĕ, fraudĕ, artĕ, mōrĕ, iniūrĭā, consensū, cāsū, iūrĕ.

- (1) nos illud idem cum pācē ăgēmus. we will do that same thing peacefully. summā cum cēlēritātē ăd exercitum rēdīt. he returned to the army with the greatest speed.
- (2) incrēdībīlī cēlērītātē dē victōrĭā Caesărīs fāmā perfertūr.

 with incredible swiftness the news is brought of Caesar's victoru.
- (3) aut vī aut fraudě fit iniūriă. wrong is done by force or fraud.

Obs. From the above rule it may be seen that manner may be expressed in four ways; e.g. the sentence I came with speed may be rendered (1) celeriter venī, (2) cum celeritate venī, (3) summā cum celeritate venī, (4) summā celeritate venī; but celeritate must not be used to denote manner without cum or an attribute.

§ 382. The ablative of description is always accompanied by an attribute, and usually expresses some temporary or external characteristic, less often a mental quality.

Britannī căpillō sunt prōmissō. the Britons are long-haired.

Cătilină füit magnā vī ĕt ănimī ĕt corpŏris, sĕd ingĕniō mălō prāvōquĕ.

Catilina was a man of great mental and bodily power, but of an evil and corrupt disposition.

- Obs. 1. This usage may be regarded as a development of the ablative of manner.
 - Obs. 2. Contrast the genitive of quality (§ 394).

- § 383. With a substantive in the ablative (a) a participle, (b) an adjective, or (c) another substantive may stand predicatively. This construction is known as the ablative of attendant circumstances or ablative absolute.
 - (a) Caesăr, expositō exercitū et loco castrīs idoneo capto, ad hostes contendit.

the troops having been landed and a fit position for the camp secured, Caesar hastens against the enemy.

- Obs. 1. In the above example there are two instances of the ablative of attendant circumstances: the first consists of exposito used predicatively with exercito, the second of capto similarly used with loco. The predicative character of capto here may be seen by comparing it with idoneo, which stands as attribute to loco loco loco is a fit place, but loco capto is a place having been taken, not a taken place.
 - (b) exiguă part e aestătis reliquă Caesăr în Britanniam proficisci contendit.
 - a small part of the summer being left, Caesar hastens to set out for Britain.
 - (c) illě Caepĭōně ět Phĭlippō ĭtěrum consŭlĭbŭs mortŭŭs est.
 - he died when Caepio and Philippus were consuls for the second time.
- Obs. 2. The name of ablative absolute was given by the old grammarians to the ablative of attendant circumstances, because they regarded it as standing free (absolutions) from the rest of the sentence; it is probably an instrumental ablative.
 - (C.) THE ABLATIVE PROPER.
- § 384. The place from which motion takes place is expressed by the ablative without a preposition if it is denoted by the name of a town or small island, or by domo, from home; humo, from the ground; rure, from the country.

Pompēius Lūceriā proficiscitur Canusium.

Pompeius sets out from Luceria for Canusium.

multī dom o exīre nolebant.

many were unwilling to leave home.

Obs. 1. With any other words a preposition must be used; e.g. Dūcite ab urbe domum, mea carmina, dūcite Daphnim, Draw Daphnis, my songs, draw Daphnis home from the city.

Obs. 2. The above rule (§ 384) applies only to expressions implying motion. A preposition is required to express distance; e.g. Tum Brūtūs ab Rōmā aberat, At that time Brutus was away from Rome.

NOTE 1.—If a substantive (e.g. urbs, city; oppidura, town) stands in apposition to the name of the town from which motion takes place, a preposition is used with that substantive; e.g. Vercingĕtŏrix expellitūr ex oppido Gergŏvia, Vercingetorix is driven out of the town of Gergovia. (Cp. § 331, NOTE 1.)

NOTE 2.—The place from which motion takes place is occasionally expressed in poetry by means of the ablative without a preposition, even when the substantive is not the name of a town, etc.; e.g. Fratres

Lycia missos occidit, He slays the brothers sent from Lycia.

§ 385. An ablative of separation without a preposition is used in dependence on words compounded with one of the prepositions ab, de, ex, or the verbs cedo, I withdraw; moveo, I set in motion, and a few others.

Caesăr omnes copias castris educit.

Caesar leads all his forces out from the camp.

- Obs. 1. Even with the above verbs a preposition is commonly used; e.g. Helvētii ē fīnībūs sūīs exeunt, The Helvetii leave their territories.
 Obs. 2. For the dative with verbs of taking away, see § 349, NOTE 1.
 NOTE.—So, too, lībēr cūrā, free from anxiety; vācūūs ignī, devoid of fire, etc.
- § 386. A substantive denoting a person or family may be used in the ablative to express origin.

nātě děā, pŏtěs hōc sŭb cāsū dūcěrě somnōs? Goddess-born, canst thou at this emergency prolong slumber?

§ 387. The ablative is used to express the standard of comparison, i.e. that from which the subject or object of the sentence diverges in respect of the quality denoted by a comparative adjective or adverb.

nīhīl est ötiosā sēnectūtē iūcundīŭs.
nothing is more pleasant than a calm old age.
sol multīs partībūs est terrā māiŏr.
the sun is many times greater than the earth.

Obs. 1. In this example the sun is measured by its divergence from the "standard of comparison"—viz. the earth. Multīs partībūs is ablative of measure (§ 378).

Obs 2. Quam, than, may always be used instead of the ablative of the "standard of comparison." See § 593.

VIL—THE GENITIVE CASE.

- § 388. The cases hitherto treated stand, in the great majority of their usages, in direct relation to the verb; the genitive, on the other hand, serves primarily to indicate the relation of one substantive to another—a relation which in English is for the most part expressed by the preposition of. The employment of the genitive with verbs and adjectives is of secondary importance.
- § 389. The usages of the genitive, which are very various, may be conveniently arranged as follows:—
- (A.) Attributive genitive, the substantive in the genitive standing in the relation of attribute to another substantive.
- (B.) Predicative genitive, the substantive in the genitive forming a predicate (usually with the verb sum).
- (C.) Objective genitive, the substantive in the genitive being the object of action expressed by an intransitive verb or implied in a substantive or adjective.

(A.) THE ATTRIBUTIVE GENITIVE.

- § 390. The following usages of the genitive are included under the heading "attributive":—
 - (i) Genitive of the possessor or author (§ 391).
 - (ii) Subjective genitive (§ 392).
 (iii) Genitive of material (§ 393).
 (iv) Genitive of quality (§ 394).
- (v) Partitive genitive, or genitive of the divided whole (§ 395).
- § 391. The genitive denoting the possessor or author corresponds to the English possessive case.

non Diomēdis equos, nec currum cernis Achillis. thou seest not Diomedes' horses, nor Achilles' chariot.

perutiles X en ophontis libri sunt.

Xenophon's books are very useful.

Note.—The substantive on which the genitive depends is sometimes omitted if easily understood; e.g. Ventum ĕrăt ăd Vestae, We had come to Vesta's temple. (Compare the English usage "St. Paul's.")

§ 392. The subjective genitive denotes the subject of the verbal action implied in the substantive on which it is dependent.

hostēs Romānorum adventum exspectābant. the enemy were awaiting the arrival of the Romans.

sententiis iūdicum est liberatus. he was discharged by the verdict of the jury.

Obs. The "subjective" character of the genitive in the former example may be seen by using in place of adventum the corresponding verbal construction, "The enemy were waiting until the Romans arrived"; here "Romans" is clearly subject to "arrived."

Note.—The corresponding possessive adjective is used instead of the subjective genitive of a personal pronoun; e.g. Caesar sua senatusque in eum beneficia commemoravit, Caesar recounted his own and the senate's kindnesses towards him.

§ 393. The genitive of material expresses that of which or in which a thing consists.

formīcae populant ingentem farrīs acervum. the ants are plundering a huge heap of spelt.

rērum copia verborum copiam gignīt. abundance of matter produces abundance of words.

§ 394. The genitive of quality expresses some inherent or leading characteristic which serves to classify the substantive on which it is dependent, and therein differs from the ablative of description (§ 382), which for the most part denotes a temporary or external characteristic. This genitive (like the ablative of description) is always accompanied by an attribute.

Titus Manlius vir erat priscae sevēritātis. Titus Manlius was a man of old-fashioned sternness.

-magnī pondērīs saxā in mūrō collŏcārant. they had placed in the wall stones of great weight.

Caesar di ērum iter qua drāgintā processit. Caesar advanced forty days' march. L. G.

14

§ 395. The partitive genitive (better called the genitive of the divided whole) expresses the whole, of which that denoted by the substantive on which it depends forms a part.

mīnus habeo vīrium quam vestrum utervīs.

I have less strength than either of you.

Obs. The forms nostrum, vestrum are used as partitive genitives; nostri, vestri as objective genitives (§ 397).

NOTE 1.—The genitive singular neuter of an adjective of the first class (§ 80) may be used substantivally as a partitive genitive with aliquid, multum, nihil, etc. (nom. or acc.); e.g. nihil novī, nothing new.

NOTE 2.—In poetry the partitive genitive sometimes depends on a neuter adjective used substantivally in the plural; e_{rg} . cunetă terrărum, all lands.

NOTE 3.—The partitive genitive is found with some adverbs of place; e.g. ubi terrarum? where in the world?

(B.) THE PREDICATIVE GENITIVE.

- § 396. A genitive (a) of the possessor or author or (b) of quality may be used as a secondary predicate, and is then termed a predicative genitive.
 - (a) omnĭă quae m ŭ l ĭ ĕ r ĭ s fŭērunt v ĭ r ī fīunt. all that was the woman's becomes the husband's. tĕmĕrĭtās est flōrentĭs aetātĭs, prūdentĭă sĕnescentĭs. rashness belongs to the prime of life, discretion to its close.
 - (b) tŭae littěrae maxĭmī sunt ăpŭd mē ponděrĭs. your letter is of great weight with me.

Obs. When the subject in usage (a) is an infinitive (e.g. Hominis est errārē), the usual translation is It is the characteristic (or function or duty) of . . .

(C.) THE OBJECTIVE GENITIVE.

§ 397. The genitive is used with certain classes of verbs to express the matter with regard to which the action takes place. These verbs are enumerated in the following rhyme:—

misĕrĕŏr, such verbs as mean remind, Forget, and some impersonals* we find With genitives constructed; class with them Fill, lack, abound, accuse, acquit, condemn.

> mē hūiŭs taedēt, mīsērēt, vēl pīgēt, pūdēt, paenītēt.

That is to say, the genitive expresses the matter with regard to which a person—

- (a) feels pity (mĭsĕrĕŏr, I feel pity), or some emotion expressed by one of the impersonal verbs mĭsĕrĕt, paenĭtĕt, pĭgĕt, pŭdĕt, taedĕt (§ 232);
 - (b) reminds another or is reminded, or forgets;
 - (c) lacks or abounds, or makes to abound (i.e. fills);
- (d) brings upon another or suffers accusation, acquittal, or condemnation.
 - (a) nātīquĕ pătris quĕ mĭsĕrērĕ. take pity on father and on son.

mē cīvitātis m o ra m piget taedetque.

I am disgusted and wearied with the morals of the state.

Obs. 1. When an impersonal verb is used, the person who feels pity, etc., is expressed by an accusative.

- Obs. 2. There are in addition to misereor three verbs meaning to pity—viz. miseresco (used in poetry only), which is constructed with a genitive, and miseror, commiseror, both transitive verbs of the first conjugation, regularly constructed with a direct object in the accusative.
 - (b) adversae děindě rēs admönŭērunt rělīgīōnum. misfortunes subsequently put us in mind of religious duties.

větěris contămēliae oblivisci vŏlō. I am willing to forget an old insult.

Obs. 3. Verbs of remembering and furgetting are often constructed with the accusative when the subject is an eye-witness; e.g. Cinnam měmĭnī, I remember Cinna. (Rěcordŏr nearly always governs the accusative.)

(c) ĕgĕt aerĭs Cappădŏcum rex.

the king of the Cappadocians is in want of money.

hīc errör for mīdinīs Samnītēs implēvīt. this mistake filled the Samnītes with alarm.

Obs. 4. The ablative is also used in this connection (see § 370, Obs.).

(d) mē tīm ōrīs arguunt.

they accuse me of fear.

accūsātōrēs ĕrant ipsī am bītūs condemnātī. the accusers had themselves been convicted of bribery.

- Obs. 5. Note the phrase căpitis damnāre, to condemn on a capital charge, and also some 'e.g. damnātus longī lāboris, condemned to protracted toil) in which the genitive is used to denote the penalty instead of the charge.
- § 398. Substantives and adjectives corresponding to verbs included in the preceding section are constructed with an objective genitive, as may be seen from the following examples:—

Cătilină měmor füit priscae dignītātīs sŭae. Catilina was mindful of his former rank.

Galliă est plēnă cīvium Rōmānōrum. Gaul is full of Roman citizens

multīs imminēt damnātio ambītūs.

conviction for bribery hangs over the head of many.

§ 399. Many other substantives and adjectives implying verbal action may be constructed with an objective genitive; such are—

ămŏr, love cūră, care fŭgă, flight ŏdĭum, hatred ăvīdŭs, greedy ĕdax, devouring pătiens, enduring pērītŭs, skilled

vincet ămor pătriae laudum que immensă căpīdo. love of fatherland and boundless desire for praise will prevail.

hostes Iocorum scientes erant. the enemy were acquainted with the locality.

Obs. 1. The objective character of the genitive in the former example may be seen by using in place of ămor and cupīdo respectively the corresponding verbal constructions ămo pătriam and cupio laudes, in which pătriam and laudes are direct objects of the verb (cp. § 392).

The term "objective genitive" is commonly restricted to the usages mentioned in this section and the preceding one.

Obs. 2. Note the difference between pătiens lăboris, capable of enduring toil, and pătiens lăborem, (actually) enduring toil; in the former pătiens is used adjectivally, in the latter as a participle governing the same case as its finite verb.

OTHER USAGES.

§ 400. Poets and later prose writers employ the genitive to express that in respect of which an adjective is applicable to its substantive.

õ sērī stüdĭörum! O ye late learned!

hoc Hělýmus facit, hoc a e v ī mātūrus Ācestēs. this Helymus does, and Acestes ripe in age.

§ 401. In many instances—among them the following—the genitive is probably due to a conscious imitation of Greek usages:—

iustītīa enē prīŭs mīrēr bellīnē lābōrum? am I to wonder first at your justice or your toils in war? dēsīnē mollium tandem quērēlārum. cease at length from unmanly regrets.

Daunus ägrestium regnāvit populorum. Daunus reignid over country tribes.

Obs. For the genitives of value and price (plūris, etc.), see §§ 364-5.

VIII.—THE PLURAL NUMBER.

§ 402. Poets frequently use the plural of concrete substantives where the sense requires the singular. This is done to add dignity to the expression or to suit the metre.

mīrātur clipēum Vulcānī, don a parentis.

he admires the shield of Vulcan, his mother's gift.

Note.—The first person plural is sometimes used, out of modesty real or assumed, for the first person singular; e.g. saepě söli sůmůs, I am often alone.

 $\it Obs.$ For Latin plural substantives rendered by the singular in English, see §§ 58, 59.

- § 403. An abstract substantive may be used in the plural where it (a) has a genitive plural dependent on it, or (b) denotes actions or states involving the quality which the abstract substantive expresses.
 - (a) Lysander proceritates arborum admiratus est.

 Lysander admired the height of the trees.
 - (b) vērae ămīcītīae sempīternae sunt. true friendships are everlasting.
- § 404. Pronominal adjectives which in the singular refer to two persons or things are in the plural used of two classes or groups; e.g. Neuter alterum cernebat, Neither perceived the other; Neutri alteros cernebant, Neither party perceived the other.

                                  ,,
     (a) town or small island, 1st or 2nd Athenis, Thuriis, Tibure, Gadibus
                                          hăbĭtābam,
  declension plural or 3rd declension:
     (b) substantives with medius or
                                        carcer media urbe aedificatur.
   tōtus:
     (c) terrā mărīque, dextrā, laevā, loco, parte, regione.
                                         tōtā rē errastī.
          § 370. Respect:
                                         hōrā dĕcĭmā pervēnī.
     § 371. Time when:
                                         Agamemnon vix decem
                 within which:
     $ 372.
              11
                                           urbem ūnam cēpit.
                                         Galliă Öcĕănō continētur.
     § 374. Instrument:
§ 376. Road:
                                         ībam viā sācrā.
                                         parvo emptum.
          § 377. Price :
          § 378. Measure or Amount of proelium paucis ante diebus erat
INSTRUMENTAL.
                                           factum.
        Difference:
                                         fāmē ĕt sĭtī mŏrĭŏr.
          § 380. Cause:
      § 381. Manner-with preposition: cum cělěrítatě vēnī.
                                         summā celeritāte venī.
                       with attribute:
                     without preposition or attribute: certain words only.
      § 382. Description (with attribute): Britanni căpillo sunt promisso.
      § 383. Attendant Circumstances: Caesar exposito exercitu ad hostes
                                            contendit.
      § 384. Place whence motion takes place:
                                          ăb urbě rědiī.
ABLATIVE PROPER.
                        preposition:
                with
                                    (only
                without
              town, small island.
                                          Rōmā rĕdĭī; dŏmō prŏfĭciscăr.
              domo, humo, rūrė):
                                          Caesar copias castris educit.
      § 385. Separation:
                                          Aenēās nātŭs est dĕā.
      § 386. Origin :
             § 375. Agent (the source of
                                          Clytaemnestră ă filio occisă est.
           action)-with preposition:
                                          sõl est terrā māiŏr.
      § 387. Standard of Comparison:
ATTRIBUTIVE.
                            GENITIVE (§§ 388-401).
                                          Dĭŏmēdĭs ĕquōs cernō.
       § 391. Possessor or Author:
                                          Romanorum adventum exspecto.
       $ 392. Subjective :
                                          formīcae populant farrīs acervum.
       § 393. Material:
§ 394. Quality (with attribute):
                                          magnī pondēris saxa colloco.
        395. Partitive or Divided Whole: horum fortissimi sunt Belgae.
                                          hominis est errare.
 PREDICATIVE. § 396. Possessor:
                                          tŭae litterae maximi sunt ponderi:
                        Quality:
                                           mē timēris arguunt.
 OBJECTIVE. §397. With verbs:
                                          Galliă est plēnă cīvium.
       §§ 398, 399.
                        adjectives:
                                           vincet amor patriae.
       §$ 398, 399.
                       substantives:
```

CHAPTER XXXIX.—VERBAL SUBSTANTIVES AND ADJECTIVES.

§ 406. The chief usages of the verbal substantives and adjectives included in the tables of conjugations (see §§ 125—129) are here treated in the following order:—

Substantives

The infinitive (active and passive) and its tenses (§§ 408—420).

The supine (§§ 421—422).

The gerund (§§ 423—429).

The gerundive (§§ 430—432).

The present participle active (§§ 433—437).

The future participle active (§§ 438—439).

The perfect participle passive and deponent (§§ 440—446).

§ 407. These forms each have one or more of the following verbal characteristics: (a) voice, (b) tense, (c) construction with an object, (d) in the case of the verbal substantives, qualification by adverbs, not by adjectives. On the other hand they are, with the exception of the infinitive, declined as substantives or adjectives.

THE INFINITIVE.

§ 408. The infinitive is an indeclinable neuter substantive, and stands to the finite verb of the sentence in the relation of subject, predicate, or object; but, inasmuch as it implies verbal action, it may have a subject of its own, and also an object (direct or indirect) in the same case as the object of the finite verb from which it is formed.

Obs. The subject of the infinitive is in the nominative case when the infinitive is used either as primary predicate (historic infinitive, § 415) or as secondary predicate (§ 409, b). Except in these two usages the subject of the infinitive is in the accusative case. (See § 411, Obs.)

§ 409. The infinitive used as a nominative may serve as (a) subject of a finite verb, (b) secondary predicate (§ 307).

(a) dulcĕ ĕt dĕcōrum est prō pătriā mŏrī.

to die for one's country is sweet and befitting.

haec ölim měm inissě iŭvābit.

to remember these things will some day afford delight.

(b) lectitāvisse Platonem Demosthenes dīcitur.

Demosthenes is said to have been in the habit of reading Plato.

dī běātī essě intellěguntur.

it is understood that the gods are happy (lit. the gods are understood to be happy).

- Obs. 1. When the finite verb is one expressing opinion, the personal construction is used in preference to the impersonal; so too with videor, I seem; iŭbeor, I am commanded; vetor, I am forbidden.
- Obs. 2. Verbs which in their finite forms have a secondary predicate in the same case as the subject (§ 323) are similarly constructed in the infinitive; e.g. in the second example in (b) above beati is nominative to agree with di, and in the third example in § 411 perfect is accusative to agree with have.

The rule holds even when the subject of the infinitive is not expressed; e.g. Magnīs in laudībūs fūit victōrem Ölympĭae cĭtārī, To be proclaimed victor at Olympia was a great distinction.

NOTE.—When esse stands as a subject of the sentence, the predicative adjective accompanying it is usually attracted into agreement with the substantive to which it refers; e.g. Licuit Themistocli esse otioso, To be at leisure was lawful to Themistocles. But also: Cür his esse liberos non licet? Why may not these be free? (See Obs. 2.)

§ 410. The infinitive used as an accusative serves as the object of a verb.

Caesăr mātūrăt ăb urbe proficisci.

Caesar hustens his departure from the city.

numquam dignē sătis laudārī philosophiă poterit. philosophy can never be really worthily praised.

fīlium ĕquītārĕ dŏcŭī.

I taught my son riding.

- Obs. 1. In the first example the infinitive is the external object ctansitive verb; in the second it is the internal object of an intransitive verb; and in the third it is the internal object of dŏeŭī (cp. § 336).
- Obs. 2. With the passive of dŏcĕō, iŭbĕō, or vĕtō the infinitive is retained (cp. the retained accusative, § 337); e.g. Pŭĕr doctŭs est săgittās tendĕrĕ, The boy has been taught to aim arrows.

§ 411. The infinitive and its own subject (in the accusative case) together stand as the direct object of a verb of saying, or one expressing some mental process, such as perceiving, thinking, rejoicing, wishing, or the verbs iŭbeo, veto. This is known as the accusative and infinitive construction.

vos săpěrě ět solos āio běně vīvěrě.

I declare that you have good sense and alone live aright.

nīhīl essĕ pĕrīcŭlī sensīmŭs.

we perceived that there was no danger.

haec perfectă essĕ gaudĕō.

I am glad that these things are finished.

vim volumus exstingui.
we want violence to be stamped out.

lex peregrinum vetat in murum ascendere. the law forbids a foreigner to go up on to the wall.

Obs. The use of the accusative as the subject of an infinitive probably originated in sentences in which the accusative was at first the object of a finite verb; e.g. in Sentio eum sequi, I perceive him to be following, the case of eum is in origin due to the transitive verb sentio.

NOTE.—Instead of dīcō followed by nōn, nĕgō is used; e.g. Illě vērum plānē nĕgāt essĕ, He distinctly says that truth does not exist.

§ 412. The accusative and infinitive construction is also found with expressions kindred in meaning to some verb included in the above rule, e.g.—

certiŏr fīō, I am informed. incrêdibile est, it is incredible. fāmă est, there is a rumour. ŏpiniō est, there is a notion.

(mihī) vēnīt in mentem, it occurs to (me).

Caesar certior factus est hostes sub monte consedisse. Caesar was informed that the enemy had posted themselves at the foot of the mountain.

§ 413. The use of the infinitive in exclamations falls under the heading of "accusative and infinitive," dependent on some verb which is not expressed.

mënë inceptö dësistërë victam? what, I draw back defeated from a task begun?

- § 414. The continuous use of the accusative and infinitive in reports of speeches, etc., known as indirect discourse or oratio obliqua, is treated in Chapter XLVI. (pp. 265-271).
- § 415. In the construction known as historic infinitive, the infinitive takes the place of primary predicate to the subject of the sentence, and is thus practically equivalent to a finite verb; the subject is in the nominative case. This usage is found in graphic narrative, and is confined to the present infinitive.

multī sēquī fūgērē, occīdī căpī.

many were following or fleeing, being slain or being taken

prisoners.

POETIC USAGES OF THE INFINITIVE.

- § 416. In the usages already noticed the infinitive stands as a verbal substantive either in the nominative or in the accusative; it is for the most part only in poetry that the infinitive stands as any other case, the gerund or some other construction being used instead.
- § 417. The infinitive in most of these poetic usages is equivalent to a dative of purpose (§ 358), and is dependent on (a) a substantive, (b) an adjective or participle. (c) a verb.
 - (a) tempŭs est iam hinc ăbīrĕ mē. it is already time for me to go hence. This use of tempŭs is found in prose.
 - (b) audax omniă perpětī gens hūmānă ruit per vetitum nefās. bold to endure all things, the race of men rushes headlong through forbidden sin.

The prose construction would be audax ad omnia perpetienda (§ 430, i.).

(c) quem vĭrum sūmīs cēlēbrārē, Clīō? what hero, Clīv, dost thou select to glorify? lōrīcam dōnāt hābērē vĭrō.

he presents to the hero a cuirass to keep.

The prose construction would be quam habeat (§ 501, c).

Obs. The infinitive was originally a case-form—usually the dative—of a verbal substantive. This would account for its force in the above usages; e.g. the last two examples may be rendered, What here dost then take for (the purpose of) praising? He presents to the here a cuirass for keeping.

TENSES OF THE INFINITIVE.

& 418. In the accusative and infinitive construction-

the present infinitive is used of an action contemporaneous with that of the finite verb;

the perfect infinitive is used of an action prior to that of the finite verb;

the future infinitive is used of an action subsequent to that of the finite verb.

This is perfectly natural and regular, and would not require pointing out were it not that in the English rendering of the accusative and infinitive construction the principal verb, if in a past tense, causes a change in the tense of the verb in the dependent clause. Contrast the following, in which the speaker reports what he said on a former occasion:—

Original Statement.

you are making a mistake.

you were making a mistake. errasti.

you made or have made a mistake.

you will make a mistake.

Report of Statement.

dixî tê errarê.

Isaid you were making a mistake.

dixī tē errāvissē.

I said you had made (or had been making) a mistake.

dixī tē errātūrum essě.

I said you would make a mistake.

- Obs. 1. Sometimes the past tense in the English dependent clause represents a past tense in the original statement; e.g. "He told me to-day that John was ill yesterday" reports the statement "John was ill yesterday." The student will nover be in doubt as to the tense of the infinitive to be used in Latin if he will consider what tense was used in the original statement, and represent a present tense in the original statement by the present infinitive, a past tense by the perfect infinitive, and the future by the future infinitive.
- Obs. 2. For the future infinitive active or passive a consecutive clause introduced by fore ut or futurum esse ut (§ 552) may be substituted in the case of any verb, and must be used if the verb has no supine base.

§ 419. The perfect infinitive is found in the archaic language of legal enactments after the verbs vŏlō and nōlō. This usage was followed by the poets and Livy, and employed also with other like verbs.

në quis convēnissě sacrorum causa vělit.

let no one presume to assemble for the purpose of sacred rites.

gaudět pěpulissě fossor těr pědě terram.

the digger delights in thrice striking the earth with his foot.

§ 420. The Latin present infinitive with a verb expressing possibility or duty in the past is often rendered by an English perfect infinitive.

dēlēlī tōtus exercitus potuit.

the whole army might have been destroyed.

pěcůniam his oportuit civitatibus pro frümento dări.

money ought to have been given to these states in payment
for corn.

Obs. This usage in English is due to the words could, should, ought, etc., having now no distinctly past signification.

THE SUPINE.

§ 421. The accusative supine is used as an accusative of the goal of motion, the action implied in the supine being regarded as the goal. The supine may govern an object (direct or indirect) in the same case as the object of the finite verb to which it belongs.

Aedūī lēgātōs ăd Caesărem mittunt rogātum auxīlium. the Aedui send ambassadors to Caesar to ask for help.

Grāiīs servītum mātrībūs ībō.

I shall go to be a slave to Greek matrons.

§ 422. The ablative supine is in common use only in the case of certain verbs of saying, perceiving, and knowing, with nascor (nātū, by birth) and fācīō (factū, in doing); it is generally used with an adjective as ablative of respect (§ 370).

něc hōc tam rē est quam dict ü mīrābilě. nor is this so wonderful in reality as it is to tell.

id exprimere Latine difficile fact u est. to express that in Latin is a difficult thing to do.

THE GERUND.

§ 423. The nominative gerund of intransitive verbs is used with the third person singular of some tense of sum; the idea thus conveyed is that of necessity or duty. The gerund may govern an object in the same case as that governed by the finite verb from which it is formed; the agent is expressed by a dative, or (where the dative would cause ambiguity) by ā or āb and the ablative.

möriendum est omnībus. all must die.

rësistendum sënectūtī est. old age must be resisted.

illīs ĕrit ā vöbīs consŭlendum.
their interests will have to be consulted by you.

- Obs. 1. The literal rendering of morrendum est omnibus is there is a dying for all (Cp. § 356, Obs. 2). The nominative gerund used to be called the "neuter gerundive used impersonally," and a few grammars still retain that name.
- Obs. 2. The accusative gerund of intransitive verbs is similarly used with esse in the accusative and infinitive construction; e.g. Constat omnibus moriendum esse, It is agreed that all must die.
- § 424. The nominative gerund of a transitive verb is occasionally used, and is accompanied by a direct object, its construction being in other respects that of an intransitive gerund.

hanc viam nöbīs quŏquĕ ingrēdiundum est. we too must enter upon this road.

Obs. This usage is quite exceptional and is not to be imitated.

§ 425. The accusative gerund is used after certain prepositions (ăd, to, being by far the commonest). It cannot, even if from a transitive verb, govern a direct object, and the gerundive construction (§ 430, i.) then takes its place.

breve tempus sătis longum est ăd bene vivendum. for living aright a short time is long enough.

- § 426. The dative gerund is used as a dative of purpose (§ 358) in close connection with a substantive, adjective, or verb. It cannot, even if from a transitive verb, govern a direct object, but the gerundive construction (§ 430, ii.) takes its place.
 - erant pugnando păres nostri.

 our men were equal to (the task of) fighting.
- § 427. The ablative gerund is used with or without a preposition. If formed from a transitive verb it frequently has a direct object (especially a neuter adjective or neuter pronoun), but the gerundive construction (§ 430, iii.) is also used.

ūnus tu nobis cunctando restituis rem. thou alone by delay restorest fortune to us.

hŏnestum versātŭr ĭn trīb ŭ en dō sŭum cuiquē. honesty consists in giving each his own.

NOTE.—The ablative gerund without a preposition is usually instrumental (§ 373).

§ 428. The genitive gerund is used in dependence on substantives and adjectives. If formed from a transitive verb it frequently has a direct object, but the gerundive construction (§ 430, iv.) is also used.

gěnůs főrensě dícendí tractārě vŏlō. I wish to treat of the forensic style of oratory.

căpidăs sum te au dien di. I am desirous of hearing you.

Obs. It is to be borne in mind that the use of the gerundive construction (§ 430) is much more frequent than that of any case of the gerund governing a direct object, and that it must always be adopted instead of an accusative or dative gerund governing a direct object.

§ 429. Occasionally an objective genitive plural takes the place of the direct object of a genitive gerund.

Marcō Antōniō făcultās dătŭr ăgrōrum sŭīs latronibŭs condōnandī.

an apportunity is being given to Marcus Antonius of presenting lands to his freebooters

THE GERUNDIVE.

§ 430. As a rule the place of a transitive gerund and its direct object is taken by the gerundive and a substantive with which the gerundive agrees in gender and number and case.

In this construction, commonly known as the gerundive (or gerundial) attraction, the substantive is in the case of

the gerund which the gerundive replaces.

(i.) Acc. Caesăr ăd conventūs ăgendōs profectus est.

Caesar set out to hold the assizes.

Here the gerundive construction is necessarily used instead of the gerund agendum with the direct object conventus.

(ii.) Dat. tresviri cŏlōnĭae dēdūcendae crĕātī sunt.
a commission of three was appointed for planting
a colony.

Here the gerundive construction is necessarily used instead of the gerund dēdūcendō with the direct object cŏlōnĭam.

(iii.) Abl. ā rēbus gerendīs senectūs abstrahīt.

old age withdraws us from active life (lit. from carrying on affairs).

Here the gerundive construction is used instead of the gerund gerendo with the direct object res.

(iv.) Gen. Caesar proelii committendi signum dĕdĭt.

Caesar gave the signal for beginning the battle.

Here the gerundive construction is used instead of the gerund committend with the direct object proelium.

NOTE.—The genitive singular neuter of the gerundive is used with the genitive of the personal pronouns (měi, nostri, tůi, vestri, sůi), these forms being in origin the genitive singular neuter of the corresponding possessive adjectives; e.g. Germāni ăd-Caesărem vēnērunt sui purgandi causā, The Germani came to Caesar for the purpose of exculpating themselves.

§ 431. The gerundive is also used to denote that the substantive to which it refers ought to be, is to be, or occasionally (with a negative) cannot be the object of the verbal action implied. The agent is expressed by a dative, or (where the dative would cause ambiguity) by ā or ăb and the ablative.

non tangendă rătes transiliunt vădă.

the barks leap over the waters that ought not to be meddled with.

hăbendă est rătio văletudinis.

account must be taken of health.

bellaque non puero tractat agenda puer.

and as a boy he meddles with wars that ought not to be waged by a boy.

võtă vix nüm ĕrandă făcĭt.

he makes vows that can scarcely be numbered.

§ 432. A substantive and gerundive may together form a phrase, concrete in form but of abstract meaning, expressing an action that is to be performed on the substantive.

Caesăr pontem în Arăre făciendum curăt. Caesar sees to the making of a bridge over the Arar. tū secandă marmoră locās sub ipsum funus. you, on the brink of the tomb, contract for having marbles cut.

THE PRESENT PARTICIPLE ACTIVE.

§ 433. The present participle of some verbs can be used as an attribute, like an ordinary adjective; when so used it may, if from a transitive verb, have a genitive in dependence on it (§ 399, Obs. 2).

ămīcum stūdiosum et amantem sūī fulsīt.

he has sustained a friend who is devoted and affectionate to him.

- Obs. The ablative singular of a present participle used attributively ends in -ī; in other usages the termination -ē is preferred.
- § 434. Some present participles have comparative and superlative forms, e.g. amans, loving, makes comparative amantior, superlative amantissmus. These do not differ syntactically from ordinary adjectives.
- § 435. The present participle used predicatively in dependence on a substantive may govern an object in the same case as the object of the verb from which it is formed.
 - tālī dīcentem Aenēān āversa tuētur.

she gazes askance at Aeneas as he speaks thus.

Obs. A temporal clause (§ 528) is generally used instead of the present participle active in the nominative case, and the want of a present participle passive is compensated for in the same way.

§ 436. The present participle is very frequently used predicatively with a substantive in the ablative (ablative of attendant circumstances or ablative absolute, § 383).

Dīdō prōgrĕdĭtŭr magnā stīpantĕ cătervā. Dido comes forth, a great throng pressing round her.

Ohs. The substantive in the ablative of attendant circumstances is one that is not otherwise related (e.g. as subject, object, or instrument) to the finite verb. An exception to this rule is occasionally found in the case of a pronoun emphatically used; e.g. Lăcrimās notāvī, mē lăcrimantē, tūās, I, shedding tears myself, have marked your tears.

§ 437. A present participle without a substantive is found as an ablative of attendant circumstances when a substantive can easily be supplied from the context.

rursus resistentībus ad pedes desiluerunt hostes.

our men again resisting, the enemy dismounted (lit. leapt down to their feet).

THE FUTURE PARTICIPLE ACTIVE.

- \S 438. The future participle serves (a) as an attribute, fütürüs and ventürüs alone being commonly so used; (b) predicatively, like the present participle, referring to the subject or object, or forming with a substantive an ablative of attendant circumstances, but these latter usages are of rare occurrence in writers of the best period.
 - (a) signă ostenduntăr â dîs rērum făt ūrārum.
 omens of future things are shown by the gods.
 - (b) adest de te sententiam laturus.

 he is here to give his vote concerning you.
- § 489. The commonest use of the future participle is that in which with the verb sum it supplies a number of additional tenses to the conjugation of an active or deponent verb (see § 156). In this use the future participle is, strictly speaking, a secondary predicate. The future participle is frequently used (without essě) as an equivalent for the corresponding future infinitive.

THE PERFECT PARTICIPLE PASSIVE AND DEPONENT.

- § 440. Perfect participles of verbs that are not deponents have a passive meaning; perfect participles of deponent verbs are, generally speaking, active in meaning. To this rule, however, there are two classes of exceptions:—
- (a) Perfect participles of active meaning formed from active verbs, mostly intransitive (see § 177).

(b) Perfect participles of passive meaning formed from verbs which in classical Latin are deponent (see § 172).

The following are the most common of those belonging to the later class:—

confessus. ranfessed, from confiteor pactus, agreed, from paciscor expertus, tried, " expěriŏr populātus, ravaged, ... populor mensus, measured, , mētior rătus. settled. rĕŏr mentitus, falsified. .. mentior sortītus, allottid. sortĭŏr oblītus, forgotten, " oblīviscor ultus, avenged, ulciscor

Obs. The above participles have an active meaning also, having confessed, having tried, etc. Rătus signifies having thought or thinking (§ 442, NOTE); solutus, having assigned or having received by lot.

- § 441. Some perfect participles may be used as attributes, and admit of degrees of comparison, like ordinary adjectives; e.g. īrātūs, angry, makes comparative īrātĭŏr, superlative īrātīssĭmūs.
- § 442. The perfect participle may stand predicatively in dependence on a substantive; if deponent or used in a middle sense (§ 304), it may govern an object.

convēnērē torīs ius sī discumbere pictīs.

they assembled, having been bidden to recline on embroidered
couches.

tum breviter Dīdo vultum dêmissā profatur. then Dido, casting down her eyes, briefly speaks.

NOTE.—Thus used predicatively a deponent or middle perfect participle is often translated by an English present participle; e.g. Illī, supplīcīā Gallōrum vĕrītī, rēmānērē sē āpūd Caesārem vellē dixērunt, They, fearing punishment at the hands of the Gauls, said they were willing to remain with Caesar.

§ 443. It will be noticed that, with the exception of deponents, Latin verbs have no perfect participle of active meaning. This deficiency is supplied (a) by a temporal clause (§ 528); (b) by the perfect participle passive in agreement with the object, e.g. Caesar fügātōs hostēs sĕcūtūs est, Caesar, having put the enemy to flight, followed them; or (c) by the perfect participle passive in the construction known as the ablative of attendant circumstances (§ 444).

§ 444. The perfect participle passive is very frequently used predicatively with a substantive in the ablative (ablative of attendant circumstances or ablative absolute, § 383). The same construction is found with the perfect participle of some deponent verbs, mostly intransitive.

hāc orātione habita concilium dimīsit.

having made this speech (lit. this speech having been made), he dismissed the meeting.

hōc responsō dătō discessĭt.

when this answer had been given him, he departed.

Caesăr ortā lūcĕ Britanniam conspexit. as soon as day broke, Caesar descried Britain.

Obs. 1. The rendering of the participle in the above examples by an English active participle or an English dependent clause should be carefully noted.

Obs. 2. The substantive in the ablative of attendant circumstances is one that is not otherwise related (e.g. as subject, object, or instrument) to the finite verb.

NOTE.—A perfect participle passive is sometimes used impersonally in the ablative singular neuter without a substantive, e.g. lībātō, a libation having been made; compertō, it having been ascertained.

§ 445. A substantive and perfect participle passive often together form a phrase, concrete in form but of abstract meaning, expressing an action performed on the substantive.

Hŏmērus fuit et Hēsiŏdus ante Rōmam conditam. Homer and Hesiod lived before the foundation of Rome. memorabilem pugnam fecit Hasdrubal captus. the capture of Hasdrubal made the battle memorable.

§ 446. The use of the perfect participle as secondary predicate with some part of sum is the ordinary method of forming certain tenses of passive and deponent verbs.

Frequently, especially in poetry, est or sunt is not expressed; the participle then becomes a primary predicate, taking the place-of-a finite verb (§ 309).

Similarly the perfect participle may be used (without essš) as an equivalent for the corresponding perfect infinitive.

CHAPTER XL.—QUESTIONS.

- 8 447. Questions are classed as "single" and "double." A single question asks for information on a certain point; e.g. "Has Caesar won the battle?" A double question asks which of two or more alternatives is in accordance with fact; e.g. "Has Caesar or Pompeius won the battle?" "Has Caesar won the battle, or has he been defeated?"
- & 448. A question may be introduced by some interrogative adjective, pronoun, or adverb, such as uter, which of the two? quis, who? ubi, where?

quid loquor? aut ŭbi sum? quae mentem insania mutăt ?

what am I saying? or where am I? what madness alters my purpose?

Note.—The use of quin (= qui? why? + the inseparable particle ne, not) with the indicative in exhortations falls under this heading; e.g. Quin expergiscimini? Arise! (lit. Why do you not arise?)

§ 449. Where no such interrogative word is used, the interrogative character of the sentence is generally indicated by one of the interrogative particles -ne, nonne, num, and (in double questions only) utrum, an. (For examples, see the succeeding sections.)

SINGLE QUESTIONS.

§ 450. Nonně and num stand at the beginning of the sentence: nonne indicates that an affirmative, num that a negative, answer is expected. The enclitic -ne is used without regard to the character of the answer expected, though the character of that answer is often clear from the context. It is appended to the emphatic word in the question, and this word as a rule stands first in the sentence.

nonně víděs rempublicam pěriissě?

do you not see that the commonwealth has perished?

num flētū ingemuit nostro? tūne id veritus es? were you afraid of that? did he sigh over my tears?

Obs. 1. For the term enclitic, see § 239, Obs. 1; for the shortened form of the second person singular with -ne, see § 239, Obs. 2.

Obs. 2. Num may be written as one word with quis, any one (§ 115).

§ 451. A question is sometimes asked without the aid of any interrogative word or particle, especially if non is the first word of the sentence.

vīs rectē vīvěrě? do you wish to live aright? non fugis hinc praeceps? do you not flee hence in haste?

Double and other Compound Questions.

§ 452. The first member of a double question is most often introduced by utrum, the second by an; less frequently the first member is introduced by ne or stands without an interrogative particle.

ŭtrum ĕă vestră ăn nostră culpă est? is that your fault or ours?

vos në vērō Dŏmĭtĭum ăn vōs Dŏmĭtĭus dēsĕruĭt? did you in fact desert Domitius, or did Domitius desert you?

Note.—The latter alternative, when merely the contradictory of the former, is expressed usually by annon, rarely by necně.

trum have acquo ănimo pătiemini annon? will you endure these things with a calm mind or not?

§ 453. When an interrogative sentence has more than two members, ŭtrum introduces the first, ăn the rest.

ŭtrum hōc tū părum commĕmĭnistī, ăn ĕgŏ nōn sătis intellexī, ăn mūtastī sententiam?

is it that you fail to remember this, or did I not quite understand, or have you changed your opinion?

§ 454. The first member of a double question is sometimes suppressed, and the second (introduced by ax) expresses wonder or indignation. This is always the case where an introduces an apparently single question.

ăn est ullum māiŭs mălum turpĭtūdĭnĕ? is there any greater evil than disgrace?

Thus, before the above example, there is a suppression of some such question as Is disgrace the greatest of evils?

CHAPTER XLI.—VERBS: NUMBER AND PERSON.

- § 455. In Chapter XXXVIII. the chief rules relating to the number and case of the substantive have been stated; the voice of the verb has been dealt with in Chapter XXXVI.; the use of the remaining inflexions of the verb will now be treated, viz. number and person and (for simple sentences) mood and tense. The rules here given are not meant to be exhaustive, but to call attention to usages in which Latin differs noticeably from English, or which are otherwise worthy of attention.
- § 456. The first person plural is sometimes used by a speaker or writer to refer to himself alone when he wishes to assume an air of modesty.

nos ădolescentes Sexto Roscio subvēnimus. as a young man I aided Sextus Roscius.

- § 457. The second person, singular and plural, should be rendered by you in prose and in poetry of the lighter kind; thou and ye should be reserved for serious poetry.
- Obs. The second person plural is never used in Latin for the singular; consequently, in rendering English into Latin, you must be rendered by the singular unless the context clearly shows that the meaning is plural.
- § 458. The indefinite subject (French on) is represented in Latin by the following, among other forms of expression.
 - (a) the first person plural;
- (b) the third person plural of verbs expressing rumour or opinion;
 - (c) the second person singular subjunctive.
 - (a) virtūtem incolumem odīmus.

 we dislike true merit when in our midst (lit. safe).
 - (b) tē săpientem ĕt appellant ĕt existimant.

 people both style and think you wise.
 - (c) crēdĕrēs victos. you would have believed them conquered.
 - Obs. With usage (c) cp. § 477, § 514, Obs. 2.

CHAPTER XLII.—MOODS AND TENSES IN SIMPLE SENTENCES.

I.—THE INDICATIVE MOOD.

§ 459. The indicative mood states a thing as a fact or asks a question as to whether a thing is a fact or not,

nonně měministi? měmini vērō. do you not remember? I do indeed.

§ 460. The present indicative answers to the English continuous present (*I am loving*, *I am being loved*) as well as to the simple present (*I love*, *I am_loved*).

quid struis aut qua spē Libycis teris ötia teris?
what art thou devising, or with what hope art thou spending
thy leisure in Libyan lands?

Obs. With regard to the passive of verbs that express the bringing of a thing into a certain condition, see § 471.

§ 461. The present indicative is used of an action or state which has already been going on some time, and the imperfect of an action which at the time referred to had been going on some time. This is the case especially when the verb is accompanied by iam, already, iamdūdum or iamprīdem, for some time already.

annum iam audīs Crătippum.

you have already been attending Cratippus' lectures a year. lamdūdum flēbam.

I had long been weeping.

§ 462. The historic present, in which a narrator describes an event from the standpoint of the time when it actually occurred, is more frequently used in Latin than in English.

tālībūs örābāt, tālesque mīserrīmā flētūs fert soror.

in such words did she continue to entreat, and such the saments her most unhappy sister conveyed.

Obs. The Latin historic present may sometimes be rendered with good effect by the same tense in English; but, on the whole, the learner will do better to make a practice of rendering it by the past.

For dum with the present indicative see § 534.

 \S 463. The imperfect indicative answers to the English continuous past (\overline{I} was loving, I was being loved); sometimes, however, the simple past tense (I loved) is a sufficient rendering.

něc plūră effatůs ăd altōs tendēbăt mūrōs, gressumquě in castră fěrēbăt. and, without saying more, he sought the lofty walls, and bent his steps to the camp.

Note.—The imperfect of sum and its compounds is more commonly used than the perfect, except in matters of historical fact; it is always rendered by the simple past in English.

- § 464. The imperfect indicative is also used to express (a) habitual action in past time, and (b) attempted action in past time.
 - (a) Karthāginē quŏtannīs bīnī consŭlēs crēābantŭr.
 at Carthage two consuls used to be appointed yearly.
 - (b) ex urbě Cătilinam ēĭcĭēbam.I endeavoured to drive Catilina from the city.
- § 465. In writing a letter a Roman frequently used the imperfect to describe something going on at the time he was writing, that being the tense which would be applicable by the time the letter was delivered. This is known as the epistolary imperfect, and is found chiefly at the beginning and end of letters.

ex itinere scribebam. I am writing on my journey.

NOTE.—The pluperfect is similarly used of an action previous to the time of writing; e.g. Ego constitueram venīre in Puteolānum, I have determined to go to my seat at Puteoli.

§ 466. In principal sentences the use of the Latin future corresponds with that of the English tense so named.

For the future in dependent clauses, see § 511 (conditional) and § 532 (temporal).

- § 467. The perfect indicative has two distinct functions: it is equivalent to (a) the English simple past, (b) the English present-perfect (simple or continuous). Thus, amavī denotes (a) I loved, (b) I have loved or I have been loving.
 - (a) incūb ŭit quĕ tŏrō dixit quĕ nŏvissimă verbă.she lay down on the bed and spake her last words.
 - (b) urbem praeclāram stātūī, mēā moenīā vīdī. I have built a noble city, I have seen my own walls rise.
- Obs. For the meaning of the perfect and other, tenses of the passive which are formed by means of the perfect participle and the verb sum, see § 471.
- \S 468. Two poetical usages of the perfect are noticeable: (a) the perfect expressing instantaneous action; (b) the gnomic (i.e. proverbial) perfect, expressing customary action.
 - (a) ēn nāvīs fugīt ēt portu sē condidīt alto.
 lo, the ship flies on, and has now hidden herself in the deep harbour.
 - (b) non aeris ăcervus et auri aegroto domini deduxit corpore febres. a heap of bronze and gold is not wont to take away fecers from its possessor's diseased frame.
- § 469. For the perfect with temporal conjunctions, such as antequam, priusquam, and postquam, see §§ 529, 533.
- § 470. The future-perfect was in early Latin Trequently used with a meaning practically equivalent to that of a simple future; in classical times this usage survives chiefly in the case of the verb video, with which it signifies postponement.

rectē sēcusnē ālīās vīdērīmūs. whether rightly or otherwise, we will consider another time.

dē grēgē praestītērīt septem mactārē iŭvencos. it will be well to sacrifice from the flock seven steers.

Obs. For the future-perfect in dependent clauses, see § 511 (conditional) and § 532 (temporal).

Tenses formed by means of the Verb SUM with the Perfect Participle Passive.

§ 471. These tenses (viz. the perfect, pluperfect, and future-perfect passive) have meanings corresponding to those of the same tenses of the active. In the case however of verbs that express the bringing of a thing into a certain condition the perfect participle may denote the present condition brought about by past action, and the translation of the tenses formed by the help of the perfect participle of such verbs calls for attention.

To take, for example, the verb mūn \check{n} o, I fortify, i.e. put into a fortified condition:

The perfect indicative passive in the sentence

urbs mūnītă est (past act or present state)

expresses (a) The city was fortified (i.e. was put into a fortified condition);

- (b) The city has been fortified (i.e. has been put into a fortified condition);
 - (c) The city is fortified (i.e. is in a fortified condition).

But the meaning of

urbs mūnītă fŭĭt (past state)

is The city was fortified (i.e. was in a fortified condition).

Similarly the pluperfect

urbs mūnītā ĕrāt (pluperfect act or past state)
expresses (a) The city had been fortified (i.e. had been put
into a fortified condition);

- (b) The city was fortified (i.e. was in a fortified condition).
- And so on, with other tenses of the verb sum (see § 164).

Obs. When the English past participle is (like "fortified") ambiguous, the Latin present, e.g. mūnītūr, should be rendered "is being fortified."

II.—THE IMPERATIVE MOOD.

§ 472. The present imperative is the natural form for conveying a command or direction; the future imperative is used in laws and treaties, and when found elsewhere expresses an authoritative command.

fertě citī flammās, dătě tēlā, impellītě rēmôs.
bring fire in haste, give out weapons, swing the oars.
noxiae poenă pār estō.
hunc tū căvētō.
let the punishment be proportionate be thou ware of him.
to the offence.

Obs. For the subjunctive expressing a command, see § 477.

§ 473. A prohibition (i.e. a negative command) in the second person is in poetry frequently expressed by nē and the present imperative, and in legal phraseology by nē and the future imperative.

ěquō nē crēditě, Teucrī. dōnum nê capiuntō. trust not to the horse, Trojans. they must not accept a gift.

Note.—In a compound sentence (in poetry) containing two imperatives the second (if negative) is introduced by neve or neu or by nec or neque; e.g. Domum claude nec in vias despice, Close the house, and look not down into the streets.

Obs. The methods by which a prohibition in the second person is deferentially expressed in prose are:—

(1) nolī (or nolītē) with the present infinitive, e.g. nolī abīrē;

(2) căvē (or căvētě) with the present subjunctive, e.g. căvē ăbĕās;
 (3) vĭdē (or vĭdētě) nē with the present subjunctive, e.g. vĭdē nē ăbĕās.

For prohibitions expressed by ne and the present or perfect subjunctive (second person) see § 478.

A prohibition may in familiar language be expressed by non and the future indicative, e.g. non abibis.

III.—THE SUBJUNCTIVE MOOD.

- \S 474. The subjunctive is used in two classes of principal sentences, viz.—
 - (1) a jussive sentence (jussive subjunctive);(2) the apodosis of a conditional sentence.

Its use in the latter is treated in Chapter XLV., under "Conditional Sentences" (§§ 507—517).

JUSSIVE SUBJUNCTIVE.

§ 475. Under the head of jussive subjunctive the following usages are comprised:—

(a) Subjunctive expressing a wish (optative use of subjunctive);

(b) Subjunctive expressing a command or exhortation (jussive use proper), including the concessive use;

(c) Subjunctive questioning what should be done (deliberative subjunctive).

§ 476, (a) The subjunctive expressing a wish is commonly introduced by ŭtĭnam (equivalent to O would that . . . I). The negative used is $n\bar{e}$ or $n\bar{o}n$.

The present subjunctive is used of a wish that may yet

be realised.

falsus utinam vātēs sim.

may I prove a false prophet.

The imperfect subjunctive expresses a wish that something, were otherwise than it now is.

illud utinam në vërë scribërem. would that what I am writing were not true.

The pluperfect subjunctive expresses a wish that something had been otherwise than it was.

ŭtınam ăliter accidisset.

would that it had happened otherwise.

§ 477. (b) The present subjunctive expresses a command or exhortation in the first person plural, in the third person, singular or plural, and (if no definite individual is addressed) in the second person singular; this last-named construction is rare. The negative used is nē.

absistāmus, att. hostībus nē cēdāmus.
let us desist, he says.
let us not yield to the enemy.

angustam ămīcē paupēriem pătī condiscăt puer. let a boy learn to endure gladly straitened means.

iniūrias fortūnae dēfūgiendo rělinquās. one should escape by flight the harsh treatment of Fortune,

§ 478. A prohibition addressed to a definite person is sometimes expressed by nē and the second person of the present or perfect subjunctive. This form of prohibition may be regarded as unceremonious and colloquial; it is accordingly very rare in dignified prose.

në pertimescas.
don't be alarmed.

hōc në fēcërĭs.

you must not do th**is.**

Obs. The perfect is more peremptory than the present; cp. "Go" and "Begone."

§ 479. In the imperfect or the pluperfect tense the jussive subjunctive expresses what ought to have taken place. The negative used is nē. (This usage is rare.)

restītissēs, rēpugnassēs, mortem pugnans oppētissēs.
ym should have resisted, you should have fought against it, you
should have met death fighting.

§ 480. The jussive subjunctive in the present tense often expresses a readiness to assume something for the sake of argument to be the case; the perfect similarly concedes a request that something is to be considered to have happened. The negative used is nē.

něgant quemquam essě vírum bŏnum nĭsĩ săpĭentem: sĩt ĩtă sānē.

they say that no man is good unless he is wise: well, granted that it is so.

nēmo is, inquies, umquam fuit: ne fuerit.

there never was, you will say, such a man: granted there was not.

Obs. This usage is termed "concessive subjunctive." It is to be distinguished from the use of the subjunctive in a concessive clause (\S 521-524).

§ 481. (c) The interrogative form of the jussive subjunctive is called the deliberative or dubitative subjunctive; the present is used in questions as to the course of action which is to be pursued, the imperfect in questions as to the course which should have been pursued. The negative used is non.

quid hoc homine făcias?

what is one to do with this fellow?

quid agerem? contenderem contra tribunum plebis? what was I to do? was I to fight against a tribune of the people?

CHAPTER XLIII.—COMPLEX SENTENCES CON-TAINING A SUBSTANTIVAL CLAUSE.

 \S 482. A substantival clause stands as subject or object to the verb of the principal sentence, and is of the nature of (I.) a question, (II.) a command, (III.) a statement.

I.—DEPENDENT QUESTION.

§ 483. It must be clearly understood that the term "dependent question" (or, as it is often called, "indirect question,") applies only to the dependent clause, not to the whole complex sentence of which the clause forms part. The principal sentence is not necessarily interrogative, but it has dependent on it a question which in Latin has its finite verb in the subjunctive, the mood serving to indicate that the question is not asked, but mentioned or reported.

For dependent questions introduced by \overline{si} see § 519; for questions in oratio obliqua see § 563.

The dependent clause may be

(a) subject of an impersonal verb in the principal sentence,

(b) object of the finite verb in the principal sentence;

- (c) object of some verbal substantive or adjective, or of some substantive or adjective containing a verbal notion, in the principal sentence.
- (a) nātūrā fiĕrēt laudābilē carmēn an artē quaesītum est. whether a praiseworthy poem was produced by nature or by art was a subject of enquiry.

Direct question (i.e. the question in the form in which it is supposed to have been asked): nātūrā fīt laudābīlē carmēn an artē;

(b) fārē, agē, quid vēniās. tell me, now, why you come.

Direct question : quid venis?

(c) cūră qu'id expědiăt prior est quam qu'id sit honestum.

the anxiety is rather as to what is expedient than as to what is honourable.

Direct question: quid expedit ? quid est honestum ?

Caesăr certior factus est quae res gererentur. Caesar was informed what was going on.

Direct question: quae res geruntur ?

- § 484. A further point to be noticed is that in both languages a past tense in the principal sentence requires a past tense in the dependent clause. Beyond this, the sense alone determines what tense is to be used in English in each case, but in Latin the choice of a tense of the subjunctive for the dependent clause is narrowed by the following rule as to the sequence of tenses.
- § 485. For the purposes of this rule tenses are divided into two classes: primary tenses and historic tenses:—

PRIMARY.

Indicative and Imperative.

Present.

Future.

Perfect (with PresentPerfect meaning).

Subjunctive.

Present.

Perfect.

Future-Perfect.

HISTORIC.

Indicative.

Imperfect.

Perfect (with past meaning).

Pluperfect.

- Obs. 1. The perfect indicative is said to be used with "present-perfect" meaning when it answers to the English present-perfect, e.g. ămāvī, I have loved, and is said to be used with a "past" meaning when, as is usually the case, it answers to the English past tense, e.g. ămāvī, I loved. Even when used with present-perfect meaning it often has historic sequence.
- Obs. 2. The historic present (§ 462) often counts, for the purpose of sequence, as a historic tense.

Rule.—A primary tense in the principal sentence requires a primary tense of the subjunctive in the dependent clause, and a historic tense in the principal sentence requires a historic tense of the subjunctive in the dependent clause.

Examples are given on the next page of direct questions and the forms they assume when dependent.

(A.) Quid Marcus agit? What is Marcus doing? or What

quaerō, I ask quaeram, I shall ask quaesīvī, I have asked quaesīvĕrō, I shall have asked quaerĕ, quaerītō, ask quaerāmūs, let us ask

quĭd Marcŭs ăgăt, what Marcus is doing or does.

quaerēbam, I was asking quaesīvī, I asked quaesīvēram, I had asked

quid Marcus ageret, what Marcus was doing or did.

(B.) Quid Marcus ăgēbăt? What was Marcus doing?
Quid Marcus ēgit? What did Marcus do? or What
has Marcus done?

quaerō, I ask
quaeram, I shall ask
quaesīvī, I have asked
quaesīvĕrō, I shall have asked
quaerĕ, quaerītō, ask
quaerāmŭs, let us ask

quĭd Marcŭs ēgĕrĭt, what - Marcus was doing or did or has done.

quaerēbam, I was asking quaesīvī, I asked quaesīvēram, I had asked

quid Marcus egisset, what
Marcus had been doing
or had done.

The tenses of sum used with the future participle conform to the same rule as to sequence:

(C.) Quid Marcus aget? What will Marcus do?

quaerō, I ask
quaeram, I shall ask
quaesīvī, I have asked
quaesīvērō, I shall have asked
quaerē, quaerītō, ask
çuaerāmus, let us ask

quid Marcus actūrus sit,
what Marcus will do.

quaerēbam, I was asking quaesīvī, I asked quaesīvēram, I had asked

quĭd Marcŭs actūrŭs essĕt,

what Marcus would do.

§ 486. Sometimes the subjunctive in a dependent question represents a deliberative subjunctive (§ 431) in the direct form.

quid ăg ĕrem dŭbĭtāvī.

I doubted what I should do.

Obs. Here the direct question was quid agam? what am I to do?

§ 487. The interrogative particles (-nĕ, nonnĕ, num) used to introduce direct single questions are used also to introduce dependent questions; num, however, does not in a dependent question necessarily expect a negative answer, but is used as an equivalent to -nĕ.

viděamus satisně ista sit vēra definītio.

let us see if that definition of yours is sufficiently accurate.

exsistīt quaestīo num quando amīcī novī veterībus sint anteronendī.

the question arises whether at any time new friends are to be preferred to old.

§ 488. Ūtrum . . . ăn (or -nĕ . . . ăn) are used in dependent as in direct double questions.

quaerō ūtrum is clēmens an inhūmānissimus essē vidēātur.

I ask whether he seems to be merciful or most savage.

ăgitur liberine vivamus ăn mortem obeamus.

the question is whether we are to live in freedom or face death.

§ 489. Where the latter alternative is the contradictory of the former, necně is more usual than annon in dependent questions.

săpientiă beatos efficiăt necne quaestio est.

the question is whether philosophy makes men happy or not.

§ 490. The following is a summary of the usages of interrogative particles:—

§ 491. The interrogative particle an is, strictly speaking, used only in the second or subsequent member of a compound question direct or dependent; but an is found introducing apparently single dependent questions after expressions of doubt, such as haud sciō, nesciō, I do not know; dubitō, I doubt.

haud sciö an nēmo běātior possit essě.

I am inclined to think that no one can be happier.

ingens ĕō dĭē rēs āc nescīō ăn maxīmā illō bellō gestă sĭt.

a great deed was done on that day, and probably the greatest in that war.

Obs. It is important to note that in sentences such as the above the improbable alternative is omitted in Latin, and the probable one alone expressed; whereas in English, after the phrase I do not know whether, it is the improbable alternative that is expressed; hence haud scīō ăn hōc vērum sīt must be rendered I am inclined to think this is true, or I don't know whether this isn't true.

II.—DEPENDENT COMMAND.

§ 492. A command mentioned or reported forms a dependent clause, having its verb in the subjunctive mood; it is introduced by the conjunction ut or (in the case of negative commands) no. The tense of the subjunctive is in accordance with the rule for the sequence of tenses (§ 485).

Hannībāl ĕquītībūs praecēpīt ŭt ādŏrīrentŭr impēdītum agmēn.

Hannibal ordered his cavalry to attack the encumbered line.

mŏnĕō hortorquĕ vōs nē tantum scĕlŭs impūnītum
ŏ m i t tā tī s.

I warn and exhort you not to let so great a crime go - unpunished.

Obs. 1. Note that in English to with the infinitive is the natural form of a dependent command; the Latin infinitive is to be used to express a dependent command with iŭbĕō, I command, and vĕtō, I forbid (§ 411), but with these verbs only.

Obs. 2. The construction of verbs of determining or deciding is no exception to this rule. They are used with ut and the subjunctive to express a determination of one person as to the course of action to be taken by another; e.g. Decrevit senatus ut consules provincias sortirentur, The senate decreed that the consules should receive their provinces by lot. With the infinitive they refer to the action of the subject, and do not introduce a dependent command; e.g. Annival Saguntuns inferre bellum statut, Hannibal determined to wage war on the people of Saguntum.

§ 493. A jussive subjunctive is often used (without a conjunction) in semi-dependence on the principal verb.

Caesăr rogăt fînem orandi fă că t.

Caesar bude him make an end of entreating .-

mēcum m ŏ r i ā r i s ŏ portět. ~

it is right that you should die with me.

Note.—The subjunctive is by analogy similarly constructed with căvē, and refers to an action to be avoided, e.g. Căvê quidquam turpe faxis (§ 201), Beware of doing anything disgraveful.

III.—DEPENDENT STATEMENT.

[The place of an English dependent clause consisting of a statement is in Latin usually taken by the accusative and infinitive construction (§ 411).]

§ 494. Quod, denoting the fact that, may introduce a clause which stands as subject to the sentence. The verb in the clause is in the indicative mood.

něc tantum mălī est peccārě principēs quantum illůd quŏd permultī imitātörēs principum exsistunt.

nor is it so great an evil that rulers should do wrong as that very many imitators of rulers arise.

§ 435. An explanatory clause introduced by ut and with its verb in the subjunctive may stand in apposition to the principal sentence or to a word in it.

fēcī non invītus, ŭt prodessem multīs rogātū tuo.

I acted not unwillingly in doing a service to many at your request.

concēdētur vērum essē ut bonos bonī diligant.

it will be allowed that it is true that good men like good men. ~

Obs. 1. The rule (§ 485) for the sequence of tenses applies here.
Obs. 2. The learner will do well always to use the accusative and infinitive in rendering into Latin an English dependent statement.

CHAPTER XLIV.—COMPLEX SENTENCES CONTAINING AN ADJECTIVAL CLAUSE.

§ 496. Adjectival clauses are introduced by quī, who, or some other relative pronoun or adjective (§ 118, 2nd column). Thus in the sentence vĭrum cănō quī ăb ōrīs Trōiae prīmūs vēnīt, I sing of the hero who was first to come from the shores of Troy, the clause introduced by quī describes vĭrum, and stands to it in the relation of an adjective. Vĭrum is said to be the "antecedent" of the relative quī.

THE CONCORD OF THE RELATIVE (OTHERWISE CALLED THE THIRD CONCORD).

§ 497. The relative is regularly of the same gender and number and person as its antecedent, but its case is determined by its own clause.

sol, quī terrārum flammīs ŏpĕră omnĭā lustrās. sun, that visitest with thy beams all the actions of the world.

quoscumquě dē tē quěrī audīvī quācumquě pŏtŭī rătione plācāvī.

whomsoever I have heard complaining of you, them I have satisfied in every possible way.

Obs. It is necessary to determine of what person (first, second, or third) the relative is, because if the relative is the subject of its clause the verb of the clause must agree with it in person, in accordance with the first concord (§ 311).

NOTE.—An adjective which in Latin qualifies the relative is in English often transferred to the antecedent; e.g. In tümülö, quem proximum Gallis căpěrě potuit, côpias instruxit, He drew up his forces on the nearest eminence to the Gauls which he could seize.

§ 498. When a substantive stands to the relative pronoun in the relation of predicate, the relative generally assumes the gender and number of that substantive.

domicilia coniuncta quas urbes dicimus moenibus saepserunt.

they surrounded with walls the united dwellings which we call
cities.

§ 499. In Latin the relative clause often precedes the so-called "antecedent." The substantive is then usually placed with the relative, not with the demonstrative.

quae cīvitās călămitātem pŏpulō Rōmānō intulērāt, ĕā princeps poenās exsolvit.

the state which had brought disaster on the Roman people was the first to pay the penalty.

§ 500. Often the antecedent is not separately expressed, but is contained in the relative.

equites quos possunt occidunt. the caralry kill whom they can.

Obs. This construction is found also in English; e.g. "Who steals my purse, steals trash."

Mood of the Verb in a Relative Clause.

- § 501. The verb in the relative clause is in the subjunctive mood when the clause implies (a) concession, (b) cause, (c) purpose, or (d) result.
 - (a) tū nōn adfŭistī quī illum dĭem sŏlĭtŭs essēs ŏbīrĕ,
 you were not present although you had been accustomed to observe that day.

Here qui is equivalent to quamvis (tū), although you.

(b) Tǐtūriūs, quī nihil antēā prōvīdissēt, trēpidārē. Titurius grew alarmed, for he had made no preparations beforehand.

Here qui is equivalent to quod (is), because he.

(c) Caesăr ĕquĭtātum quī sustĭnērĕt ħostĭum impĕtum mīsĭt.

Caesar sent the cavalry to resist the enemy's onset.

Here qui is equivalent to ut (is), in order that it.

(d) quis tam praeceps est qui hoc nĕgĕt? who is so rash as to deny this?

Here qui is equivalent to ut (is), (so) that he.

Obs. The rule given for the sequence of tenses (§ 485) applies to the subjunctive in relative clauses.

§ 502. Of the usages of the subjunctive with quī that expressing result is the least obvious at first sight. It occurs where tālīs ŭt (ĭs) (such that he) might be substituted for quī, and also where the antecedent is indefinite, quī then denoting any one who (i.e. any such as).

ŭbi ĕōs invēniēmus quī ōpēs ămīcitiae non antēpōnant? where shall we find those who do not prefer wealth to friendship? quid dulcius quam habērē quīcum omnia audēas dīcērē? what is more pleasant than to have some one with whom you can renture to speak on every matter?

virgīs caesī quī ād nōminā nōn respondissent.

all that did not answer to their names were beaten with rods.

impērītī fācīlē quōd *tultē dixēris rēprēhendunt.

the unskilled easily take up anything foolish you may have said.

- § 503. This subjunctive is especially frequent after the phrases est qui, sunt qui, meaning there is a sort of man that, there is a class of men who; also after is qui, meaning one who.
- sunt dēlictā tāmēn quibūs ignovissē vēlīmūs. there are faults, however, which we are willing to pardon. non tū is es qui hoc nesciās. you are not the man to be ignorant of this.

Note 1.—The indicative is used when the antecedent is definite; e.g. Vestës mūricĕ tinctās sunt quī non hābĕant, est quī non cūrāt hābērē, There are people (indefinite antecedent) who do not possess garments dyed with purple, there is one (definite antecedent) who does not care to possess them.

NOTE 2.—Poets sometimes use the indicative after sunt qui, regarding the phrase as a single word; e.g. Sunt quos curriculo pulverem Olympicum collegisse iuvat, It delights some to have collected upon their chariot the dust of Olympia.

- § 504. When the relative clause does not imply concession, cause, purpose, or result, but is merely a description or definition, the verb is in the indicative.
 - Galliă est omnis divisă în partes tres quarum unam incolunt Belgae.

Gaul as a whole is divided into three parts, of which the Belgae inhabit one.

See also the examples in §§ 496—500.

§ 505. When an adjectival clause consists of a description or definition which the writer or speaker does not insert in his narrative as so much additional explanation, but reports as being given at the time of the action, the verb in this adjectival clause is subjunctive.

Caesăr obsidēs quī ăd ĕōs perfūgissent pŏposcit. Caesar demanded such hostages as had taken refuge with them.

Agămemnon Dianae devovit quod pulcherrimum natum esset eo anno.

Agamemnon vowed to Diana the most beautiful creature that should be born that year.

In the first example above, Caesar is recording a past action of his own. The clause quī ăd ĕōs perfūgissent is not a description added for the benefit of the reader, but a report of the description given by Caesar in making his demand: obsĭdēs quī ăd vōs perfūgērunt poscō.

Obs. Clauses such as the above are sometimes called "virtually

The tense of the subjunctive is decided in accordance with (a) the rule for the sequence of tenses, and (b) the tense of the indicative which would have been used in the relative clause in the direct form. Thus:—

	DIRECT.	REPORTED.			
Tradia	Present	Primar	y sequence.	Histo	ric sequence.
	Future	Subj.	Present	Subj.	Imperfect
,, ,,	Imperfect	, -		•	1
•,	Perfect	1	Perfect		T) 1 (
,,	Pluperfect	` ''	Periect	9.9	Pluperfect
,,	Future-Perfect	,			

Here the representation of the future and future-perfect indicative is the chief thing to be noticed. In the second example above the words which Agamemnon is supposed to have used are Dianae dēvovēō (or immolābō) quŏd pulcherrimum nātum ĕrit (future-perfect) hōc annō.

These rules as to the tense of the subjunctive apply to virtually oblique clauses in general (cp. § 518), and also to sub-dependent clauses (§ 549). Thus the two examples in § 518 severally represent aedem Fortunae dēvŏvēō (or dēdĭcābō) sī hödīē hostēs fūděrō (future-perfect) and vōbīs auxīlĭum mĕum pollīcĕŏr (or auxīlĭum fĕram) sī āb Suēvīs prēmēmřnī (future).

CHAPTER XLV.— COMPLEX SENTENCES CONTAINING AN ADVERBIAL CLAUSE.

§ 506. Adverbial clauses are here arranged in the following four classes:—

§§ 507-520. I. Conditional (in English usually intro-

duced by if).

§§ 521-537. II. Circumstantial, i.e. such as express some circumstances under which the action of the principal sentence is represented as taking place, including:

§\$ 521—524. (i) concessive (in Eng. introd. by although). §\$ 525—527. (ii) caysal (,, ,, ,, because). §\$ 528—535. (iii) temporal (,, ,, ,, when). § 536. (iv) local (,, ,, ,, where). § 537. (v) comparative (,, ,, as).

§§ 538—542. III. Final, expressing the purpose of the action of the principal sentence.

§§ 543—547. ÎV. Consecutive, expressing the consequence or result of the action of the principal sentence.

The chief point to attend to in an adverbial clause is the mood of its verb, which is always either indicative or subjunctive.

The rule for the sequence of tenses (§ 485) applies to all sentences in which the verb of the dependent clause is

subjunctive.

I.—CONDITIONAL SENTENCES.

§ 507. It is convenient to give here the rules not only for the conditional (or "if") clause (usually known as the protasis), but also for the principal sentence to which the conditional clause is subordinate, viz. the hypothesis or (to use the name corresponding to "protasis") apodosis.

The whole complex sentence, consisting of conditional clause (or protasis) and hypothesis (or apodosis), is known as a conditional (or hypothetical) sentence; thus sī hōc crēdīs, errās (if you believe this, you are wrong) is a conditional sentence, of which the protasis is sī hōc crēdīs and

the apodosis errās.

§ 508. The protasis is usually introduced by one of the conjunctions SI, if, NISI (or, especially in poetry and legal language, NI), NISI, ... not, unless. For SIVE or SEU, see § 607.

Obs. Etsī, ĕtĭamsī, tāmetsī are treated under "Concessive Clauses" (§§ 523, 524).

- § 509. Hypothetical sentences fall into three divisions according as the condition expressed by the protasis is represented, as:—
- (A.) A condition that may or may not have been fulfilled in the past,

or a condition that may or may not be fulfilled in the present;

- (B.) A condition that may or may not be fulfilled in the future;
- (C.) A condition that is not fulfilled in the present, or a condition that was not fulfilled in the past.
- § 510. (A.) When the condition is represented as one that may or may not have been fulfilled in the past, or one that may or may not be fulfilled in the present, the indicative is used in both protasis and apodosis, the tense in each being present, imperfect, perfect or pluperfect according to the sense.

sī peccāvī, insciens fēcī.

if I did wrong, I did so unwittingly.

sī quandō nostrī nāvem rělīgāvěrant, hostēs succurrēbant.

if at any time our men had moored a ship, the enemy rushed up.

assěquŏr omniă, sī prŏpěrō; sī cunctŏr, āmittō. I gain all, if I hasten; if I delay, I lose it.

NOTE.—The imperative may also be used in the apodosis; e.g. Dēsīlītē, nīsī vultīs aquīlam hostībūs prodērē, Leap down, unless you want to betray the standard to the enemy.

§ 511. (B.) When the condition is represented as one that may or may not be fulfilled in the future, the future or (more commonly) the future-perfect indicative is used in

the protasis, and the future indicative (rarely the future-perfect) in the apodosis.

scrībentŭr fortassĕ plūrā, sī vītā suppĕtĕt.
more will perhaps be written, if life lusts.

quidquid fēcĕrĭs, apprŏbābō.

I shall approve of anything you do.

pergrātum mīhī fēcērīs, sī dē ămīcītīā disputārīs. you will do me a great pleasure, if you discuss friendship.

Obs. In conditional clauses of this kind the Latin future or future-perfect of the protasis is represented by the English present or present-perfect.

Note.—The imperative may also be used in the apodosis; e.g. Si dē mē ipso plūra dīcēre vidēbor, ignoscitote, If I shall seem to speak rather much about myself, you must pardon me.

- § 512. But if the idea of futurity is not prominent, the present subjunctive is used in both protasis and apodosis.
 - sī Scīpionis dēsīdērio mē movērī nēgem, certē mentiār.
 - were I to deny that I am moved with regret for Scipio, I should assuredly lie.
- Obs. In this form of sentence the contingency is regarded as less probable than it is when the future indicative is used.
- § 513. (C.) When the condition is represented as one that is not fulfilled in the present, the imperfect subjunctive is used in both protasis and apodosis; when it is represented as one that was not fulfilled in the past, the imperfect subjunctive or (more commonly) the pluperfect subjunctive is used in both protasis and apodosis.
 - sī ūtīlītās amīcītīās conglūtīnāret, eadem commūtāta dissolvēret.
 - if expedience cemented friendships, it would also when it lay in a different direction dissolve them.
 - Tărentum nisi tū āmīsissēs, numquam rĕcēpissem. had you not lost Tarentum, I should never have recovered it.
- tūm māgīs id dīcērēs, sī nūpēr in hortīs Scīpionis adfūissēs.
 - you would then say so all the more, if you had lately been present in Scipio's yarden.

§ 514. The preceding rules may be thus illustrated:— Condition

(A.) that may have been fulfilled in the

(S.) not creditable, extrast.

If you believed or have believed this, you were or have been wrong.

S. not creditable, extrast.

If you believed or have believed this, you were or have been wrong.

S. not creditable, extrast.

If you believe this, you were wrong.

S. not creditable, extrast.

If you used believe this, you were wrong.

S. not creditable, extrast.

If you believe this, you were wrong. Condition (B.) that may be fulfilled (definite) (sī hōc crēdĭdĕrĭs, errāʾyĭs.

in the (f you believe this, you will be wrong. that may be fulfilled in the future {
 sī hōc crēdās, errēs.
 if you were to believe this, you would be wrong.

(C.) that is not fulfilled present \{ \begin{aligned} \sin \text{h\overline{c}} & \text{cr\overline{c}} \text{r\overline{c}} & \text{cr\overline{c}} \text{cr\overline{c}} \text{cr\overline{c}} & \text{cr\overline{c}} & \text{cr\overline{c}} \text{cr\overline{c}} & \text

that was not fulfilled and past in the space of the state of the space of the space

Obs. 1. Especial care must be taken to distinguish the use of the present subjunctive (B) from that of the imperfect subjunctive (C) in conditional sentences, the English translation being often the same for both. In Sī hōc crēdās, errēs, the meaning is If you were to believe this (and perhaps you will), you would be wrong; whereas in Sī hōc crēderes, errares it is If you believed this (but I know you do not), you would be wrong.

Obs. 2. The above are examples of the conditional sentence in its normal forms; other combinations occur of the various tenses of the indicative (cp. the second example in § 510). The imperfect and pluperfect subjunctive may also be used together, as in the lastexample in § 513. A subjunctive is found in the protasis with an indicative in the apodosis in accordance with the next two sections, and also when the second person singular denotes an indefinite subject; e.g. Memoria minuitur, nisi exerceas, The memory grows weak unless one exercises it. Cp. § 458.

§ 515. Occasionally a past tense of the indicative takes the place of an imperfect or pluperfect subjunctive in the apodosis, greater vividness being thus imparted to the narrative; similarly a future indicative may replace a present subjunctive.

sī non alium iactaret odorem, laurus erat.

save that it threw out a different scent, it was a bay-tree.

mē truncūs illapsūs cerebro sustūlerāt, nīsī Faunūs ictum levassēt.

the fall of a tree upon my head had carried me off, were it not that Faunus warded off the blow,

sī fractūs illābātūr orbīs, impāvīdum hunc fērīent rūīnae.

if the unicerse fall shattered upon him, the crash will strike him unalarmed.

§ 516. The verb sum accompanied by a gerund or verbal adjective, and the verbs possum, dēbēō, dēcēt, ŏportēt, are in the apodosis of hypothetical sentences commonly used in a past tense of the indicative, where other verbs would be in the imperfect or pluperfect subjunctive.

sī unum diem morātī essētis, moriendum omnibus fuit.

* had you tarried a single day, you must all have been put to death.

nĕquĕ sustĭnērī pŏtĕrant, nī cŏhortēs sē obiēcissent.

nor could they have been withstood, if the cohorts had not interposed.

Note.—Similarly the present tense is used in such phrases as Longă est făbulă, $It\ would\ be\ a\ long\ story\ (to\ tell).$

§ 517. Often a hypothetical sentence is found without any expressed protasis; the mood of the verb in such sentences is subjunctive, and is often termed the potential subjunctive. The present and perfect are used of something that may be realised; the imperfect of something that may not.

tū vělim saepě ăd nos scrībās.

I should like you to write often to me.

quid non sit citius quam quid sit dixerim.

I could more easily say what it is not than what it is.

vellem ădessĕt Marcus Antônius.

I could wish Marcus Antonius were here.

Obs. The effect of the present or perfect subjunctive is to give a mild or modest tone to the statement.

§ 518. Conditional clauses with the verb in the subjunctive and without any formal apodosis are used to report a condition laid down at the time of the action described in the principal sentence.

consul aedem Fortunae devovit sī eo die hostes fūdisset.

the consul vowed a temple to Fortune, if on that day he should rout the enemy.

Caesăr îis auxilium sŭum pollicitus est sī āb Suēvis prēmerentur.

Caesar promised them his aid if they were hard pressed by the Suevi.

 $\mathit{Obs}.$ Clauses such as the above are sometimes called "virtually oblique."

519. Clauses apparently conditional are found in dependence on a principal sentence which is not the apodosis, when the conjunction sī may be rendered to see if or in case. In these clauses, which are best classed as dependent questions, the verb is subjunctive.

hanc pălūdem sī nostrī transīrent hostēs exspectābant.

the enemy were waiting to see if our men would cross (or in case our men should cross) this marsh.

Note.—The use of sī after expressions of wondering is probably an imitation of a similar construction in Greek; e.g. Non mīrum sī hōc vobīs rīdiculum vidētur, It is not wonderful if this seems ridiculous to you.

§ 520. Quasi, as if, and sī preceded by āc, quam, tamquam, ŭt, or vělŭt, introduce conditional clauses with no expressed apodosis. These clauses indicate that the action of the principal sentence is such as would be expected under other circumstances. The verb of the clause is always subjunctive, and its tense is regulated in accordance with the sequence of tenses.

spērāt sībī quisquē fortūnam proindē quāšī plūrēs fortūnātī sint quam infēlicēs,

each hopes for good fortune for himself, just as if more were fortunate than unfortunate.

Sēquănī absentīs Ariovistī crūdēlītātem, vělūt sī cōram ădessēt, horrēbant.

the Sequani stood in dread of the cruelty of Ariovistus when he was absent, just as if he were present.

Obs. The suppressed apodosis may easily be supplied; e.g. each hopes, as he would hope if . . .; they stond in dread of him, just as they would do if

II.—CIRCUMSTANTIAL CLAUSES.

(i.) Concessive Clauses.

- § 521. The verb of a concessive clause introduced by quamvis (although), licet (although), cum (although), or ut (although) is in the subjunctive.
 - sěnectūs, quamvīs non sīt grăvīs, tăměn aufert viridītātem.
 - although old age is not burdensome, it nevertheless takes away one's freshness.
 - Quinctris quam causam umquam antēā dixērāt, cum annōs quinquāgintā nātūs essēt?
 - what cause had Quinctius ever pleaded before, although he was fifty years old?
 - ŭt dēsint vīrēs, tăměn est laudandă völuntās.
 - though strength be lacking, yet willingness is praiseworthy.
- NOTE 1.—The poets often construct quamvis with the indicative; e.s. Pollio ămăt nostram, quamvis est rustieă, Mūsam, Pollio loves my muse, rustic though she be.
- NOTE 2.—Quamvīs is also used with adjectives and adverbs as an adverb of degree; e.g. Mǐhǐ fācilě est quamvīs multos nominatim proferro, It would be easy for me to instance any number by name.
 - § 522. Quamquam (although) is used with the indicative.
 - quam quam festīnās, non est mŏră longă. though you are in a hurry, the deluy is not great.
- NOTE 1.—The subjunctive is freely used after quamquam by Tacitus and other late writers.
- NOTE 2.—Quamquam is sometimes used as an adverb of transition at the beginning of a principal sentence; e.g. Quamquam non căret is qui non desiderat, And yet he lacks not who feels not his want.
- § 523. Tămetsī (notwithstanding that, although) is used with the indicative.
 - Caesăr, tămetsī ĕrant mūnītionēs magnae, tăměn cělěritěr hostēs ex vallo dēturbāvit.
 - although the fortifications were of great size, Caesar nevertheless quickly drove the enemy down from the rampart.

§ 524. Etsī (although, even if) and ĕtĭamsī (although, even if) are used with the indicative when what is conceded is regarded as a fact, with the subjunctive when something is conceded merely for the sake of argument.

ergō, etsī conferrě mănum pǔdŏr īrăquě monstrăt, obĭcĭunt portās tăměn.

therefore, although shame and anger point them to battle, they nevertheless bar the gates.

etsī nihil aliud Sullae nisi consulātum abstulissētis, tamen eo vos contentos esse oportēbat.

even if you had robbed Sulla of nothing except the consulship, you ought, nevertheless, to have been satisfied.

Note.—Etsī is sometimes used as an adverb of transition; e.g. Etsī ex partě magnā tibi assentio, Yet to a great extent I agree with you.

(ii.) Causal Clauses.

§ 525. The verb of a causal clause introduced by cum (since) is always subjunctive.

Aedŭī, cum sē dēfenděrě non possent, lēgātos ád Caesărem mittunt.

as they were unable to defend themselves, the Aedui sent ambassadors to Caesar.

Obs. The tense of possent in the above example is due to mittunt being in the historic present; see § 485, Obs. 2.

§ 526. After the other causal conjunctions quŏd or quĭa (because), quŏnĭam (since), quandŏquĭdem (since), the indicative is used if the cause is stated as a fact; the subjunctive reports the cause assigned at the time of the action described in the principal sentence; the conjunction may then be rendered by on the ground that or because (he) said (or thought) that.

dŏlĕō quĭă dŏlēs.

I am grieved because you are.

indignābantur Romānī quod victorībus victī inferrént armā.

the Romans were indignant at the conquered making war on their conquerors.

mīhī hominēs grātulābantur quod habiturus essem contrā tribunum furiosum fortem consulem.

people were congratulating me on the ground that I should have in opposition to the furious tribune a brave consul.

Obs. If in this last example eram were substituted for essem, the speaker would commit himself to an acknowledgment of the consul's bravery, whereas by using the subjunctive he is able to imply that the popular expectation was disappointed.

NOTE.—Quando is also used (with the indicative), chiefly by Livy and the poets, with the meaning of since.

§ 527. The subjunctive is also used after non quod or non quo, the reason they introduce not being stated as a fact, but mentioned only to be rejected.

quibuscum mē pugnantem non vidēbitis; non quo mihi fās sīt quidquam dēfugērē, sēd quīž non nēcessē est.

but you will not find me contending with them; not that I have a right to evade anything, but because it is unnecessary.

(iii.) Temporal Clauses.

- § 528. In temporal clauses which merely define the time of the action described in the principal sentence the verb is indicative; if, however, concession, cause, or purpose is implied, the verb in the temporal clause is subjunctive.
- § 529. After the temporal conjunctions ŭt, ŭbĭ, quandōquĕ, quandōcumquĕ, sĭmŭl āc (or sĭmŭl atquĕ), postquam, the indicative is uscd, the clauses introduced by these conjunctions being merely temporal.

Ariovistus, ut Gallorum copias vīcit, crudēliter imperat. as soon as he has defeated the forces of the Gauls, Ariovistus governs with cruelty.

ĕō postquam Caesăr pervēnīt, obsĭdēs pŏposcĭt. Caesar, after he had arrived there, demanded hostages.

Obs. Often after ŭt, ŭbĭ, simŭl āc, postquam, the perfect indicative is more naturally rendered by the English pluperfect.

Note.—Ŭbĭ is found with the subjunctive, chiefly in Livy and later writers, when an action of frequent occurrence is denoted (iterative subjunctive); e.g. Hasdrübäl Hannībālem praeficiābāt ŭbĭ quidţ fortĭtĕr ägendum essĕt, Hasdrubal used to put Hannībal in command whenever anything had to be done with courage.

17

§ 530. After postquam the perfect indicative is the usual tense; but if the interval is specified the pluperfect may be used.

anno octāvo postquam in Hispāniam vēnērāt Scīpio est interfectus.

Scipio was slain in the eighth year after his arrival in Spain.

- § 531. (a) Cum, when, referring to present or future time, is used with a primary tense of the indicative.
- (b) Cum, at the time when, referring to past time, is used with the imperfect or perfect indicative to denote a state or action which is represented as marking the time of the event related in the principal sentence.
- (c) Cum, when, referring to past time, is used with the imperfect or pluperfect subjunctive to denote a state or action with which that of the principal sentence is represented as closely connected.
 - (a) c u m hostium copiae non longe a b s u n t, agrī cultūră deseritur.
 - when an enemy's forces are near, the cultivation of the land is abandoned.
 - (b) cum Caesăr în Galliam vēnīt, principēs ĕrant Haedūī. at the time of Caesar's arrival in Gaul, the Haedui were the leading state.
 - (c) Gyges, cum terră discessisset, descendit in illum hiatum.
 - Gyges, when the earth had opened, went down into the chasm.

Obs. Cum, when, with the subjunctive, is often indistinguishable from cum causal (§ 525).

NOTE 1.—The historians and other writers occasionally adopt, for the sake of emphasis, an inversion whereby the action which would normally be that of the principal sentence is transferred to a temporal clause introduced by cum and with its verb in the indicative; e.g. Mūrō circumdărĕ urbem părābāt, cum Sābīnum bellum coeptis intervēnĭt, He was preparing to surround the city with a wall, when the Sabine War interrupted his plans.

NOTE 2.—When cum introduces a definition of the action of the principal sentence, it is followed by the indicative; e.g. Cum collegae Brūtüs-imperium abrogābāt, poterāt vidērī fācērē iniustē, Brutus may have seemed to be acting unjustly in depriving his colleague of office.

- NOTE 3.—In a temporal clause introduced by cum, repeated action is expressed by the pluperfect indicative; e.g. Neque vero cum aliquid mandarat, confectum putabat, Nor indeed, when he had given erd refer a thing, was he wont to regard it as done. But the subjunctive is sometimes found, and becomes frequent in late writers.
- § 532. The verb in a temporal clause referring to future time must be in the future or future-perfect, the English use of the present or present-perfect being merely idiomatic.

dē hīs rēbūs, ōtiosī cum ĕrīmūs, loguēmur.

we will speak about these matters when we are at leisure.

morātī melius erimus cum didicerimus quae nātūrā dēsīderet.

we shall be better in churacter when we have learnt what nature requires.

- Obs. This rule applies to all indicative clauses referring to the future, irrespective of the conjunction by which they are introduced. Cp. sī with the future and future-perfect (§ 511).
- § 533. (c) The verb in a clause introduced by antequam or priusquam is indicative when mere sequence of events is denoted; but it is subjunctive if the action expressed by the clause is purposely anticipated or (when the principal sentence is negative) purposely awaited.

něc priŭs illě est rělictŭs lŏcŭs quam fīnĭs est pugnandī factŭs.

nor was that position abandoned before an end was made of fighting.

Romanus priusquam fores obicerentur irrūpit.

the Romans rushed in before the gates could be shut.

Gallī non prīŭs dŭcēs dīmittunt quam ab his sīt concessum arma ŭtī capiant.

the Gauls would not send away the chieftains before the latter had consented to take up arms.

 Obs. 1. Often after antequam or priusquam the perfect indicative is more naturally rendered by the English pluperfect.

Obs. 2. Antequam, priusquam, postquam may each be written as two words: ante, prius, or post is frequently placed in the principal sentence, quam introducing the clause. (Cp. the first and third of the above examples.)

NOTE.—The subjunctive after antequam and priusquam is sometimes iterative (cp. § 529, NOTE), and is by Livy sometimes used in a merely temporal sense.

§ 534. Dum, meaning while (i.e. in the time that), is followed by the present indicative.

dum haec gĕruntŭr, lēgātī discessērunt. while this was going on, the ambassadors departed.

Note 1.—Dum, dōnĕc, and quòăd, meaning so long as, are followed by the indicative: c.g. Dum tēcum vixī, dum mē lēyis aurā fērēbāt, haec mĕā pēr plācidās cumbā cūcurrīt āquās. So long as I lived with you, so long as the light breeze bore me on, this my bark sailed through calm waters. Livy uses dōnĕc in this sense with the subjunctive.

NOTE 2.—Dum, when meaning so long as in the sense of provided that, is followed by a subjunctive; e.g. Ödĕrint, dum mĕtuant, Let them hate, so long as they fear. In this sense the compound dummŏdŏ is also used. The negative in this usage is nē.

§ 535. The indicative is used after dum, donec, and quodad, when they mean until, if the relation between the principal sentence and the clause is merely temporal. If, however, the action expressed by the clause is purposely awaited, the verb of the clause is subjunctive; dum may then often be rendered in order that meanwhile.

pugnāvērunt hostēs dum dux interfectus est. the enemy fought until their leader was slain.

obsidio për paucos dies magis quam oppugnatio fuit, dum vulnus ducis curaretur.

there was a blockade for a few days rather than an assault, that the general's wound might meanwhile be attended to.

Note.—Donec, until, is not used with the subjunctive in good prose.

(iv.) Local Clauses.

- § 536. A local clause is introduced by some relative adverb of place (§ 240, column 2), such as ŭbĭ, where; quō, whither; undĕ, whence. The mood of the verb in the clause is regulated by the same conditions that determine the mood after a relative pronoun (§ 501), i.e. the subjunctive is used if the clause implies concession, cause, purpose, or result.
 - (a) Caesăr ĕödem undĕ rĕdĭĕrăt pröficiscĭtŭr.
 Caesar sets out for the same place whence he had returned.
 - (b) consul locum petit unde hostem invadat.

 the consul seeks a position from which to attack the enemy.

 Obs. In (b) unde is equivalent to ut inde, in order that thence,

(v.) Comparative Clauses.

§ 537. A comparative clause is introduced by some relative adverb of manner, such as ŭt, as; quam, than; or āc in the combinations pěrindě āc, just as; non sěcůs āc, not otherwise than. The mood in a comparative clause is naturally indicative.

cunctă ŭt gestă sunt exponam. I will relate everything as it happened.

illüd, quŏd dixī, nōn dixī sĕcŭs āc sentĭēbam. what I said, I did not say otherwise than as I thought.

Obs. 7. Adverbs of manner are very commonly used without a dependent clause; e.f. Planci sălūtem non secus ac meam tüerī dēbēo, I ought to guard Plancius' welfare no less than my own. For quam so used, see § 593.

Obs. 2. For adverbs of manner followed by sī, see under Conditional Clauses (\$ 520).

III.—FINAL CLAUSES.

§ 538. A final clause is one that expresses the purpose or end (fīnīs) of the action of the principal sentence; its verb is always in the subjunctive.

The chief conjunctions that introduce final clauses are ut (that, in order that), ne (lest, in order that . . . not), quo (in order that thereby), quominus (that . . . not), quin (that . . . not).

§ 539. Ut with a final subjunctive is very frequently rendered by the English infinitive* with to; similarly newith a final subjunctive may be rendered by not to . . .

ĕquĭtēs mīsīt ŭt ĕōs quī fūgĕrant persĕquĕrentŭr. he sent horsemen to pursue those who had fled.

dandă öperă est nē quă ămīcērum discidiă fīant. care must be taken that no estrangements take place between friends.

* Taking this rule together with that relating to dependent commands (§ 492), we have conversely:

With ask, command, advise, and strive, By ŭt translate infinitive; But not so after iŭbĕō, nor With vĕtō or deponent cōnŏr.

NOTE.—A final clause is frequently used parenthetically; e.g. Quōmŏdŏ, ŭt ăliă ŏmittam, mortem filii tŭlit! How well (to pass other matters by) he bore his son's death!

Obs. In negative final clauses $n\bar{e}$ must be used; not only $t\bar{t}$ $n\bar{o}n$, but $t\bar{t}$ followed by any negative word, is inadmissible when purpose is denoted.

Thus, instead of ut nemo we have ne quis, that no one;

,, ,, ŭt nullŭs, ,, nē ūllŭs, that no ; ,, ,, ŭt numquam, ,, nē umquam, that never.

The second example in § 539 contains an instance of ne quis.

§ 540. When ne introduces a clause dependent on a verb of *fearing*, it is usually rendered in English by *thet* more naturally than by *lest*, ut in a similar position being rendered by *that* . . . *not*.

ōrātōr mĕtŭō nē languescăt sĕnectūtĕ.

I fear that the orator will be enfeebled by old age.

illă duo vereor ut possim tibi concedere. I fear that I cannot grant you those two points.

Note.—Occasionally në non is used instead of $\verb"ut"$; e.g. Timeo non impetrem, I fear I shall not obtain my request.

§ 541. Quō (properly abl. sing. neut. of quī, who) is used as a final conjunction chiefly when the clause introduced by it contains a comparative adjective or adverb.

Pompēiŭs, quō făcīliŭs impětum Caesăris tardārět, portās obstruĭt.

the more easily to impede Caesar's attack, Pompeius harred the gates.

Obs. The tense of tardārēt in the above example is due to obstruĭt being in the historic present; cp. § 485, Obs. 2.

§ 542. After verbs of hindering or preventing the dependent clause is introduced by quōmĭnŭs or (if the principal sentence is negative) by quōn.

nāvēs ventō těnēbantŭr quōmīnŭs in portum věnīrē possent.

the ships were hindered by the wind from being able to reach the harbour.

Germānī rětǐnērī non pŏtŭērunt quīn ĭn nostros tēlā conĭcĕrent.

the Germani could not be restrained from hurling darts at our men.

Obs. Quōminus is equivalent to ut eō minus, in order that ... the less, and is sometimes written as two words—quō minus.

IV.—CONSECUTIVE CLAUSES.

- § 543. A consecutive clause is one that expresses the consequence or result of the action of the principal sentence; its verb is always in the subjunctive.
- § 544. Consecutiv clauses are usually introduced by ŭt (that, so that); if the clause is negative, ŭt is followed by non or some other negative word. A consecutive clause is often preceded by a demonstrative adverb meaning so; e.g. ădēō, ītā, sīc, tam.

mons altissīmus impendēbāt ut fācile perpaucī obstāre possent.

a very high mountain overhung, so that a very few could easily block the way.

accidit ŭt essět lūnă plēnă.

it so happened that the moon was full.

ĭtā vixī ŭt non frustrā mē nātum existīmem. I have so lived that I consider I was not born in vain.

- Obs. Nē is inadmissible in consecutive clauses: hence we find **ŭt** nēmō, **ŭt** null**ŭs**, **ŭt** numquam, etc., in consecutive clauses; never (as in final clauses) nē quīs, nē ullūs, nē umquam, etc. Cp. § 539, Obs.
- § 545. The conjunction quin is used after a negative or interrogative principal sentence, and (with the dependent clause which it introduces) expresses an exception; the verb in the clause introduced by quin is subjunctive.
- (i.) Quin is rendered by who . . not, that (relative pronoun) . . . not.

nēmo fuit militum quin vulnērārētur.

there was not one of the soldiers who was not wounded.

hōrum nīhīl est quīn intěrěăt.

of these there is nothing that does not perish,

(ii.) Quin is rendered by but, but that, that (conjunction)... not.

făcere non possum quin ăd te mittam. I cannot but send to you. fier non potest quin haec ită sint. it cannot but be that these things are so.

quid est causae quin liceat hoc dicere? what is the reason that we may not say this?

(iii.) Quin is rendered by from or without with a verbnoun in -ing.

lēgātōs nostrōs haud procul āfuit quīn viŏlā?ent.

they were not far from outraging our ambassadors.

Trēverī tōtius hiĕmis nullum tempus intermīsērunt quīn
trans Rhēnum lēgātōs mitterent.

the Treveri let no time in the whole winter go by without sending ambassadors across the Rhine.

Obs. For quin after verbs of hindering, etc., see § 542; for the interrogative adverb quin, see § 448, NOTE.

§ 546. Quin with the subjunctive is also used after a negative or interrogative principal sentence expressing doubt, such as non est dubium, non dubito, quis dubitat? Quin so used is rendered by that.

non dubito quin brevi sit Troia peritura. I do not doubt that Troy will soon be destroyed.

něquě ăbest suspīciō quīn ipsě sĭbī mortem conscīvěrĭt.

nor are there wanting grounds for suspecting that he committed suicide (lit. adjudged death to himself).

- § 547. In consecutive clauses the ordinary sequence of tenses is so far modified that a perfect subjunctive is often found (especially in Livy) in dependence on a historic principal verb.
 - ĭs, tormentīs cum lăcērārētŭr, ĕō fǔĭt hābĭtū ōrĭs, ŭt rīdentīs ětĭam spēcĭem praebŭērĭt.
 - though he was being torn on the rach, he wore such an expression of countenance that he presented the appearance of a man actually smiling.

Obs. The perfect subjunctive thus used states an actual result rather than a natural consequence.

CHAPTER XLVI.—CLAUSES DEPENDENT ON AN INFINITIVE OR DEPENDENT SUBJUNC-TIVE, ORATIO OBLIQUA, AND TABLE OF SUBJUNCTIVE USAGES.

I.—CLAUSES DEPENDENT ON AN INFINITIVE OR DEPENDENT SUBJUNCTIVE.

- § 548. The rules given in the last three chapters apply to clauses directly dependent on some word in the principal sentence. Certain modifications, however, in these rules are required in the case of clauses dependent (a) on the infinitive or some word closely connected with it in the "accusative and infinitive" construction (§ 411), or (b) on a dependent clause of which the verb is subjunctive.
- Obs. 1. A clause dependent on a dependent clause is called a sub-dependent clause.
- Obs. 2. The verb in many dependent clauses is indicative. Subdependent clauses dependent on such are subject to exactly the same rules as clauses directly dependent on a principal sentence; e.g. Caesar, etsi intellegebat quae res eos terreret, principem ad se venire iussit, Although Caesar understood what circumstance alarmed them, he ordered the chieftain to come to him. (Here intellegebat, the verb of a dependent clause, introduces a dependent question, just as it would if it were a principal verb.)
- § 549. In a clause dependent on an accusative and infinitive phrase or on a subjunctive dependent clause the mood used, if the writer wishes (as he usually does) to bring out this dependence, is subjunctive. (For the tense see § 505).
 - vīdī sĕnātum, sīnĕ quō cīvītās stārĕ nōn possĕt, omnīnō dē •cīvītātĕ essĕ sublātum.
 - I saw that the senate, without which I knew the government could not continue, had been altogether removed from the government.

huic impěrăt quās possīt ăděăt (§ 493) cīvĭtātēs. he orders him to visit what states he can.

fraus fídem in parvīs sibi praestruit, ut, cum operae pretium sit, cum mercēde magnā fallāt.

deceit wins for itself confidence in small matters, in order that, when it is worth while, it may cheat with great profit.

- Obs. Here in the first example the subjunctive posset implies that the clause beginning sine quo formed part of the speaker's reflection at the past time referred to. The indicative (§ 551, i.) would have been used if the clause had been a parenthetical statement addressed to the audience. So in the second example quas possit represents a clause in the order as given ("visit what states you can"); and in the third example the temporal clause cum . . . sit is closely connected in sense with the final clause, and is not an independent mark of time.
- § 550. The sequence of tenses is so far modified in the case of clauses dependent on an accusative and infinitive phrase or subjunctive dependent clause, that a perfect infinitive or perfect subjunctive is usually followed by an imperfect or pluperfect subjunctive, even when the principal verb is primary.
 - crēdō dēōs immortālēs sparsissē ănīmōs in corpŏrā hūmānă ŭt essent quī terrās tǔērentǔr.
 - I hold that the immortal gods assigned rational souls to human bodies in order that there might exist some beings who should care for the earth.
 - accusēs šum quī sē praesidio mūnišrit üt vitam süam possēt dēfendērē?
 - are you to accuse him for having protected himself by means of a body-guard in order that he might be able to preserve his life?
- § 551. In clauses dependent on an accusative and infinitive phrase or on a subjunctive dependent clause, the indicative is used under certain circumstances.
- (i.) The indicative is used in a relative or other clause which the writer or speaker introduces for the information of his readers or hearers.
 - dēcrēvit sēnātūs ūt ēīs quī sālūtīs mēae causā convēnērant agerentūr grātīae.
 - the senate decreed that thanks should be tendered to those who had assembled on behalf of my welfare.
- Obs. 1. If convenissent were substituted for convenerant, it would imply that the relative clause formed part of the decree.
- (ii.) The indicative is often used in a short relative or other clause which simply defines, and sometimes in a clause introduced by ut meaning as, dum meaning while, or cum used in a merely temporal sense.

haec ipsă, quae dixī, sentio fuisse longioră.

I feel that what I have said has been itself somewhat long.

quotus quisque philosophorum invenītur quī sit ita morātus ut ratio postulāt!

how few philosophers are found whose manner of life is such as reason demands!

nolitě arbitrari me, cum a vobis discessero, nusquam aut nullum fore.

you must not think that when I have departed from you I shall be nowhere or non-existent.

Obs. 2. Were the subjunctive used after ut, dum, or cum, the meaning might be mistaken; e.g. cum might be rendered although or since.

§552. In the accusative and infinitive construction (§§ 411, 412), the future infinitive active may be replaced by fore ut (or future infinitive passive may be replaced by fore ut (or future infinitive passive may be replaced by fore ut (or future infinitive passive may be replaced by fore ut (or future infinitive passive may be replaced by fore ut (or future esse ut) and the present or imperfect subjunctive passive; the present subjunctive is used when the principal verb is primary, the imperfect subjunctive when the principal verb is historic (§ 485).

spērō fŏrĕ (or fŭtūrum essĕ) ŭt multă discam. I hope that I shall learn much.

spērābam förĕ (or fǔtūrum essĕ) ŭt multă discĕrem. I hoped that I should learn much.

sciō fŏrĕ (or fŭtūrum essĕ) ŭt urbs căpĭātŭr. I know that the city will be taken.

sciëbam förë (or fütūrum essë) üt urbs căpĕrētŭr. I knew that the city would be taken.

Obs. 1. In this usage the subjunctive is consecutive (§ 544), and the clause is sub-dependent, being dependent on the infinitive fore or futurum esse.

Obs. 2. The above construction may be used in place of the future infinitive of any verb, and must be used in the case of verbs that have no supine base.

§ 553. When a conditional sentence with a subjunctive in the apodosis becomes a dependent statement or a dependent question, the subjunctive of the apodosis is represented by a periphrastic form as shown by the examples in the next two sections.

§ 554. (i.) Direct form: sī něgem, mentĭăr.

were I to deny it, I should lie.

(a) aiổ më, sĩ něgem, mentîtūrum essě.

(b) aiēbam mē, sī něgarem, mentītūrum essě.

(a) I declare
 (b) I was declaring that were I to deny it, I should be.

- (ii.) Direct form: sī ădessēs, gaudērem.

 if you were present, I should be glad,
 - (a) dīcō mē,
 (b) dixī mē,
 sī ădessēs, gāvīsūrum fŭissē.

(a) I say that, if you were present, I should be glad.

- (b) I said that, if you had (when I spoke) been present, I-should have been glad.
- (iii.) Direct form: sī adfŭissēs, gāvīsūs essem. if you had been present I should have been glad.
 - (a) dīcō mē,
 (b) dixī mē,
 sī adfŭissēs, gāvīsūrum fŭissē.

(a) I say that, if you had been present, I should have been glad.

- (b) I said that, if you had (on a former occusion) been present, I should have been glad.
- § 555. (i.) Direct form: qu'id évěniát, sī urbs căpiatur?

 what would happen, were the city to be taken?
- (a) mīror quid ēventūrum sit sī urbs capiātur.
- (b) mīrābār quid ēventūrum esset sī urbs caperētur.
- (a) I wonder
 (b) I was wondering
 what would happen, were the city to be taken.
- (ii.) Direct form: quid diceres, si ădesses? what would you say if you were there? scio (sciebam) quid, si ădesses, diceres. I know (knew) what you would be saying if you were there.
- (iii.) Direct form: qu'id dixissēs, sī adfüissēs? what would you have said if you had been there? sciō (sciēbam) qu'id, sī adfüissēs, dictūrūs füĕris. I know (knew) what you would have said if you had been there.
- NOTE 1.—The perfect subjunctive of esse is here used with the future participle in historic as well as in primary sequence (cp. § 547).
- NOTE 2.—Similar constructions are found when the conditional sentence is introduced by quin (after expressions of doubting) or by ut consecutive.
- § 556. When the verb of the apodosis is passive or has no future participle, futurum fuisse ut and the subjunctive may be used to represent the direct form of § 554 (iii.) and the direct form of § 555 (iii.) may remain unchanged.

dīcō (dixī) fūtūrum fŭissē ūt vincĕrēmūr, sī bellum indixissēmūs. I say (said) that we should have been defeated, if we had declared war. quŏd illĕ sī rĕpūdĭassĕt, dūbītātĭs quīn vīs essĕt allātā? do you doubt that, had he rejected that, force would have been used?

II.—ORATIO OBLIQUA.

§ 557. The name ōrātīō oblīquă (indirect discourse) is given to the form assumed by speeches and other statements (usually of some considerable length) reported, not in the words actually used, but after some verb of saying, questioning, or commanding, expressed or understood. For examples, see § 562.

§ 558. The use of moods and tenses in oratio obliqua is the same as in the accusative and infinitive construction

or in dependent commands; that is to say:-

Statements in a principal sentence of oratio recta are expressed by the infinitive in oratio obliqua, and commands or verbs in dependent clauses of oratio recta are expressed by the subjunctive in oratio obliqua.

Special rules (§ 563) apply to questions in oratio obliqua.

.§ 559. The following are the changes which take place in mood and tense when a sentence is reported in oratio obliqua dependent on an introductory verb in a historic tense.

```
PRINCIPAL
 SENTENCES.
                       Oratio Recta.
                                               Oratio Obliqua.

                                                      pluperfect
```

- § 560. If the introductory verb is primary instead of (as is assumed above) historic, the same rules hold good, except that the present subjunctive is used instead of imperfect, and the perfect subjunctive instead of the pluperfect. The present and perfect subjunctive are also found occasionally after a historic introductory verb, a more graphic character being thus given to the report. Cp. vělit in § 562 (a).
- § 561. All verbs and pronouns and possessive adjectives in oratio obliqua are of the third person; hīc, istě, adverbs derived from them (§ 243), and some other adverbs, are changed in the transformation from oratio recta to oratio obliqua.

Oratio Recta.

ěgŏ, měŭs, nōs, nostěr tū, tǔŭs, vōs, vestěr hīc, istě nunc Oratio Obliqua. sē (în nominative ipsē), sŭŭs ĭs (sometimes illě), ēiŭs, etc. illě (sometimes hīc is retained) sometimes changed to tum.

NOTE 1.—The first person plural is retained in oratio obliqua when it refers to the Roman people.

NOTE 2.—Sē, sūŭs, occasionally represent the second person of the oratio recta, and ipsum, ipsīūs, the first. Cp. § 563, II. (b).

§ 562. Oratio Recta.

(a) agrum dăbō în Ītālĭā Afrīcā Hispānĭā ŭbĭ quisquĕ völĕt; quī pĕcūnĭam quam agrum mālŭĕrĭt, ĕī argentō sătisfăcĭam.

I will give land in Italy, Africa, or Spain, wherever each shall wish; I will satisfy with money the man who shall prefer money to land.

(b) nē commīsērīs út hīc löcūs, ŭbĭ constĭtīmūs, ex călămĭtātĕ pöpulī Rōmānī nōmēn capïāt.

do not bring it about that this place where we have taken our stand should derive renown from a disaster to the Roman people.

Oratio Obliqua.

agrum sēsē dătūrum essē în Ītālĭā Afrīcā Hispānĭā tibi quisquē vēlīt (§ 560); quī pēcūnīam quam agrum māltissēt ēī sē argentō sătisfactūrum.

he would (he said) give land in Italy, Africa, or Spain, wherever each should wish; he would satisfy with money the man who should prefer money to land.

nē committěrět üt is löcüs a ŭbĭ constitissent, ex călămĭtātë pŏpŭlī Rōmānī nōměn căpěrět.

let him not bring it about that the place where they had taken their stand should derive renown from a disaster to the Roman people.

- § 563. Questions in oratio obliqua (§ 557) are not immediately dependent (as are "dependent questions," § 483) on a principal verb. The following are the main rules:—
- I. Questions in which the verb is subjunctive in oratio recta retain the subjunctive in oratio obliqua;
- II. (a) Questions in the 1st or 3rd person indicative in oratio recta become infinitive in oratio obliqua;
- (b) Questions in the 2nd person indicative in oratio recta become subjunctive in oratio obliqua.

I. cūr vulněrārī pătĭăr optĭmē dē mē mĕrĭtōs mīlitēs ?

why am Pto allow troops that have deserved so well of me to be wounded?

- II. (a) sī vētērīs contūmēlīae oblīviscī völō, num ētīam rēcentīum iniūriārum mēmērīam dēpēnērē possum?
- if I am willing to forget an old insult, can I also lay aside the remembrance of recent wrongs?
- (b) sī Ariovistŭs bellum intülērīt, quīd tandem vērēbīmīnī? aut cūr dē vestrā virtūtě aut dē mēā dīlīgentīā despērātīs?
- if Ariovistus makes war, what, pray, will you fear? or why do you despair of your own valour or my carefulness?

NOTE.—A question in the second person in O.R. may become infinitive in O.O. if practically equivalent to a negative statement.

aŭdi tu nobiscum acie conflixisti? when did you fight in battle with us? (i.e. you never fought in battle with us). cūr vulnērārī pātērētūr optīmē dē sē mērītōs mīlĭtēs ?

why was he to allow troops that had deserved so well of him to be wounded?

sī včtěrís contůměliae oblivisci vellět, num ětiam rěcentium iniūriārum měmōriam děpōněrě possě?

if he were willing to forget an old insult, could he also lay aside the remembrance of recent wrongs?

sī Ariovistūs bellum intūlissēt, quĭd tandem vērērentūr? aut cūr dē sūā virtūtē aut dē ipsīūs dīlīgentīā despērārent?

if Ariovistus made war, what, pray, would they fear? or why did they despair of their own valour or his carefulness?

ŭbĭ ĕum sēcum ăcĭē conflixissĕ? when had he fought in battle with them?

Obs. The rules as to tenses in questions in O.O. are the same as for principal statements if the verb is infinitive, and the same as for dependent statements if the verb is subjunctive.

§ 564. TABLE OF SUBJUNCTIVE USAGES.

I —Subjunctive in	Principal Sentences.

* Or with a relative adverb of place (§ 536).						

CHAPTER XLVII. — CONSTRUCTIONS AND USAGES OF CERTAIN WORDS.

§ 565. In the preceding chapters the general principles of syntax and the construction of classes of words have been set out and illustrated. The present chapter deals with some noticeable constructions and usages of individual words. These constructions may, in some cases, be easily seen to be governed by general principles, while in others the connection is not at first sight obvious, and in some few instances cannot with certainty be traced.

I.—SUBSTANTIVES.

§ 566. Opus, work, constructed with an ablative of that with which the work has to be done (instrument, § 374), signifies (there is) need of.

māgistrātībūs ŏpūs est.

there is need of magistrates (lit. there is work to be done with magistrates).

Öpüs is also used as a secondary predicate in the sense of necessary.

dŭeēs nobis opŭs sunt.

we need leaders (lit. leaders are necessary for us).

§ 567. $\overline{\mathbf{0}}$ sūs, use, has a construction and meaning similar to that of $\overline{\mathbf{0}}$ pus with the ablative. Cp. § 586.

nune vīrībūs ūsūs.
now we need strength.

II.—ADJECTIVES.

§ 568. Some adjectives, instead of qualifying as a whole the substantives of which they are the attributes, often specify certain parts of those substantives. The adjectives commonly so used are:—

prīmūs, first medius, middle extremus, last summus, highest medius, middle extremus, last summus, highest medius, middle extremus, last reliquus, remaining

They are commonly rendered by English substantives, thus: prīmum vēr, the beginning of spring; mědiă urbs, the middle of the city; extrēmă ōrātiō, the end of the speech; summus mons, the top of the mountain; infimă ārā, the lowest part of the altar; rěliquă praedă, the rest of the booty.

§ 569. Similis, like, is used with a genitive or dative of that with which its substantive is compared. A person is more commonly in the genitive; a thing is in the genitive or dative indifferently.

Attīcārum sīmīlēs esse volumus. we wish to be like the Attic writers.

quid habet illius carminis simile hace oratio? what resemblance has this speech to that poem?

nihil est morti tam simile quam somnus. nothing is so like death as sleep.

NOTE.—Dissimilis, unake, is constructed like similis.

- § 570. The following adjectives are used with an ablative:—dignus, worthy (of); indignus, unworthy (of); praeditus, endowed (with); fretus, relying (on); contentus, content (with); laetus, rejoicing (in).
- Rhyme:—Construct with ablative contentus, laetus, Dignus, indignus, praeditus, and frētus.

glande sues laetī redeunt.
the swine return gladdened with acorns.

dignum laudě vírum Mūsă větăt mŏrī, the Muse forbids the man who is worthy of praise to die.

§ 571. Aptus, fit, and idoneus, suitable, are used with the dative, or with ad and the accusative.

castra erant ad bellum ducendum aptissima. the camp was well suited for prolonging the war.

Caesar castrīs idonēum locum dēlēgit. Caesar chose a spot suitable for a camp.

\$572. Dignus, indignus, aptus, idoneus are followed by qui and the subjunctive.

nullă vidēbātur aptior persona quae dē senēctūte:
lŏquērētur.

there seemed no character more fit to discourse on old age.

§ 573. Ălĭŭs (§ 81) is frequently repeated in a different case, or followed by an adverb formed from it. The translation of the doubled ălĭŭs is to be noted.

ălīŭs ĭn ălīā est rē magis ūtilis.

one is more useful in one business, another in another.

ălĭī ălĭō mittēbantŭr.

some were being sent one way, some another.

Note.—Alius followed by atque or ac is used in the sense of other than; e.g. Hi longe alia ratione ac reliqui Galli bellum gerunt, These wage war in a manner very different from the rest of the Gauls.

NUMERALS.

- § 574. The plural of unus is used with substantives plural in form and singular in meaning; e.g. unae litterae, one letter (epistle); unusera, one camp. (Distributives are used with these substantives for numbers above 1, see § 99.)
- \S 575. In poetry distributives, singular or plural, are sometimes substituted for the corresponding cardinal numerals.

terno consurgunt ordine remi.

the oars rise in three tiers.

tot lectī proceres ter denīs nāvibus ībant.

in thrice ten ships an equal number of chosen nobles were voyaging.

III.—PRONOUNS.

§ 576. The personal pronouns ego, tū, are seldom used in the nominative except for emphasis or contrast.

võs îtě domum, ĕgo rūs ībo.

you go home, I will go into the country.

- Obs. For the distinction between the two forms of the genitive plural (nostrum, vestrum, and nostrī, vestrī), see § 395, Obs.
 - § 577. In simple sentences sē, sūŭs, refer to the subject.

 Caesar sē ād sūōs rēcēpīt.

Caesar returned (lit. took himself back) to his men.

Note.—Săŭs sometimes (provided no ambiguity thereby arises) refers to some word other than the subject; e.g. Hannibālem sūī cīvēs ē cīvītātē ēiēcērunt, His fellow-citizens expelled Hannibal from the state.

Obs. In the accusative and infinitive construction sē, sǔŭs, refer to the subject of the principal verb.

§ 578. In complex sentences the question arises as to whether sē, sūūs, are in the dependent clause to be used in reference to the subject of the principal sentence or to that of the dependent clause.

Classical usage is not on this point altogether uniform, but the following rules generally hold good:—

- (1) Sē or suus in a dependent clause refers to the subject of the principal sentence if the dependent clause has its verb in the subjunctive mood, and is (a) a final clause or dependent command, (b) a reported description, condition, cause, or a dependent question (§ 564, c, d, H).
 - (a) pětlerunt principēs út sibi dē súā sălūtě cum ěō ăgěrě licērět.
 - the chiefs begged that it might be permitted them to treat with him concerning their lives.
 - (b) dĕcĭmă 1ĕgĭō Caesărī grātĭās fēgĭt quŏd dē sē optĭmum iūdĭcĭum fēcissĕt.
 - the tenth legion tendered its thanks to Caesar for having formed a high opinion of it.
 - hī abs tē requirunt cur sē dēlēgeris.

these men are inquiring of you why you selected them.

- (2) Sē or suus in dependent clauses other than the above refers to the subject of the clause; is, ēius, being used to refer to the subject of the principal sentence.
 - ĕö impětū mīlitēs iērunt út hostēs sē fúgae mandārent.

the troops charged with such force that the enemy betook themselres to flight.

hunc, cum ăd ĕōs Caesăris mandātă deferret, hostēs comprehendērunct.

the enemy, when he brought them Caesar's commands, took him prisoner.

Obs. Of the above examples the first contains a consecutive, the latter a temporal, clause.

- § 579. Sē, sūus, are used in reference to an indefinite subject.
- dēformě est dē sē ipsum praedĭcārě.

it is bad form to brag about oneself.

non licet suī commodī causa nocere alterī.

it is not permissible to injure another for one's own advantage.

For the case of ipsum, see § 581 and § 40%.

§ 580. Hic, ille, etc., used as subject of a sentence containing a secondary predicate, are attracted into the gender of that predicate.

hōc ŏpŭs, hīc lăbŏr est.
this is the toil, this is the hard work.

§ 581. When used with a reflexive pronoun, ipse agrees with the subject of the sentence, unless the object is the emphatic word.

mē ipsē consēlor.

I soothe my own grief.

omně ănimăl sē ipsum dīligit.
every living thing loves itself.

- Obs. Thus, in the first example above, mē ipsē consōlŏr fleans it is from myself, not from others, that I derive consolation: whereas mē ipsum consōlŏr would mean it is myself, not others, that I console.
- § 582. Quī frequently stands at the beginning of a Latin sentence, where English idiom requires a personal or demonstrative pronoun with or without and. This is especially the case when quī is followed by cum (when).

quā rē cognītā, Caesar proficiscī contendit. on learning this, Caesar hastens his departure.

- quibus ex nāvibus cum essent expositī mīlitēs, Morinī convēnērunt.
- and when the troops had disembarked from these ships, the Morini assembled.
- \S 583. Qu'is following nescio, I know not, forms a phrase (nescio qu'is) equivalent to some one.

laudābāt homo doctus philosophos nescio quos.

- a learned man used to praise some philosophers (lit. I know not what philosophers).
- Obs. Thus used nesció quis does not affect the mood of the verb, and is sometimes written as one word—nesció quis. Distinguish nesció quis adest, some one is here, from nesció quis adsit, I do not know who is here (dependent question).
- § 584. Quisque used after a superlative adjective is, translated by all.

optimus quisque hoc sentit.
all the best men are of this opinion.

IV.--VERBS.

§ 585. Certain verbs are differently rendered according as they are constructed with a direct object in the accusative or an indirect object in the dative; the commonest are căveō, •mětuō and timeō, consulō, moderor and temperō.

căvē cănem, beware of the dog
mětuunt dŏminum servī, the
slares fear their master
poenam timěō, I fear punishment
consulō ōrāculum, I consult the
oracle
mŏděrŏr ĕquum, I manage a
horse
Iuppitěr mundum tempěrăt,
Jupiter rules the world

căvē tibi, look out for yourself mětiě tüis, be anxious about your people urbi timěč, I am anxious about the city consălé fămae tüae, have regard to your reputation mŏdŏror īrae, I set bounds to my anger tempěro linguae, I restrain my tonaue

NOTE.—Nūbō, I marry (said of the woman), is also constructed with a dative; e.g. Porciā Brūtō nupsit, Porcia married Brutus.

§ 586. The verbs ūtŏr, I use; ăbūtŏr, I misuse; fungŏr, I perform; frūŏr, I enjoy, are constructed with an ablative representing the direct object of the corresponding English verbs; an ablative is also used with dignŏr, I deem myself worthy of; pŏtĭŏr, I gain possession of; vescŏr, I feed on.

Rhyme:—Put ablative with dignör, vescör, ūtör, And fungör, fruör, pötiör, äbūtör.

im pědīm en tīs castris quě nostrī pŏtītī sunt. our men gained possession of the baggage and camp.

fungăr ĭnānī mūnĕrĕ.

I shall perform a fruitless task.

rěcordātioně nostrae amīcitiae fruor. I enjoy the remembrance of our friendship.

Obs. With the above verbs the ablative was originally instrumental; e.g. potior, I make myself powerful by means of.

Note 1.—Pôtior is sometimes found with a genitive; e.g. Vexilli hostes potiti sunt, The enemy gained possession of the standard.

NOTE 2.—Nītŏr, I endearour or lean, is in the latter sense used with an ablative; e.g. Iŭvĕnĭs hastā nītĭtŭr, The youth is leaning on his spear.

§ 587. Three common verbs, (a) circumdo, (b) dono, and (c) muto, have each two constructions, as shown in the following examples:—

(a) imperator armatos contioni circumdedit.

the general placed armed men around the meeting. impërator oppidum vallo et fossa circumdedit.

the general surrounded the town with a mound and trench.

(b) Caesăr praedam exercitui donăt.

Caesar presents the booty to the army.

Quintum cŏrōnā dōnastī.

you presented Quintus with a wreath.

(c) mītībūs mūtārē quaerō tristīā.

I seek to change harsh words for mild.

saepē Lūcrētĭlem mūtăt Lÿcaeō Faunŭs.

Faunus often chooses Lucretilis in place of Lycaeus.

Obs. In both constructions of mūtō the ablative is that of price $(\S 377)$; in the former the accusative is the thing given in exchange, in the latter it is the thing taken in exchange.

- § 588. The construction of two impersonal verbs, interest and refert, both meaning it concerns, calls for special attention.
- (a) The person or thing concerned, if represented by an English personal pronoun of the first or second person or reflexive pronoun of the third person, is expressed by the ablative singular feminine of the corresponding possessive adjective (mea, nostra; tua, vestra; sua), and (with interest only) by the genitive of other words.
- (b) The extent to which the person or thing is concerned is expressed by a genitive of value (§ 363) or an accusative neuter singular (§ 341); e.g. parvī, nihīl, quid ?
- (c) That which concerns the person or thing is expressed (with refert only) by a neuter singular pronoun (hoc, id illud), or (with either verb) by an infinitive or a dependent question, or (with interest only) by a final clause introduced by ut or ne.

quid höc tua refert ?

in what respect does this concern you?

tŭā ĕt mĕā magnī intĕrest tē vălērě.

it is of great importance to you and to me that you should be well

quid illius interest ubi sis?

what does it matter to him where you are?

mēā magnī interest tē ŭt videam.

it is of great importance to me to see you.

Obs. The possessive adjectives měā, tūā, etc., agree with rē (abl. sing. of rēs) in rē-fert, the original sense having probably been it bears in the direction of my affairs.

§ 589. Verbs of hoping, promising, and threatening (spērō, prōmittō, pollĭcĕŏr, mĭnŏr) are usually constructed with an accusative and future infinitive (or future participle).

spērāt ādolescens dīū sē victūrum.

a young man hopes to live long.

Caesar pollicitus estesibi eam rem curae futuram.

Caesar promised that the matter should receive his attention (lit, be a care to him).

- Obs. The above rule would be unnecessary were it not for the idiomatic use of the English present infinitive. In Latin the present or perfect infinitive is used only where the sense requires it; e.g. Spērō tǐbǐ mē causam probassě, I hope I have proved my case to you.
- § 590. With an infinitive passive coeptus sum, the passive form of coepi, I began, is used.

contemnî coeptî ĕrant Romanî a fînitimîs populîs.

the Romans had begun to be despised by the neighbouring tribes.

V.—ADVERBS.

§ 591. Noticeable usages of some of the adverbs enumerated in §§ 238—239 are here illustrated.

ceu . . . Anchīsae făcies fūgit ceu fūmus in auras.

the form of Anchises passed away like smoke into the air.

pěrindě...hôc pěrindě atque ego půtaram evenit.

this turned out exactly as I had expected.

sēcius or \nihilō sēcius Caesar ŏpus perficērē constituut.
sētius (§ 252) I none the less Caesar determined to complete
the work.

ultro. . . . quod antea petentibus denegarat, ultro pollicitus est.

> what he had previously refused to their entreaty he promised un as hed.

usque . . . Caesar usque ad castra hostium accessit.

Caesar advanced right up to the enemy's camp.

nē...quidem. nē nunc quidem vīrēs dēsīdērō.

not even now do I feel the want of strength.

The emphatic word is placed between nē and quidem. Except in connection with quidem, nē is constructed with an imperative (§ 473) or subjunctive (§ 564).

nē or nae . . nē ĕgŏ vělim tǐbī placērē. (with pronouns) I should in deed like to please you.

For **ŭtinam**, see § 476; for the adverbs of interrogation, see §§ 450, 452—454, 487—491.

§ 592. Haud, not, is used with adjectives and adverbs, and reverses their meaning. It is rarely found with verbs, except in the phrase haud sciō an (§ 491).

haud ignõtae bellī artēs.

the art of war was by no means unknown (i.e. well known).

haud făcile dixerim cur haec ită sint.

I should find it difficult to say why these things are so.

Obs. Non is the ordinary negative with adjectives, adverbs, and verbs alike.

- § 593. Quam is very commonly used after comparative adjectives and adverbs in the sense of than.
- (a) When two persons or things are compared, the substantives denoting them must, if quam is used, be in the same case.

ŏdĭīs prope māioribus certārunt quam vīrībus. they fought with almost greater hatred than strength.

For the ablative of the standard of comparison, see § 387.

(b) When the subject of comparison is the degree in which two adjectives are respectively applicable to a substantive, magis is used with the former adjective, or both adjectives are comparative. In both constructions the gender, number, and case of the two adjectives are the same.

hörum corpŏră magnă măgis quam firmă sunt. their bodies are large rather than strong.

detātoris triumphus clārior quam grātior fuit. the dictator's triumph was more brilliant than popular.

§ 594. Quam, with or without possum, used with superlative adjectives and adverbs, is represented by the English phrase as . . . as possible.

Caesăr quam maximīs põtest itinēribus in Galliam contendit:

Caesar hastens into Gaul by means of cs long marches as possible.

Caesar quam angustissimē Pompēium continēbat. Caesar was hemming Pompeius in as closely as possible.

§ 595. The adverbs amplius, plus, minus, are used with numerals in the sense of more than, less than.

hostes non ampl¶us octingentos equites habuerunt. the enemy had no more than 800 horsemen.

cěcidērě dů o mīlia haud minus pěditum. there fell not less than 2000 infantry.

NOTE.—The above is the usual construction of these words with numerals, but the ablative is also found with amplius; e.g. Amplius horis sex pugnābātur, The battle went on for more than six hours. Plus may be followed by quam.

§ 596. Propius, nearer; proxime, nearest, may be used (like prope) as prepositions with the accusative.

propius periculum fuerunt qui vicerunt. those who conquered were nearer danger.

VI.—PREPOSITIONS.

- § 597. The following are examples of the more noticeable or idiomatic usages of prepositions. The primary or ordinary meanings are not illustrated here if sufficiently obvious from the list in §§ 255—257.
 - § 598. PREPOSITIONS USED WITH THE ACCUSATIVE ONLY.
- ăd, to . . . praesĭdĭum ăd pontem rĕlictum est.

 a garrison was left at the bridge.

omniă ăd nutum et ăd voluntatem eius facță sunt. everything was done in accordance with hix will and pleasure.

ăd, to . . , vir bonus est, sed nihil ad Persium.

he is a good man, but nothing compared with Persius.

omnēs ăd unum caesī sunt.

they were all slain to a man.

āpūd, with (a rēs āgītūr āpūd praetōrem pŏpūlī Rōmānī ēt āpūd person), at sēvērissīmōs iūdīcēs.

the house of, the case is being heard before a practor of the Roman people and before a very strict jury.

ă p ŭ d Xĕnŏphontem Cÿrŭs haec dīcĭt.

Cyrus speaks thus in Xenophon (i.e. in a book by Xenophon).

ergā, towards ĕödem mŏdō ergā amīcum affectī essĕ dēbēmus quō (a person). ergā nosmět ipsōs.

we might to be disposed to wards a friend exactly us we are towards ourselves.

inter, between, ămīcī colent inter sē āc dīligent.

among. friends will honour and esteem one another.

ŏb, because of exilium mihi ŏb ŏculos versābātur.
exile was ever before my eyes.

pěněs, in the eloquentia eos ornat pěněs quos est.

power of. cloquence graces those in whose possession it is.

pēr, through . pēr tē dĕēs ērē.

I entreat thee by the gods.

Obs. In this usage per is frequently separated from its accusative, as above.

stětissě pěr Trěbonĭum quōmĭnŭs oppĭdō pŏtīrentŭr
vidēbātŏr.

it seemed to have been owing to Trebonius that they did not gain possession of the town.

praetër, hoc nëmini praetër më vidëtur.
beyond. this scems so to no one except me.

secundum, fol- Caesar sex légiones secundum flumen duxit.

lowing on. Caesar led six legions a long by the river.

sécundum naturam vivamus.

let us live in accordance with nature.

săprā, abore. caesă ĕō dĭē săprā miliă vīgintī.

abore 20.000 were slain on that day.

\$ 599. PREPOSITIONS USED WITH THE ABLATIVE ONLY.

ā, ăb, from Galliă attingit ăb Sequănis et Helvetiis flumen or (of the Rhenum.

agent) by. Gaul reaches the river Rhine on the side of the Sequani and Helretii.

sŭmŭs impăratī cum a mīlitibus tum a pecunia.
we are unprepared both in respect of troops
and in respect of money.

commūně est quod nihilo magis ab adversariis quam a nobis facit.

that is neutral which sides no more with our opponents than with us.

cum, with . . vērītās cum hōc făcīt.

truth is on his side.

dē, down from templum sõlidō dē marmŏrě pōnam.

I will build a temple of solid murble.

surgunt dē noctě lătrōnēs.

robbers rise by night.

concessum ăb nōbilitātě dē consülě plêbēiō.

a concession was made ly the nobles with

regard to a plebeian consul.

ē, ex, out of

. Boii ex itinērē nostros aggressi sunt.

the Boii attacked our men while on the march.

nihil est tam misērābilē quam ex bēātō misēr.

nothing is so pitiable as a man who is wretched

after being happy.

ĕrāt ē rēgiōnē oppidī collis.

there was a hill opposite the town.

hōc ē rēpublicā feci.

I did this in the interest of the state.

prae, in front prae cētěris Cătō în sĕnectūtě flōruĭt.

of.

beyond all others Cato was at his prime in old age.

něc lŏquī prae maerōrě pŏtŭĭt (with negatives only).

nor could he speak for grief.

pro, veyere, in- consilium pro tempore et pro re cape.

stead of. take counsel in accordance with the eccasion
and the circumstances.

proelium atrocius quam pro numero pugnantium fŭĭt.

the battle was more deadly than would be expected for the number of combatants,

§ 600. PREPOSITIONS USED WITH THE ACCUSATIVE OR ABLATIVE. ĭn (with acc.), rārō ĭn ĕquum ascendō.

into. I seldom mount a horse.

exercitus in dies senescebat.

the army was wasting away from day to day.

Cicero quattuor orationes in Catilinam habuit. Cicero made four speeches against Catilina.

ĭn (with abl.), imperator ĭn equo sedebaí. in.

the general was on horseback.

Caesar respondit se quod in Nerviis fecisset factūrum.

Caesar answered that he would do what he had done in the case of the Nervii.

sub(with acc.), sub montem succedunt milites.

up to. the troops march up to the foot of the mountain.

Pompēius sub noctem nāvēs solvīt.

Pompeius weighed anchor at (i.e. just after) nightfall.

sŭb(with abl.), Ariovistŭs sŭb montĕ consēdĭt.

below, under. Ariovistus took up a position at the foot of the mountain.

> adhūc sŭb iūdĭcĕ līs est. the case is still before the court.

VII.—CONJUNCTIONS.

Co-ordinating Conjunctions (§ 261).

§ 601. Of the conjunctions meaning and the most usual is et, which is used to connect words, clauses, and sentences; -que usually connects words, and is often used in the case of two objects commonly associated, e.g. senātus populusque Romanus, the senate and people of Rome.

Atque or ac properly means and indeed, and especially, though often used by way of variety for et. (Atque is used before a vowel or a consonant, ac before consonants only.)

dis immortalibus habenda est gratia, atque ipsi Iovi Statori.

thanks must be rendered to the immortal gods, and especially
to Jupiter the Stayer himself.

intrā moenī atque in sinū urbis sunt hostes.
within the walls, and indeed in the very heart of the city,
there are foes.

§ 602. In lists and enumerations, ĕt (if used at all) is usually inserted before each item after the first, instead of before the last only.

sunt mörösī ět anxĭī ět īrācundī ět diffīcilēs sĕnēs.
old men are peevish, uneasy, wrathful, and hard to please.

Obs. Often, however, the items are enumerated without any conjunction being used; this usage is known as "asyndeton" (§ 611).

§ 603. Two attributes of a substantive must be connected by a conjunction.

mĭhĭ cum Marcō Crassō multae ĕt magnae contentĭōnēs fŭērunt. I have had many great contests with Marcus Crassus.

§ 604. Of the commoner conjunctions usually rendered but, sed limits or corrects a preceding statement, introducing something in contrast to it, whereas autem merely denotes transition to a fresh thought; at is strongly adversative, and often means but, it may be objected.

difficile factu est, sed conabor tamen. it is difficult to do, but I will nevertheless try.

vītă dēsertă ăb ămīcīs non potest esse iūcundă; sed haec hactenus; constituendī autem sunt quest terminī diligendī. Wife devoid of friends cannot be pleasant; but enough of this (lit, these things so far); now the bounds (so to speak) of affection have to be determined.

mălě iūdicāvit populus; ăt iūdicāvit: non dēbuit; ăt potuit.
"the people decided amiss"; "but it did decide": "it ought not
to have done so". "but it had the power."

§ 605. Of the conjunctions meaning or, aut contrasts things essentially opposed; věl and the enclitic -vě leave the choice open as to some detail.

cĭtă mors věnĭt a u t victōrĭă laetă.

swift death comes or else joyful victory.

tantă vîs pröbitātis est ŭt čam věl ĭn čīs quōs numquam vīdimus věl ĭn hostě dīligāmus.

so great is the force of goodness that we esteem it either in those whom we have never seen or in an enemy.

ămīcī rēgīs duo tresvē perdīvitēs sunt.

two or three friends of the king are very rich.

- § 606. A second final clause is, if negative, introduced by neve or neu.
 - Caesăr mīlitēs cŏhortātūs est ūtī sŭae pristīnae virtūtīs mēmōriam rētīnērent neu perturbārentūr anīmō.
 - Caesar encouraged his troops to preserve the remembrance of their former valour and not to be troubled in mind.
- § 607. Alternative conditional clauses are introduced by sīvē... sīvē or seu... seu. These conjunctions are also used when the alternatives are expressed by single words or phrases instead of complete clauses.
 - illō lŏcō lĭbentissīmē sŏlĕō ūtī, sīvĕ quĭd mēcum ipsē cŏgĭtō sīvĕ quĭd scrībō aut lĕgō.
 - I am in the habit of frequenting that spot with great pleasure, either if I am pondering anything in my mind or if I am writing or reading anything.
 - omnēs lībertātē cărent sīvē rēgī sīvē optimātībūs serviunt. all lack liberty if they are slaves either to a king or to an aristocracy.
- Obs. The use of sīvě... sīvě must be clearly distinguished from that of utrum... ăn. The latter introduce the two alternatives of a double question, direct or dependent; e.g. Quid refert utrum regī an optimatibus serviamus? What does it matter whether we are slaves to a king or to an aristocracy?
- § 608. The usages of subordinating conjunctions are given in Chapter XLV. A summary will be found on page 169.

APPENDIX

(A.) GRAMMATICAL TERMS.

- § 609. The terms here explained are applied to certain modes of expression occasionally met with in the classical writers. The names are all of Greek origin, and are best remembered by means of their literal signification, here added in parentheses.
- § 610. Ăpŏsĭŏpēsĭs (a lapse into silence) is the sudden breaking off of a sentence when incomplete.

quōs ĕgŏ—sĕd motos praestăt componere fluctus. whom I—but it is better to calm the troubled waters.

§ 611. Asyndeton (lack of conjunction) is the term applied to the co-ordination of words without the use of conjunctions.

ăbiit excessit evasit erupit.

he went away, he withdrew, he passed out, he burst forth.

• § 612. Brachylogy (brāchylogiā, short expression) is frequent where in English the phrase that of would be used.

multos castră iŭvant, et lituo tubae permixtus sonitus.

camp-life delights many, and the sound of the bugle blended with

(that of) the clarion.

§ 613. Chīasmus (forming the Greek letter X—named "chi"): In this figure one pair of words (A, a) corresponds to another pair (B, b), and the order in the sentence is A, a, b, B.

pēiŭs victīrībūs Sēquānīs quam Aedūīs victīs accīdīt.

worse happened to the conquering Sequani than to the conqueredAedui.

Obs. The following diagram illustrates the name "chiasmus":—
pēiŭs victōrībŭs Sēquănīs

quam Aedvis victis accidit

quam Aedŭīs victīs accīdīt.

§ 614. Hendiadys (one thing through two): this term is applied when two substantives takes the place of a substantive and an attributive adjective.

păteris libamus et auro.

we make drink-offerings from cups and gold.

Obs. Here păteris et auro stands for păteris aureis, golden bowls.

L. G.

§ 615. Hỹpallăgē (exchange): an attributive adjective is occasionally transferred from the substantive to which it is strictly applicable to some other substantive in the sentence.

dőlentem nön purpurārum sīděrě clarior dēlēnit ūsus.

the use of purple garneats more brilliant than a constellation soothes not the sufferer.

Obs. Here clāriŏr goes grammatically with ūsūs, but in sense applies to purpūrārum

§ 616. Lītōtēs (simplicity) is an intentional understatement, often implying modesty on the speaker's part.

běně dicěre haud absurdum est. to use language well is no contemptible thing.

& 617. Meiosis (lessening): another name for litotes.

§ 618. Oxymoron (pointedly foolish): an expression intentionally self-contradictory, and containing an inner meaning.

ünă periūrum făit în părentem splendidē mendax. one was nobly false to her perjured father.

Obs. Cp. in English: "Faith unfaithful kept him falsely true."

§ 619. Prolepsis (anticipation) is the name given to the usage in which an adjective describes the state in which its substantive will be after the action of the verb has taken place.

submersas obruĕ puppēs. swamp the ships till they sink.

Obs. So in English; e.g. "He drained the cup dry."

- § 620. Syncopē (striking together): the meeting of consonants consequent upon the dropping of a vowel in the middle of a word; e.g. vinclum for vinculum, chain.
- § 621. Synecdochē (understanding one thing with another): the use of the name of a part of a thing to signify the whole; e.y. carīnā, keel, or puppīs, poop, for nāvīs, ship.
- § 622. Sỹněsis (sense): this term is applied to constructions in which the concord is governed by the meaning, not the form, of the expression.

pars epulis on erant mensas.

part (i.e. some of them) load the tables with the tanguet.

Rěmô cum frâtrě Quirînus iūră dăbunt.

Quirinus with his brother Remus will ordain laws.

căpită coniurationis virgis caesi.

the heads (i.e. ringleaders) of the conspiracy were beaten with

§ 623. Tmēsis (a cutting): the separation of the parts of a compound word by intervening words,

quō nēs cum quē fērēt fortūnā, ībīmūs. whithersoever fortuna shall bear us, we will go.

Obs. Here quo and cumque would naturally form one word.

§ 624. Zeugriă (a yekinq): in this usaze two subjects or two objects are constructed with a verb, which, strictly speaking, is suitable only to one of them.

të grëgës centum Siculaequë circum mügiunt vaccae. around thee a hundred flocks (bloot) and Sicilian hine are lowing.

Obs. Co. in English: "See Pan with flocks, with fruits Pomona crowned."

(D.) THE BOMAN CALENDAR.

§ 625. In each month there were three days named respectively Kälendae (Kalends), Nonae (Nones), and Idus (Ides).

The Kalends were always on the 1st, the Nones were in most

months on the 5th, and the Ides on the 13th.

But in July, October, March, and May, Nones were the seventh, Ides the fifteenth day.

Obs. The Nones were always (according to the inclusive method of reckoning in use with the Romans) nine days before the Ides (cp. nonus, ninth).

§ 626. The Eoman months were designated by adjectives, sometimes used substantivally in the masculine (the word mensis, month, being understood), but usually in agreement with one of the words Kälendae, Nõnae, Idus. These adjectives are Iānūariūs, Febrūāriūs, Martīūs, Aprīlīs, Māiūs, Iūnīūs, Quintīlīs, Sextīlīs, Septembēr, October, Növembēr, Dēcembēr. Quintīlīs (July) was after the death of Julius Caesar named Iūlīūs in his honour, and Sextīlīs was similarly changed to Augustūs in honour of the Emperor.

Of these adjectives, those ending in -us are declined like bonus (§ 80); those in -is like tristis (§ 86); and those in -or like acer

(\$ 86).

Martiis caelebs quid agis Kalendis? what are you, a backelor, doing on the first of March?

consŭlēs vi, quōs diximus, Īdibus Dēcembrībus magistratum occēpērē.

the consuls that I have mentioned entered upon their office on the 13th of December.

§ 627. Intervening days were reckoned as so many days before the next Kalends, Nones, or Ides, as the case might be, as follows:—

Dec. 30. antě diem tertium Kalendas Ianuarias (a. d. iii. Kal. Ian.).

Dec. 31. prīdīē Kălendās Iānuāriās (prid. Kal. Ian.).

Jan. 1. Kălendae Iānŭārĭae (Kal. Ian.).

Jan. 2. ante diem quartum Nonas Ianuarias (a. d. iv. Non. Ian.).

It is important to observe that the Roman method of reckoning was *inclusive*; *e.g.* Dec. 30 is the third day before Jan. 1, both days being included.

The rule for expressing a Roman date in English is as follows:-

For a day between the Kalends and Nones, add 1 to the date on which the Nones fall, and subtract.

For a day between the Nones and Ides, add 1 to the date on which the Ides fall, and subtract.

For a day between the Ides and Kalends, add 2 to the number of days in the month preceding those Kalends, and subtract.

Take for example ante diem sextum Nonas Martias: the Nones of March were on the 7th; add 1 to 7 and subtract 6; this gives March 2.

Again, antě diem sextum děcimum Kälendās Aprīlēs: March, the month preceding the Kalends of April, has 31 days; add 2 to 31, and subtract 16; this gives March 17.

NOTE 1.—To express the day before the Kalends. Nones, or Ides, the word prīdīē was used instead of the phrase ante diem; e.g. prīdīē Īdūs Sextīlēs, August 12.

- Obs. 1. The phrase antě diem, etc., probably originated thus: the ablative form (denoting time when, § 371) was, e.g., diš tertič antě Kälendäs Iānūāriās; subsequently antě was transferred to the beginning and die was changed to diem, as if it were governed by antě.
- Obs. 2. Prīdĭē, on the day before, is constructed with an accusative which is due to analogy with the construction of antĕ dĭem.
- Obs. 3. The examples given above are in accordance with the reformed Calendar introduced by Gaius Julius Caesar, B.C. 45.
- § 628. The above phrases expressing dates having come to be regarded as substantives, they may be used after prepositions.
 - ex antē diem tertium Nonās Iūniās usquē ad prīdie Kalendās Octobrēs nuntius vēnit nullus.

from June 3 to September 30 no messenger came.

(C.) ROMAN MONEY.

- § 629. The original unit in the Roman mometary system was the as, a copper coin which was gradually debased in value, and in the classical period weighed half an cance. The as was not used as the unit for reckoning sums of money after the end of the second century B.C., the sestertius (see below) taking its place for this purpose.
- In the classical period the silver coin in most common use was the denarius, equivalent to 16 (originally 10) asses. Reckonings were made by the sestertius (= \frac{1}{2} denarius, and originally equivalent to 2\frac{1}{2} asses). The full name of the sestertius (for which the symbol was HS) was sestertius nummus; it was also known simply as nummus. In English it is called sesterce.
- § 620. The bullion value of a dinarius of the classical period is a little over 8d., that of a sesterties about 2d. Hence 1999 sestertie £8 10s. It must be clearly understood that these values are not intended to represent the purchasing power of money at Rome.
- § 631. The unit used in reckoning sums of money was the sestertius.
- In expressing thousands of sestertil (up to one million) the word
 millia was omitted and sestertium, the genitive plural of sestertius,
 was converted into a neuter plural substantive; the number of
 thousands was denoted by a distributive numeral.
 - căpit ille ex suis praediis sex cenă sestertiă, ego centenă ex meis.
 - he receives from his estates 600,000 sesterces, I receive 100,000 from mine.

In expressing hundreds of thousands of sesterti, if amounting to not less than one million, the words centena milia were omitted, and sertertium was declinable as a neuter singular substantive; the number of hundreds of thousands was denoted by an adverbial numeral.

quadringenties sestertium debuisti.
you owed forty million (460 × 100 × 1000) sesterces.

syngrāphā sestertīī centīēs factā. a bond for ten million $(160 \times 100 \times 1000)$ serterces was given.

Obs. The above rules may be tabulated thus:-

Up to 1000 serterces cardinal with sestertii as decem sestertii (10) 2000 to 900,000 " distributive " sestertia " dena sestertia (10,000):

1,000,000 sesterces and upwards }adverbial ,, sestertĭum ,, sestertĭum ,, sestertĭum (1,000,000)

§ 632. The as remained the theoretical unit in reckoning interest, portions of inheritances, etc., after it had dropped out of use as the unit for reckoning sums of money. The following fractions of the as were thus employed:—

uncĭ-ă (-ae) =
$$\frac{1}{12}$$
 | quincun-x (-cĭs) = $\frac{5}{12}$ | c̄ōdran-s (-tĭs) = $\frac{3}{2}$ | sextan-s (-tĭs) = $\frac{3}{2}$ | c̄ōmĭs (sōmissīs) = $\frac{1}{2}$ | dexton-s (-tĭs) = $\frac{3}{2}$ | quadran-a (-tĭs) = $\frac{1}{4}$ | septun-x (-cĭs) = $\frac{1}{12}$ | dĕun-x (-cĭs) = $\frac{1}{12}$ | trien-s (-tĭs) = $\frac{3}{2}$ | bēs (becsīs) = $\frac{3}{2}$

Caesar, öpīnēr, ex uncīā; sēd Leptē ex trīentē.
Caesar. I thinh, (is heir) to one-twelfth, but Lepta to one-third of
the property.

§ 633. Interest (ūsūrae or fēnus) was reckoned by the month at so many hundrecth parts (centērimae, i.e. centērimae partes) of the capital (sors).

Accordingly üsürae centésimae = 1 per cent. per mensen = 12 per cent. per annum.

usurae binae centesimae = 2 per cent. per mensem = 24 per cent. per annum.

§ 654. Lower rates were expressed by fractions of the ās in apposition to ūsūrae or fēnūs, the rate of 1 per cent. per mensem being taken as the standard; e.g.,

fenus triens $= \frac{1}{3}$ per cent. per mensem = 4 per cent. per annum; usurae bessés $= \frac{2}{3}$ per cent. per mensem = 8 per cent. per annum,

fēnus ex trīentē factum ērāt bessībus. interest had advanced from 4 to 8 per cent.

Obs. In the above example, bessibus is ablative of price (§ 377).

(D.) PRAENOMINA.

§ 635. A free-born Roman had three names: praenomen, nomen, and cognomen. The praenomen was the personal name the nomen that of the gens (clan), the cognomen that of the familia (family); e.g. Publius Cornelius Scipio is the individual Fublius belonging to the gens Cornelia and the familia Scipionum.

The following is a list of Roman prachomina with the abbreviations commonly used:—

A.	Aulus	N.	Numerius
App.	Appius	P.	P ublĭŭs
C.	Gaius	Q.	Quintus
Cn.	Gnaeŭs	Ser.	Servĭŭs
D.	Děcímůs	Sex. or S.	Sextŭs
K.	Kaesō	Sp.	Spurius
L.	Lūcĭŭs	Sp.	Titus
\mathbf{M} .	Marcus	Ti.	Tībērīŭs
M'.	Mānĭŭs		

(E.) PROSODY AND METRE.

§ 636. QUANTITY.—The metres used by the classical Latin poets are all of Greek origin and depend entirely on quantity, i.e. on the length of syllables. A syllable contains either one vowel or a diphthong; any syllable containing a diphthong or long vowel is a long syllable, and a syllable containing a short vowel is a short syllable unless two consonants (see Rule 3, below) follow the vowel. Thus. os, bone, has genitive essis, in which the first syllable is long on account of the position of o before ss, although the o is naturally short, as is seen by the nominative.

The following rules are sufficient for the learner's guidance in reading verse, but are nearly all subject to some few exceptions:

(1) A diphthong or contracted syllable is long; e.g. mensae, nil (= nihil).

(2) The former of two vowels not forming a diphthong is short:

e.q. puer.

(3) A syllable is lorg when its vowel is followed in the same word by two consonants (other than h), by one of the double consonants x, z, or by semi-consonant i (sometimes printed j).

(4) A final syllable ending in a consonant counts as long before a word beginning with semi-consonant i or a consonant (other than h).

- (5) A syllable containing a vowel naturally short is either long or short when the vowel is followed by two different consonants of which the second is lor r; e.g. patris or patris, gen. sing. of pater. (A vowel by nature long remains long; e.g. matris, gen. sing. of mater.)
- (6) Final syllables of words ending in a, i, o, u, as, es, os, and c, are long. Final a, however, in nom., voc., and acc. is short. Final es is short in such nominatives singular as miles, and in the nom, plural of Greek substantives, e.g. lampades; and final as is short in the corresponding Greek acc. plural, lampadas. Final os is short when it represents Greek os.

(7) Final e is short, except in the 1st (Greek) and 5th declensions, in 2nd sing, imper. act. of verbs of the 2nd conjugation, and in adverbs.

(8) Final is is short, except in acc., dat., and abl. plural, and in 2nd sing, pres. ind. act. of verbs of the 4th conjugation.

(9) Final us is short, except in the nom., voc., and acc. plural and gen, sing, of the 4th declension, and in fem. substantives like palus.

(10) Final syllables of words of more than one syllable ending in a single consonant other than c or s are short.

(11) Monosyllables are generally long, except those ending in b, d, t.

§ 637. ELISION.—Before a word beginning with a vowel or h a final vowel or diphthong is elided, as also is a final m together with the vowel preceding it; e.g. in the fourth line quoted in § 641, posse Ītālīā scans as poss' Ītālīā and Teuerorum avertere as Teueror' avertere. This rarely takes place when the two words are not in the same line (\S 641, f).

§ 638. METRE.—The metre most commonly used by the poets of the best period was the dactylic hexameter, or line consisting in theory of six dactyls, of which the last is one syllable short.

Obs. A dactyl is a foot consisting of a long syllable followed by two short ones $(- \smile \smile)$.

§ 639. In practice a spondee is substituted for a dactyl in any of the first four feet and occasionally in the fifth, and the last syllable of the line is "doubtful," i.e. may be long or short. Hence it is customary to say that the hexameter consists of six feet of which the first four are either dactyls or spondees, the fifth a dactyl (very rarely a spondee), and the sixth a spondee or a trochee.

Obs. A spondee is a foot consisting of two long syllables (--), and a trochee of a long syllable followed by a short one (--).

§ 640. The following is a scheme of the hexameter verse:

§ 641. The following are examples of the dactylic hexameter divided into feet, with the quantities of the syllables marked:—

- (a) arma vi- | rumque ca- | no , Tro- | iae qui | primus ab | oris,
- (b) quidve do- | lens re- | gina , de- | um tot | volvere | casus.
- (c) cara de- | um subo- | les , mag- | num Iovis | incre- | mentum.
- (d) nec pos- | se Itali- | a " Teu- | crorum a- | vertere | regem.
- (e) posthabi- | ta colu- | isse u Sa- | mo: hic | illius | arma.
- (f) iacte- | mur doce- | as | ig- | nar' homi- | numque lo- | corumque erra- | mus . . .
- (g) cortici- | busque ca- | vis | viti- | osae- | que ilicis | alveo.

NOTES.—(a) This is a regular line with caesura (cutting) in the usual place, viz. after the first syllable of the third foot. A caesura so placed is called "strong," and indicates a decided pause in the verse.

- (b) Here the caesura is "weak," i.e. it occurs after the second syllable of the third foot, that foot being a dactyl.
- (c) In this line a spondee takes the place of a dactyl in the fifth foot; this is very rarely the case.
 - (d) Here e is elided in the second foot, and um in the fourth.

- (e) In this line there is an example of hiatus (gaping); o is not, as might be expected, clided before hic. Instances of hiatus are rare.
- (f) The final vowel of locorumque is elided before erramus, the first word of the next line; this is an exceptional usage, and is termed synalcepha (melting together) or synaphea (fitting together).
- (q) The word alveo is here seened as a dissyllable, §5 coalescing into one syllable. This combination of vowels is termed synceresis (drawing together) or synizesis (settling together).
- §.842. The hexameter followed by a pentameter (i.e. a line of five feet) forms the elegiac couplet, which is sufficiently common to call for notice here. For other metres the student is referred to editions of the poets who employ them.
- § 643. The pentameter consists of two half-lines, each of which contains two dactyls followed by a long syllable. In the first half, a spondee may be substituted for either of the dactyls.
- Obs. The dactylic pentameter is never used except in the elegiac couplet, i.e. each pentameter is preceded by a hexameter.
 - § 644. The following is the scheme of the pentameter:-

Examples of the elegiac couplet:-

Ignibus | Ilia- | cis | ade- | ram, cum | lapsa ca- | pillis

Decidit | ante sa- | cros | lanea | vitta fo- | cos.

Dum sedet, | umbro- | sae | sali- | ces volu- | cresque ca- | norae

Fece- | runt som- | nos, | et leve | murmur a- | quae.

NOTE.—The first half of a pentameter always ends with the end of a word. Elision is allowed in the first two feet only.

(F.) ORDER OF WORDS.

- 645. Owing to the use of inflections in Latin the order of the words n a sentence admits of considerable variations being made without any radical change in the meaning. Thus, instead of Rômūlūs Rěmum occīdīt (Romulus slew Remus), we may write Rēmum occīdīt Rômūlūs; whereas in English by changing the order of the words to 'Remus slew Romulus" the meaning is inverted.
- § 646. The following are the rules which govern the arrangement of words in a Latin sentence where the order is not affected (as is very commonly the case) by considerations of euphony or emphasis.

§ 647. (a) The subject stands first.

NOTE 1.—This does not apply to the infinitive used as subject (§ 409, a).

- NOTE 2.—Interrogative and relative words, conjunctions and other words of connection or transition, are placed at the beginning of the sentence or clause which they introduce, except enclitics (-nĕ, -quĕ, -vĕ), reatem, ĕnim, quidem, quĕquĕ, and (usually) īgitūr, tāmĕn, Cp. § 261.
- (b) A finite verb (i.e. the primary predicate) stands at the end of its sentence or clause, the secondary predicate (if there is one) preceding the primary.
- (c) The object is placed between the subject and the predicate, an indirect object usually preceding a direct object.

Caesar lis auxilium suum pollicitus est. Caesar promised them his help.

- \S 648. (d) An attribute, whether consisting of an ordinary adjective, an attributive genitive, a substantive in apposition, or a phrase, usually follows the substantive to which it refers, but a demonstrative of an adjective of quantity or number precedes its substantive.
- (e) An adverb or adverbial phrase immediately precedes the word it qualifies.
- (f) A preposition precedes its case, except tenus and enclitic cum (§§ 258, 259). An attribute may intervene.

Sěnātus duumvirēs ad čam sedem pro amplitudině populi Romani faciendam crčasi iussit.

the Senate ordered a commission of two to be appointed for building that temple in accordance with the dignity of the Roman people.

- Obs. In the above example ad... faciendam is an attributive phrase qualifying dumviros; eam (a demonstrative) is attribute to aedem; Rimānī is the attribute of popull; popull Romēnī is attribute genitive qualifying amplitūdīnē; pro... Romānī together forms an adverbial phrase qualifying the verbal notion in faciendam.
- § 649. Clauses other than consecutive are frequently, but by no means always, inserted in the principal sentence. See examples in §§ 492, 501, 521, 532, 541, 544.
- § 650. A word is frequently, for the sake of emphasis, put in some prominent position—i.e. either first or last in the sentence. The subject is, if emphatic, placed at the end; the verb, if emphatic, at the beginning. Either of these positions emphasises any other word.

mětüēbant servī, věrēbantür lībērī.

he was feared by his slaves, reverenced by his children. mēā opērā Tārentum rēcēpistī.

it was through me that you recovered Tarentum.

Obs. Here the normal order would be Tărentum ŏpĕrā mĕā rĕcēpistī (§ 648, e), a possessive adjective usually following its substantive.

INDEX.

The numbers refer to the pages of the book. For Cases, see pp. 214, 215; for the Subjunctive, see pp. 212, 213.

DECEMBER 1907.

The University Tutorial Series.

General Editor: WM. BRIGGS, LL.D., D.C.L., M.A., E.Sc., Principal of University Correspondence College.

The object of the UNIVERSITY TUTORIAL SERIES is to provide candidates for examinations and learners generally with text-books which shall convey in the simplest form sound instruction in accordance with the latest results of scholarship and scientific research. Important points are fully and clearly treated, and care has been taken not to introduce details which are likely to perplex the beginner.

The Publisher will be happy to entertain applications from Teachers for Specimen Copies of any of the books mentioned in this List.

SOME PRESS OPINIONS

- "This series is successful in hitting its mark and supplying much help to students in places where a guiding hand is sorely needed."—Journal of Education.
- "Many editors of more pretentious books might study the methods of the 'University Tutorial Series' with profit,"—Guardian.
- "The 'University Tutorial Series' is favourably known for its practical and workmanlike methods."—Public Schools Year Book.
 - "The series is eminently successful,"-Spectator.
- "The classical texts in this series are edited by men who are thoroughly masters of their craft."—Saturday Review.
- "The competent manner in which the volumes of this series are edited is now well known and generally recognised."—Educational Times.
 - "This useful series of text-books."-Nature.
- "Any books published in this series are admirably adapted for the needs of the large class of students for whom they are intended."—Cambridge Review.
- "Clearness in statement and orderliness in arrangement characterise the publications of the University Tutorial Press,"—Oxford Magazine.
- "All books which issue from the 'University Tutorial Press' are both scholarly and practical."—Westmuster Review.
- "The 'University Tutorial Series' of text-books contains works which are written by eminent scholars and are used in many colleges because of their directness of presentation."—Cyclopaedia of Education.
- "Such text-books are immeasurably superior to the heavy tomes, overburdened which extraneous matter, with which boys of a previous generation were familiar." —School Guardian.
- "The more we see of these excellent manuals the more highly do we think of them. They are edited by those who have passed through the same ordeal, and who should know how to meet the wants of the diligent student."—Schoolmaster.

Mathematics and Mechanics.

- Algebra, The New Matriculation. With a Section on Graphs. By R. Deakin, M.A., late Headmaster of Stourbridge Grammar School. Fourth Edition. 58.6d.
- Algebra. The Tutorial. ADVANCED COURSE. By WM. BRIGGS, LL.D., M.A., B Se., and G. H. BRYAN, S.D., F.R.S. es. od.
- Arithmetic, Clive's New Shilling. Edited by WM. BRIGGS, LL.D., B.Sc., F.R.A.S. 1s. With Answers, 1s. 3d. Answers, 6d.
- Arithmetic, The Junior. Adapted from the Tucered Arithmetic by R. H. Chopp, B.A. (With or without Answers., 2s. Cd. "Excellent."—Educational Times.
- Arithmetic, The Primary. Edited by WM. BRIGGS, LL.D., M.A., B Sc., F.R.A.S. An Introductory Course of Simple and Instructive Arithmetical Exercises. In Three Parts. Parts I. and II., each od.; with Answers, 7d. Part III., 9d.; with Answers, 10d.
 - "Clear and practical,"-Guardian.
 - "Thoroughly suited for use in elementary schools generally."-School Guardian.
- •Arithmetic, The School. By W. P. WORKMAN, M.A., B.Sc. (With or without Answers.) 3s. 6d. Also in Two Parts: each, 2s. "The took is of a very high order of merit."—School World.
- Arithmetic, The Tutorial. By W. P. Workman, M.A., B.Sc., Headmaster of Kingswood School. (With or without Answers.) 4s. 6d. "Destined to supersede all other secondary treatises on the subject."—Westminster Review.
- Astronomy, Elementary Mathematical. By C. W. C. Barlow, M.A. Lond. and Camb., B.Sc. Lond., and G. H. BRYAN, Sc.D., M.A., F.R.S. Second Edition, with Answers. 6s. 6d.
- Book-keeping, Practical Lessons in. Adapted to the requirements of the Society of Arts, London Chamber of Commerce, Oxford and Cambridge Locals, etc. By T. C. Jackson, B.A., LL.B. 3s.6d.
- Book-keeping, Junior. By T. C. JACKSON, B.A., LL.B. 1s. 6d.
- Coordinate Geometry (The Conic). By J. H. GRACE, M.A. Camb., and F. ROSENBERG, M.A., B.Sc. Second Edition. 3s. 6d.
- Dynamics, The Tutorial. By WM. BRIGGS, LL.D., M.A., B.Sc., and G. H. BRYAN, Sc.D., F.R.S. Second Edition. 3s. 6d.

 "In every way most suitable for the use of beginners, the initial difficulties being fully explained and abundantly illustrated."—Journal of Education.
- Euclid. By RUPERT DEAKIN, M.A. Lond. and Oxon. With Problems in Practical Geometry and an Introductory Course of Rrawing and Measurement. Books I., II., 1s. Books I.-IV., 2s. 6d. Books V., VI., XI., 1s. 6d.

Mathematics and Mechanics—continued.

- Geometry, Deductions in. A Collection of Riders and Practical Problems. By T. W. Edmondson, B.A., Ph.D. 2s. fd.
- Geometry, Theoretical and Practical. By W. P. WORKMAN, M.A., B.Sc., and A. G. CRACKNELL, M.A., B.Sc., F.C.P.
- PART I. Contains the matter of Euclid, I., III. (1-34), IV. (1-9). (With or without Answers.) 2s. 6d. PART II. (In the press.) "Shows on every page the skill and care with which the material has been put together."—School World.

"One of the best books on modern lines." — Oxford Magazine.

This work is also published in Sections as follows:

Section I. Introductory Course. 9d.

Section II. Plane Rectilinear Figures. (Euclid, I.) 1s. 6d. Section III. The Circle. (Euclid, III. 1-34, IV. 1-9.) 1s.

Section IV. Rectangle-Theorems and Polygons. (Euclid, II., III., 35-37, and IV. 10-16.) Is.

Section V. Similar Figures. (Euclid, VI.) (In the press.)

- Geometry, Matriculation. (Being Sections I.-IV. of Geometry, Theoretical and Practical, and containing the subject-matter of Euclid, Books I.-IV.) 3s. 6d.
- Graphs: The Graphical Representation of Algebraic Functions. By G. H. French, M.A., and G. Osborn, M.A., Leys School, Cambridge. Second Edition. 1s. 6d.
- Graphs, Matriculation. (Contained in *The New Matriculation Algebra*.)

 By C. H. French, M.A., and G. Osborn, M.A. 1s.

 "A good book with plenty of suitable examples."—School.
- Hydrostatics, Intermediate. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.R.A.S. 3s. 6d.
- Hydrostatics, The Matriculation. (Contained in Intermediate Hydrostatics.) By Dr. WM. BRIGGS and Dr. G. H. BRYAN. 2s. "An excellent text-book."—Journal of Education.
- Mechanics, Junior. By F. Rosenberg, M.A., B.Sc. 2s. 6d.
- Mechanics, The Matriculation. By Dr. WM. BRIGGS and Dr. G. H. BRYAN. Second Edition. 3s. 6d.
 "It is a good book-clear, concise, and accurate."—Journal of Education.
- Mensuration and Spherical Geometry: By Wm. BRIGGS, LL.D., M.A., B.Sc., and T. W. EDMONDSON, B.A., Ph.D. 3s. 6d.
- Navigation, Modern. By WILLIAM HALL, B.A., R.N. 6s. 6d. "A valuable addition to the text-books on navigation."—Maritime Review."
- The Right Line and Circle (Coordinate Geometry). By Dr. BRIGGS and Dr. BRYAN. Third Edition. 3s. 6d.
 "It is thoroughly sound throughout, and indeed deals with some difficult points with a clearness and accuracy that has not, we believe, been surpassed."—Education.

Mathematics and Mechanics—continued.

- Statics, The Tutorial. By Dr. WM. BRIGGS and Dr. G. H. BRYAN. Third Edition, Recised and Enlarged. 3s. 6d.
- Tables, Clive's Mathematical. Edited by A. G. CRACKNELL, M.A., B.Sc. 1s. 6d.
- "A useful little book of mathematical tables sufficiently complete for all practical purposes and well designed to combine speed and accuracy in calculation."-School
- Trigonometry, Junior. By WM. BRIGGS, LL.D., M.A., B.Sc., F.R.A.S., and G. H. BRYAN, Sc.D., M.A., F.R.S. 2s. 6d.
- Trigonometry, The Tutorial. By WM. BRIGGS, LL.D., M.A., B.Se., F.R.A.S., and G. H. BRYAN, Sc.D., M.A., F.R.S. 3s. 6d. "The book is very thorough."-Schoolmaster.

Chemistry.

- Chemical Analysis, Qualitative and Quantitative. BRIGGS, LL.D., M.A., B.Sc., F.C.S., and R. W. STEWART, D.Sc. Fourth Edition, Revised and Enlarged. 3s. 6d.
- "The instructions are clear and concise. The pupil who uses this book ought to obtain an intelligible grasp of the principles of analysis."-Nature.
- Carbon Compounds, An Introduction to. By R. H. ADIE, M.A., B.Sc. 2s. 6d.
- The New Matriculation Chemistry. By G. H. BAILLY, D.Sc., Ph. D. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.C.S. Edition, Rewritten and Enlarged. 5s. 6d.
 - "A trustworthy text-book,"-School World.
- Chemistry, A Safe Course in Experimental. By W. T. BOONE, B.A., B.Sc. 2s.
- A practical course to illustrate the fundamental laws of the subject. " $\mathbf{V}_{\mathbf{p}}$ to the standard of the best of modern elementary books on practical chemistry."—Nature.
- Chemistry, Synopsis of Matriculation. By Dr. WM. BRIGGS, 1s. 6d.
- Chemistry. The Tutorial. By G. H. BAILEY, D.Sc., Ph.D. Edited by WM. BRIGGS, LL.D., M.A., B.Sc., F.C.S.

 - Part I. Non-Metals. 3s. 6d Part II. Metals and Physical Chemistry. 4s. 6d.
- "The descriptions of experiments and diagrams of apparatus are very good, and with their help a beginner ought to be able to do the experimental work quite satisfactorily."—Cambridge Review.
- Organic Chemistry, Systematic Practical. By G. M. NORMAN, B.Sc., A.R.C.Sc., F.C.S. 1s. 6d.
 - "Just such a helpful book as the student will need."—School Guardian.
 "A thorough course in practical organic chemistry."—Literary World.

Physics.

- THE TUTORIAL PHYSICS. By R. WALLACE STEWART, D.Sc. Lond. E. CATCHPOOL, B.Sc. Lond., and C. J. L. WAGSTAFF, M.A. Cantab., etc. In Six Volumes.
- I. Sound, Text-Book of. By E. CATCHPOOL, B.Sc. 4th Edition. 3s.6d. CONTENTS:—Vibratory Motion—Progressive Undulation—Velocity of Sound—Interference—Forced Vibration—Fourier's Theorem—The Ear and Heating—Reflection of Sound—Stationary Undulation—Vibration in Pipes—Transverse Undulation—Acoustic Measurements.
- II. Heat, Higher Text-Book of. By R. W. STEWART, D.Sc. 6s. 6d. CONTENTS:—Thermometry—Expansion—Calorimetry—Change of State—Hygrometry—Conduction, Convection, Radiation—The First Law of Thermo-Dynamics—Graphic Methods.
- III. Light, Text-Book of. By R. W. STEWART, D.Sc. 4s. 6d.

 CONTENTS:—Rectilinear Propagation—Shadows—Photometry—
 Reflexion and Refraction at Plane and Spherical Surfaces—Prisms
 and Lenses—Dispersion—Velocity of Light—Optical Instruments.
- IV. Magnetism and Electricity, Higher Text-Book of. By R. W. STEWART, D.Sc. 6s. 6d.

CONTENTS: — ELECTROSTATICS. — Electrification — Induction — Machines — Potential and Capacity — Condensers — Electrometers — Specific Inductive Capacity — Atmospheric Electricity. MAGNITISM. — Fundamental Phenomena and Theory — Terrestrial Magnetism. CURRENT ELECTRICITY.—Effects of Currents—Ohm's Law—Electromagnetic Induction—Inductance—Alternating Currents—Waves—Units—Thermo-Electricity—Practical Applications—Radius Activity.

V. Properties of Matter. By C. J. L. WAGSTAFF, M.A. 3s. 6d.

CONTENTS:—Units: Dimensions—Lengths and Areas—Matter: Mass—Volumes, Density—Energy—Circular Motion—The Pendulum and Simple Harmonic Motion—Time—Solids—Gravity—Gases—Hydrostatics—Liquids—Friction—Capillarity.

- "A useful text-book for elementary purposes. It includes many important things usually omitted in books of its size."— $Oxford\ Magazine$.
- VI. Practical Physics. By W. R. Bower, A.R.C.S., and J. Satterly, B.Sc. 4s. 6d.

CONTENTS: -- Mechanical Quantities: Heat: Sound: Light; Magnetism and Electricity.

ELECTRICITY, TECHNICAL. By Professor H. T. DAVIDGE, B.Sc., M.L.E.L., and R. W. HUTCHINSON, B.Sc., A.M.I.E.E. 4s. 6d.

"The book has been prepared in accordance with the most modern ideas as regards technical education."—Electrical Engineer,

Physics-continued.

- Magnetism and Electricity, School. By R. H. Fudu, D.S., St. 8d. "A useful text-book, that scena much sounder as regards fundamental conceptions tunn most elementary works on electricity,"—Oxford Magnetics.
- The New Matriculation Heat, Light, and Sound. By R. W. STEWART, D.S., Lond. Three volumes, each 2s. 6d.
- Experimental Science, Junior. By W. M. H6610N, M.A., M.Sc. 2s. 6d.
 - "The emplanations are clear and empise," School Wor 6.

Biology.

- Botany, The New Matriculation. By A. J. Ewang, D.Sc. 3s. 6d. Botany, A Text-Book of. By J. M. Lowson, M.A., B.S., F.L.S. Thank Edition. 6s. 6d.
- "It represents the nearest any reach to the ideal botanical text-book that has yet been produced."—Pronomiceutical Journal.
- Plant Biology: A Course of Elementary Dotany arranged for Modern Methods of Teaching. By Professor F. CAVERS, D.Sc. 3s. 6d.
- Physiology, First Stage Human. By G. N. MEACHEN, M.D., B.S. Lond., L.R.C.P., M R.C.S. 2s.
- Zoology, A Text-Book of. By H. G. Wells, B.Sc., and A. M. Davies, B.Sc. Third Edition, Enlarged. 6s. 6d.
- Science German Course. By C. W. PAGET MOFFART, M.A., M.B., B.C. 3s. 6d.

Modern History.

- Modern History, Matriculation. Being the History of England 1485-1901, with some reference to the Contemporary History of Europe and Golonial Developments. By C. S. FEARENSIDE, M.A. Oxon. 3s. 6d.
- "An excellent manual. The international history, especially in the eighteenth century, where most text-books fail, is very carefully treated."—School World.
- History of England, The Tutorial. (To 1901.) By C. S. Fearen-Side, M.A. Oxon. 4s. 6d.
- "Provides a good working course for schools."-Guardian.
- English History, The Intermediate Text-Book of: a Longer History
 of England. By C. S. Ferrenside, M.A. Oxon., and A.
 Johnson Evans, M.A. Camb., B.A. Lond. With Maps & Plans.
 Vol. II., 1455 to 1633. 4s. 6d. Vol. III., 1603 to 1714. 4s. 6d.
 Vol. IV., 1714 to 1837. 4s. 6d.
- "It is written in a clear and vigorous style. The facts are admirably marshalled."
 Westminster Review.

Modern History—continued.

- ENGLISH HISTORY, GROUNDWORK OF. By M. E. CARTER, 2s. Contains the "salient facts" required at London Matriculation.
- European History, Main Landmarks of. By F. N. DIXON, B.A. 2s. "To tell the story of nineteen hundred years in 140 pages is a task which might tax the ingenuity of the lest. Yet we must confess that Mr. Dixon has here successfully given us an outline of the main events "-School World.
- Citizenship, The Elements of the Duties and Rights of. By W. D. ASTON, B.A., LL.B. Third Edition, 1s. 6d.
- "Might well be introduced as a text-book into the upper classes of secondary schools."-Guardian.
 - "A practical up-to-date work."-Schoolmaster.

English Language and Literature.

- The English Language: Its History and Structure. By W. H. Low, M.A. Lond. With Test QUESTIONS. Sixth Edition, Revised. 3s. 6d. "A clear workmanlike history of the English language done on sound principles." -Saturday Review.
- Matriculation English Course. By W. H. Low, M.A. Lond., and JOHN BRIGGS, M.A. Camb., F.Z S. Second Edition. 3s. 6d.
- CONTENTS: Historical Sketch-Sounds and Symbols-Outlines of Accidence and Syntax-Common Errors-Analysis-Parsing-The Word, the Sentence, the Paragraph—Punctuation—Rules for Composition—Simple Narrative—Compound Narrative—Descriptive Com-position—The Abstract Theme—The Essay—Paraphrasing—Précis-Writing—Letter-Writing and Proof-Reading—Index.
- "The matter is clearly arranged, concisely and intelligently put, and marked by accurate scholarship and common sense."—Guardian.
- Précis-Writing, A Text-Book of. By T. C. Jackson, B.A., LL.B. Lond., and John Briggs, M.A. Camb., F.Z.S. 2s. 6d.
 - "Admirably clear and businesslike."-Guardian.
- "Thoroughly practical, and on right lines educationally."-School World.
- English Literature, The Tutorial History of. By A. J. WYATT. M.A. Lond. and Camb. Second Edition. 2s. 6d.
- "This is undoubtedly the best school history of literature that has yet come under our notice."-Guardian.
- English Literature, The Intermediate Text-Book of. By W. H. Low, M.A. Lond., and A. J. WYATT, M.A. Lond. and Camb. 6s. 6d.
- "The historical part is concise and clear, but the criticism is even more valuable, and a number of illustrative extracts contribute a most useful feature to the volume."-School World.
- An Anthology of English Verse. With Introduction and Glossary. By A. J. WYATT, M.A., and S. E. GOGGIN, B.A. 2s. "An excellent school primer."—Cambridge Review.
- "The collection has been compiled and edited with great judgment and care."-Educational Times.

English Classics.

Bacon's Essays. I.—XX. By A. F. WATT, M.A. Oxon. 1s. 6d.

Burke. ■On the Proposals for Peace with the Regicide Directory of France. Letter I. By F. J. C. HEARNSHAW, M.A. 1s. 6d.

Chaucer. By A. J. WYATT, M.A. Lond. With Glossary. Prologue to the Canterbury Tales. 1s. Knight's Tale, Nun's Priest's Tale, Man of Law's Tale, Squire's Tale. Each with the Prologue, 2s. 6d.

Dryden.-Essay of Dramatic Poesy. By W. H. Low, M.A. 3s. 6d. Dryden .- Defence of the Essay of Dramatic Poesy. By ALLEN MAWER, B.A. Lond. and Camb. 1s. 6d. Fables. By ALLEN MAWER, B.A. 1s. 6d. Preface to the

Johnson. A Journey to the Western Islands of Scotland. By E. J. THOMAS, M.A. St. Andrews, B.A. Lond. 2s. 6d.

Johnson.-Life of Milton. By S. E. Goggin, B.A. 1s. 6d.

Langland .- Piers Plowman. Prologue and Passus I.-VII., Text B. By J. F. Davis, D.Lit., M.A. Lond. 4s. 6d.

Milton.—Areopagitica. 1s. 6d.

Milton.-Early Poems, Comus, Lycidas. By S. E. Goggin, B.A., and A. F. WATT, M.A. 2s. 6d.

Milton.—Paradise Lost, Books I., II. By A. F. WATT, M.A. 1s. 6d. Books IV., V. By S. E. Goggin, B.A. 1s. 6d.

Milton.—Paradise Regained. By A. J. WYATT, M.A. 2s. 6d.

Milton.—Samson Agonistes. By A. J. WYATT, M.A. 2s. 6d.

Milton.—Sonnets. By W. F. MASOM, M.A. Lond. and Camb. 1s. 6d.

Pope.—Rape of the Lock. By A. F. WATT, M.A. 1s. 6d.

Shakespeare. By Prof. W. J. ROLFE, D.Litt. In 40 volumes.

2s. a Volume.

Merry Wives of Windsor
Love's Labour's Lost Two Gentlemen of Verona The Taming of the Shrew All's Well that Ends Well Measure for Measure Henry IV. Part I. Henry IV. Part II.

Henry V. Henry VI. Parts I., II., Coriolanus III. Richard III. Henry VIII. Romeo and Juliet

Macbeth Othello Hamlet Cymbeline ' Winter's Tale King Lear

Julius Caesar Antony and Cleopatra Timon of Athens Troilus and Cressida

Pericles The Two Noble Kinsmen Titus Andronicus Venus and Adonis Sonnets

Shakespeare .- Midsummer Night's Dream. Richard II. Br A. F. WATT, M.A. 2s. each.

Spenser .- Faerie Queene, Book I. By W. H. HILL, M.A. 2s. 6d.

Philosophy and Education.

Ethics, Manual of. By J. S. MACKENZIE, Litt D., M.A., Professor of Logic and Philosophy in the University College of South Wales, formerly Fellow of Trinity College, Cambridge. Fourth Edition. Enlarged. 6s. 6d.

"In writing this book Mr. Mackenzie has produced an earnest and striking contribution to the ethical literature of the time."—Mind.

"Written with lucidity and an obvious mastery of the whole bearing of the subject."

-Standard.

Logic, A Manual of. By J. Welton, M.A. Lond. and Camb. 2 vols. Vol. I., Second Edition, Ss. 6d.; Vol. II., 6s. 6d.

Vol. I. contains the whole of Deductive Logic, except Fallacies, which are treated, with Inductive Fallacies, in Vol. II.

"A clear and compendious summary of the views of various thinkers on important and doubtful points."—Journal of Education.

"The manual may be safely recommended."-Educational Times.

Psychology, The Groundwork of. By G. F. Stout, M.A., LL.D., Fellow of the British Academy, Professor of Logic and Metaphysics in the University of St. Andrews, late Examiner in Mental and Moral Science in the University of London. 4s. 6d.

"All students of philosophy, both beginners and those who would be cribe themselves as 'advanced,' will do well to 'read, mark, learn, and inwardly digest' this book." Orford Magazine.

Psychology, A Manual of. By G. F. Stout, M.A., LL.D. Second Edition, Revised and Enlarged. 8s. 6d.

"There is a refreshing absence of sketchiness about the book, and a clear desire manifested to help the student in the subject."—Saturday Region.

"The student's task will be much lightened by the lucidity of the style and the

"The student's task will be much lightened by the lucidity of the style and the numerous illustrative facts, which together make the book highly interesting."—
Literary World.

Teaching, Principles and Methods of. By J. Welton, M.A. Lond. and Camb., Professor of Education in the University of Leeds. Present price, 4s. 6d.

CONTENTS.—General Function of Teaching—Material of Instruction—Form of Instruction—The Teaching of English: Preparatory—The Teaching of English: Reading—The Teaching of English: Literature—The Teaching of English: Composition and Grammar—The Teaching of English: Summary—The Teaching of Music—The Teaching of History—The Teaching of Geography—The Teaching of Natural History—The Teaching of Mathematics—The Teaching of Form—The Teaching of Needlework.

"A valuable and thoughtful book,"-The Sneaker.

"We have no hesitation in placing Professor Welton's book amongst the best."
-Education.

Voice Training in Speech and Song. By H. H. HULBERT, M.A., M.R.C.S., L.R.C.P., Lecturer in Voice Production and in Physical Education to the London County Council. 1s. 6d.

french.

- Junior French Course. By E. Weekley, M.A. Lond. and Camb., Professor of French at University College, Nottingham. Second Edition. 2s. 6d.
 - "Distinctly an advance on similar courses."-Journal of Education.
- The Matriculation French Course. By E. Weekley, M.A. Third Edition, Enlarged. 3s. 6d.
- "The rules are well expressed, the exercises appropriate, and the matter accurate and well arranged."—Gian dian.
- French Accidence, The Tutorial. By ERNEST WEEKLEY, M.A.
 With Exercises, Passages for Translation into French, and a
 Chapter on Elementary Syntax. Third Edition. 3s. 6d.
 "We can heartly recommend it."—Schoolmaster.
- French Syntax, The Tatorial. By ERNEST WHEKLEY, M.A., and A. J. WYATT, M.A. Lond. and Camb. With Exercises. 3s. 6d.
 "Mr. Weekley has produced a clear, full, and careful Grammar in the Tutorial French Accidence," and the companion volume of 'Syntax,' by himself and Mr. Yyatt, is worthy of it."—Saturday Review.
- French Grammar, The Tutorial. Containing the Accidence and the Syntax in One Volume. Second Edition. 4s. 6d. Also the Exercises on the Accidence, 1s. 6d.; on the Syntax, 1s.
- French Prose Composition. By E. WEEKLEY, M.A. With Notes and Vocabulary. Third Edition, Enlarged. 3s. 6d.
 "The arrangement is lucid, the rules clearly expressed, the suggestions really helpful, and the examples carefully chosen."—Educational Times.
- Class-Work in French Composition. By E. WEEKLEY, M.A. 2s. "The extracts are well chosen."—Teacher.
- Junior French Reader. By E. WEEKLEY, M.A. Lond. and Camb. With Notes and Vocabulary. Second Edition. 1s. 6d. "A very useful first reader with good vocabulary and sensible notes."—School-
- French Prose Reader. By S. Barlet, B. ès Sc., and W. F. Masom, M.A. With Notes and Vocabulary. Third Edition. 2s. 6d. "Admirably chosen extracts."—School Government Chronicle.
- The Matriculation French Reader. Containing Prose, Verse, Notes, and Vocabulary. By J. A. Perrer, Examiner in French at the University of London. 2s. 6d. "We can recommend this book without reserve."—School World.
- Advanced French Reader. Edited by S. BARLET, B. ès Sc., and W. F. Masom, M.A. Lond. and Camb. Second Edition. 2s. 6d. "Chosen from a large range of good modern authors."—Schoolmaster.
- Higher French Reader. Edited by ERNEST WEEKLEY, M.A. -3s. 6d. "The passages are well chosen, interesting in themselves, and representative of the best contemporary stylists."—Journal of Education.

Latin and Greek Classics.

The editions of LATIN and GREEK CLASSICS contained in the UNI-VERSITY TUTORIAL SERIES are on the following plan:-

A short Introduction gives an account of the Author and his chief works, the circumstances under which he wrote, and his style. dialect, and metre, where these call for notice.

The TEXT is based on the latest and best editions, and is clearly printed in large type.

The distinctive feature of the Notes is the omission of parallel passages and controversial discussions of difficulties, and stress is laid on all the important points of grammar and subject-matter. Information as to persons and places mentioned is grouped together in a HISTORICAL AND GEOGRAPHICAL INDEX; by this means the expense of procuring a Classical Dictionary is rendered unnecessary.

The standard of proficiency which the learner is assumed to possess varies in this series according as the classic dealt with is usually read by beginners or by those who have already made considerable progress. A complete list is given overleaf.

VOCABULARIES, arranged in order of the text and interleaved with writing paper, are issued, together with Test Papers, in the case of the classics more commonly read by beginners; the price is 1s. or (in some instances) 1s. 6d. A detailed list can be had on application.

- Caesar.—Gallic War, Books I.—VII. By A. H. ALLCROFT, M.A. Oxon., and others. 1s. 6d. each.
- "A clearly printed text, a good introduction, an excellent set of notes, and a historical and geographical index make up a very good edition at a very small price."-Schoolmaster.
- Cicero.—De Amicitia and De Senectute. By A. H. Allcroft, M.A. Oxon., and W. F. MASOM, M.A. Lond. and Camb. 1s. 6d. each. "The notes, although full, are simple."-Educational Times.
- Horace.—Odes, Books I.—III. By A. H. Allcroft, M.A. Oxon., and B. J. HAYES, M.A. Lond. and Camb. 1s. 6d. each.
- "Notes which leave no difficulty unexplained."—Schoolmaster.
 "The Notes (on Book III.) are full and good, and nothing more can well be demanded of them."—Journal of Education.
- Livy .-- Book I. By A. H. Allcroft, M.A. Oxon., and W. F. Mason, M.A. Lond. and Camb. Third Edition. 2s. 6d.
- "The notes are concise, dwelling much on grammatical points and dealing with questions of history and archæology in a simple but interesting fashion."—Education.
- Vergil.—Aeneid, Books I.—XII. By A. H. ALLCROFT, M.A., assisted by F. G. PLAISTOWE, M.A., and others. 1s. 6d. each.
- Xenophon.—Anabasis, Book I. By A. H. Alleroff, M.A. Oxon., and F. L. D. RICHARDSON, B.A. Lond. 1s. 6d. "The notes are all that could be desired."-Schoolmaster.

Editions of Latin and Greek Classics.
